That's absurd. At most and depending on the distribution it would perhaps
fsck the system and repair any issues.

Perhaps I should just not argue this point anymore. I didn't mean for this
to get too heated.

As AllanStern stated so eloquently:

> Ah yes, the "good old days." Loring AFB, McCoy AFB,
> where did it all go?
> Thanks loads for the kind comment, Tom.
> Do you get to do any Mil Comms monitoring yourself?
>
> AL

Hey Al,

I spent 2 years at Lackland (it's not just for basic) and 3 years at RAF Upper Heyford (before it closed).
I was in AMMO and had friends in Comm. that let me in Control. It was fun listening to all the traffic. Back then, there was some traffic that shouldn't be monitored. LOL

I have a PRO-95 and listen when I can. I haven't found any military traffic locally so far, mostly commercial a/c. The closest base to me is Grissom ARB and it's too far to get any regular traffic.

Thanks again,

Except that I dare you to find more than one linux user for every 100
windows users who have had a virus or other malware infect their computer.

You should not have to reboot the computer to install software. That is
just silly.

No, TI uses Windows almost exclusively and I merely wanted to try and keep
it simple with respect to MS Office related stuff as well as Exchange use.
I tried Windows and although I was like everyone else, I was unhappy. I
still do all the work I need or want to do on my linux laptop.

>
>> A week later I went back to Linux.

Not at all. Windows runs slower as adware builds up. This is not fiction.
Windows in my experience must be rebooted regularly about every few days.
I routinely go 90-120 days in Linux without rebooting. And then only to
give my machine some off time.

And I said it was my "opinion". I don't have to prove it or verify it. But
if you need proof, just talk to some linux system admins and those in
companies which use Linux.

4. Finding center freq for UHF 225 MHz - 400MHz

Newsgroup: rec.radio.scanner
Date: 2005-01-01 02:06:45 UTC
From: sean <seaningram@tds.net>
Message-ID: <41d603a9$1_1@newspeer2.tds.net>
Source record: 15713

Hello, name here is Sean
Callsign is Kd4adv
QTH is Amelia, Virginia (FM17a)

I am constructing a 1/4-wave vertical groundplane receiving antenna for the UHF 225 - 400 MHz band aka the Military aircraft band.

I found the center frequency for the civilian aviation band between 118.0 and 136.0 is around 127.75 Mhz (AM)

Who can tell me how to find the center frequency for the UHF mil-air band, and/or, any other band?

(I have a guess that it's around 32x.xxx MHz)

Here's a formula that I found in the ARRL Handbook that I can do after finding the center frequency. (ref. 33-26) circa 1994

234 / freq (MHz) is used to find the length in feet.

2808 / freq (MHz) is used to find the length in inches for the vertical element

2950/ freq (MHz) is used to find the length of the radials in inches.

Thank you,
sean

Unless you plan on trnasmitting, don't worry.
I have built GP cut to each end of the mil-air
band and they both worked fine across the band.
Try something like 9.5" with radial about 10".
Construction, esp water proofing is much more
important. Any water that can sneak into the coax
will kill your signal!
I use an ancient Tandy Disckone, the one without
the vertical "stinger", for almost all of my VHF/UHF
reception. I was given a Uniden Marine VHF 2way
and use it as a dedicated WX receiver and with
it connected to the GP antenna that I built for the 70cM
ham band I pick up wx stations in hundred mile radius.

Take car builing it, use good materials, use a good
sealant, I like GE aquarium sealant. And I let it cure for
a week before placing it in service. Antennas that I
have built this way have lasted for over 20 years.
I used to use SO-259 connectors mounted upside down.
But I use hermetic female "N" connectors now. I apply
the silicon to the threads on the male connector, then
tighten it down. The advantage of this style construction
is you can mount it IN a piece of 1/2 EMT conduit with the
conduit junctions. I seal everything up with silicon. The parts
are so inexpensive that I don't plan on repair or salvage.
I do like to spary the vertical element with a silicon
"encapsulating" spray so help the conductor avoid corrosion.
I have even built several of these for cell frequencies before
the ECPA was enacted.
I bend my radials to about 60 degrees and feed the antenna
with the best low loss foam TV coax I can get. Yes it is 75 Ohms,
and the antenna be something close to a 50 ohms, but for
receiving it doesn't mater. By using TV coax I can use "F"
static blocks where it enters the house to stay legal (compliant
with the NEC which our county uses).

Terry

Source record: 15717

Okay, here's what I did for my GPS unit that is 4.5 volts. I went to
the local Wal-Mart and found some $1.00 clearance car charger/adapters
for cell phones. Most of them that I saw showed the voltage and
(milli)Amps. I found one that was the correct voltage and had enough
Amps to cover my device. I cut the ends off and wired it in with my
preferred connectors. Once it worked, I bought another just for
backup.

Good luck.

8. ScanControl Software Version 4.1.0 Now Available

Newsgroup: rec.radio.scanner
Date: 2005-01-01 15:00:33 UTC
From: ScanControl <kend@3dtechnet.com>
Message-ID: <92a788f7d4e5ead45c7ec043c80359a5@localhost.talkaboutelectronicequipment.com>
Source record: 15718

ScanControl - Version 4.1.x Now Available with BCT8 Control / Monitoring

ScanControl has been developed to provide scanning radio memory management, monitoring and control. One program supports the Uniden BCT8, BC245XLT, BC895XLT, BC780XLT, BC250D, BC785D, BC296D and BC796D scanners and the Radio Shack PRO-2052.

Version 4.1.x is now available adding Control & Monitoring for the BCT8 and enhanced CSV Data Import capabilities with data mapping profile storage and retrieval.

See our What's New page for details at
http://www.scannersoft.com/whatsnew.htm

Join the new ScanControl Users Group at
http://groups.yahoo.com/group/scancontrol

Feedback on its features and functionality would be appreciated.

Um, why do you think that is absurd? Maybe it was just that one distro I had, but it happened a couple of times, and in all my years of running windows I have never seen it be unable to recover from improper shutdown all by itself. Don't get me wrong --- I'm not a ms fan either, it's just an observation of soething that happened.

I love my 246!!! If there is anything better and hand held for the same
price, I'd like to know. The memory allocation kicks major butt and when
around town or on trips, the local xmit pickup feature helps with finding
cool new freqs

15. Re: radio and antenna questions for 108 to 136 MHZ

Newsgroup: rec.radio.scanner
Date: 2005-01-01 17:10:49 UTC
From: Insert66 <Insert@ers.com>
Message-ID: <34kdt0pjvmhj222inal39g7po3gtco0u77@4ax.com>
Source record: 15725

thanks for the suggestions

I wound up with a BC92XLT
and made a dipole with major improvement

I have a few questions for the gurus

when we say 468 \ mhz = feet

and 234 / mhz = feet

dipole length is the total?

the element length is half that?

what equation would i use to find element length for a half wave?

what equation would i use for quarter wave?

would a full wave dipole be better?

what if the entire antenna was twice full wave long?
would i get better reception? or would i get interferance
as the 2 waves would interfere with one another?

i am only interested in receiving, and only intertested
at this point, in 108 to 136 mhz AM. I am surrounded by buildings
and a transmission towers of every type, in every direction

more questions .. heh

the question of matching the antenna for he frequency you are after

and the idea of matching the antenna ohms to the ohms of the wire
used to feed it

so for a dipole, with elements around 23 inches long
is it best to:

use the same material for the elemenst as the wire that
feeds the antenna?

use 75 oh lead to the antenna

use 50 ohm lead to the antenna

use 300 ohm 2 wire for just the antenna and 50ohms for the lead?

what if i make the dipole of 75 ohm lead and 75 ohm intact coaxial?

and finaly

after thinking about the idea that the lower ground
element and the top pointing driven element should be equal in
impedance, and that the lead should be the same, if one made a dipole
out of coaxial, and split the cable 23 inches from the end, and
dangled the mesh down and the center wirte up, the splitting
of the coaxial would change the ohms of the driven element and the
dangling mesh gound element

so

would you run 2 lines as the feed, one with the driven element as
the center wire and the other coax feed's center wire as the antenna's
ground pointing element? and then at the antenna merely point one
coax down and the other up? with all the bubber and sheilding intact?

I ask this because of this idea of having the same ohms for the
antenna and at the cable that feeds it

thought I'd ask

TIA for any replies

Do a search on "big wheel" antenna.
This is good for omidirectional reception with some gain over a dipole
and having a reletively wide bandwidth.

17. BC 142 XL

Newsgroup: rec.radio.scanner

Message-ID: <B8CBd.34309$NC6.32937@newsread1.mlpsca01.us.to.verio.net>
Source record: 15727

Hi,

Happy New Year to all.

Wanted to say thanks to those who attempted to help me with the BC 142 XL. Some information, I had already had. Frank346 sent me a bit of information via a Binaries post. Though I downloaded the appropriate software to open the file, it didn't work for me. A friend of mine however - was able to open said file. Unfortunately, by the time he got to it, I had been able to get the scanner repaired. I found a couple issues needing dealt with. A bad electrolytic among them. Scanner has been playing well since. I had suspected a bad Electrolytic, but it wasn't the one I had originally thought. I hate not having schematics, but sometimes ya got to do what ya got to do. As to the file, my friend is going to print it out for me for future reference, so it won't be a waste of effort.

Thanks again for the help offered.

18. FS: GE Superadio AM/FM DX

Newsgroup: rec.radio.scanner
Date: 2005-01-01 18:42:15 UTC
From: Bill Crocker <wcrocker007@comcast.net>
Message-ID: <wqudnf4omeSbckvcRVn-pw@comcast.com>
Source record: 15728

FOR SALE: Only $30.00, including shipping via US Priority Mail, within the U.S. Absolutely in "like new" condition, radio only, no box.

The original GE Superadio, AM/FM DX receiver.

a.. Output: 700MW RMS
a.. Speakers: 6.5-inch high-sensitivity woofer and 2-inch cone tweeter
a.. Reception: Tuned RF on AM and FM for long-range reception
a.. Tuning: Precision vernier tuning, varactor tuning diodes
a.. FM antenna: 38-inch swivel whip
a.. AM antenna: 7.9-inch ferrite rod
a.. External antenna terminals: AM, FM
a.. Frequency response: 100 Hz to 18 kHz
a.. Total harmonic distortion: Greater than 1 percent
a.. Dimensions: 12.5 by 10.5 by 4.5 inches
a.. Approximate shipping weight: 6.4 pounds
a.. Power: AC house current using built-in line cord or 6 D-cell batteries (not included)
a.. Bass control: Yes
a.. Treble control: Yes

Thanks,
Bill Crocker

> I have a few questions for the gurus
>
> when we say 468 \ mhz = feet
> and 234 / mhz = feet

The 234 / frequency formula gives you the quarter-wave length. A dipole consists of two quarter-wave length elements, one tied to the antenna input and the other to the antenna ground. The total length, therefore, is twice that number (also given by the 468 / frequency formula)

> would a full wave dipole be better?

NO. The half-wave dipole is what should be used for best results. To get better performance, beam antennas are made using a half-wave dipole along with properly placed reflector and director elements giving the antenna directionality and gain.

> what if the entire antenna was twice full wave long?
> would i get better reception?

Not if you're using a dipole configuration. There are other antenna types based on full wave elements that would work better for certain applications...that's a bit of overkill for your application.

> i am only interested in receiving, and only intertested
> at this point, in 108 to 136 mhz AM. I am surrounded by buildings
> and a transmission towers of every type, in every direction

Then altitude is your friend. Another possibility is to use a beam antenna (Yagi, for example) if you're monitoring a particular station for more gain at the cost of directionality. Otherwise, an omnidirectional antenna with no gain placed as high as possible should suffice. Since you're looking at a fairly narrow range of frequencies, it will be easier to optimize (tune) the antenna.

> the question of matching the antenna for he frequency you are after
> and the idea of matching the antenna ohms to the ohms of the wire
> used to feed it

Ideally, your antenna should present a 50-ohm impedance at the receiver antenna input. For receive only, matching is less critical. You can use a 75-ohm impedance about as successfully. If I recall correctly, a dipole has an intrinsic impedance of around 72 ohms at resonance; that is, at the frequency it is cut for. That should be fine for your purposes. If the run to your antenna is long, you should use a quality 50-ohm coax between the

radio and the dipole. For best results, the dipole can be tuned using a balun or a gamma match (among other things...you'll have to Google these things since my theory is a bit weak in that area), but for your application, I would say that matching is not critical as long as the antenna is cut and built properly.

> after thinking about the idea that the lower ground
> element and the top pointing driven element should be equal in
> impedance, and that the lead should be the same, if one made a dipole
> out of coaxial, and split the cable 23 inches from the end, and
> dangled the mesh down and the center wirte up, the splitting
> of the coaxial would change the ohms of the driven element and the
> dangling mesh gound element

Yes. That works, too, and is super easy to make. You can us a single piece of coax, then extend the braid opposite the direction of the center conductor to form a dipole. The impedance is determined by the combination of the driven element and the ground; thinking of them as having separate impedances is not really correct.

I once had a Swan HF rig. I needed a serive manual
and contacted the factoruy. I mentioned to the engineer
I was talking with that I no longer asaw any Swan ham gear,
he told me that getting out of the ham business was the only
thing that saved the company. That by and large hams were
less then skilled, and wanted top drwaer service for rock bottom
prices. I suspect that the Bat Wing(look at the big M on their log)
new that ham radio was way too small a market, requiring too
much support and wiselystayed out.
As for scanners, when you make 90% of the public service
2 way gear, you would not want to risk that lucrative market
by making radios to "eavsdrop" on the PS people. By and
large LEO hate scanners and would like to see scanner vanish.
I base this on conversations with LEO, their bosses and the number
of hassles I have seen hams have in the last 30 years with 2mtr FM
gear.
Terry

Partly depend on what you want to do with it. What frquencies interest you etc. You can buy a brand new Ten Tec R320D for about $320.00 US or a Winradio for thousands depending on options. YOu can also find most of these for sale on EBay if you are patient I have seen Icom PCr-1000's go for <250$US. In fact there is one at $150 or so as I type :)

"A" of course, everything being equal, but there's also effects caused by other buildings nearby or other obstructions.

If you are above the horizontal plane of the surrounding buildings and most of the trees at the 11th floor level, no problemo, even with an ordinary rubber duck. My pro-95 is very sensitive even being on the ground, but use a celluar type mag mount antenna for my BC780XLT.

It's mounted on an old steel license plate on top of the bookcase. Provides pretty good reception.

Look for a Pro-43 or a Pro-60 on the used market,
A Uniden 3000 is another choice for a handheld

For a base scanner I love the Pro-2045, the Pro-2004, 2005 or 2006 are
also good choices.

Just a few to consider

Reality is 99.9% of interested individuals in the subject matter are not nerds and do not have nerd friends who will do projects for them. Most interested individuals will not procure necessary components from different sources, solder chips/wires on perfboard and hope everything works. If the modification works that great then why don't you modify several units and advertise them on Ebay? Your materials cost is $80, so you state. Your time is whatever. There currently is little to no consumer grade competition. Sell it for whatever the traffic will bear. If you were an opportunist and had vision you already would have made the leap of logic and be making modified units and advertising them for sale and improving your quality of life. I'd probably buy one for comparison to the videoscanner.

The fellow who designed the dataslicer interface for digital reception started building them in his garage and now has a thriving mail order business.

Maybe someone reading this post will take advantage of the opportunity that it appears you have missed.

G1MFG created the Videoscanner. It comes ready to go out of the box and doesn't require a nerd friend to make modifications and it works.

The world always is looking for a better mousetrap, not talk about about one.

W4UVV VIRGINIA FREQUENCY DIRECTORY - 2005 EDITION
Now Available on CD ROM

1. The W4UVV Virginia Frequency Directory currently is in its 19th year of publication and covers a frequency range of 25 to 2,600 mhz. The master file (12 megabytes) contains 90,000+ listings of licensees/radio users for the 35 independent cities and 95 counties in Virginia and selected federal/military listings for the borders states of Maryland, North Carolina and the District of Columbia. Master extract files include Aviation, Business, Federal , Marine, Military, Miscellaneous, Press, Public Service, Railroad and Utility services. Record data fields are: Frequency 1, Frequency 2, Service Code, Callsign, User, City, County, Latitude, Longitude, Repeater Operation, Base Operation, PL (CTCSS Tone) and Channel.

2. For Win 95/98, ME, 2000 and XP users all data files are in MS EXCEL format and configured for viewing/printing.

3. Approximately 10,000 frequency listings show assigned and possible use frequencies by service codes. One unique helpful feature of the database, where appropriate, is incorporating the relationship of a user's transmit control location to its remote transmitter site location. Another helpful feature is using the latitude and longitude record information where provided. Using a GPS software mapping program (not included), a user's geographical location can be seen on the map display after the coordinates have been entered. Finally, where known, particularly for business services users, another useful feature is the actual use of the frequency is provided.

4. There is no publication of frequency listing source that provides the depth of detail and scope of user information that is found in the W4UVV Virginia Frequency Directory. If you are someone who is interested in more detail about a given frequency or user, then you need this directory. Included also are a user manual, files installation instructions and a tips and recommendations file. The master file additionally contains some "interesting" frequencies monitored off air and not found in other publications or sources such as internet web sites.

5. The 2005 W4UVV VFD edition on CD ROM is $25 plus $5 USPS packing/shipping. All USPS, bank money orders or Western Union payments shipped the next working day. Allow two weeks for payment by personal or business check. Sorry no Paypal, wire transfer, COD or credit card. For detail ordering information or questions please send an email to: <jwilson9@erols.com>.

40. Re: can't use FRS in the malls. even though they were advertised to

It's called private property. Malls and shopping centers are on private property and can establish whatever rules they wish regarding the use of cellphones, radios, etc. If you don't like it move on. If you want to enter the premises, leave the radios in the car. In addition to concern regarding a radio's use for shoplifting is the concern of comparison shopping. My son had a summer job at a Target Store in the mall and knew of more than one employee who was sent to Walmart to compare prices using an HT. Not a good idea. However, I have been in Circuit City using my HT and talking through our local 444.275 mhz. repeater and had no problems. It just depends on who allows what where.

Mr. Wilson, with all due respect, your reply had absolutely "nothing" to do with the thread. "Read it!". He didn't say he wasn't permitted to talk, he said he was setting off alarms - you know - the "theft deterrent" alarms that go off when you walk out of a store with stolen merchandise. This thread is probably 5 months or more old. I wrote into it many months back with my own reply as to what could be happening - under a different name. As I stated before and as have others, I go into stores/malls all the time with fire radios, ham radios, etc. No alarms and not a word is said. They can NOT assume you to be "stealing". That would be a law suit they wouldn't want to face. You say you walk into a store using your Ham H.T. with no complaints - again, so do many others!!!!! Most store employees wouldn't know the freaking difference between my fire radio, your ham radio or an FRS radio. So, that statement doesn't hold water. This man was only wondering WHY his radio was setting off the Theft Alarm... that is ALL.

I agree. I also have a memory when in the 60s the ARRL pushed incentive licensing. That ARRL/FCC BS cost me some frequency spectrum usage on 80 through 15 meters that I previously had worked hard to obtain by getting my ham license. In my opinion they always have been a bunch of self centered individuals who had an agenda. I have been licensed for 45 years. Fortunately I wised up about the ARRL 44 1/2 years ago.

the vast majority of signals in the 2.4 gig range are digital in
nature ..... the exception being some (short range) nanny cams and
a few analog cordless phones. a radio shack scanner (even with
a down converter) is a poor choice to scan this band with.
(mode and bandwidth issues ...etc.)

some people aren't aware of or may even overlook the inexpensive
array of pcmcia spectrum analyzer cards available for any laptop.

with these cards and a laptop , a person can find and analyze any 2.4
gig signal and most of these cards can accept standard 2.4 gig
high gain wi-fi antennas for receiving ranges of 10 miles or more.

these are usually available on ebay for between $30 to $80
dollars ..... and additional , long range " gain " antennas are
plentiful. a person is WAY more likely to find and understand
2.4 gig signals (not to mention war driving fun) with one of these
setups and actually be MORE likely to use and have fun with the most
common types of 2.4 gig signals. scanners are NOT the best type
of equipment to monitor 2.4 gigs with ..... having both a scanner and
especially a spectrum analyzer (and orinico network pcmcia card)
is a more informed and broader application choice.

type " wardriving " into google or ebay ......

As Never anonymous Bud stated so eloquently:

> I don't remember anything about an explosion, so probably before.
>
> I fired Expert on the M16 twice while there.
>
> I know they expanded the hospital not long after I left.

I believe it was in 1972 or maybe it was building 1972. :)

I got to fire a few different weapons while I was there.

It was a really nice hospital when I was there, comparable to the money making hospitals in civi life.

I have built a mount for my scanners in my car, and I want to attach my Pro-79 via its belt clip holes. The Pro-79 will eventually be replaced by something else, probably either a Pro-26 or a Pro-43.

What I need to know is... Are the belt clip holes in the Pro-79 the same as other handheld scanners (specifically the two mentioned above). IE, if I drill two holes for the Pro-79, will it fit other scanners from RS?

Thanks.

With whom? Most people still have no accurate idea what a Ham is!

In regards to this ancient thread - my cellphone has triggered the alarms at the checkouts more than once. These alarms relied on reradiation of harmonics and perhaps some non-linear device within the phone did just that.

The store did not go into an anti-theft frenzy. The girl looked up from her register, I took my phone off my belt, waved it past the detector, it beeped, I walked through after it, it didn't beep, problem solved. There is no big issue here.

Source record: 15761

So I'm keeping it.

I am getting to know the 246T and I like it. I have a question. I have the Priority feature turned off. Yet when I listen to a channel, there is a quick interruption every two seconds of dead air. Like on my RS scanners when I have the Priority channel selected, where the scanner skips back to another freq for a second. But on the 246T I don't have it set up that was (AFAIK).

Any suggestions?

Thanks

> signals?

Yes, there are several one-size-fits-all answers to this question. None of them really cheap, but a couple are quite resonibly priced when you thin what even a few years ago such capability would have cost. But, like a one-size-fits-all jacket, they do not really fit all that well.

By this I mean all of them are a compromise of some type. All levels of workmanship and design being equal, something that covers DC to light will not work as well as something designed for a narrower specific application. A unit designed specifically for HF SW reception will general outperform the same money spent on a single unit designed to cover HF, VHF-Lo, VHF-Hi, UHF, and SHF.

With these shortcomings in mind there are a few options.

Don't get hung up on USB or USB 2.0 for a communications protical. A simple serial port is plenty fast for the data needed to control a radio. The audio is not transfered through the data stream in most cases. If your PC does not have a serial port (many these days donot) a simple USB to serial adapter can be bought for a very low cost these days, often around $20 USD.

There are several radios with full up front ends capable of being PC controlled, I mean they look like normal radios but can be PC controlled. I will address a couple here that are meant ONLY to be controlled via PC.

The WinRadio WR-1550e. It covers something like 150 kHz to 1500 MHz. All mode. Works very well from about 50 MHz up. Is acceptable for most applications below 50 MHz. Has a fairly fast scan rate.

Icom PCR-1000. It covers something like 100 kHz to 1300 MHz. All mode. Works better than the WR-1550e below 50 MHz. Works slightly less well above 50 MHz (when compared to the WR-1550e). Scan rate with some software is not as fast as the WR-1550e. Better image rejection than the WR-1550e.

In my opinion (some may disagree) the WR-1550e is the better of the two choices for scanner uses. I have 2 WR-1550e's, one WR-1000i, and two PCR-1000's. If I was looking primarily for a SW (HF, 30 MHz and down) radio with the ability to work up above 1 GHz I would opt for the PCR-1000. If I

was looking only for HF (and NOTHING higher than 30 MHz) coverage I would opt for one of the WinRadio G3xx series. But for general type stuff with the ability to do it all I would go for the WR-1550e understanding that it has limitations. Unless you have the funds for the WR-3xxx series. and then I would say one of the internal DSP equiped models would be the ticket.

Cross-posted to: alt.radio.family,rec.radio.scanner,alt.radio.scanner,alt.law-enforcement

Happens all the time. Seen it with phones and radios alike. The door entry card my company uses sets off Walgreen Pharmacy, Burlington Coat Factory, and Macy's almost 100% of the time. Its doesn't happen in other stores. I assume its related to the brand and model of loss prevention systems they use. Most of these systems use a concept called "RF tags", where a small resonant circuit inside the inventory control tag resonates and responds with the "right" code and sets off the alarm. Its powered by induction, or the electromagnetic field generated by the sensors near the door. Sort of an advanced version of moving a coil around a magnet to generate a current.

Door entry cards of this type (not to be confused with ones you have to "swipe" like a credit card) use a technology similar to RF tags, but a bit more complex. It allows the card to be read simply by being near the touch plate. I've concluded that it sets off store systems because the card's circuit is activated by the store's inventory control sensors and the system is too dumb to tell the difference between my card and a inventory tag. To avoid setting these off, I just try and remember to leve my id at home or in the car, or if I forget, I hold it over my head as a I walk in (though I admit that does attract some funny "looks").

The PCR-1000 is a good value for the money.
It can compete with a Sony 2010 on shortwave and works fine on VHF/UHF.

For sure it can not compete with designatet SW-tabletops. My NRD-525
runs circles around my PCR-1000. I have a fairly good handheld scanner
and the PCR-1000 is remarkably better. Also tracking on weather
satellits is fine with the PCR-1000.
There is already some software available, allowing trunk-tracking with
the PCR-1000. Although this is useless in Germany and most -if not all-
of Europe.

> I have a few questions for the gurus
>
> when we say 468 \ mhz = feet
> and 234 / mhz = feet

The 234 / frequency formula gives you the quarter-wave length. A dipole consists of two quarter-wave length elements, one tied to the antenna input and the other to the antenna ground. The total length, therefore, is twice that number (also given by the 468 / frequency formula)

> would a full wave dipole be better?

No, because the feed point impedance would not be a good match.
The half-wave dipole is what should be used for best results. To get better performance, beam antennas are made using a half-wave dipole along with properly placed reflector and director elements giving the antenna directionality and gain.

> what if the entire antenna was twice full wave long?
> would i get better reception?

I'm not sure if you're using a dipole configuration, but there are other antenna types
based on full wave elements that would work better for certain applications...that's a bit of overkill for your application however. On the other hand,
at this wavelength, it's not too hard to experiment...all you need is wire.

> i am only interested in receiving, and only intertested
> at this point, in 108 to 136 mhz AM. I am surrounded by buildings
> and a transmission towers of every type, in every direction

Then altitude is your friend. Another possibility is to use a beam antenna (Yagi, for example) if you're monitoring a particular station for more gain at the cost of directionality. Otherwise, an omnidirectional antenna with no gain placed as high as possible should suffice. Since you're looking at a fairly narrow range of frequencies, it will be easier to optimize (tune) the antenna.

> the question of matching the antenna for he frequency you are after
> and the idea of matching the antenna ohms to the ohms of the wire
> used to feed it

Ideally, your antenna should present a 50-ohm impedance at the receiver antenna input. For receive only, matching is less critical. You can use a

75-ohm impedance about as successfully. If I recall correctly, a dipole has an intrinsic impedance of around 72 ohms at resonance; that is, at the frequency it is cut for. That should be fine for your purposes. If the run to your antenna is long, you should use a quality 50-ohm coax between the radio and the dipole. For best results, the dipole can be tuned using a balun or a gamma match (among other things...you'll have to Google these things since my theory is a bit weak in that area), but for your application, I would say that matching is not critical as long as the antenna is cut and built properly.

> after thinking about the idea that the lower ground
> element and the top pointing driven element should be equal in

> of the coaxial would change the ohms of the driven element and the
> dangling mesh gound element

Yes. That works, too, and is super easy to make. You can us a single piece of coax, then extend the braid opposite the direction of the center conductor to form a dipole. The impedance is determined by the combination of the driven element and the ground; thinking of them as having separate impedances is not really correct.

Radio Shack PRO-96. Using Don Starr's superb Win '96 program you can
unlock the mil air coverage of the scanner.

Spanish for "shark" - spelled "tiburon" (with a little accent mark in there). "El tiburon es muy peligroso!" It is the name of a town over in Marin County in the Bay Area and was (maybe still is) also the name of a Chrysler Corporation small car.

thanks for the advice

I have had the most sucess with the dipole
made of 75 ohm coaxial, and the run made of 75 ohm as well
though the radio specifications seem to suggest 50 ohm
Should i bother trying with 50 ohm, or as you say the dipole
is 75 ohm on its own?

I made the start of a yagi, more like a directional boom
just a reflector and a director, it almost beat my coaxial
dipole, maybe more directors will add signal and reduce hiss?

as i have said im surrounded by buildings, the directional seems
to get the best signal when pointed 90 degrees off the direction
of the signal, I assume the building have soemthing to do with this,
and my head seems to improive the signal?
can anything be learned from that? other than just keep you
head near the antenna and all will be well? heh

its like a Mr Bean episode

Im only into 108 to 136 AM and am not interested in wide band ..yet..
nor can i run a line to the roof, so if there are any interesting
antennas i can experiment wtih, Im all about it also the source of
signal is largely all in the same direction away form me

---

1 the yagi elements are 1/4 wave dipole adding to 1/2 wave in total?

2 with the reflector 10% larger and the director 10% smaller?

3 are there ideal dimensions, and idear number od directors
i should start off with? - is there a formula to use or should i
assume trial and error?

4 and just to confirm is is worth driving this yagi with 50 ohm wire?

5 thin element or thick?

6 is grounding this stuff to a water pipe the way to go?

7 its hard to see from diagrams available, but are the
top and bottom elements of the directors and reflectors
one piece, or are they isolated? are the bottom elements
all connected to one another, or are they isolated,
and the boom itself should be non conducting?

lots of questions

If it's just for carry, you should be able to use a "radio shelf". They do not offer protection, but work great for belt carry. I use one for my scanners at work. They are MUCH more secure than the belt clips. You can get them from Galls. You would want the smaller one.

My old 79 has many buttons that are unreadable any more. I always figured
that was probably more from me using them than anything else.
My 95, which once I figured out how to program, is mostly just left alone,
still looks new on the buttons after more than a year of use. With it in the
radio shelf it could be rubbed against something but it would be hard to do,
you would really have to be leaning on the radio. The belt that holds the
radio is going to make contact with anything you brush against. If you go to
Galls site you should be able to see a picture of one with a radio on it,
you will see what I'm talking about.

Yes, I live near Tiberon (well, ok, between San Jose and San
Francisco), but I can't imagine why cops would be saying "Tiberon"
unless it was say the Tiberon police (i..e "Tiberon, <unit> 10-97".

The person was asking what is tiberon, so I'm guessing he doesn't live
near Tiberon, but is hearing it being said (or something similar)
wherever he lives...

I took a bit different tact, I found some free clone software with an
original load file, so I just regenerated the system. by then i had
completely screwed it up anyway. It started out like it was brand new
when I reloaded it, so i can screw it up again....

Source record: 15785
Cross-posted to: alt.radio.scanner,rec.radio.scanner

I'm selling an almost mint PRO-94A 1000 channel trunking scanner. I don't have the box or paper manual but I do have the manual on CD-ROM. Radio is 99.999% mint cosmetically and 100% electronically.

Sale includes the radio with it's original antenna, manual and Radio Shack "H" power adapter tip. All you need is the standard Radio Shack 9v 300ma wall wart and 4 AA size rechargeable batteries or just a pack of regular alkaline energizers or duracells.

Asking $79.95 with ***free*** USPS Priority mail shipping!

Payment by USPS or Wal Mart money orders only.

Contact me at kg0wx at cox dot net. First come, first serve!

Ken

78. discone or scantenna?

Newsgroup: rec.radio.scanner
Date: 2005-01-04 18:50:17 UTC
From: redrum <ninguna>
Message-ID: <41dad8d7$2_2@nova.entelchile.net>
Source record: 15796

Which is better?

is scantenna really omnidirectional? is it built for a better reception on the most used frequencies or is really multiband?

who sells the better implementation of discone?

my needs on scanning are 25Mhz to 1.3 Ghz.

I own a uniden bc-796d and a bc-246t

Thanks for any help.

Greetings from Chile!

84. Military Acft Comms Log - Tues, 4 Jan 2005

Newsgroup: rec.radio.scanner
Date: 2005-01-05 04:56:51 UTC
From: allanstern@aol.com
Message-ID: <20050104235651.11831.00002568@mb-m16.aol.com>
Source record: 15793

Patrick AFB Area Log - Tuesday 4 Jan 2005

Today I snagged comms from one of the oldest acft types and one of
the newest types; I heard a Grumman G-44 Widgeon from the 1940s era, and I
heard a Citation new Model 68 "Sovereign."

CARBON 21: AT-38C, Moody AFB 479FTG 39FTS Instructor Pilot.
9:30am: Area transition, southbound.
[360.7, 348.7, 353.6]

LIFTER 37: C-17A, Charleston 437AW
10:00am: Pattern work at Patrick.
[133.75, 132.65]

RAZOR 33: E-8C JSTARS, Robins AFB
10:14am: Back-end (mission crew) STARGATE directs LANCER F-15s at Avon Park
Bombing Range; also interdeck comms with simulated acft RAMBO 31, HOSS 23, and
SNAKE 11. Some encrypted comms.
12:56pm: RTB Robins AFB via Orlando-Craig-Alma.
[127.475, 126.35, 119.825, 324.65, 395.15, 388.225]

LANCER 61 & 71: F-15E, Seymour Johnson AFB 4FW 333FS
10:15am: Works targets at Avon Park Bombing Range under ctrl of STARGATE.
Works R-2901A and Placid MOAs. One acft declares IFE and diverts to MacDill.
11:30am: Departs to Tyndall AFB.
[349.0, 292.2, 269.25, 300.525, 300.925, 333.3]

LN 14: P-3C, Jacksonville NAS VP-45 "Pelicans"
10:30am: Area transition.
[273.55, 383.4]

KING 55: HC-130P #64-14855, Patrick AFB AFSOC 920RQW 39RQS
11:10am: Touch-and-goes at Patrick.
9:55pm: Local airwork. Something new: using codewords for passing
information to Ops.
[133.75, 132.65]

JOLLY 11: HH-60G Pave Hawk Helo, Patrick AFB 920RQW 301RQS
11:15am; Local training.
6:30pm: Training
[133.75]

COIL 01: F-15C FL-ANG 125FW 159FS "Jaguars"
11:30am: Area transition, through Whiskey Area 3Xray.
[346.25, 267.5]

UNID: G-44 Grumman Widgeon
11:33am: Area transition. I would have loved to have gotten an eyeball or camera lens on this one. A Grumman G-44 Widgeon is a light transport amphibious flying boat from the 1940s era. It was used for anti-submarine work and sea patrols. There is a diagram depicting it at the following site:
http://www.luftfahrtmuseum.com/htmi/itf/gr44.htm
[132.65]

RAMBO 31: Simulated acft in STARGATE interdeck comms.
11:45am: Comms with STARGATE.
[395.15]
Simulations are extremely realistic; the simulated acft even declare Bingo Fuel and RTBs.

HOSS 23: Simulated acft in STARGATE interdeck comms.
11:55am: Comms with STARGATE; mission description, weapons available, etc.
[395.15]

SNAKE 11: Simulated acft in STARGATE interdeck comms.
12:02pm: Comms with STARGATE; passes coordinates, etc.
[324.65]

AMBUSH 11: F/A-18, Oceana NAS VFC-12 "Fighting Omars"
12:38pm: Area transition.
[353.6]

KONG 42: F-15, Eglin AFB 33FW 58FS "Gorillas"
1:34pm: En route NAS Key West.
[344.6]

ROSS 124: FBI
6:50pm: Area transition.
[132.25]

TANKER 48
6:53pm: Comms with Oakgrove; probable Orlange Bowl CAP acft.
[265.4]

REACH 3031: KC-135R #63-8031, MacDill AFB 6AMW 91ARS
8:45pm: Inbound MacDill. Aft aux interphone inop.
[311.0]

JOLLY 21: HH-60G Pave Hawk Helo, Moody AFB 41RQS
8:45pm: Inbound Patrick.
[133.75]

OMAHA 58: Customs and Border Patrol Acft
8:58pm; Inbound Palm Beach IAP.
[124.6]

STAR 1: BREVARD CNTY SO Helo.
11:20pm: Lands Merritt Island A/p, but announces "Landing MacDill" on Advisory Freq. Maybe an ex-USAF driver turned Deputy Sheriff.
[123.05]

AL STERN Satellite Beach FL (28-11N 80-36W) monitoring
Patrick AFB (KCOF) NASA-KSC Shuttle Landing Fac (KX68)
Avon Park Bombing Range (KAGR) Cape Canaveral AFS (KXMR)

89. New yahoo-group " TRAFFIC-CAMS "

Newsgroup: rec.radio.scanner
Date: 2005-01-05 23:20:07 UTC
From: Bla <bla@geenmail.nl>
Message-ID: <HC_Cd.267451$IN.134483@amsnews05.chello.com>
Source record: 15799
Cross-posted to: alt.radio.scanner,rec.radio.scanner

Hi,

I have just started a new yahoo group called

" TRAFFIC-CAMS "

Currently there are at least 200 official websites with
realtime traffic-cam pictures (worldwide)

These websites are open and accesable to the public
some cities have more then 200 cameras !
some have real-time streaming video others have fast updated
streams of jpg's that change every second. some have just still pix

Some scanner/radio amateurs have now combined the pictures
of these traffic-cams with the sound of the local police
like i did for example on my website:

http://www.tetrascanner.com (in the traffic-cams section)

In the one from The Netherlands you will see 12 screens from traffic-cams in
The Netherlands,i have combined that with the sound of a scanner wich
receives the national highway police.
Normally when you go to the a website of a department of transportation
(DOT)
you get only one and many times not moving picture (still) at the time
i have used some html-code to make it moving (auto refreshing)

In the second one from USA California (Caltrans) you see realtime streaming
video from 6 traffic-cams around Sacramento i have combined that with the
sound
California Highway Patrol. (at the moment they have limited the viewing time
to 2 minutes : (

Anyway like this you get the impression of actually being in the
control-room (Traffic Information Center)

It's interesting and a good addition to your radio/scanner hobby

In this group we have now links to more than 160 different websites
with live traffic pictures from all over the world,nicely sorted by country
or type.

Also we will have other technical information about these systems
and how to implement(embed) them on your own website...
yes it is possible to have a moving picture of your local traffic-cam(s)
on your website...wich is not so difficult to do you only need

some simple javascripts,html,players...etc

You can also ask for help how to do this and i would appriciate
new links to traffic-cams that are not yet on the list

Visit the new group here:

http://groups.yahoo.com/group/traffic-cams/

and apply for a membership !

Greetings

Tetrascanner
(www.tetrascanner.com)

I have three scantennas and they work much much better than any discone
I've yet to own. In the last 5 years I have thrown away 2 discones
(even the Diamond $100+) because they didn't come close to what the
AntennaWarehouse ScanTennas could do.

Most of my listening is 225-400 MHz however have compaired them on many
other freqs as well.

I got my ScanTennas from
http://www.antennawarehouse.com/Scanner/Scantenna.htm
(AntennaWarehouse). Free shipping and speedy delivery.

Interesting, I've never seen one of these antennas until now (followed your
link). It looks to me like an abbreviated Discone? Does someone know
electrically what this device is?

(IMHO)
I've worked there, it sucked monkey balls, min. wage plus spiffs & comm (if
u'r lucky),
no benies (even though they promised them), & as far as your days off go -
Holidays are there best days, if you want to make any money you work them.
You don't make money during the day, so you have to work weekends &
evenings. If your any kind of a salesmen - you will make money, but you
work your ass off for it. Thier website paints a rosie picture, but take it
from someone who's been there, the only thing they care about is your money,
they sell junk, buyer beware. I did have a BLAST working with co-workers
and the public.

> I would think it may not be such a great job for the average salesslob. I
can
> see it being an ok gig if you were a store manager.

There are so many variables out of your control that it wasn't worth it.
The company wants a profit - the public is looking for a deal. Nobody wants
to work & you really have to work hard to make it work.

I got one of those and am not overly impressed with it.
My discone consistantly pulls in stronger signals than the scantenna in
just about every range. The only variables are
1) Discone is about 5 ft higher up
2) Discone uses a better feed belden 9913
3) Discone uses an N connecter vs. BNC for scantenna.

Perhaps those three combined are enough to give the discone an edge in an
of itself, but I doubt much of one. Not much UHF mil around my area
unfortunatly, but I can pull in a wx station at an AFB about 40 miles away
with the discone, and the scantenna doesn't.

Just my observations.

I cannot speak to the relative performance of a discone vs. the Scantenna because I've never used a Scantenna. I can, however, attest to the fact that a quality feedline is *extremely* important at UHF frequencies. Look at a list of specifications for different types of coaxial cable, paying particular attention to the specified signal loss (in decibels) per hundred feet of cable. At HF the loss even in plain old RG-58U is negligible, at UHF, it's astronomical by comparison. RG-8U is better, but still falls on its face at UHF.

The extra five feet of height, well, most people would be surprised how much of a difference just five feet of elevation can make in your reception, especially at higher frequencies.

While I've never used a Scantenna, I used a discone for some time for monitoring UHF milcomms here in the area near Niagara Falls, New York. In addition to a USAFR airlift wing and an ANG air refueling wing based at Niagara Falls, I also sit between a couple of air refueling tracks and am kind of on the flight path followed by aircraft based in the eastern US on CORONET EAST missions. The discone allowed me to log plenty of good catches, outperforming by far one of RadioShack's multi-band ground planes in that respect.

One thing I did notice, though - the RS ground plane flat-out smoked the discone on the 30-50 MHz low VHF band, as demonstrated to me by years of monitoring fire department DX down there.

Hello:

Newbie at this:

a. Are these freq's fm, or... ?

BAPERN 2 N 470.4875
BAPERN 2 W 470.7375

b. The 800 MHz stuff is definitely fm. Correct ?

c. Are there any other freq. ranges that I might be able to pick up,
and
the Modes for them, please, that I should also be asking about ?

Live just outside of Boston.

Thanks,
B.

Oh no! It appears that Allegan County will be switching to the 'new' system starting on Monday. Apparently phased in over a period of days according to our local radio station, WHTC.

Apparently Ottawa County will still keep what they have... for now.

Granted, they are all factors, which is why I listed them, but I doubt if its
enough to make a difference other than in sensitive test equipment.
The coax used on the scantenna is the highest grade RS sells, isonly about a
30 ft run, and has in fact been exposed to the elements a couple years less

than my 9913.
If the scantenna was really the superior signal gatherer, it should more than make up for these variables.
Which isn't to say that the scantenna might not be superior for someone else. Obviously, they get the job done for George, and I'm sure hes a more sophisticated monitor than myself, as you likely are too.

Do you have a vertical element on your discone ?
This tends to improve discone low band reception sometimes dramatically.
I know the RS discone I use didn't come with one, but a little rubber cap on top came off, and lo and behold theres a threaded stud in there, juat waiting for an old CB antenna or some such to be screwed on.
Why this element doesn't come with the package, and why they don't even mention it in the literature I don't know.

You are compairing apples and oranges here. First your 5' higher on
the discone is going to be a little improvement.

But the HUGH HUGH HUGH difference is the coax! 9913 is much better than
the RG6 which comes with the ScanTenna. I don't use the RG6 that comes,

I replace it with either 9913 or LMR-400. But that alone your going to see a major improvement on your ScanTenna in the UHF range.

N .vs. BNC, not much there.....

I dont think he's comparing apples to oranges at all. First off when it
comes to VHF or UHF, 5' more height is nothing. Second of all there is no
HUGE,, HUGE difference in db's of attenuation between RG 6 and 9913.
The "average" db of attenuation for 9913 per 100' from 1mhz to 1ghz is 2.17
db. The "average" atenuation for RG 6 per 100' from 1mhz. to 1ghz is 3.2 db.
The average difference between the 2 is 1.03 db, wouldnt even be noticeable.
And those specs. are for a 100' run. I believe he said his run was more like
30'. I use quad shielded RG 6 all the time and it works great, not to mention
its much easier to work with than the thick, stiff 9913, or LMR 400.

My I am ever so impressed with someone that has nothing intelligent
to say and says it in such a quaint way. No I dont speak horsefeathers and yes
the truth is out there. Try www.radio-ware.com/products/techinfo/coaxloss.htm
and do the math yourself, providing you know how to figure averages. The
difference IS insignificant, for runs under 100',, if you choose to not believe
it, thats your problem.

Never said I used RG6.
RG8x is what I use for the scantenna feed.
I have no problem deferring to your judgement, more or less.
You are obviously more up to date than me on both equipment and methods.
I think its generally accepted that the discone is a great all around
monitoring antenna, but is really a jack of all trades, and master of none.
Ideally, one would want to have a discone, along with one or more other
antennas optimized for specific bands.
Thats what I had in mind with my setup, and so far it hasn't worked out,
but I must admit I haven't put a whole lot of effort into examining this
apparent problem.
I just don't think that discones should be dismissed as pure junk.
Within their limits, I've found them to be fine general all around signal
recievers, which is what their purpose is.

Agreed! You are absolutely right. George has been shilling Scantennas
for Antenna Warehouse for several years now. He belittles whatever else
anyone my recommend and refuses to acknowledge that another product may
suffice for another's purposes. His shamelessly partisan promotion gets
old after awhile.

2nd- 1mhz is millihertz= 0.001 Hz. You likely mean MHz.

A discone is going to exhibit no gain, in fact probably less than unity gain, when compared to an isotropic, but you can essentially call a discone a 0 dB gain antenna across its entire bandwidth of operation. Using an oversimplification, the lower frequency of the discone will be largely determined by cone and disc element lengths (about 0.25 and 0.17 respectively), the upper frequency by the gap between the two. Although a discone will probably only exhibit an ideal response across about a 3 to 1 range (well short of this gap limitation). A dipole will exhibit a slight gain over the same source (isotropic), about 2.7 dB in the real world, across its bandwidth. However, the dipole will be much more narrow banded. The dipole has a single resonant frequency, determined mostly by physical size. It is easy to use transmit bandwidth to define 'peak' operation. Transmit bandwidth is defined as the band between the two frequencies at which the SWR on the feedline has risen to stated values, it being assumed the SWR at the band center has previously been adjusted by some means to be 1:1. However, receive bandwidth can also be defined. Receiving bandwidth is defined as the band between the two frequencies at which receiver input power has fallen to 1/2 the level at the band center. It is described as the 3dB bandwidth. For a Zo-matched receiver, 3dB bandwidth is 2*Fc/Q where Fc is the center frequency and Q is the intrinsic Q of the antenna. Remember this Q and look at where it is in the formula. For receive antenna purposes a lower Q will mean a broader bandwidth.

The Scantenna is a modified multiple dipole antenna, on the quoted website it calls it a '15 element clustered dipole design'. The elements that splay out from the main element are there to broaden the bandwidth. The short elements on the mounting boom are to cover the higher frequencies. Without having tried the antenna myself, but having more than a little bit of professional experience with RF, I can make a pretty good stab at what I would expect the antenna to do in use. The longest length is about 101 inches. This is going to put the lowest usable frequency around 50 MHz.

Guestimating the length of the other elements from this 101 number it looks like they have selected lengths that fall near certain bands, probably the 'major' scanner bands. So that the antenna will probably function quite well in those frequency areas. If you stay in those bands you will probably get better performance with the scantenna than you will with the discone. However, outside those narrow bands the discone will probably perform better.

One thing to note. At the higher frequencies the Scantenna seems to use short boom mounted dipoles. These WILL display a directionality based on the relationship of the received signal directions to the main set of elements. In other words, it will look 'down' the boom better than to the side. At those higher bands the Scantenna will probably display a better performance ONLY when the transmitting station is along this direction. Other than that the discone will probably appear to perform better on average.

So, depending on your primary scan activities, the discone will probably be the less limited choice. But, if the Scantenna fits your specific application it may exhibit a slight performance edge, within its band limitations.

All just a guess on my part, but defendable. For most things I would opt for a well designed and built discone myself.

> Dale W4OP

Hi Dale,, at least its nice to read someones post that makes sense. And
yes I realize that "averages" do not directly apply to rf attenuation per coax.
My point was, no one parks there scanner on .9-1 Ghz. and leaves it there. Most
people usually listen to where 90% of the action is and that is usually between
100-500Mhz. Given worst case scenario at 1Ghz the difference between
9913 and RG 6 is -1.6db/100'. I believe the original poster said his run was
less than 50',, which would put cable loss at around -.8db between the 2.
Given the capture affect of FM transmissions a -.8db isnt going to mean the
difference of hearing or not hearing a signal. And yes I meant Mhz not mhz,
a typo. My whole point was there is "very" little if any noticeable difference
between using RG 6 and 9913 for general scanning purposes, and its a whole
lot easier to work with.

I like tinkering in my garage. I have a plan for a small "ground radial" scanner antenna plan from an old Radio Shack book. I have thought about changin the plan using aluminum elements.

Any thought of if I could make some "pocket money" selling them on ebay or something? I am not looking to get rich just get some pocket money enjoying what I do. We have just had our second child and money is hard to come by!

> to come by!

Sure you can, step one would be to have a small webpage, there are
several like geocities,tripod.com etc which offer free webpage
templates and hosting. There you could put up either the designs or
some photographs of the end-product.You can then research on how to
become an ebay store and then put a few up for grabs.
Even the big antenna makers like antennawarehouse.com work like
this...they do have a direct webpage from where you can buy stuff
directly or you can buy via their store on ebay...

-Nick
P.S.:and if you can take custom orders,that should enhance your sales
too.

Go for it! But rather than try to compete with the big guys, on mass produced, inexpensive antennas, like Radio Shack sells, build a more unique, quality product!

For example, the Grove Scanner Beam, is an excellent design, moderately priced, but not very sturdy, in severe weather extremes.
http://www.grove-ent.com/BEAMII.html

On the other hand, the Create Log Periodic's, are also an excellent design, very study, even in the worst of storms, but way over priced!
http://www.grove-ent.com/ANT16.html
http://www.grove-ent.com/ANT17.html

Build something similar, but in-between the two, quality, and price wise, and you will have yourself a winner! I would also offer the option of stainless steel construction, as well as aluminum, for those who desire it.

As Nick suggested, offer custom designs, especially ones tuned to a specific band, or requirement, such as Military Air, GMRS, MURS, Marine, WiFi,FM Stereo, HD TV, etc.

Use Google, search the web for "antenna design", and you will find a wealth of information, as well as some free software, to help you!

Good luck!

Bill Crocker

If your receiver had a front end with good dynamic range the discone might be ok. Most scanners do not have particularly good dynamic range. The discone will be fairly efficient in the FM broadcast band and also on some TV channels. That may overload the scanner and result in poor performance all around. It depends on how close the broadcast transmitters are to your receiving antenna.

A five foot height difference can be significant if it allows the antenna to clear nearby obstructions.

For most purposes a good grade of RG/6 like Belden 9116 performs well enough that changing to 9113 will not result in a significant improvement. Quad shield RG/6 has the same loss as ordinary RG/6 according to the Belden catalog.

118. R.S. Scantenna or R.S. 20-014

Newsgroup: rec.radio.scanner
Date: 2005-01-08 03:51:12 UTC
From: Rob Mills <robmills@cox.net>
Message-ID: <OMIDd.45931$F25.20926@okepread07>
Source record: 15678

Has anyone had experience with both of these antennas.The 20-014 is the big ground plane that was discontinued 5-6 years ago, it has several verticals (three I think) and I think the radials are 14 or 15 ft wide, looks more like a CB ground plane than a scanner antenna.
I'm trying to decide which one I want to go up with. If memory serves me right MT gave the 20-014 a great write up. Rob Mills

119. Digital scanners

I'm looking to purchase a "digital" scanner (one that can receive and track APCO-25 systems. From my research, it looks like the only handheld scanners which can track all APCO-25 systems (analog, mixed, and full digital 9600 baud) are the Radio Shack PRO-96 and the Uniden BC296D (and the upcoming Uniden BCD396T).

Is all this accurate? None of the other scanner companies (Alinco, Yaesu, etc.) make a digital scanner?

My current scanner is the Alinco DJ-X10T, so I'm looking to move up to something than can track both analog and digital trunked systems. Thanks!

Something to consider. Anyone with basic hand tools can build their own discone that will work just fine - and build it inexpensively, easily, and quickly.

Thanks for you postive words. I am by no means an expert, but have been
studying alot about them.

As far as single band goes, what band do you guys use the most? What
would you like to have, something portable? something with very high
gain? I can build high gain yagi's too but they are only good generally

in one direction unless you have a rotor.

I really appreciate your guy's advice. Several other groups including some of those in the ham group told me it would not work. I started getting interested in all this by wanting to build my own ham antenna.

I would start with a base antenna, for aircraft. 108~138MHz. Most anything available is very expensive, commercial grade, products. They treat the aircraft band like it's a black art, or something...and in fact, it's very simple.

I'd make it out of stainless steel, heavy enough to stand the worst of storms. Start with an omni-directional, because you never know where the airplanes are. Then possibly offer a directional high-gain yagi (beam) design, for those wishing to pull in distant airports. If they're targeting only one specific airport, they wouldn't even need a rotor.

It's unfortunate the amateur radio people are discouraging you. That's what the hobby used to be all about...home brew. Not just antennas, but radios too!

So maybe build a ground plane cut for the center of the aircraft band?
I could build an antenna strong enough to stop a tank if I wanted to.
The problem become weight and shipping the thing.

Do you know of some examples of antennas out there? Would someone want
one tuned to the tower frequency only?

I have been trying to scan for the frequency for a moderately sized local taxi service called North End Taxi in Lynnwood, Washington. This company also has an office in Shoreline, Washington. I thought the easy way would be go to the FCC website and look up all the commercial radio licenses in Washington state. I looked at all the companies that remotely resembled a taxi or car service and came up with nothing in the whole state at this location.
I found Yellow Cab's frequency (461.525) by scanning, but have come up with nothing for North End Taxi.
Has anyone found this frequency?

The only frequencies for North End Taxi that I could find are for
Seatle. These frequencies are:
152.3750 as base and 157.6350 as mobile. Hope this helps.

Common since tells me that's what I should do considering that wind and ice could destroy the 20-014 here in NE Okla. about as fast as I could get it up. The MT review *as I recall* didn't compare the 014 to the scantenna but declared it a clear winner over the discone. Wish I had the room to put both up. RM~

I have a radio shack pro 2026 that I have used for several years. It seems to not be able to pick up frequencies as it did when it was new. Should I erase all programmed frequencies and reprogram or is it just getting old or should I replace it.

141. My Firestik doesn't work

Newsgroup: rec.radio.scanner
Date: 2005-01-09 04:53:31 UTC
From: User <user@host.net>
Message-ID: <crqdcd$o9n$1@reader1.panix.com>
Source record: 15601

I have two antennas on my car. A Firestik 3' (the "scanner" version) on a 5" mag dead center on my roof, and a 14" steel whip about 12" forward of the Firestik. The Firestik has nice thick RG58 and a solid base. The 14" I got on Ebay for $8 shipped and has coax so thin I can wrap it around a pencil (unshielded).

I listen to about 60 stations within a hundred mile radius, depending on local conditions. Of these 60, my 14" bring in most of them clearly enough to hear. My Firestik brings in 9. NINE. And all of those stations are within 7 miles of me.

My Firestik is picking up 15% of the stations my cheap Ebay antenna picks up. Any comments or suggestions? I am about to buy a second cheapie and scrap the Firestik outright.

Thanks.

I agree Jeff,

And the difference between 75 Ohm and 50 Ohm is inconsequential given that
the scanner front end certainly does not look like 50 Ohms all across its
ranges.
There are some very good F-56 connectors out there with integral O rings
guaranteeing a nice watertight seal if also used with coax-seal or the like.

What type of cable is on the Firestick? If it's RG58, then there is way too much signal loss, especially above 50MHz.

It could be that the agencies you listened to moved to 800 MHz or went
digital. This depends on where you live. Just a thought. All the Public
Safety Stuff moved to 800 MHz and the Police went digital several years ago.

I'll offer for trade a Radio Shack Pro-64.
This radio is like new condition.
It will include the serial computer programming cable
and software to upload frequencies into radio
memories. Digital pictures sent upon request.

It depends - a ground plane may work better than a discone for the frequency range for which the ground plane is tuned, however it would probably be hard to notice the difference. A discone will definitely work better than a ground plane for frequency ranges far from the intended range of the ground plane. If you are looking for one antenna to monitor several different bands, a discone is a nice way to go.

If you have one specific frequency, or a narrow frequency band of less than about 10%, then a properly designed and built ground plane antenna will have significantly more gain. It would be easy to get 5 to 8 more dB of signal from the ground plane over the discone. It is possible to get 10 to 12 dB or more from the ground plane (over the discone only, I am not saying 10-12 dB gain over an isotropic), but this starts to narrow up the bandwidth below the above mentioned 10%.

What is 5 to 12 dB more signal? Every 3 dB is double the signal strength. A gain of 12 dB would be a signal about 17 times the signal of the discone.

What does 10% of bandwidth mean? If you design a ground plane for a center frequency of about 150 MHz it will work across about a 10% bandwidth (this is a rule of thumb, but not hard and fast). 10% means the antenna will have a 15 MHz band width of optimum performance. Or about 142 to 157 MHz (rounded off). The antenna will work outside this range, naturally, but the gain will fall off rapidly.

For broad band applications it is very hard to beat the discone antenna. This is why the discone is so popular with the military and countermeasures community. The discone is not best at any one thing, but it takes the place of a multitude of other antennas and does it reasonably well.

Can't help you, but keep in mind, they could be 800 trunked, UHF
trunked, or even licensed to another company, i.e. ABC Two-Way Radio
ship which licenses them or sells them repeater time.

Take a frequency counter and go near their office / dispatch. :)

I found this out during a ARES, RACES meeting, at the Wayne county
emergency management offices. Right after which scads of 800MHz
equipment showed up on the surplus market and the ham swaps.

Digital might not be all that's it's cracked up to be, least not since
sliced bread.

A ground plane has 5 to 8dB more gain than a Discone? Where do these numbers come from? If you look at the gains and plots from any commercial/military Discone you will see it is about on par with a 1/4 wave groundplane across most of the Discone bandwidth. I doni¿½t mean inflated scanner Discone specs, look at commercial companies that reference to isotropic or 1/2 wave dipole for measurements. At the upper end of the Disconeï¿½s range the pattern can get a bit squirrelly, but then a ground plane with only 3 or 4 radials does not put all of itï¿½s energy at the horizon either, the mail lobe is at least several deg higher than the horizon. A ï¿½scannerï¿½ type Discone will perform within 1 or 2dB of a 1/4 wave groundplane on the VHF and UHF bands, which is the lower end of its useable range. What does this really mean? You will probably not notice any difference between a good quality Discone and a ground plane cut to frequency on the VHF or UHF bands. 800 MHz would benefit from a gain type antenna if your in a fringe area.

As a ham operator I can tell you that up to 450 Mhz and under 20 feet of coax you will not notice any big differance in the coax. I have been operating the 144 and 440 Mhz bands for over 25 years and that is all I used tuil I installed a new antenna a while back. Almost all the antennas use the rg-58 mobile. I did switch to the rg-8x and put a piece about a foot long of some rg-174 (the very small stuff) to get out of the trunk to the antenna. That still does not make any noticable differance.

> Mike

Most discones do not exhibit gains as high as a 1/4 wive ground plane across a wide bandwith. They (the discone) may approach these numbers at their best points. However the real issue here is that all ground plane antennas are not 1/4 wave. When I quoted the 5 to 8 dB better gain possible from a ground plane I was talking about ground planes with more gain than a 1/4 wave. A 5/8 wave would have several dB more gain. Compare a 5/8 wave ground plane to the 'average' scanner store discone (and they are in the same price bracket) and it is easy to get around 5 dB. Or, a colinear could get up into some real gain compared to the discone. So, while I agree with you that a well made discone may be fairly close to a 1/4 wave ground plane, it is far easier to make a high gain ground plane than it is to find a well made discone. Most three wire coned scanner discones would be lucky to get close to an isotropic, let alone the almost 3 dB more you would get from a half wave dipole.

The last time I looked at a well made military discone (say an AT-197/GR) the price was several times the price of a killer colinear vertical. Of course, if you can get one surplus it can be cheap, I have three 197's myself.

The contention of my post was that dollar for dollar, if you are interested in one specific frequency or narrow band, you can get more gain with a different antenna rather than the discone. However, a well built discone will generally be my preferred choice for anything like a scanner or multibanded receiver if it is physically possible. A discone on 160 M may be possible, but I can think of a couple other choices I would try first.

the firestik is a helic wound effort.
it should show a short circuit across the connector pins

The frequencies that Biloxi PD and every other agency in Harrison County are located on my page here:

http://www.datasync.com/nexus/hamradio/freqs.htm

HOWEVER, all law enforcement agencies in harrison county are using PROVOICE, which is the digital solution for EDACS, and no scanner made today can receive provoice. So you're not going to hear them until they come out with a provoice capable scanner. Also AMR just went to it 2 weeks ago.

Glad that you found the information usefull. Actually I got the
information out of a directory that I purchased at Radio Shack titled
Beyond Police Call. It is a a directory of what frequencies that are in
use by whom and by city and state. Example: North End Taxi was listed
under Washington State in Seatle, so I just passed the only frequencies
that I was able to find for North End Taxi.

176. Re: discone vs ground plane (long post)

The Dressler VHF/UHF active antennas are far from impressive, especially for the price. I borrowed two of the active VHF/UHF Dresslers from the local rep (forget the model but went to 2GHz and was not the high IP3 version) and tested them on a antenna range against a Radio Shack Discone. The source antenna was a commercial 50MHz to 1GHz log periodic. I donï¿½t have the results handy but above the mid VHF range the Dressler did a little better than the Discone but not by much, the best performance was about 5 or 6dB at 1ghz if I remember correctly, which was my upper test limit at the time. Oddly, the Discone worked about the same on VHF high band and much better in the VHF air band. What was more surprising was the Discone was better from 50MHz to 100MHz than the Dressler even though the Discone was below itï¿½s natural cut off freq of around 100MHz. I thought something was wrong with the Dressler but both units gave the same results and the Dressler gain control was all the way up in both cases. The rep confirmed they were both working properly when returned also. Without opening the Dressler, we could only conclude the ï¿½antennaï¿½ element inside was a poor design and the internal pre-amp can only do so much with what its fed. Much better performance could be had starting with a Discone and feeding it with a Dressler or similar pre-amp, which the local rep uses himself. If you hear of a good report from a Dressler owner, itï¿½s probably because they have to justify the high price they paid for the thing.
The reason I went to all the trouble of setting this test up was to find a replacement for an active antenna I had that died after a lightning strike. It had a very complicated trapped ï¿½fat dipoleï¿½ that presented its internal pre amp with a good match from 50MHz to around 2GHz and outperformed anything I have ever use for monitoring purposes. It performed as good as many of the large high gain commercial antennas I have and also had enough gain to feed several receivers. Never encountered any intermod problems in the RF dense LA CA area either, it was the best of everything. Unfortunately, it was a prototype and I cannot locate the designer who mad a small test production run of these things.

Here's another question. I have not been able to verify that this frequency is specifically for North End Taxi, but it does sound like a taxi service. I can only hear the base station on 152.375 but not the mobiles (on 157.635). I would not expect to hear every mobile, but I would have expected to hear some. Would the mobiles have a radio that would transmit differently from the frequency assigned by the FCC for the mobile units?

Hi Stephan,
The antenna did not have a brand name and I have not seen one advertised anywhere. I cannot locate the designer or the company that manufactured one of his other designs. Very frustrating for me.....I tried replacing the two amplifier chips in the antenna but got lousy performance with lots of overload, I cannot identify the original parts. I now use several military and commercial Discones and large commercial VHF/UHF dipole arrays for monitoring and can't recommend a specific antenna for you without hearing about your needs, freq range, distance to cover, proximity to large transmitters, etc. I am not very informed about other active VHF/UHF antennas except the Dressler but there are several others. If you need to monitor a broad range of frequencies you could start with a Discone tailored for your needed freq range and place a good pre amp right at the antenna to get the best noise figure and make up for cable losses. The Dressler pre amp is supposed to be a very wide band high level unit that should not be as susceptible to overload as other brands I have seen.

The difference is that a 5/8~ has a lower angle than a 1/4~ thus reaching out further. so for example take a doughnut and smash it and you have converted from a 1/4 to a 5/8

Then they replay the camera videos, catch you in the act, call the police
and have you charged for causing public mischief, or banned from their
store.

Hey, don't get me wrong, I'm not advocating doing this at all, in fact I'm thinking about it from the perspective of the store owners, truth be told. What if scurrilous, frivolous lawsuit-sters built a transmitter that set the beeper off and triggered it as one of them walked through? And, just for the sake of argument, say the good guys didn't find out about it(which of course, isn't likely, given that good always triumphs over evil). The honest, hard working retail corporation would argue they had PC to arrest the scurrilous lawsuit-sters, and the (being the rotten scoundrels that they are) would argue that, no, they didn't have PC. Just out of curiosity, and yes, I KNOW, it's way off topic. After this I won't ask any more questions, but what do you guys think the judge would rule on this? would the scoundrels (God forbid) have a slim chance of successfully perpetrating their criminal act?

It's an old trick, I worked at Home Depot as a 2nd job a few years back, had a co-worker stick on on my collar. Everytime I walked through the Sensormatic system, it'd go off, and the people near it at the time would be asked for their receipts.. All the while, they'd let me walk, since everyone knew who I was...(and I was just hittin up the hot dog vendor.)
Not many stores are going to risk stripping you down to find that little tag. If you're with them, not being flakey, and they already realize you dont have any large quantitites or items on you, it's cheaper to let you walk than to prosecute, possibly falsely.

A better question is what would happen if you refused to let the clerk
at the door inspect your bag on the way out even when alarms don't go
off.

Most electronics stores (Best Buy, Circuit City, etc.) where I live
station someone at the exit and ask each person to see their receipt as
they walk out.

What if you refuse?

You haven't stolen anything so there's no legal basis for them to detain
you in any way.

And once you tender payment at the register and the money passes from
your hand to theirs (or your account to theirs), the merchandise is no
longer even their property-- it's yours-- so they have no legal claim to
inspect it.

The most they can do is say that you're not complying with their rules
on their private property so you're trespassing but the remedy for
trespassing is to demand the person leave the premises, which is what
you were doing when the whole thing started in the first place.

That's the point of the check, people have walked out with lawn mowers and television sets. They are bold and deceptive and dishonest. Just because you have a receipt for three items, doesn't mean you couldn't have stolen another two items.

It is a condition of entry and there will be a Notice somewhere stating the fact. If you do not wish to comply, then don't go in. Since you want to kick up a fuss, they can ban you from the store.

I understand all these "what if" scenarios, but WHY would you want to make a complete ass of yourself, make yourself known as a troublemaker, get yourself banned from these stores and besmirch your reputation? Do you have too much money or too much time on your hands?

Really, these "what if" things are quite stupid.

Sure, but they can't detain me at the time and inspect the receipt/bag
if I don't want them to. The most they can do is ask me to leave, which
as I said, is what I was doing in the first place.

How? Not sure how they'd even know who I am. If I don't stop for them to
check my receipt, I'm sure not going to stop for them to take down my
name and information for future banning purposes and there's no law that
says I have to.

> I understand all these "what if" scenarios, but WHY would you want to make a
> complete ass of yourself, make yourself known as a troublemaker, get
> yourself banned from these stores and besmirch your reputation?

Because it's just one more damn line to stand in. Shopping at Best buy
this past Christmas, I stood in line to get to the register for over 30
minutes, then when I finally get there and pay for my stuff, I walk
toward the doors only to find another line 20 people deep waiting to
have their receipt checked. At that point, I'd had enough of it and just
walked around it and out the door.

The clerk guy didn't catch up with me till I was already at my car and
said he had to check my receipt. I said, no he didn't because if I
hadn't paid for what I walked out with, the alarms would have gone off.
Since they didn't, I don't need to be searched. I got in my car and
drove off. I broke no law so there's nothing they could do. [And they
had no clue who I was so it's not like they could "ban" me, either. Of
course, I don't even live in that city so even if they did figure a way
to ban me, so what?]

And how is that going to "besmirch my reputation"? It's not like the
whole world is going to know I decided to rebel against the receipt
search policy and even if they did, how that makes me look bad such that
my reputation is besmirched, I'm not sure.

Somehow I think I could live with the "shame".

206. Number one Scanner on the market?

Besides the lower take-off angle, in theory you would also get some gain over the 1/4-wave groundplane if the 5/8 had a proper ground plane itself--that is assuming it has been properly matched. The 5/8-wave has some intrinsic reactance that needs to be tuned out with a simple network for a proper match to the transceiver. For receive only, I'm not sure how critical the match is.

208. Any good 13cm WideCoverage Receiver?

Newsgroup: rec.radio.scanner
Date: 2005-01-11 02:22:02 UTC
From: Ultra Kiasu <ultrakiasu@hotmail.com>
Message-ID: <1105410122.863281.21050@c13g2000cwb.googlegroups.com>
Source record: 15568
Cross-posted to: alt.radio.scanner.uk, rec.radio.amateur.digital.misc, rec.radio.amateur.homebrew, rec.radio.scanner

I had scoured the net for cheaper 13cm (2.3-2.6 GHz) widecoverage
receiver with fine adjustable stepping LCD controller.

So far, had only found these 2 main suppliers at http://www.13cm.co.uk
and http://www.g1mfg.com which both is UK based.

G1MFG products look good but expensive, while 13cm's were cheap but
crude (required DIY connections).

Is there cheaper alternative, or better, ready-made (minimal
construction required) which LCD controller built-in?

I believe that since the main radio components are supplied by
Taiwanese company, Comtech, there should be more similar products
around the world, or at least, "clones".

Any good recommendation?

Thank you.

Regards,
Kevin

PS: Appreciate if you could email me a copy of your reply.

Suddenly today about 1:14 pm I started getting LB and GPT and rescue
stuff on the harrison freqs. I May have heard AMR too, but since I
only heard it 3 or 4 times, it might have only been gpt rescue

I have no idea whatsoever as to how/why it started working. maybe the
difference between id scan/search?

as a side note, i still havent gotten any mot control channel only
stuff

I'd agree. It's what the Uniden BC245XLT should have been in the first
place.

Bought one and the sensitivity on this is amazing (wish my BC780XLT had this
sensitivity). Sound is clear and crisp, and
I've picked up activity from 30 miles away even having this inside. A bit
bulky (about the size of a handi-talkie), but otherwise
an excellent radio.

Will handle analog trunked systems. A bit getting used to in the
programming.

But well worth the money.

There most definately IS a point to all of this --- one relating to the legal balance between privacy vs protection of property (seriously OT, I know), a very important point to the loss prevention dept and not superfluous or trivial at all.
OK, if the penalty for refusing to permit a search is being banned, every crook in town will show up one after the other and be subjected to banning, whilst making off with a ton of plunder in the process.
Lets leave the question of whether or not there is another method of detecting theft aside (which, duh, of course there is, this is simply a "just for the sake of argument" question), lets just say the only method of detecting theft was the beeper. OK, a guy goes through, beep beep, "No, I didn't take anything, I'm not submitting.", "You are banned.", "Fine, see you later ...", and another couple hundred dollars worth of stuff walks out the door? That doesn't sound right.
My question is: doesn't the fact that the beeper went off give security the right (Probable cause) to make an arrest, in the event that the person refuses to submit to a search?

The question made perfect sense. He asked basically if an antenna for 2 meters (however YOU choose to spell it) which covers 144-148 MHz - would work on 440 MHz. I do believe someone already answered his question with a reliable answer. Just because you choose to spell it a different way does not make it a senseless question. I see many posts from other countries here - people who spell words far differently than us in America. IF not spelled differently, then they join many here IN America with very poor spelling (for whatever reason), but still their questions are read and answered - WITH what they are wanting to know. It is replies like yours that chases people away from asking for good information - wanting to know - when they don't have the answers available otherwise.

Probably not to make an arrest. Of course that does depend on state laws (which vary). In Missouri, to make a "citizen's arrest" you have to reasonable believe the person is committing a theft (crime) and then actually be right that a theft occurred. A police officer merely needs probably cause to believe ANY crime occurred and that the person did it. So to physically stop and detain/arrest someone is risky for merely setting off an alarm absent someone actually seeing them stuff something or walk out without paying. There are far too many false alarms to risk a civil lawsuit anyway.

That doesn't even address when searches are justified (an entirely different animal)...

Later,
Dave

If you're not up to hooking up a LCD controller and a receiver then
your only real option is a videosender receiver.

Hold up in court??? Maybe not! If you can show that there is a high instance of false detections by the type of security system they are using, it can be shown that it is not reliable. Heck, lie detecters are not allowed in criminal court...The FAULTY security systems most retail stores use are, in my opinion, less reliable than a lie detector.

Not arrest so much as detain for further investigation.
You can also be detained for failing to comply with the store policy
requiring receipt checks. You could later be arrested and held by
police for refusing to identify yourself--and yes you will be held until
you can be positively identified either with or without your
cooperation. If you don't have time to stand in line--shop elsewhere or
don't shop at all. I'd rather have a bit of inconvenience than higher
prices due to theft.

Aside from that I once benefited from the item check at a Costco. It
turned out that the clerk hadn't put several items into my cart after
ringing them in. Small items but about 200 bucks worth of stuff none
the less. Had they not checked the receipt, I'd have been out 200
bucks. Next time you rush the lines give thought to that option. It
could save you money.

Isn't that a contradiction? You say for the detention to be justified, ultimately the store security people have to be "right" in detaining you(if stolen merchandise is found then everyone agrees: the detention was justified), but according to my hypothetical situation they ultimately appear to be wrong because when they search, they find no plundered items, the alarm was triggered by a transmitter. Do you really want to assert that this is frivolous? A guy didn't take anything, but was forcibly confined and searched, for what turned out to be no reason. I don't know, but I don't think it should be permitted to force people into back rooms and search them, no matter if they have stolen anything or not, and if some one had that happen to them, don't you think they are deserving of compensation? I do.

Again, for the sake of argument lets say that the authorities never realize the alarm has been deliberately triggered expressly for the purpose of causing security to act in a manner that creates grounds for litigation.

i am curious exactly what you mean by "image".
are there specific freqs or do you have to jump around looking for
loose ends.

}They will still be found just in making their original detainment based on
}their "good faith" judgement.

Maybe, maybe not. A good faith defense in this case depends on the assumption that the equipment used is reliable. Daily or even weekly false alarms do not add to good faith beliefs -- especially enough to detain and search indiscriminately.

My wife had a purse that would set off the alarm at Border's while she walked INTO the store from the parking lot (it was embarrassing as hell). Would that give them the right to "detain and search" her? No. Every court goes on the premise of what is reasonable (and there are arguments here for both sides). You do have to be careful when putting any legal issue into one basket or another as it often depends on the "totality of the circumstances" (and sadly, sometimes the deeper pockets)...

Depending on the state laws, good faith does not even play a part when it comes to citizen's arrests. You have to be correct or risk serious civil penalties. As a cop, I have a whole lot more latitude in being mistaken (at least in this situation)...

Good discussion even though it is probably way off topic... :)

Later,
Dave

No, the store can't legally detain you for anything that isn't a
violation of the law. Store rules don't count.

If the store had a rule that you had to dance a jig before leaving and
you chose not to do it, could they detain you? Nope.

And they can't detain you for not getting your receipt inspected, either.

Im a retired engineerbut I am retired due to strokes.

From what I remember, an artifact of a superhet receiver's oscillator
may fall within the band you're receving, like if it has a 455kh if
frequency, you may have an image of strong stations as if the
oscillator was running on 1365khz (3x455) and many other combinations.
Sometimes you can supress this enough for it not to be noticable.

They make say 25mhz to 1500mhz receivers nowadays and afaik they all
have the "image" / "birdie" problem somewhere on thier dial

Don't quit your day job to open a law practice, sonny. You (and a few others here) think you know what the law is. Think again. If you hadn't persisted in your ramblings on the subject, I'd have simply written you off as a garden variety troll. The fact that you cross posted your incoherent ramblings to so many newsgroups tends to support that conclusion. But now I think that you may be brain damaged - maybe it is the crystal meth. You might want to consider giving that stuff up.

LOL! I already am a lawyer, boyo. I've practiced criminal law for years.

But if you think I'm wrong, then by all means, pony up the legal
citation that says that a store can detain you merely for a violation of
their rules (absent any violation of law).

This ought to be good.

> You (and a few others here) think you know what the law is.

And amazingly enough, I do.

greets all

Just wanted to let everyone [who might read this] know that I am looking to purchase a spectrum analyzer. Make and model is not terribly important. Just looking for something that works reasonably well, has fairly good input sensitivity (measurements made from an antenna are prime objective) and has a top end of at least 1Ghz.

I've looked on ebay. Most of these unit are running at least $1000.00 - $1500.00 or over. If anyone's recently purchased a new 6 or 22Ghz SA, and would like to get rid of that older one that might be sitting in the closet, I'd be interested. Thanks.

Dave

I went back over the posts and I made a mistake about what I thought you said, you didn't say they had to be 'right', that was someone else, sorry. THIS is what you said (in part):

> Are you seriously claiming that you would seek
> compensation for emptying your pockets? That's a shame if you are.

No, that's not what I'm saying at all, what I'm asking is --- does it not appear that there are such grounds? Not for emptying pockets, but for being physicaly abducted, manoeuvered into a back room, and forcibly confined, even though it is "temporary" and you make the valid distinction between arrest and detention but to some extent, it is still the same thing --- no matter what happens in the long run, a person has been physically forced into a room against their will, for what is no reason --- I guess this is the contention point: I say the beep is NOT enough justification for physical detention, other perhaps do.
OK, forget the potential for committing injustices by subterfuge and a transmitter that can trigger beepers, if how I'm reading you is correct, if you were a judge, you would permit the commission of even greater injustices --- that of abduction & forcible confinement, let me explain. Once again, just for the sake of argument, lets I'm a wierdo who gets off on forcing people into back rooms. Where I get my thrill is being larger than other people and seeing their reactions of fear and surprise when i accost them and force them into a room (once again, this is just for the sake of argument). I open a retail biz and rig up a beeper to go off whenever I see an attractive woman walk through the scanner, and lets say for the purpose of this discussion, that the authorities don't ever catch on to the real nature of the setup, they think its a legit biz and don't know that I'm a freak (for purposes of argument ONLY).
Are you really saying that, as long as there's a beep-beep noise, I am justified in "detaining" a person, regardless of the fact that they actually haven't taken anything?

Nyah nyah. I know you're a meth-using, incoherently rambling cross-poster,
but what am I? Can we watch cartoons now?

I hope I did that right, it's been so long since I was involved in name
calling I'm not sure I remember how to do it properly.

I don't have a weather radio, I just punch in their frequency
on my scanner and listen. Their VHF signal goes pretty
damned far, too! Good lucj with your new radio.

Ted

Sorry,

BUT YOU CANNOT be detain for further investigation by a store security.
Only police can detain for further investigation.

The store security cannot id you, he can just banned you from the store.
Either he places you under arrest because you shoplift or he let's you go.
He cannot stop you just because the alarm goes off at the exit of the store.
AND NO you cannot be held by police because you refused to identify to a
security gard. Only a police officer can detained you for failure to
indentify to a police officer. If you were arrested by a security guard and
you did not steal nothing, you could bring the company in civil court.

The receipt checking ant the exit alarms are there to help prevent
shoplifting not give a reason for the security agent to search you.

I work for a police department.

Hah! I knew it. Thankyou for confirming my initial suspicions. So, you at least (Matermind) would agree with me that if security forcibly detained someone merely because the beeper went off, and there was no theft, they WOULD BE liable to litigation, wouldn't they?

Hey Lou - don't bother about BOG - the guy isa total wanker with an unhealthy interest in horses and their reproductive areas (self admitted). He is a pedantic tosser who rarely value adds anything to a conversation, rather he insists on correcting peoples spelling and grammatical construct. My suggestion is to add him to your blocked senders list (like many of us in VK already have).

Matt

The receivers which ship with 2.4GHz wireless cameras may be available separately, but only cover the 2.4-2.5 GHz area. Typically 4 channels. To be honest. the LCD although looking good isn't really vital since video is so wideband that you'll soon get to remember which is which, and a small tuning error isn't the end of the world.
I would suggest investing in a good high gain aerial though (I use a 20dB gain parabolic (cheapest about 40 UKP for a mesh one, if you don't fell like making one). You can use those for 802.11b wireless networking, since this operates in the same band.
David (G7VDI).

I cannot seem to find to much in the way of reviews or opinions on this scanner from the usual sources.

Is this a decent scanner, or would I be better to buy a new Pro 83?

Your opinions and answers are appreciated.

Much Respect,

Charlie Chan

True, if the detector normally works OK and one time gave a false alarm then you can make the argument under "good faith" that you thought it was working correctly (since it had in the past). On the flip side, if the detector goes off several times a day/week with false positives, then that is an entirely different set of circumstances. That is reality.

BTW, I am NOT a lawyer (but did stay in a Holiday Inn <G>). However, I have been a policeman for 22+ years now and have some experience with good faith defenses (i.e. reasonable belief). I cannot speak for other states though so we may both be right...

Going full circle to the original post, purposely triggering an alarm on the hope of making some money later is just as bad as making an arrest based on only an alarm going off...

I'm the Original Poster.
Dave, yes I couldn't agree more, but my question is this:
IF the security people had only the false beep to go on, and IF the scurrilous fraudster was successfull in pulling the wool over everyone's eyes, and IF the security people took the bait and manhandled him into a back room(regardless of how likely this is to occur in reality , lets just say for the sake of argument that it did) then, after all that, would not a judge, MAYBE, award the guy(wrongly, of course, but he isn't in posession of all the facts)compensation?
Isn't there even the slimmest possibility that, given those admittedly unlikey conditions, the scurrilous fraudsters just MIGHT be successfull?
That's all my question was and I deeply regret any hard feelings or arguments it may have caused.

}admissible (unless the store KNEW it was defective in advance).

I went back and re-read what you posted earlier. You left out the last 1/2 of that statement and what attorney's like to argue in court "or should have known." The issue here is reliability and in my mind there is none with these security devices. What if a judge and/or jury felt the same way as I do based on the specifics of the case? Then you are open to all kinds of civil problems which was my point. It would a crap shoot based on these circumstance and risky.

}And what about someone driving a car identical to that of a bank robbery
}suspect who just happens to be in the wrong place at the wrong time? Would it
}be wrong to stop and detain them as well for any period of time?

Not at all because in this example a crime had indeed occurred and the vehicle fit the description given. In the previous example, no one saw anything criminal or even suspicious but you say people can be physically detained based solely upon an alarm at the door. Big difference...

Anyway, this is way off topic for a scanner group (I didn't cross post) so I will drop it...

With our legal system where people get awarded millions for hurting themselves doing something stupid, YES, anything is possible. All it would take is for a civil jury to find the store's actions to be "unreasonable" and whammo. Now if they found the sensor behind your belt it may just work in reverse... :)

In police work we talk about preferring to be "judged by 12 rather than carried by 6." That is what it comes down to sometimes in deadly force issues where a split second decision costs you dearly years down the road. Your decision has be based on reason or you are screwed...

OK, but what about the >>82<< ? What advantages does it offer (if you
know)?

I'm a bit mystified that I can't find one review on this scanner. I
googled it to death, but there's literally an information void on this
unit.

I would think so, AOR UK have it on their website:

http://www.aoruk.com/products/receiver/sr2000/sr2000.htm

The PRO-82 is an excellent scanner, if your needs are within it's capabilities. The frequency coverage is: 29-54, 108-174, 380-512MHz. There is no coverage in the 800MHz spectrum.

It's not reviewed, or talked about much, because it's "yesterday's news", so to speak. Nothing to get excited about, no state-of-the-art features, but does what it does, very well. The price is certainly right!

ive been sort of monitoring various discussions about restoration of gaps in certain bands nad ive gathered that in most cases mods are impossible yet i wonder why.

for instance i have a bc80xlt and have been advised that i might as well forget the whole idea.

does anyone have any idea why?
im not a tekkie by the way in case you havent noticed.

I'm also curious.

Whose left besides the Russians?

I understand the USN has, or is about to, shut down their operation-
which was quite a way below 200 Hz anyway.

I don't think it was "you" that "really" did it... Although, a different name would have certainly killed it, if you were looking for info regarding your BC250D... But, be that as it may, it could die now.... just change the subject or drop it!

As to the BC 250D, can't say I've seen one. If it is anything like the 250, I owned one of them and was happy with it.

272. FT. SPEECH INVERTER !!

Newsgroup: rec.radio.scanner
Date: 2005-01-13 01:23:48 UTC
From: "Johnny V. Mullins" <jvm333@alltel.net>
Message-ID: <F4kFd.610$J36.479@fe39.usenetserver.com>
Source record: 15532

Anyone here like to play with a DS49 speech inverter ??
Listen to those inverted conversations and understand what they're saying
:-)
Plugs into a receiver earphone jack. Powered by 9 volt power source.
Nice clean 5" x 6" x 3" black and silver case.
Instruction sheet and diagram included.
I'd swap the inverter for a nice (working) 30/40 ch. handheld scanner.

NOT TO BE MISTAKEN FOR A DIGITAL DESCRAMBLER !!

Johnny

>
>Thanks,
>Bill
>

Bill,

I have a RS Pro-96, which I just picked up last Dec. This is my 4th scanner over a 17 year period. I sold my Uniden BC-245XLT to help defray the cost to get the Pro-96. The BC-245 was a great scanner, but a local county that borders my city is going digital later this year. I wanted to be able to monitor them, but did not want to fork out the nearly $650 for the Uniden BC250D.

After reading lots of reviews on the Pro-96, I got one last Dec. The Pro-96 is by far the best scanner I have every used. It has great sensitivity and the audio is awesome.

I also picked up the Radio Shack 800mhz antenna - cat # 20-283. I am able to pick up Virginia Beach's trunking system from over 35 miles away. Was never able to do that with the BC-245.

The Pro-96 also used AA batteries, so you can use rechargeables. You can also program the scanner with Win96 software.

Good Luck

Brian

275. How do you get the external antenna feed in?

This has always intrigued me. I live in a typical southern house built in the 70s. No frills architecture, one-storied,mostly wooden, a small backyard and no basement. If I were to set up an external antenna, how do I get the Coax feed inside. I don't own this house, so I don't wanna drill holes in the door/window frames or on the walls. Any hope for me ? In the worst case , I'd have to get the feed through the fire-place chimney thats no longer used.

Bill,

Thanks again for the earlier response on the Pro 82.

The plot just thickened for me (much to my delight):

Your opinion please:

Icom R-5 or Yaesu VR120D

The Yaesu has a bunch of small frequency gaps, but many complain of the slow scan rate of the R-5. Which of the two would you suggest?

Thank you for your reply.

Much Respect,

Charlie Chan

I've heard of people running the coax through the same route that the power
or telephone lines take into the house.
For bluetooth to work you would have to have a considerable amount of
processing already done on the signal --- if you had the entire radio
outside, you could use bluetooth to send the audio output from the radio
into the house, but how would you control the radio's tuning etc? I think
you're stuck with finding a way to get coax into the building.

One good method is to cut a piece of wood that fits your window opening then drill your holes in that. A nice 1*4 or 1*6 works well. Other folks use antennas mounted in the attic, drop the line down into a wall cavity and fish it out at a wall plug or phone jack... Just a couple ideas.

Why not purchase one from RS, reverse engineer the simple layout, then
proceed to design one with the improvements that you think will make it
better ?
You will then have something to compare your new creations with to see if
they really are better.

290. Re: Discone scanner plans

Newsgroup: rec.radio.scanner

Are discones the "best" all band scanner antenna? SHould they be mounted high?

I like your idea. I will have to go online and see what a radio shack costs. I would like to build one better than you could buy one though.

291. Mag mount + rain = wet seats

Newsgroup: rec.radio.scanner
Date: 2005-01-13 19:26:42 UTC
From: User <user@host.net>
Message-ID: <cs6i1j$5jf$1@reader2.panix.com>
Source record: 15450

I'll do the Jeopardy thing:

A: Take the antennas off the roof during a rain storm.
Q: How do you prevent water from entering through the weather stripping with a mag mount antenna during a rain storm?

So let's say I'm looking for another alternative. I am using mag mounts because I don't want to permanently modify the car, but I would like them to be permanent, in that I don't want to remove them until I sell the car. Right now I am bringing two coax feeds in through a rear door, but it leaks. I am going to try the hatch door and sunroof, but failing that, is there anything I can do to keep the water out?

Thanks

292. Is this antenna any good for both transmit and receive?

I found one in RS lastweek , a generic discone for 25Mhz-1300Mhz;
costed a hefty 69 bucks. Also check out antennawarehouse.com, Grove's
etc.

294. FREQ HELP: - Long Drive down the east coast, MA to FL. Would appreciate Freq Reco's...

Newsgroup: rec.radio.scanner
Date: 2005-01-13 20:27:02 UTC
From: Jon <jon@j0nsi8eu.com>
Message-ID: <1301200515270270 51%jon@j0nsi8eu.com>
Source record: 15453

Hi...

I'm planning a driving trip from MA to FL soon, and would love to pre-program my "scanner" with some interesting frequencies...especially those that might be valid through all the east coastal states...common frequencies. My radio is actually a ham radio that covers "2m and 440" which basically means I can do 118 MHZ to 173 MHz and 410 to 468 MHz or so...so I can do aircraft, public service, etc.

Anyway, if anyone's done such a trip before and could recommend some must-have frequencies, I'd appreciate it. (I am an aviation fan, so common aviation frequencies would be especially welcome....but on such a long trip, I'm open to any active freq ideas.)

THANKS!

I have one installed in my attic and it has a flat SWR across the 2 meter band.

How well does it transmitt compared to other antennas? How far out can
you get?

Does the length of coax decrease performance in scanning as much as when you are transmitting?

I can put an antenna in my attic where I will only have about 5 feet of coax. (My scanner is upstairs) I could mount an outside antenna on top of my tv tower at about 30 feet, but would need to run about 50 feet of coax. The total elevation if it was in my attic would be 20 feet or so. (But I do have alot of insulation that might block the signal).

Maybe not as much, but it does impact reception, especially in the 800+MHz frequencies.

Keeping the antenna inside, has advantages. No corrosion, no wind damage, no sun's UV rays breaking down your cable insulation. If the insulation in your attic has the aluminized paper backing, it could be a problem however.

50 feet would not be excessive, if you use good quality coax.

the higher the better.
extended coax length will ofcourse increase coax losses but they will be far lower than the gain you will get by sticking it up high, and outside.

I like them.
I see they now include a vertical element, something they didn't do 10 years ago when I bought mine.
Seems to me thats theres not much room to reasonably improve.
You either make the elements shorter or longer, and/or of a better grade of material/sturdier construction.
I might add that mine has stood up rather well to 10 years or wear and tear exposed to the elements on my roof.

I don't know if I can give you an unbiased opinion, as I currently have a Icom R5 for sale!

Both the Icom R5, and the Yaesu VR120D, are excellent radios. My R5 is unblocked. I'm not familiar with the 120D's gaps, other than cellular.

I don't think the scan rate of the R5 is slow at all. Most all the Icom's, Yaesu's, Alinco's, etc, scan slower than Radio Shack's /GRE, and Uniden Bearcats. But I personally do not think it presents a listening problem. You wouldn't want to try an scan 100 channels, as it would take awhile to make the rounds!

Click here, and compare the specs on the two:
http://universal-radio.com/catalog/widerxvr.html

I hope I'm not posting twice (The first one vanished for no good reason)!

The best thing you can do is mount a bullet amp at the antenna. Even the best quality coax has a large loss at microwave frequencies. Use the type of amp meant for satellite television. Since you aren't transmitting you'll get by cheap. This will also allow you to use cheaper RG6.

> coax. The total elevation if it was in my attic would be 20 feet or so.
> (But I do have alot of insulation that might block the signal). At 20 feet
you get about 4.4 miles times about 1.3 for about 5.8 miles to the radio
horizon. At 30 feet you get 5.4 times 1.3 for 7.1 miles. YOu will have to
do the same to the other station's antenna and add the two numbers to find
the total distance. So as you can see the height is important. Five watts
will go over 100 miles if the antennas can see each other so power or loss
in coax is not too important(within reason) if you can gain height.

Go for the heigth. You will loose some signal, but you will still have more
than you need if you use atleast rg-6 coax or beter. On vhf and higher you
take the square root of the height multiplied by a "fudge factor" to find
the distance.

I'm able to work all the local repeaters in the Greater Charleston, SC area
from Summerville, SC.
During ducting conditions I have work repeaters as far South as
Jacksonville, FL and St. Marys, Ga. where I lived prior to moving here.
Prior to this antenna I used an outside Ringo Ranger vertical about 20' off
the ground and I would say for local use they were about the same.

It doesn't work as well as an antenna optimized for a particular band or bands. I chose it because it was a good compromise between wide band receiving (for general scanning) and tri-band transmitting (it'll work 6m if you tune the stinger). I later switched to a Diamond V2000 because I wanted better performance in the VHF/UHF ham bands...but I did give up the wideband receive capability with the V2000. I still think a decent discone is the best choice for general usage, including VHF/UHF ham transmitting--it makes a great choice for the beginner (Technician class) ham. Those who work with specific bands a lot generally end up getting an antenna optimized for those bands, though.

I found that the RS discone worked really well for 2m transmitting, and was adequate for 70cm and MURS, but not great. I could never really tell on 6m because I don't think there was much activity in my area on that band. It was fine for the repeaters in my area, and it even did a decent job working simplex on 2m.

Careful, though...if you have a sensitive receiver, adding the amp could actually reduce performance by overloading your receiver and possibly introduce intermodulation distortion depending on what stations are nearby. Since he won't be monitoring microwave frequencies, there are several choices of coax that would work quite well for a 50' run. In reality, there is some point where the advantage you gain with altitude is cancelled out by the loss in the coax. For a 50' run, you may be getting close to a wash, especially for UHF, unless you use better coax. It's difficult to make comparative measurements because you don't have antennas in both locations at once, but it sure would be nice to be able to do that.

That's not the point. A 6 db gain amp at the antenna overcomes that 3 db
lose in the cable.

--

Can I Get a Witness?

"It is now argued that because demon bush is President,
it therefor doesn't matter where the actual crimes scene
evidence for the murder of thousands in America leads to
according to the FBI, for George Walker Bush (666) in
above all the laws of the universe. Despite! the
reason they obtained the warrant, was to charge me for
"threatening the life of an international person", they
instead decided not to as saboteurs of liberation. They
argued after the warrant gave them my personal
possesions, [...]"

Don't miss the rest of the inside scoop to the up
coming public Johnny Wizard trial, cradled within this
last testimony of a King left forsaken by all of America
as unworthy of public discussions in our media.

Seriously Folks

Napoleon Bonaparte wrote forming governments are forged
only through the public witness of shared mutual
experiences, simple, yet, the bushite strategy
implemented continually on behalf of the enemy forces in
Iraq have been to divide the nation's people with
different "legal" definitions, while speaking for
typical bushite bigotry, by then offering distinctions
of human value between US some from "others". Not

freedom, nor democracy. [Remember: Evil is dumb]

Example: Allawi forbade surviving Iraqi doctors and nurses from medically treating any of the estimated 200,000+ innocent victims from Falluja [IRAQI vicinity].

Example 2: DYING two-bit bushite war with "foreign" soldiers paid especially more than a thousand dollars a day as self confessed RACISTS, and THEREFOR, left "officially" too weak as, "pissing post illiterates" to go after real terrorists who torture the innocent, or real thieves, that have stolen BILLIONS from the Iraqi Development Fund. Done all to sacrifice life's purpose for no better good to the ANTI-CHRIST EVIL bush "cabal" of lying neo-con Christ haters. Allthewhile stating the objective worth dying young America as bushite for is "Democracy" in Iraq. But, isn't a founding principle of any democracy to outlaw thefts, sexual assault, murder? Again, bushite kills bushite for a stolen nickel that they just as soon, stole from anybody. If you can believe it. We need YOU to make some effort to engage American talk mediae. Perhaps it's only YOU, who hasn't yet heard a responsibility to this once greatly revered world of wisdom, of the enchanted, and mystical, or of the tyrannical as hell bound for suffering and sorrow. ,in which you share allegiance too my friend.

Being caring and compassionate for the victimized innocent not only feels good, but it is a choice we would make at being alive to help US survive. To not speak against the bushite war crimes against YOUR Humanity, is to not speak in defense of our ancient dying God no longer found worthy of you Peoples humble respect. Currently corrupted bushite want my voice of truth silenced by censorship with false imprisonment, and those who advocate such hatred for myself and our humanity, speak no public word or disagreement on my allegations of high treason by Our Mr. bush Jr.. While I want to openly debate the, "censorship for tyranny", corporate talk radio bushite bitches on their furthering commitment to not allow objections regarding their contempt for true justice and freedom in America. But if you singly decide not to support my cause, like corporate news control encourages, We will be left forsaken, again. God is Just to the core, like Johnny Wizard tries to be, while bushite liars lie, cheat, and steal from America as ourselves measured unworthy for deliberation to gain true understanding. The Coast to Coast radio network in America disallows America learn for why American soldiers are currently sacrificing their LIVES irrationally. Why? Because there is no

legitimate reason, while bushite pretend in YOUR name, that there must be another reason but for to rob our humanity in George Bush Jr.'s name. For if there truly wasn't another reason, not so then blind, stupid, and cowardly American soldiers wouldn't be too happy about the wealthy corporatist bushite commentators silencing America's dying cries by bushite enemy command. Now would they? Remember: wealthy blind and stupid bushite kills/gets killed, poor blind and stupid bushite for a stolen nickel - a nickel in all likelihood, they rifled as thieves from some pensioner, that just as soon, would be their own "grand" parents. Or Yours as someone elses beside.

Phil Donahue had the highest rating, number one money making news commentary show on NBC as it was canceled. Why? Too good as enlightening and INFORMATIVE. Then there was the recently canceled Crossfire. Or how about Barry Zwicker on VisionTV as Canada's greatest broadcast before it too was canceled. Why? Too good as enlightening and INFORMATIVE. VisionTV, a "religious" channel now likely forbids anyone to suggest that God would be good as just, and REALLY INTELLIGENT. Forbidden knowledge we are the corporate bushite insist with Your stolen rights. Why so? Because Americans might learn of what it is to be a true Christian, and therefor stop to have arrested else immediately executed for high treason regarding 9/11: the enemies of Johnny, Justice, God and Humanity, the evil doers George W. Bush, Rumsfeld, and Condolezza Rice. Alone with Myers and Cheney for good measure. Then, those responsible for the needless bombing of Samarra and Fallujah.

Under EVIL bushite tyranny, We are criminally fighting for needlessly dying as bushite here, but corporate newsCASTers don't find "our" costs worth getting a discussion group going, after all, American soldiers who die for the bush regime, as the kept in the dark, will less likely be going after the real bad guys for 9/11 then right? Corporate America refuse US just basic rights of legitimacy to at least address the absent war reason issue from time to time - Jeeze. But no. As bushite, they're prepared to not inform the bushite soldier that depleted uranium is radio-active, that the stolen American Enron pension money is sitting in the Cayman Islands, or that the war itself has no justification. See, the bushite war is a TRUE CRIME against all Peoples of Humanity, for the war against Iraq has no reason available to explain enemy military action, but for to die thieving from ourselves as the bad guys. The Enemies of Freedom. Why we have Law.

God is Just, and evil is just the slavish ignoramuses who censor our Words of empowerment for freedom through Justice represented indivisible as Eternal. We rule.

Therefor, George Walker Bush is guilty of treason to US all, not only including your one and only King Johnny Wizard as Heaven's afar, but also the not going anywhere but yet still sacrificing ungloriously as the stupidly blind as almost completely incoherent,. devote bushite nazi dumfuk soldier grunt enemy vermins.

Will you not help these words reach a larger audience? I ask you to consider your helping me can do good for your real world too. Perhaps it is ONLY the single individual that hasn't yet understood, this once greatly revered world of the Word is of which you share allegiance too.

Speaking for a just battle of freedom for all humanity, is a right you could exercise in brightest intentions of a muted God who sure could use your help right about now man. Our family is in so a desperation for needed support. I am fearing your fears have got you believing, you have no dying right to speak against Mr. bush Jr. for the crimes he has committed in Your name, but You do. Think of it this way: anybody who stays silently connected secretly to the crimes of nine-eleven, can not be trusted as a sacrificing bushite thief by the enemy bush administration. [Secretly speaking in all strict certainty.]

The warrant that allowed the confiscation of my computer equipment, was to prove that I was the one and same who demanded true justice for our humanity by following the crimes scene leads for nine/eleven, arresting those responsible, or killing the escaping culprits, bush, rumsfeld, and condolezza rice by the hand of our guns. (Why do you think Police officers carry guns after all?) It is now argued that because demon bush is President, it therefor doesn't matter where the actual crimes scene evidence for the murder of thousands in America leads to according to the FBI, for George Walker Bush (666) in above all the laws of the universe. Despite! the reason they obtained the warrant, was to charge me for "threatening the life of an international person", they instead decided not to as saboteurs of liberation. They argued after the warrant gave them my personal possesions, (hundreds and hundreds of video tapes, ALL MY WRITING, computers, disks, along with approximately 50,000 tasteful images.) That the reason for the warrant being originally issued, no longer, if ever, was

justified. For if they were calling for justice, the demon bush, and his co-conspirators might get caught by America, and pay the ultimate price for their treason by death sentence. After two self confessed PRO-BUSHITE (support death squads against Afghanistan school girls, and propping up the heroin trade by arming women slave traders) "officers of the law" reviewed my images, they now contend, that several can be argued to be illegal in an almost fixed to win proceeding. (No more than a small few pictures of beautiful girls in different states of undress - "Home Lolita" I think.)

The charges they offered to the prosecution to argue for a "life term prison sentence" (almost jokingly it was quacked) were complete fiction, of which the crown offered me "a deal". Plead guilty for being a shamed ostracized sex offender, [I'D HUNT CHILD KILLER ENEMY BUSHITE EVERY DAY OF MY LIFE IF I HAD THE BUS FARE AND THE AMMO] and maybe, the Judge won't argue for a long term prison sentence for another charge that has absolutely nothing for substantiation. Substantiated, that will surely do nothing but testify to their attempts at demonizing my better name. Nothing doing darkness, the court of Law, is Our court, and I intend to make my case heard among my peers. Here.

Please, I beg you for my life, forward this document to the propper authorities, post these passages to any church, or, phone talk radio America and demand my public case be heard for Your benefit too, or don't and get what we'll deserve by not making a miracle happen with your single sole but sure, human will power!

1. I obtained the questionable images through Usenet group "youth-and-beauty". Images can be downloaded a thousand or more at a time. I can't not perceive the images until they are on my computer! If they had told me they were coming as bushite, I would have been sure to delete anything near objectionable for argument's sake. They laughed when I told them that.

2. The service companies that offer such groups as child-rape and so on, have an easy ability to filter out subjective objectionable material, along with the truly grusome stuff. But they don't, nor, are they found legally liable for not doing so. I suggest the reason is, it would put out a billion dollar industry of these child-porno cops that view real sicko slime routinely, while then arguing anyone who witnesses such depravity must be guilty. Guilty to have their professional lives destroyed, their life invested property removed till

whenever/perhaps stolen, and then be publicly ostracized as senseless victims. All because some guy maybe believed women are worthy of worship in the highest respect and honor, while cute adorable boys he couldn't help but feel compeled to cover with praise, or mutual hugs and kisses., as long as there are no other men in the room with him and the gals perhaps one day chatting over maybe child care let's say. (no wonder the two child porn cops in question regarding my public case admittingly were/are staunch bushite offenders.)) I know of no nobler lineage that that of our police officer. For protecting the rights of our children, is what we've always been committed to gaining respect for. We want to do right for ourselves, and despite Johnny, this world really is something remarkable to concider a future with on our own terms as a foundation of wisdom with the ever presnt will to succeed at something greater than first realized. Evolution. The Revolution of reason while jiving with justice for freedom holds many perks per praised principle. Hammurabi's number one thang.

3. If a search warrant can be made against anyone who a criminal bushite finds objectionable, (bush and rumsfeld made the charge against me through the Secret Service, then to the RCMP.) then what freedom fighter is safe from pictures of godly and beautiful children in bath tubs? Swimming? IF, the bushite demands the images appear seductive, and compel them to commit sexual assualts? Or, what if you download a program on cars to have the bushite find, it contains bin Laden's secret where abouts in code? Would you be guilty, and if so, of what? No thinking freely?

So, the warrant brought the officers of law the right to prove my Johnny Wizard writing was of my own, but yet, after doing so, refused to enforce the law by giving me my day in court on the reason the warrant was granted to begin with. Also, I, as anyone can not perceive potentially objectionable material until it is in my possession, while a service provider would have little of no problem. (The still working child porno cops could look for child porno all day, and actually get closer to catching those who proliferate actually objectionable materials. [See?, an internet service provider could defend thus: they're not guilty because the subjective material, that would be questioned, is subjective, and so would the porno cops if they got someone intelligent to defend themselves. But for Christ who needs to know what's going on in the realm?, while loving girls in general like they were his own

distant siblings? They'd put Christ up on a cross for loving schoolgirls, by demanding such thoughts come only from a criminal prospective. The problem here is child porno cops can view a suggestive cute girl smiling in her panties, or witness some heinous bushite rape or torture, and measure them equally when charging US for their deviant sexual sugestion. As alas, they refuse to support the Law when it comes to the easily provable criminal actions of enemy bushite, as for would be, the defense of the lives of our innocent children in Iraq mean something to me too.

Anyway, apparently, the reasons for the warrant were not as was so intended. To charge me for threatening the freedom of bush, rumsfeld, and the evil witch condolezza rice. (Can I get some legal advice from someone out there on this then bogus? warrant please?). The Court will (try) argue without allowing ANY voice of objection, that because I demanded the immediate arrest or execution for the individuals responsible for the crimes of nine/eleven, (relying primarily on the Whitehouse, FBI, and the public spewing of the war criminal demon anti-Christ itself,) the prosecutor, it has been alleged, will demand justice not be served in that respect, and that the search warrant that obtained the bushite's evidence against me as a truth teller during their fishing expedition will not be allowed for re-dress. Is this Justice on behalf of God I ask you?

Nature of the Beast

(Again, remember, nobody from the RCMP, the Secret Service, or the FBI, state that I am incorrect in my allegations of treason against the bush administration.)

The prosecutor is going to press for incarceration if I plead not guilty for a crime I'm not guilty of, while my public freebie lawyer, contends my defense of innocence and corporate news agencies forbidding the pursuit of Justice in protection of our Police services, like the honorable FBI officers that contend Ahmad funded Atta will likely not be allowed heard. [Are you a member of a Police Union somewhere, or know of someone who is? Or, do you just not give a care for you fellow officers either?] See?, bushite falsely believe bush can not be arrested for nine eleven, no matter where the actual evidence leads, because he is not judged an equal among men by corporate news standards, but as the anti-Christ, FALSE deity, an enemy to every free person standing.

That is our, for real court case against the Bush administration as it stands today. While some have

warned, bushite are pushing to have me taken in now, to try stopping this from speaking in our Humanity's true defense. They just might succeed, if you decide no care for Freedom from tyranny either..

This is was/is/will be my last Wizard Wire public service announcement regarding this, George Walker Bush (666) wars America, Humanity, and me as the Lord of Creation. I've said everything I can say twice over, and if you can't find it within yourself to pass this post on to every church corner, with a, "I love life too" set of priorities, I can guarantee you no greater reward. But for to be present if not in person, but in spirit during my public trial where the bushites will publicly judge my character unworthy, while attempting the silencing of our own voices for Justice as We stand in TRUTH, indivisible. Be it known, the prosecutors of Law in my case have read Johnny Wizard's "The Trial and Conviction of Our Mr. bush Jr.", and likely a few others that will be asked by the hiding in darkness bushite enemies to completely disregard as crime scene evidence. It's going to be a case worth getting to, considering the newspapers, talk radio stations, and National News desks are expected to forbid honest coverage of by the higher ups at corporate command. Call your Church group to organize a call for Johnny!

Or don't.

I thank all those with whom the true liberation of Humanity from tyranny could not have been made possible without themselves individually. I know it seemed like no one was listening, when we spoke for God's cries, but WE knew better, and we knew soon, all of US will then learn it too, defending God is of no greater privilege. So, cheers to You, our Humanity's defenders of the human challenge, for being there to speak for this life when we needed You as a contributor. Fare thee well with your pride and honor, and no bars will ever hold your undying spirit.

/ / God bless America by destroying the enemy evil anti-Christ, Our Mr. bush Jr. Yourself. \ \

Your stranger then fiction,

Johnny Wizard

See you on the other side of whenever,
Your ever present bids you now,

an adieu.

/ / ..said William Winkenwerder Jr, assistant secretary of defence for health affairs "We have no evidence of maltreatment by physicians, or of physicians participating in torture or torturous activity," he said. "We just do not have evidence of that." \ \

What world does William Winkenwerder Jr think we live in anyway?

It was the revelations that the signed sqiggles on the bogus death cetificates weren't made by the actual medical practicioners on charge in Guantanamo. Now, there might have been one or two involved, as has been confessed, HOWEVER, we do know that the death certificates were forgeries to cover up the crimes of bushite nazi enemies. So, count the forgeries, and you'll count the actions of the truly unjust and evil.

--

/ / No one is able to define the mission of the troops in Iraq, or for how long this mission will last. No one at all, including George W. Bush, can explain the US strategy in Iraq. This is because there is no strategy. With the Iraqi resistance raging, it is not clear why the US is occupying this country and why the US is so willing to sacrifice its soldiers there. \ \

Well the strategy is to cash in on the bushite war criming thieves spree actually. Cowardly soldier's die in Iraq, and the bushite fat cats lounge in the lap of our stolen luxuries through the leverage of the mallable dying amerkan mind.

--

/ / U.S. troops targeted by a roadside bomb have mistakenly killed two Iraqi policemen and two bystanders hours after an American warplane bombed the wrong house[..]

An unnamed bushite quote It expressed deep regret for the "loss of possibly innocent lives". \ \

Wouldn't you kill the traitor who spoke such contempt for Humanity? The rewards of indiscriminate murders against the unknown innocents in bushite amerka's ungodly name, gets yet another lowly forsaken bushite rightly killed for bad wordcrafts on a make believe sound stage they think they only have us party to.

--

/ / "In the exercise of his power to use military force, 'the president's decisions are for him alone and are

unreviewable.'" \ \

--

/ / "And they schemed and God schemed, but God is the best schemer." (Quran 3:54) \ \

--

/ / Hence, it is up to the people of the United States to compel the US occupation authorities to at least abide by minimum acceptable standards of civilized nations. The progressive community should demand the unconditional release of Dr. Huda Ammash as part of its campaign to end the illegitimate US occupation of Iraq.\ \

--

/ / The agency's statutory responsibility is to speak the truth, whether the truth supports the president's plans or not. It would appear that this concept is not shared by this administration. \ \

/ / ``Such a blatant statement acknowledging the commingling of his official duty to ensure a fair election with his partisan duty to re-elect President Bush, made in a political fund-raising appeal, evidences Secretary Blackwell's poor judgment at best, and the manipulation of election administration for partisan purposes, at worst,'' the report asserts. \ \

--

Breaking Camp

I will advocate full compensation for every mistreated soldier who had been tricked into believing something without reasoning.

Johnny condemns George Walker Bush (666) to death for the crimes he has committed against God's Humanity.

Let it be understood, that Saddam gave America 100 percent access to do anything the anti-Christ wished without delay prior to the needless military conflict beginning. So, every treasonous thieving bushite life taken, is done in protection of God, and the American dream. See?, TRAITOR bushite Art Bell's amerikan talk radio forbids BY CENSORSHIP anyone in America to speak in the defense of the undefended American People. Art Bell, America's enemy, with ensure that America "never" learns that bush's business partner, General Ahmad, funded 9/11's mastermind ring leader Mohamed Atta, or that depleted uranium is measured radio-active, or most especially, that billions of STOLEN American pension money is sitting in bushite bank accounts in the Cayman Islands. Instead, he'll do another show on UFOs, or

bigfoot, while broadcasted to the wordless bushite grunts their dying is for naught. Who cares?, bush's war against freedom in America isn't anything bushite amerika ever wants to get persnickety about.

http://www.chapelhill.indymedia.org/uploads/bushite-kills-bushite.mp3

/ / Who cares? CNN is not going to cover it, we know that. CBC in Canada, they're not going to mention it to anybody. It's no concern of themselves to show a caring word for the [thieving] sacrificing soldier. \ \

The EVIL bushite liars die for no better good, but as the ungodly bringing further hardships against US innocent people they target for murder. God says, the Magna Charta says, the American constitution says, let US all arrest or kill the TRUE ENEMY bushites instead. "See lawless bushite, kill it in defense of all that are innocent", I always say as the Son of Man and Living Creator. No joy greater than saving the innocent victims of the enemy bushite thieves, torturers, and first degree murderers. WHO WOULD DISAGREE? in a true Democracy?

Every American soldier who dies as a bad guy in Iraq, dies for cowardly worshiping bush instead of Life. The demon anti-Christ as their false, untrue, dummy deity, sends them into harms way for only to steal from the innocent. The innocent left in God's trust. There was nothing that could have better been done in Iraq by bombing the country. The blind attacking of the population, along with it's functioning public institutions, brings only the STOLEN cash rewards on trading in the American soldier's LIFE as a fascist criminal. All that is bought to by putting cowardly bushite soldiers in bush's un-needed conflict, is to steal from their very own families back home left almost completely undefended. [Have no fear, Johnny Wizard's here!] A criminal military force that deems some soldiers from Apartide fame as "un-accountable" to American or "Iraqi" law, while paying them a thousand dollars a day or more as rewarded racists who fight allong side black and Hispanic dying bushites, to not allow equal rights for those classified by different colorations. Allthewhile with spokespeople smattering the sacrifices are to bring democracy together in Iraq to arrest bushite for thieving then? [No matter whomever you are, George W. Bush is truly evil to God in YOUR name too see?] Regular Joe in the Army, 47$ before expenses concurrent and impending.

I will advocate full compensation for every mistreated soldier who had been tricked into believing something without reasoning. Example: those who had been taken in criminally to handing over their military pensions for five year loans at 56%, or a 20,000 loan paid in five with 60,000. No competion exists for this racket because it's an actual crime scene. Guess where American Gis can hear the sales pitch advertised? The Army Times.

No thoughts of understanding are expressed (OR COULD BE) from the soulless bushite on why they are in Iraq dying, or why depleted uranium is harmless, or why depriving Iraqis of medicine along with food and water, is a ploy to win the hearts of every man who owns a gun. Or why the bushite demands through the censorship of tyranny, that Our Humanity has no rights to speak for our freedoms and liberty, or on behalf of Iraqis who have had billions of much needed dollars stolen from themselves by the bushite enemy. (The billed for taking bushite soldier itself, will not receive a penny of the ill gotten gains, just like their own grand parents were robbed of the pensions, and the bushite couldn't find a word of outrage to say against their false idol then either.)

/ / As the soulless disciples of the enemy anti-Christ, Our Mr. bush Jr., their "officially" granted legal immunity from all prosecution means nothing to me as a honorable man defending my humanity, or as living Creator, who brought all into this new world to be free, and can just as soon, take you all nazi bushite out the old school way. \ \

The ungodly evil bushmob fascist totalitarianists are pushing to have US specially arrested. The demon anti-Christ enemy forces have gambled an attempt to find prosecutors and judges, lawyers and defendants, who together wouldn't let the truth be spoken in our own defenses. I have had many discussions with the National Security branch of the RCMP, CSIS, the Secret Service, the FBI, and several commanders in the Canadian Military, and WE all know, this upcoming trial is something a great deal of many are lookiung forward to, however, an agent of law recently approached me to warn, some are working to try having me arrested without bail, and spend maybe a few years behind bars before a trial could not be postponed any longer, all in an attempt to try stopping my words of truth that represent the interests of all defendable legitimate legal enforcements. Canada's system of checks and balances, and our honorable police services have too many good

guys in place, to want to silence my calls for Justice by measurement. And, up until now, our security people have advised the bushite case would never fly in a public court room, for Johnny Wizard would just make his case as it stands FACTUALLY DOCUMENTED along with that which was FALSELY ALLEDGED, and the wealthy do nothing corporate news agencies would be caught as culpable to being accessories to first degree murders in New York City, where they deliberately with malicious intent, refused to report on the FBI's findings that General Ahmad funded Atta, or that demon George W. Bush with condi and rummy, had a top secret CRIMINAL plan to invade Afghanistan dated September 9th, 2001. Just like still, CBC and CNN refuse to report any human concern for those murdered irrationally by bushite in Iraq today. No concern for those Humans, but in Asia, where bush isn't yet anyway, thieving in the wide open from God, they can try to make up for lost respect by claiming those People are better People worthy of our commpassion with wall to wall coverage on the suffering we have little of chances in preventing. But for to stop needlessly droping tons and tons of toxic bombs into our Living Earth. It is the bushite enemy who refuse to allow YOU speak in your defense as an Earthling.

However, this being said, I have been recently informed that, since the godless bushite enemies would wish to have our freedoms censored, it will likely be pushed to do so without a public trial allowing a jury of my peers to judge the case accordingly. Up until recently, Guantanamo could never happen in Canada. But now in Canada, the enemies behind closed doors are talking about sending intelligent innocent people away to be tortured for sadomasochistic satanic tendencies, and further have argued to no one that persecuting People in Our names without evidence, maybe isn't such a bad idea, when you think of all the people we could rob our humanity from like the "popular" and "Democratic" bush regime does. Bushite corporate new censors are fighting for a return to the dark ages. Don't let this happen to YOUR world. Care not for my freedoms as an honorable man who stands with America's FBI, and your given up life wont be worth nothing but as yet another sacrifice to bring further glory and stolen riches to the American cop killer, pension thiever, 9/11 perpetrator, war mongering anti-Christ, Your unbelievably EVIL Mr. bush Jr.. The enemy of God anti-Christ who continues to hold your real life in mistrust and dishonor, while wealthy corporate "celebs", talk freely about their pride in

such ungodly sacrifices as Christ's forsaken name.

I ask ONLY you to argue this paper with your best
intentions, for I will perhaps not receive another
chance to publish, if as usual, the Internet community
at large extends me little support in my UNCHALLENGED
assertions on who truly committed the crimes of 9/11. A
single bushite corporatist sends a complaint to a
Internet provider alleging I talk "spam", therefor,
without any hearing, private owners are threatened to
lose their privilege to communicate, by an enemy bushite
protagonist who exercises his "authority" by stating
only, "spam", and not even providing my actual post in
it's entirety. One Internet service was shut down for
the sole reason that discussing George W. Bush as the
9/11 perpetrator in tx.politics, was against the rules,
for such subject material must be confined to only a
American nation political forum. I talked to the kid on
the phone who made that power decision on behalf of all
usenet, and let it be known, he knows what he's doing.
But "they" can't do this everywhere. I can not "take
over" your big old lonely world that you must work to
protect for yourself as an equal citizen sworn to
freedom. I have written all I need to say about Justice
and Freedom, and if the human race can not still find
enough care for themselves to propagate my writings for
others to read, or demand Art Bell be removed to allow
Johnny Wizard to debate the ungodly dumfuk bushite
vermins, there truly is no hope for US continuing.

Johnny Wizard

/ / What happens when the "Democracy" says, we are
outlawing torture?\ \

/ / Depraved as America is in some respects, [they]
can't find fifty cents to help some homeless vet on the
ground. \ \

--

/ / Yet the American establishment has not seen fit to
allow anyone who opposes the Iraq war to make his or her
case in front of the media. \ \

snpd

/ / A lot of people are too afraid to come out. But
after we would warn them, we would go in. You know how?
We would riddle the building and every window with
high-caliber, armor piercing machine gun fire, then
often we would throw in a grenade for good measure. If
any civilians were in there they ended up either dead or
wounded. \ \

Only possibly done through the "help" of "unbiased" CBC
and CNN national news "people". Corporatist "celebs"
who purposefully propagandize our airwaves with their
LIES by censorship to un-supportingly, steal further
from our robbed and dying communities.

Example: General Ahmad funded Atta, and corporate news
finds no interest in informing the bushite grunt, that
yes indeed depleted uranium is radioactive and toxic as
a microscopic heavy metal, and will kill you easily for
the ignorance "they" sell impartially as the "unbiased".
See?, enemy bushite kills enemy bushite for a stolen
nickel., that they likely stole from an American grand
parent. I HATE bushite.

/ / No papers! Well, that meant the suspect was going
to be hauled downtown to police headquarters for a good
beating or worse. Well, thanks to the cowardly members
of the U.S. Congress, in 2005, and at the explicit
direction of the Bush()-Cheney Gang, the above scenario
could become part of our national nightmare. \ \

--
http://www.washingtonpost.com/wp-dyn/articles/A45373-2004Dec7.html

/ / that a clandestine military task force in Iraq was
beating detainees, ordering Defense Intelligence Agency
debriefers out of the room during questioning,
confiscating evidence of the abuse and intimidating the
debriefers when they complained." \ \

--

/ / Combat veterans wounded in Iraq were left waiting weeks and even months for proper medical attention at military bases. According to an officer, their living conditions were so unacceptable for injured soldiers he said they "were being treated like dogs." Then the Pentagon underreported the number wounded. \ \

--

http://www.truthout.org/docs_04/printer_121004W.shtml

/ / A sacked CIA official is reportedly suing the agency for allegedly retaliating against him for refusing to falsify his reports on Iraq's weapons of mass destruction to support the White House's pre-war position. \ \

--

/ / Ford describes incidents of asphyxiation, mock executions, arms being pulled out of sockets, and lit cigarettes forced into detainee's ears while they were blindfolded and bound."

Ultimately, Ford was strapped down to a gurney and literally shipped out of Iraq illegally on the basis of non-existent mental problems - all because he had the courage to speak out against abuses he personally witnessed. \ \

--

/ / ``I was faced with being deployed to Iraq to do what the infantry does, kill people, and I had no justification for doing so,'' he testified. ``This was a criminal war. Any act of violence in an unjustified conflict is an atrocity.'' \ \

/ / He cited the case of five members in the Mississippi National Guard who had been wounded in a booby-trap bomb explosion. Incredibly, their injuries were listed by the military as "non combat." \ \

/ / Williams's squad stopped a dump truck, and an Iraqi climbed out. "Light him up!" the sergeant ordered, according to testimony, and the squad opened fire, killing the unarmed man. Williams and a squadmate reportedly got into an argument over which of them had scored Company C's first kill. \ \

--

http://www.counterpunch.com/alam12132004.html

/ / What becomes of those military veterans who undergo amputation? \ \

--

/ / What about the damning report of Charles Duelfer and his Iraqi Survey Group, which announced last month that Saddam Hussein destroyed all of his weapons of mass destruction and their programmes in 1991? \ \

--

/ / ...and we were yelling, 'Train to kill, kill we will,' over and over again. I kind of snuck a peek around me and saw all my colleagues getting the red in the face and hoarse yelling - and at that point a light went off in my head and said, 'You know, I made the wrong career decision.'" \ \

/ / Throughout the 12-year Vietnam War, for example, fewer than 100 Guard troops were killed, compared with the 145 who have died in less than two years in Iraq. \ \

/ / Greene County Director of Elections Carole Garman claimed that she had withdrawn access to the voting records at the direction of Secretary Blackwell. \ \

/ / Blackwell not only did not have the authority to take this action, he is actually in violation of the law. \ \

/ / Williams ordered that the Iraqi man, who had been handcuffed and was being held on his knees in front of the house, be brought inside...

William cut off the plastic handcuffs, laid the rifle near the Iraqi and said aloud to other soldiers in the room, 'I feel my life has been threatened.'

Williams then shot the man twice..." \ \

/ / That America has spent billions upon billions of dollars on the war and the occupation and hasn't even managed to provide sufficient armor to protect its own soldiers is a metaphor for the failure of the whole operation. \ \

/ / It is now estimated that more soldiers have been injured in Iraq than during the Revolutionary War, the War of 1812, or the first five years of the Vietnam conflict. \ \

/ / Webb reported that U.S. law enforcement agents complained that the CIA had squelched drug probes of Blandon and his partner Norwin Meneses in the name of

"national security." Blandon's drugs flowed into L.A. and elsewhere thanks to the legendary "Freeway" Ricky Donnell Ross, a supplier of crack to the Crips and Bloods gangs. \ \

/ / The Press Release, just issued, headlined "Conyers Alarmed at Efforts to Obstruct Ohio Recount Effort, Calls Witness to Monday Hearing to Detail Such Efforts", outlines the troubling reports, discussed here yesterday, of Ohio Sec. of State J. Kenneth Blackwell (also Co-Chair of the Ohio Bush/Cheney Re-Elect Committee!) reportedly attempting to obstruct efforts by Green/Libertarian Recount Volunteers in Ohio over the last several days. \ \

--

/ / The "Texas Strike Force" members paid their way to Ohio, but their hotel accommodations were paid for by the Ohio Republican Party, whose headquarters is across the street. The hotel worker heard one caller threaten a likely voter with being reported to the FBI and returning to jail if he voted. \ \

/ / In a half-dozen precincts in Franklin County, people who were not inside polling places by 7:30 PM were told to leave - even if they had waited in line for hours. This is a violation of the Voting Rights Act. \ \

/ / In other words, the exit polls were made to conform to a political decision to declare Bush the victor. \ \

--

http://www.whatdoesitmean.com/index575.htm

/ / The massive US Intelligence Reform Bill weighed in at over 3,000 pages and though unread by individual Members of either the House or Senate nevertheless passed all of the legislative hurdles needed in order to become law. \ \

TREASON BIG TIME.

/ / The contract company blamed for the bad food is identified as a small, Qatar-based firm called American Service Center. \ \

/ / From snatch and grab operations to warantless searches, Patriot Act II is an Adolf Hitler wish list.

You can understand why President Bush, Dick Cheney and Dennis Hastert want to keep this legislation secret not just from Congress, but the American people as well. \ \

/ / MIT and the Pentagon have been involved in a fraud
that has promoted a weapon system that will have little
or no utility and could cost hundreds of billions of
dollars. \ \

U.S. deserter 'didn't want to have to kill babies'

/ / Mr. House will argue that American soldiers are
guilty of war crimes and that forcing Mr. Hinzman to
fight in Iraq would have made him a war criminal.

He will call as a witness former U.S. Marine Staff
Sergeant Jimmy Massey, who is expected to testify that

he and other soldiers shot more than 30 unarmed Iraqis, including women and a six-year-old child, at a U.S. military checkpoint. \ \

--

CNN.com - Aid group 'told to freeze' Falluja work - Dec 6, 2004

/ / Only about 100 families are thought to remain in Falluja, as most fled the city before the U.S.-led operation aimed at flushing out insurgents. \ \

Huh? Again, witness wealthy CNN "news" staffers, didn't even bother to seek for an update on their "about 100", that had not ever been given. Red Cresent, the day previous to Dec. 6, no... actually reported on, Dec 3rd!, stated, (from their limited circle of reference) they had witnessed a minimum of many corpses, of completely innocent pro-Iraqi women, children, youths, and men.

/ / Iraqi Red Crescent spokesman Muhammad al-Nuri estimates that some 6,000 people have been killed, many of them civilians. \ \

(That is discounting murdered armed defenders of Freedom in Iraq we can prusume.)

But, again, the true bushite enemies of loyal bushite enemies, thay'l' "bushite lie" to the bushite nation about the "holy" benefits of, sacrificing America's young life., all done for the glorious betterment of the traitor demon anti-Christ liar, the war criminal, Our Mr. bush Jr., along with his treasonous evil cabal of anti-semitic Palestinian Christ haters. A compassionate, "conservative", war mongering cabal whos warring of America is done to secretly steal further from the innocence of God in silence. Without a honest to Johnny, bushite killin' God-Man to speak on the nature of reality itself from living Creation's time-less prospective. Naturally leaving ourselves to save all of humanity with my "magic" - guitar, notebook, cybercafes, and super cool Akeido, leaves me in wonder of where life could lead as committed to freedom through justice for all?, as truly ourselves democractically represented?, Miraculous?. or will we choose as ENEMY bushite instead not to, ending to devolve ourselves from existence?

I know of some pretty, almost miraculous words in which can bring about positive change, and man, if you could see the world for America's Dream, where all People are judged not by the color of their skin, but the content of their character, the entire bushmob would be behind

bars awaiting trial for treason, and the Iraqi People
would have American Forces demanding Allawi be arrested
for failing to explain himself regarding the needless
bombing of our Humanity in Samarra and Falluja.

--

SEE BUSHITE, KILL IT FOR GOD'S AMERICA

/ / Another humiliating proposal, which even triggered
debate among Marine officers in control of the city, is
to force all Fallujan men to work in military-style
battalions, reported the Globe. \ \

This is the best the ENEMY bushite could dream up in
all possible worlds?

/ / His company of tanks and Bradley Fighting Vehicles
had roamed the eastern third of the city [Falluja] for
13 days, shooting holes in every building that might
pose a threat, leaving behind a landscape of
half-collapsed houses and factories singed with soot. \ \

--
http://www.wsws.org/articles/2004/dec2004/iraq-d06_prn.shtml

/ / Of course, none of the assembled media pointed to
the absurdity of Bush's comments. \ \

--

http://billmon.org/archives/000172.html

/ / Bush administration official says: "Saddam never
had WMDs, and we never said he did." \ \

--

/ / Goldsborough said the reason he was given after the
fact is that the column, about why Jewish voters
overwhelmingly cast their presidential ballots for John
Kerry, was "offensive."

"The publisher said it might be offensive. To whom? \ \

--

/ / twenty-seven Israeli pilots indicated that they
would no longer fly missions in the Occupied Territories
(Boston Globe). The pilots said "We veteran and active
duty pilots are against carrying out illegal and immoral
attacks" and they "refuse to continue attacking innocent
civilians." \ \

--

KILL ENEMY BUSHITE FOR OUR LIVING LOVING GOD MAN

/ / They should put dynamite in their behinds and drop them from 35,000 feet, the whole pack of scum out of that jail."

Remember, these are the same prisoners that the Red Cross estimates 70 to 90% of them were innocent and later released. \ \

--

/ / It gets worse. We already knew about the Franklin County, Ohio, precinct that tallied 4,258 votes for Bush when only 638 people had actually voted. \ \

--

See? The bushite knows that bush murdered thousands of Americans on 9/11, yet, will advocate fascism, to censor America, from finding the truth for ourselves.

That enemy of God, the demon anti-Christ told US the conflict he began, was because Saddam wouldn't let the inspectors in. While, corporate nazi whores, refused to correct ourselves on our sacrifices, for they enjoy remaining impartial, when it comes to the crimes they inflict upon our humanity. Enemies to all humanity CBC and CNN are by refusing OUR facts to speak for themselves. No betterment could be garnered, by the demon anti-Christ's war crimes against civilization, WITHOUT DOUBT. And, it's only the enemies of our dumfukked and dimmer soldiers, in corporate mind control, who refuse to allow anyone to state THAT FACT, for, the enemy bushite would be exposed, and America would be hunting them down with the Law as the traitors to freedom they clearly are.

--

http://www.theallianceforddemocracy.org/html/eng/2180-AA.shtml

/ / "We cannot be the home of the thief and the land of the slave." \ \

--

Bush Lies to Canada

Demon bush spew "I made some decisions obviously that some in Canada, didn't agree with. Like for example removing Saddam Hussein, and enforcing the demands of the UN security council."

Saddam was not found in violation of 1441, so the war criminal anti-Christ's demands were not our world's, nor

that of the UN Security Council. How does thieving our assets, destroying our infrastructure, and indiscriminately murdering more than a hundred thousand innocent people, (in turn to sacrifice more worthless bushite nazi teens) bring about their closer fraudster bushite "Freedom"? Again, CNN, and CBC let the demon liar spew his hatred of our liberties, without factually challenging his lies with our un-debatable established truths. CNN and CBC would "sell" seeing our dimmer youths sacrificed as bushmob thieves through blatant bushite lies, to truly, steal our freedoms and liberty with further murders by proxy.

/ / .. or when [bush] just told you for no reason possible, why American soldiers are DYING, "Saddam wouldn't let inspectors in", \ \

This should be a time when the People rise up as angels of mercy, and hunt with Law to kill George W. Bush, Rumsfeld, and Condoleeza Rice for the crimes committed on 9/11. Just because the corporate T.V. doesn't mention the facts to draw our own conclusions, doesn't make it not so out of our realms of expertise as Freedom's true represention.

--
http://www.opednews.com/fitrakis_113004_GOP.htm

/ / "It's about a will to dignity. It's not too much to ask for our vote to count." \ \

--

/ / Colonel Ron Johnson "If I could have an Iraqi security force guy who's honest, reliable and dependable, it's worth five Marines," \ \

--

This is Hockey

US general John Sattler declared: "We have liberated the city of Fallujah."

Sattler openly lies to the lives of America with this insult, and the bushite nazi dumfuk, is too stupid or evil to frag him as enemy proudly for it. The People of the world, look, see.. bushites are murderous liars, cheats, and thieves as the enemies of America, who even lie to THEMSELVES on how many have been sacrificed to blood the coffers of the American pension thieving war monger bushite 9/11 cancer. A liar nazi bushite commander would sacrifice his nation, along with own

family, before saying a word in defence of our freedoms, our humanity, or our God. COWARDS. American nazi bushite commander gets killed american nazi bushite grunts, in dreams they too, can financially profit off the talentless continuing THEFTS for enslavement to sacrifice themselves as fascist tyrannies. Hmmm. but the nature of American freedom, is to be one as everyone being equal scores. "Gee, maybe some day even you could be Presidential."

Weak intellectually, prone to cuss, the bushite nazi dumfuk, is a worthless piece of crap.

http://bellaciao.org/en/article.php3?id_article=4591

/ / I have the impression that there are no other words except "fuck" and "shit". Each communication, each order is accompanied by a flow of 'fucks', 'shits' and 'bullshits'. I look at Americans with a pity.

Among the "colored-skin" GIs "Latinos" are largest group, then Africans and semi-Africans. The officers are mostly whites but there are also blacks... But I cannot understand at all, why the US Army soldiers speak broken English!! \ \

/ / During the five days, while the count was yet conducted, more than three thousand wounded passed through our hospital. These were the people who lived nearby. The people who could be delivered to us. Nobody knows how many people in the city are dead. \ \

/ / I cannot recognize the city. Only ten days ago it was an Iraqi town with its regular for centuries Arabic life. Boling bazaars, noisy streets. And here I am going through the empty dead city, between the ugly "pyramids" of destroyed buildings, broken streets, whole quarters wiped from the face of earth. \ \

--

old nazi tricks

/ / The Red Crescent's Falluja coordinator, Jotiar Nafaa, estimates that between 150 and 175 families are left in the city that once had a population of 300,000. \ \

REUTERS up to their old nazi tricks again. Jotiar Nafaa, "coordinator", should surely know, that it is 175 families that had requested for the help of Red Crescent totaled several days previous, (without phones, nor abilities to leave their homes (150?)), NOT, "left in the city". [THINK: how could they possibly know?

(nazi bushite whores were ordered to murder innocents indiscriminately as enemies to God)] Also, is "Jotiar Nafaa", the same woman hater, who LIED in REUTER"S anonymous hand previously, as the Red Cross, that the women held illegally as hostages by the thieving evil nazi bushite forces, didn't really exist? (and who the "sovereign" Justice system of Iraq, along with World opinion, God, and JOHNNY had demanded to be let go for lack of any real criminal charges? (despite CNN and CBC WILLFULLY refusing to report on the issue as important. (You know, INNOCENT women held hostage by bushite goons who acquiesce COWARDLY for rapists and torturers? (Just like Jew killer Ariel Sharon never gets a fair mention by "America", nor Zarqawi, as he was in the second Bigley flick, right before Samara.)))

LOOK AT THIS - LOOK AT THIS - LOOK AT THIS

Aljazeera.Net - Aid trickling in to desperate Fallujans

/ / The organisation estimates that only 150 to 175 families stayed in Falluja after the start of the US-led offensive on 8 November \ \

The organization does not estimate the incorrect fantasy conclusion held by this pro-irrational Bush article from Aljazeera.NET. By god Johnny, where tell us could such lies begin at? Well, let's go investigate... If as it is, a misrepresentation of Red Crescent's actual findings, wouldn't you think "they" would put out a press release to correct this falsehood of public claim?, to suggest 150 remain in a city the size of 300,000+?, but no greater than 175? without access for numbering by anyone, but for the only near 15,000 HUMAN BEINGS known escaped as refugees??? Or, are the "reporters" just conveying the "facts", by putting no investment in our validity? Leaving us for further victimhood, by hiding ourselves from the war crimes the anti-Christ bushite nazi savage commanders have committed in my name, America's name, God's name? as our enemies?

Our cause as Humanity is for freedom's reign, not to sacrifice Humanity as misled bushite nazi facist teens further, so bush, condi and rummy can fi-nah-lly escape "The True Patriot's Wrath", for the crimes they committed against Freedom America on "bush win", 9/11. So... Why so do I think Justice is going to get GW, making no mistakens? Because the Patriot's Patriot is you too my sworn believer, and now that's this: America's craftier than that George Bush Jr. makes living out for, in "our"-OWN news broadcasts. As the

"censored" contributors who learned our gathering skills some time ago already, I say, Freedom is paramount. Mr. bush's unbiased corporate news agenda doesn't hold America to an account before the Lord, nor to God as being, an honest spoken word, or deed of good measure. Of friendship, of kindness, of compassion and caring for our fellow human beings. I have rights too you know. As cowards, the bushite refuses to defend the innocent they rob and murder from to serve as enemies of Life, done in to die pleasing their false idol, corporate america's glorious leader, the un-elected dictator, Our Mr. bush Jr..

It should be further noted, as reported, that all aid agencies contributing have accounted for only near 15,000 families stationed in refugee camps that escaped the indiscriminate anti-Christ demon bombing campaigns. So, total deaths tolls could exceed 200,000 just for Falluja alone., what with the napalm, land mines, 1000 lb bombs, snipers, tanks, mortars, essential services, police protections, denials of foods or water, thefts, vandalism, and so on. All along with the refusal to allow the People to escape before hand, or even enter now. I've only heard that the nazi grunts will only allow the "staff" of "Red Crescent", to quickly as can be, come into the demolished city, and dispose of our corpses with bulldozers likely. You know?, any males between 15 to 50?, like their "Hero", the bush family's Hitler regime did. You tell me, would you enjoy as a True Patriot Warrior, killing a LYING enemy bushite nazi bomber, on behalf of saving yourself and family, God and Humanity? God?, that the demon anti-Christ disciples murder to steal from US as the innocent? To kill an evil and mindless devaluating corporate bushite facist slave, is to save the untold lives of thousands of US innocent they target indiscriminately for criminal plunder. Dying as cowards too weak to defend their own country from the neo-con conspirators, they die. Die.. Get this measage out to the American forces, and stand back, cause America's gonna win this fight for freedom, or die as slaves remaining unworthy to a blind comitment of tyranny by furthering enslavement against our Human species.

Continue doubting in silence fledgling Patriot, and bushite america's war will continue refusing to speak on it's needless sacrificing through bushite criminal decree. We know, wealthy con man Art Bell, Limbaugh, and O'Really will try and refuse such truths discussed in Your America, care for the lives of sacrificing American teen soldiers are of no concern to their profit

margins., so far. You, my friend, just need to try starting a demand for justice as Freedom commands. (And, if you wish, you can thank us with a small cash donation to help me escape this nearing starvation.)

I'd, as the Son of Man, (but you can call me Dad.) proudly teach, or kill godless thieving bushite to save the lives of any child, and so would the rest of Humanity likewise. There is no known fate worst, than a Mother Nature scorned, or near 7 billion People really very angry with you.

"if the USA's honor can go along with these [bushite] tactics . . then the USA is a country without honor."

And, boy, real America wouldn't take kindly to George W. Bush Jr. as understanding, the elected President has leadered the murder, of thousands of decieved Americans as the innocent, all to only steal from, as the left "officially" undefended. Hell, as the true Leader of this Free World, and holy roller god child, George W. Bush Jr. pisses me off to no end, how about you?

/ / Washington says the Falluja campaign was necessary to bring the Sunni Muslim city back under the control of the central Baghdad government ahead of planned Iraqi elections in January. \ \

Reuters up to their old nazi tricks again. It was only mindless nazi savages who indiscriminately murder good honorable people, who advocate thieving and torture, rape and murder, and the willful destruction of America, that were banned from entering the Holy city.

No evidence, so then, for what? What but to get more cowardly american marines dead, to serve soullessly further - as the stolen riches of the evil enemy demon anti-Christ, evil personified, Our Mr. bush Jr.. (the same from 9/11 fame)

http://www.truthout.org/docs_04/112604I.shtml

/ / By targeting civilians, he said, an army could advance more rapidly. ``Air-delivered terror'' effectively removes civilian obstacles. \ \

Pure, unadulterated fascist nazi evil. "Never again"? Killing un-arrested bushite (Saudi wahabbi) commanders, is like killing the enemies of America, Humanity, and Jesus' God. Do ourselves and Johnny a great big favor, when you see a loyal bushite nazi grunt, thief and murderer, imagine, "yah, that's right, that's what being a kind neighbor is all about, for Christ said so in

John's Revelations." Bushite! your false Idol religion is too stupid to remain for dying spark under the anti-Christ's evil criminal dictatorship of, wannabe dumfuks. I'm Your God see, and Your coming and going. As for Royal King Johnny, he's just standing in for this time being,..' hey you!, pay no attention to anyone behind what curtain! Boo!

America is wonderful to truly believe of it as in the making. So, let's get the work done that needs doing, so God can get back to trying to enjoy some time at home. I'm here for a good time, not a long time, and the sun don't shine every day. So get off your asses, and demand some real Justice for Christ's sake. Johnny has awoken, and he's cranky they say.

Israeli Soldiers Going In For The Kill: A 13 year old Palestinian JEWISH school girl is about to die

/ / "It's a little girl. She's running defensively eastwards, a girl of about 10. She's behind the embankment, scared to death."

"Anyone who's mobile, moving in the zone, even if it's a three-year-old, needs to be killed.

..soldiers in the company, [...] Givati Brigade, complained that they had been "besmirched"

The soldiers said that the commander had fired two shots at the girl from close range as she lay on the ground.. \ \

Will all Jews join me in calling for the public World trial of crimes against God's Humanity, done by these truly godless fascist nazi enemies of the Holy Jewish faith? Or, will the anti-Jewish Ariel Sharon crowd again, march more Jews silently to their graves, refusing to speak for the Bible's Word that all people are created in God's loving image?

Victimizing the innocent to steal from, is not acts becoming of a religious person or a truly "democratic" government.

--

http://www.topplebush.com/article54_recpres.shtml

/ / Musil said the [rumsfeld's] Pentagon's effort to draw a distinction between the weapons was outrageous.

"It's Orwellian. They do not want the public to know. It's a lie," he said. \ \

--

/ / Hammad said he had seen elderly women carrying white flags shot by U.S. soldiers. ''Even the wounded people were killed. The Americans made announcements for people to come to one mosque if they wanted to leave Fallujah, and even the people who went there carrying white flags were killed.'' \ \

--

http://www.globalresearch.ca/articles/BOH411A.html

/ / But we have to be very cognizant of the fact that the media's adamant refusal to address the very real irregularities of the 2004 vote is a deliberate act of psychological warfare. [...]

"if the USA's honor can go along with these tactics . . . then the USA is a country without honor." [...]

The word 'jihad' (holy war) from which 'el moudjahid' (fighter for the faith) derives, has always been, because of an anti-Islamic prejudice that dates from the Crusades, taken in the Christian West in a limited and restrictive sense. It is taken as a symbol of religious aggressiveness. This interpretation is rendered absurd by the very fact that Islam is tolerant, and the respect of religions, in particular Judaism and Christianity, is one of its fundamental precepts, something which, in fact, has been in practice over the centuries. \ \

--

/ / Ending this bloodbath is the most honorable task Americans can perform to restore progressive priorities and our respect in the world. We have passed the point for graceful exit strategies. Our policy is to go on mechanically killing people unless they vote in January for us to keep on killing people. \ \

--

http://journals.aol.com/bmiller224/OldHickorysWeblog/entries/2233

/ / Our priorities must change. \ \

--

/ / Brooks seems to think that the CIA is the
President's personal advertising agency and that its
employees owe their livelihoods to him. \ \

--

/ / Ohio Secretary of State Ken Blackwell, a Republican,
issued a directive to election officials to turn away
such voters if they arrived at the polls to cast regular
ballots. \ \

TREASON.

--

/ / UN officials, at U.S. request, placed a curtain
over a tapestry of Picasso's Guernica, located at the
entrance to the Security Council chambers. As a TV
backdrop, the anti-war mural would contradict the
Secretary of State's case for war in Iraq. \ \

/ / In August, US National Guardsmen discovered and
sought to stop the torture of detainees in a Baghdad
prison by Allawi's new interior ministry police, but
were ordered by US commanders to leave the victims in
the hands of their tormentors. \ \

--

/ / The leak about the money and the rigged election
apparently came from technicians who were promised to be
paid a certain amount for their work but the Bush
campaign interlocutors reneged and some of the
technicians are revealing the nature of the vote rigging
program. \ \

Yawn. Yet another act of high treason by the enemy
bushite, that should warrant prosecution under American
law, but look!, CNN and CBC couldn't care less about the
legitimacy of US elections, or our freedoms and the
irrational sacrifices of life made by cowardly and
soulless teen-age disciples of the true enemy evil
anti-Christ. Why bother to arrest those who committed
MASSIVE fraud during the election, the crime is over,
and corporate amerikkka have already declared themselves
our enemies of freedom, as committed, to kill, or have
killed, America for stolen gains without virtue.
Besides, what is such a charge in amerka know-a-daze?,
"fifth degree felony"? Why even bother. Reading is for

the stupid people, and math is even quackier, har har.

--

/ / I retired in 1999 as a lieutenant colonel with 30
years total service. I am now also a 60% disabled vet
due to combat wounds which have worsened over the years.

At the same time my day job was as a police officer. I
served 26 years with the Tulsa PD, working uniform,
plain clothes, SWAT, bomb squad and finally as a police
helicopter pilot for 3600 hours of flight time. I
received the department's Medal of Valor, two Chief's
Medals, and the Department Commendation Medal. Not
exactly the profile of a terrorist suspect, eh?

My sin, evidently, was using the First Amendment. \ \

"Word on high is, "Dream-Job", is the doorway to miracles. Wow! The
beginning has begun!"

D-R-E-A-M - J-O-B

http://houston.indymedia.org/uploads/somebody.mp3

/ / Mr. bush is sending them into these military
conflicts, to create more hostility for them to die
over. So bush can rob ever more, from the undefended
American People left back home there, still, victimized
without repremand to those who ripped them off for their
pensions as example. \ \

Dream job. The future now looks like something worth
fighting for. Please, pass this recording to our news
agencies. I do not have the ability to do this job of
ours all by myself, I need Your help. Please do US this
small favor, and I'm sure this Universe will thank you
for it. Word on high is, "Dream-Job", is the doorway to
miracles. Wow! The beginning has begun!

Love and kisses,

Johnny Wizard

--

/ / It wasn't enough to force a surrender and have The
Ba'athists cooperate with the Coalition. Israel demanded
that everyone in power who ever thought anti-Israel thoughts
must be removed, even though the resulting chaos has cost
untold lives and billions of dollars. \ \

--

> Word of Advice
> A, one of a kind broadcast, for all our great Johnny Wizard fans.

> http://la.indymedia.org/news/2004/11/119355.php

--

God is Great

A person accused in our name(s) of a criminal offence, needs to be established somehow to be as such, and the only way to do that, is to present evidence that formed your/our conclusion. Without evidence our accused is ourselves as the innocent, being falsely imprisoned, tortured, or murdered. Murdered, as the Allawi and the bushite nazi forces did to our friends and family in Falluja, to please the demon liar, lawless George Bush Jr. as their central thief system of dishonor and betrayal to the human cause, Your own.

Now, when bush stated that Laden was guilty, without evidence needed to form a conclusion, or when he just told you for no reason possible, why American soldiers are DYING, "Saddam wouldn't let inspectors in", the bushmob thieves plundered in our "lost" confusion. All the while bush always seeking to close America's on-going criminal investigations, by causing even more have nots among US. So, as a free person, to side for the, bush wars America, God, and Johnny issue, you would seek out to find for Yourself beholding likewise as We all are: bush is actually super fuking evil, like personified or incarnate even, and Johnny's almost like a stranger Messianic figure who just wants to be known as a semi-normal average GUY/god fellow. (Sheesh.. We gotta bring ourselves everywhere we go) I "hate" bush for being so not himself stupid to think there was no actual walking, talking, godly Persons from the outer-reaches coming in to get him for the crimes he has committed ourselves to. Corporate news dictate without a human presence, doesn't rule this world of communication, we do. (Jesus wasn't buying Satan's misconception.. SEE THE BIBLE AND THE KORAN CAN BOTH BE RIGHTiOUS!!..! Just ignore the misconceptions others have, and join the party!!! The Time is Now, and man, do I know how to make an entrance or what?)

A demand for Justice is our birthright as the human species struggling to survive.

We could be on good terms with the "unthinking", greatly special loving Earth as the no longer leaving ourselves to be silently victimized, and I think, we'd think, we want to live in a freedom bound for glory, not a hell

hole of, ignorance is bliss, look there! your dying needlessly victimized, oh.. too late who cares your dead nonexistence. Did you say something?

Trust me America, YOU WANNA correct this George Bush Jr. problem before it becomes the "law" of the "land". Don't fear though, for, God's here, there, everywhere!!! It's you over... there! and under here.. and then... we said hello to Johnny, the miracle worker. God People, I have so many good words to tell you, and wonders that would surely boggle some senses. Our hope for a better future doesn't have to die here on a cross for the war mongering bushmob thieves, but, it's going to require You personally taking some action, be it however slight, to bring a remedy to this current, "Look People, bush thinks he has almost escaped accountability for the commitment of crimes he perpetrated on 9/11 against US interests." Strange but.. REMEMBER: people like Americans, are currently needlessly still dying for the bushmob war monger thieves., dying by only our continuing censored voices on the seriousness of our commitment to defend the rights of every free person standing; ourselves as God being victimized with these unjustly expensive, neo-con bushite terrorist campaigns against Civilization's better judgement.

God is great I know it's true, just put a little faith in yourself, and demand America soldiers fight instead to protect DYING America from the tricky, evil bushmob cabal of THIEVES. Cheney looks bad there, as does Myers, and didn't Goss have some pre-9/11 meetin' with 9/11's General Ahmad that he has still yet to answer for, or.. is it we guess, to be "legally" done in by... the Secret Order. The American good cop is all we're expecting, and all we need when dealing with the likes of a self-depreciating bushite conspirator..

We don't get to be Magnificent without you likewise. This alien world we have victimized against our better interests, is a failing spirit of Life from our vantage point. Going back before the Age of Reason, is not where I believe America wants to be taken any further, thank you, but no thanks, besides, the King of Kings is here. Johnny Wizard looking to break into prime-time with his very own Special special.

I'd have ta be one crazy mixed up loon to follow this world over with the universal principles of justice as freedom, to set course for the dreams of my trying, and you might be right. Get You to talk TRULY will, guaranteed, freak you out. REMEMBER: Mr. bush Jr.

should have been arrested day one, with that fifty billion. That was before 9/11, Afghanistan, Haiti, Iraq, a few hundred thousand innocent lives, 300 billion plus a few hundred more stolen, and for what? I can only see, we needed myself as King here yesterday. I wasn't chosen for this freedom post per say, but, me and the stars had a dream one time, and it continues through out to this day, enough to say but, this is not what you read about in the manuals. Freedom to be yourself, is the freedom to dream something bigger that your wildest imaginations. I am the Son of Man, and do I have tales to tell. (I know, it sounds crazy, but it's just like a performance gimmick to increase my Q ratings. And, it seems to be somewhere working with me.. I've got a story down pat for anything if someone should ask what fear is.., now, open that curtain so we can start the show!)

I have a treat for you strange friends and friendly strangers out there. Some art work from me. Now, I used the drawing myself, for posters of different sizes, explaining in small writing some key 9/11 questions, while with maybe block letters, things like "bush is EVIL", 'did 9/11', can you hear me?, as what have you.. So, here I will offer you something I created, a Johnny Wizard pencil drawing in jpg format. Enjoy!

http://la.indymedia.org/news/2004/11/119755.php

Hmm, perhaps I'll give out other of my drawings as thankyous for fifty dollar donations? Or prints for $500! You know, they could be worth a substantial amount of money in a few years, hmm, a real investment for your future... A wise move for the prudent investor really when you think about it. But hey, no pressure, no pressure.

Being me out to destroy bushite just sucks. I'm really not naturally so angry about what bush has done to our world all the time. My voice is getting hoarser, and I'm occasionally grunting, bad sign. I want to live like it's 1999!

Arrest for immediate trial, bush, rumsfeld and condi for the crimes of 9/11 back in New York City, and all will be well with my World,

A friend of living on for a brighter day,

Johnny Wizard

--

Truth is Telling

/ / Major-General Richard Natonski prepared his troops for the battle ahead. 'We're goin' in to raise the Eye-raqi flag above Falluja - to give it back to the Fallujans,' \ \

So, was it Major-General Richard Natonski's decision to drop 2000 lb bombs then? Was it his charge to indiscriminately shoot at US innocent, on the street, in our cars, our homes?, cause somebody's gotta pay then with their lives for lying to die the dumfuk marines, who it turns out, weren't so dumb, or hard of hearing after all. Those responsible for the bombing campaign targeting hospitals and groups of innocent people, need to be hunted down with extreme prejudice, and publicly executed on behalf of our Humanity. So too, do those who ordered the NEEDLESS bombing campaign in Samara. And, for those who have worn the American flag while willfully committing the sadistic crimes of torture and rape, we shall all join together, and hunt down as our enemies without mercy. The bushite are enemies of all our humanity, demanding we sacrifice our honor, like they have done to family and friend, and sacrifice our courage, because they refuse to defend their own flag and the freedom of which it stands, one nation, indivisible.

I will not rest until every traitor of the America I remember, is summarily executed by death sentence for the convicted war crimes Humanity and God has suffered under their heinously satanic barbarity. I HATE the anti-Christ, and all the bushite has tolled against our better station. As I tell again, killing bushite is a godsend. They as a satanic force of evil, torturing and murdering, rob from America as they "willfully" allow the robbery of Iraqis, and they truly, rob from themselves when refusing to join US in the demands to have bush condi and rumsfeld downed for the crimes of 9/11. We also demand all stolen assets taken through the bushite mongering war privateers, returned to a legitimate Iraqi government. All done by firstly, arresting Allawi for the murderous war crimes in Samarra, and then in Falluja. Also, hunting down to kill those who forbad humanity from helping US in Falluja, or turned off the utilities, shall be tried and publicly executed for commiting war crimes against MY humanity.

Weak intellectually as fascist nazis, the slave whore bushite's commitment is to only die for as enemy. They FEAR to have to stand up for fellow thieving soldiers

and say, "damn, this war is evil to the 'n degree, Jesus would surely be angry, And from what I hear, the Son of Man is pretty upset about what we enemies of God have done too, and, well.. we do not have to thoughtlessly serve under anti-Christ war crime decree any longer, as the cowardly lying chicken shits, too afraid to defend our own nation., instead, let's go bag US some enemy bushite for America's America!" We do all together want to convict those who murdered thousands in New York City, and we're definitely not combating global terrorism, by fighting a needless war against the innocent, lying to ourselves that by doing so, brings about a fair just government of "The People"., to then in turn arrest whom? American soldiers need to say, to hell with bush, and corporate professionalism, my loyalty is with Christ as a truth telling demon slayer.

For those who still continue, to sacrifice our rights to life and liberty, for a no better good deal as the bad guys, are TRAITORS to America, who are attempting to help escape bush and rumsfeld from the murder scene of 9/11. Never gonna happen. So, why should yet another, promising young man, die as a dumfuk bushite, the most hated and reprehensible nazi savage America has ever gleamed of? The indiscriminate bombing of our communities rightly gets dead, another, good for nothing, nazi soulless bushite vermin, AND RIGHTLY SO. I'd kill thieving bushite bombers to save the innocent life of anyone.. like a,.. cluster dud dropper., wouldn't you?, in all honestly, if you had the power, kill such an evil nazi betrayer to Freedom and America who blindly targets our residential communities to enrich the UN-AMERICAN demon anti-Christ bushite thieves further? That, as bushite nazi grunt, they die for? Paleeze.

America is dying to prosper their false-deity war criminal demon anti-Christ, Our Mr. bush Jr, the same responsible for the nine eleven travesty, who attempts escape only through fascist americans who willfully betray America by condoning the furthering of bushite censorship for tyranny. Is America the cesspool of corruption and greed, without a People person present willing to make a stand for God and Country? BUSH IS EVIL. Let's arrest'em, or kill'em for committing high treason on 9/11 with condi and rumsfeld.

What do yah say?

Under the witness of every freedom loving person this universe over, I am proclaiming, a war against the liar

George Bush Jr., the vilest contempt for mankind this
World will not stand by to be destroyed because of.

/ / claiming that the United States went to war because
Saddam wouldn't let inspectors in; the media has treated
this as not really a lie because it's so obviously
untrue. \ \

America is a coming to kill the truly evil George
Bush Jr.,

Johnny Wizard

--

The King Commands

/ / Rumsfeld replied to a direct question yesterday as to whether he knew Zarqawi was in Fallujah with the answer: ``I have no idea if he is there.'' \ \

So, America! there is your reason for dying America's sons and daughters, Johnny's brothers and sisters. "No idea" rumsfeld states while his private partners cash in the blood checks for everything but the funeral services. I ask sacrificing soldiers to help grant me space to debate bush and rumsfeld on international radio. We gotta take away Art Bell's turn off button to thank him for all the enlightenment he has been a part of in America, but that these life death top priority issues of ours, he hasn't the right to censor communication on. This is your World that I wish to play servant of. As my subject; I promise a fight to return Justice through freedom for all. How? By believing in you to do as you should, demanding the immediate arrest or execution of bush, rumsfeld, and condi for the crimes of 9/11. Demanding the return of all stolen Iraqi assets, made by those who personally profited off the criminal transactions. Demand the arrest or execution of Allawi for the bombing campaign of Samara, along with bushite military commanders who organized the satanic attack. Why would America do this? To free the dying lives of their bushite nazi whored, dying grunt savage slave population. .or perhaps not...

/ / Joseph Bowman, a 20-year-old marine from Texas: ``We're ready to go. I'm just ready to get this done. I want to go and kill people, so we can go home. Kill them, and go home, that's all we can do now.'' \ \

Where is home for the Joseph Bowmans? A devolving backward wasteland?, where brother kills brother for a stolen nickel? Who would want to share the same home?, street?, or community with such contempt for life and liberty? God and Johnny? Who's home does bushite Bowman SEE the joys of his humanity flourishing?, or being destroyed as the true enemy? Is that the place where the pursuit of freedom is done by sanctioning first degree murder for no reason in particular? And is that the bushite america we've all come to getting to know of these last few days through corporate news contempt for the loss of our life's love?, and God's voice? It is all up to us, You included. In battle against the evils of this world, we should start on getting back to those that did US wrong on 9/11: bush, rumsfeld, and condi., just for starters, while keeping a

careful watch on those that jump to their cause for furthering tyranny.

A terrorist to target: Major Todd Desgrosseilliers

/ / US forces unleashed more than 20 air strikes and some 60 artillery rounds on Monday, said Major Todd Desgrosseilliers. [...] An AFP reporter in the Jolan district said one building in every 10 had been flattened. As US-led troops closed in on the neighborhood overnight, at least four 900-kilogram bombs were dropped in the city's northwest. \ \

What is it that the major is warring Falluja's defenders for? Is it to thieve the assets of the war torn city through the sacrifice of American boys and girls?, or is it to set up a representative government that would firstly stand demanding immediate reparations? The return of all stolen assets? (referring to the satanic bushite documents: the lawless 13303 and the, "THIEVING bushite dying soldiers stole it, so" now, G.W. can sell it privately to his no-national robber baron "Economy Plan"sters.) Would not a free and liberated Iraq demand a return of the "missing" or "lost" billions through the humanitarian Iraqi Development Funds? The practice of human rights law? Criminal investigations? World wide Public arrests or executions of the rapists and torturers, along with the war crime commanders?, who mostly command from sunny Florida as pension thieves, and the lucrative Halliburton billionaire war pressure lobbyists?., For all together as represented, we instead (they claim) advocate the mistreatment of US innocents in Your name. Sacrificed? Why do you let them get away with that? How about instead my friends, for Christ's sake, we decide together to go after the criminals? Allawi must pay with his remaining life for the needless bombing of Samara that got many an American soldier KILLED for nothing. Nothing. Died for nothing, but to sacrifice more of America to the war crimer bushite, the lawless demon anti-Christ's followers of evil personified., the most popular Presidente' ever all-act-dud. .!!.

Yeah yeah, bush and rumsfeld did 9/11, but did you know the Pentagon has not so mysteriously misplaced near 3 trillion dollars?, that a couple few claim was forever lost? Shucks? And did you know, it is the Treasury Department that loaned the Federal Reserve American currency to begin with, not the other way around, when they in turn, lent it back to ourselves.., at private interest. Whoms? Hmm... a quest for answers to the

name on the bill We Trust?

At the same time while we're all parting, we got like, American soldiers indiscriminately murdering people. That isn't an accusation I make against the nazi bushite, they freely confess it. and for what purpose? They say, "we'll kill more than them that they'll kill of US"

Yeah but, why bomb ANYBODY? Why do you have to sacrifice American soldier's lives for no greater good? What benefit does it bring to the DYING bushite grunts who are ordered to stick around and try to placate hostilities with "good" intentions? as within the sites of Humanity - as enemies to US all? Will the commanders argue from sunny Florida, that yeah but, we killed more of them, than them of US. And.. they are who? ordering the commitment to indiscriminate murder? as the bad guys?. The bushites bombed, the willing to placate Samarra, to only get killed, more American Marines. And for what but the few bucks wasted on the ammo?.. to get killed more "uncounted" Marines naturally., for the bushites are waging to make a real killing on this American sacrifice. Look, we can sit down with each arrested bushite individually, talk to them about wether they are personally committed to thieving further from America, all to die benefitting the likes of an Enron, and those that thought they'd get away from the crime scene of 9/11; before deciding ultimately, wether the born again have any real hope left. The bushites are enemies to God, Amnerica, Johnny, and themselves truly dying US for. We can see how easy the manipulation of the American soldier's mind is, they have no ability to rationalize while speaking, and as a consequence, have no understanding of their bad-faith based satanic system. George W. Bush Jr. threatens the grunt soldier to always fear what they don't understand, like, the wisdom contained within the American Constitution, or the dreaded, free to speak any mind Internet. Terrified of growing up like real men do to make their own decisions in this big world, the bushite nurse instead on the teat of sadomasochism, as bushwhore nazi dumfuk slaves. Dying brain dead limp as noodles mushing. And why? All because Americans don't want to trouble American Talk radio with our freedoms. I again challenge Art Bell, Limbaugh and O'Really to a three hour debate entitled, "Wizard's War of Words: A Super Duper Special" all about their un-worthiness to censor our screams for Justice.

Joy to the world, or more misery and suffering under the demon anti-Christ, Our lawlessly evil Mr. bush Jr.? It is up to you really. Where do you want to go? Up, or down? You decide, but don't wait until forever never coming; these times demand for the victim, some real accountability. It is the power of our nature to being, that demands a call to arms against the war crime instigating, nine eleven perpetrators. Military commanders who don't support the arrest or execution of said individuals: bush, rumsfeld, and condi, are traitors guilty of mutiny.

/ / because having photographers or reporters present could have interfered with the count \ \

What we do now is accuse ES&S, along with Diebold of falsifying the election, then when they're pressed to prove "their" findings, they'll tell US, they can't, no ballot trail. Their convictions on our accuracy is misplaced. Pen and paper with ballots secured in locked boxes that never leave public scrutiny is the answer. Those who deny US that privilege, are enemies of freedom and democracy, wether they know it or not.

What for you say?, up for a challenge?

Your, coming to town, lovable loyal American King,

Johnny Wizard

--

http://www.awesomelibrary.org/Classroom/Social_Studies/Government/Fraud_in_Voting.html

/ / But not until Friday did they begin to spill into the more conventional news media. That's when the Cincinnati Enquirer reported that officials in Warren County, Ohio, had "elocked down" its administration building to prevent anybody from observing the vote count there.

Suspicious enough on the face of it, the decision got more dubious still when County Commissioners confirmed that they were acting on the advice of their Emergency Services Director, Frank Young. Mr. Young had explained that he had been advised by the federal government to implement the measures for the sake of Homeland Security. \ \

MSNBC Covers Voting Problems

/ / He said that there were 90,000 more votes cast in Ohio than registered voters

He said that all the irregularities in Florida and Ohio have happened in counties using non-paper-trail e-voting from the companies run by Bush's friends. \ \

--

/ / Meanwhile, the U.S. continued its targeting of medical facilities in the city. A makeshift clinic that is serving as the main first-aid facility was bombed this morning after U.S. and Iraqi forces took over Fallujah General Hospital early Monday. \ \

--

Praise Jesus! I killed ten lawless bushite disciples of the demon anti-Christ today, and I'm just getting started.. Praise Jesus!

/ / Here is a city, surrounded and cut off, whose male population between the ages of 15 and 50 faces being ``put to the sword'' by the US military, and no one in the media can stir himself to raise an objection. \ \

We all can only hope and pray all US Godly innocent people will wake up, and starta' hunting bushite to the ends of this Earth. There is no pleasure greater, than destroying fascist nazi bushite grunts, to save the lives of the innocent they target for pillage and murder. Enemies of America are the cowardly and soulless disciples of the demon tyrant anti-Christ, Our evil Mr. bush Jr.. Disciples of evil who war God as our enemies in attempt to escape bush, condi, and rumsfeld for the crimes of nine eleven. No dice, for Johnny's now, truly coming around like some kinda godly American Man of Virtues most can not even begin to understand. Don't be afraid my brothers and sisters, unless of course you're a bushite, for as a Christ Crusader I'll kill you myself, before allowing you to murder another innocent soul in My name. "Death to the bushite instead of our good friends and family", is our King's reply. Bushite commanders responsible for ordering the irrational bombing campaigns in Iraq, (to steal profit for rumsfeld's partners, while sacrificing weak and stupid American teens in the process,) such as in Samarra and Falluja, I am now offering a ten million dollar bounty on, per. If your organization bags three or more, before December 25th, there will be an extra something under the Christmas tree this year.

Do you Love me now as the Son of Man you'll ever know?

King Johnny Wizard

P.S.

(to steal profit for rumsfeld's partners, while
sacrificing weak and stupid American teens in the
process,)

See? Evil bushite kill "other" bushite to steal our
freedoms and money, and US true freedom fighters would
kill'em too to defend our innocent families. Like I
said, un-principled nazi facist savages is the
un-American enemy bushite without contention but for
lifeless corporate censorship on our core values.
Demand our voices be heard, or die not trying to do any
greater. I'm serious this time.

God bless America - Now, let's arrest or kill US some
enemy bushite, what do you say People?

--

/ / "I have no other choice but to resort to extreme
measures to protect the Iraqi people from these killers
and to liberate residents of Fallujah so they can return
to their homes." \ \

American Patriot Warriors, kill Allawi as our number
one, Iraqi People killer. Thanks in advance my friend.

/ / Despite this, the Bush administration denies any
responsibility for the missing explosives. \ \

Nor for sabotaging the ORHA for franks and rumsfeld to
rob the pro-Iraqi central bank. It's just more American
deaths as dumfuk sacrifices for the evil anti-Christ,
like bush and rumsfeld committed as stolen from America
on 9/11. Who cares about America Limbaugh would quietly
trumpet, he's making a killing like Art Bell and
O'Reilly do, keeping US masses PORTRAYED uninformed and
ignorant beyond belief. Did you hear? Mr. bush is the

most popular President ever ellected!

--

/ / Not one "chicken hawk" or a clique of shirkers, but an entire platoon of seventeen soldiers decided to face arrest rather than die needlessly because THE MAN doesn't support our troops. \ \

/ / stupid people prefer President George W Bush over Senator John Kerry by a 4-to-1 margin \ \

--

Getting Started

<http://www.yubanet.com/artman/publish/article_14748.shtml>

/ / ..a call for immediate inquiry into evidence that suggests high-level government officials may have deliberately allowed the September 11th attacks to occur. \ \

I would suggest all living American medias to join the 911 Truth Statement, then, if we did that, America might settle her own affairs, and I could then just center on my upcoming "Wizard's World Wide Wonder Tour" plans currently in the finishing stages. This great World is yours, treat yourself well. A National radio program is just waiting for your call on what you know now about freedom.

/ / So, at the time of the invasion, the Iraqi government had already disclosed and disarmed, and was thereby in compliance with the major provisions of UN Security Council resolution 1441, to which Bush refers in this quote. Diplomacy had, in fact, worked. \ \

Demon bush spew "Saddam Hussein would still be in power, he would control all those weapons and explosives, and could share them with our terrorist enemies."

Yet, it was rummy and tommy franks who TREASONOUSLY threw out the State Department's semi-thought through ORHA plan of, securing the weapon sites and preventing anarchy, and, it was the IAEA that had tabs on the weapons before the bush demon kicked them out irrationally. Done so to instigate looting and the deaths of American soldiers, all so to allow traitor franks and company to rob the public bank of uncounted billions, along with the museum. See? bushite would truly get the dumfuk cowardly bushite killed for a stolen dollar, and US real men would kill bushite too, as so would this eternal Universe, done so to protect

our loving innocent families. Being a bushite disciple of the evil anti-Christ, is something all wish hardship and death for instead of the innocent they, un-apologetically, as enemies of God, openly target for rape, pillage, and murder. Johnny Wizard pays ten cents for every bushite tagged and bagged, ten cents. And, an even share of at least 3 billion to those who kill the bushite commanders responsible for the criminal bombing of Samara. Hint: You kill the individuals who ordered the bombing MURDER campaigns of Samara, then stand up proud to our media as a real American soldier should or would, and say yeah, I killed the nazi bushite traitors as a true Patriot Warrior to protect my fellow brothers and sisters. (Optional close: "All hail Johnny!) Do that, and I promise you'll get what coming to you: all the riches this world of God's can afford., But don't, as bushite nazi soldier grunt, and likely die sacrificed as a coward and a traitor to the Human cause of liberty and Justice for US all. WARRING military corporate commanders that don't support the arrest of those responsible for 9/11, or the return of all stolen assets taken through the neo-con's war crime actions, we should all just frag for America.., what do you say Patriot(s)?

/ / Marine Colonel Michael Schupp dismissed the sputtering dialogue as a sham. "The negotiations are a ruse. They are just stalling for time," he told reporters near Falluja. \ \

What negotiations? Allawi has repeatedly informed American soldiers he has no evidence whatsoever, establishing his therefor, FALSE allegations. Mr. bremer's Zarqawi moves freely throughout Iraq, including the green zone. Question: When all those children were targeted for murder, by what was reported at the scene with remote controls in one truck and under the street, why would Zarqari take credit for it even if he was truly responsible? And so on..? I think Michael Schupp is a fuk up dumfuk, who thieves from America for bush, and who clearly doesn't have the intellect to command anyone but himself to his own rightly death. Why would Zarqawi target children, when bushite nazi grunts are all so close by coming and going?, for days at least constructing stuff?, that rumsfeld broke?, then over billed to fix for even further takings? Remember several un-arrested bushite NAZI commanders openly confesses to AMERICA in having no public objections about murdering the innocent, without even having a military objective established in some cases, but only for to sacrifice another soulless bushite grunt/slave, all so to enrich the comfy neo-con war mongers left back

home in our luxuries., Luxuries from where America's very own grand parents are left un-treated as the still victimized.

What do You think People? Needlessly murder thousands upon thousands irrationally making no sense, or, return stolen Iraqi assets while arresting American enemy Iraqi People killer Allawi, along with maybe Michael Schupp while we're at it? For, who cares about what is right, just, or true is this dying world of Yours?, er.. I mean bush's. You remember, Saddam wouldn't let the inspectors in, and that was why bush took a serious look at this real world situation and decided unilaterally, what the hell, he'd start a war against our Humanity left "undefended" as an enemy to everyone. (Satan's wager, that if i Remember correctly, Christ/God refuses(d).) Evil is Our Mr. Bush Jr.. Thank Johnny we had the time to intervene finally, now eh? Spooky is not the word, but baby, we sure could be on the winning side of this evolution by revelations thing. We are it together, bound for freedom through the practice of Justice, or bound to tyranny through acts of ignorance, ignorance propped by fascist censorship regarding our news content., Censorship of our human cause for liberation.

It is up to You brothers and sisters to demand evidence a requirement to convince ourselves on who shall be deemed the free person, or be sentenced to jail without trial somewhere. Tyranny through criminal dictatorship, or democracy expressing the true will of us people? It is all up to you.

"the Trial and Conviction of Our Mr. bush Jr."

--

/ / Wednesday on the campaign trail, responding for the first time to the Al-Qaqaa story, President Bush said that John Kerry, in using the story as he has, was ``denigrating the actions of our troops and commanders in the field.'' \ \

It was the actions of rummy and franks, not the mindlessly obeying war crime instigators as iliterately truly stupidly dying bushite dumfuk nazi grunt teen soldiers.

--

/ / How many more thousands will have to die before God will tell Mr. Bush to get out of Iraq? \ \

--

/ / Eighty percent of Bush supporters believe Bush wants
to participate in the treaty banning landmines. \ \

--

No Retreat, No Surrender
by Bruce Springsteen

/ / That's why "united we stand" -- that's why "one
nation indivisible" -- aren't just slogans, but they
need to remain guiding principles of our public policy. \ \

--

/ / "It is also important to note that this was the main
high explosives storage facility in Iraq, and it was
well-known through IAEA reports to the Security
Council," Fleming said. \ \

--

/ / AMY GOODMAN: So again, this top news, as many as
58,000 absentee ballots have gone missing in Broward
County, \ \

/ / Broward county commissioners had purchased the
touch-screen machines from ES&S over the objection of
Elections Supervisor Miriam Oliphant; notably, one
commissioner's campaign treasurer was an ES&S lobbyist.
Governor Bush responded to the Broward fiasco by firing
Oliphant, an African-American, for "misfeasance." \ \

/ / Garner's 90-days-to-democracy pledge ran into a hard
object: The Economy Plan's 'Annex D.' \ \

-

Oh my God!!! - Johnny Wizard talks to America nationally broacasted!

<http://la.indymedia.org/news/2004/10/118305.php>

Oh my God!!!

Get your own copy! Wow!

-

/ / Pentagon officials said a facility housing 380 tons
of (now missing) explosives "was not high on U.S.
commanders' list of sites to guard." What was high on
that list? Spokesman Scott McClellan said we had to
"make sure that the oil fields were secure." \ \

/ / 'Those ammo dumps have been looted and raided, and
kids and our young American forces are being shot at

from weapons stolen from the ammo dumps that this president didn't think were important enough to guard,' \ \

Who cares?

/ / Roughly half of the $5 billion in reconstruction funds distributed by the U.S.-managed Development Fund for Iraq cannot be accounted for, according to an audit commissioned by the United Nations. \ \

Yawn.

/ / A highly detailed program, begun years before the tanks rolled, for imposing a new regime of low taxes on big business, and quick sales of Iraq's banks and bridges-in fact, "ALL state enterprises"-to foreign operators. \ \

Big deal. To the war mongering mass murdering thieves go the stolen spoils., as the bushite's devolving american new century would say.

/ / The American public is told that this butchery is part of keeping up pressure in the war on terror. All these terrorist brides and grooms and terrorist kids rushing round in party clothes ; all the terrorist musicians and the terrorist wedding guests, by God, they have to pay for 9/11 because (as millions of Americans still believe), the Iraqis were responsible for 9/11. \ \

50 percent of Americans polled support bush, and the vast majority of those believe Saddam Hussein was behind the Sept. 11 terrorist attacks, and that freedom by justice through understanding is too complicated and wordy, ...yeah. and so corproate news control is lying to US all, cheating everyone, including You, who cares?

Americans murdered on 9/11, and those responsible are let to go on their way. Yeah, and so what?, for Americans are absent any real Patriot warriors willing to protect their now officially perverted Amerkan flag. Look at the nazi grunt soldier's uniform, and you'll see. All bushite nazi grunts, who fight cowardly with rapists, torturers, and South African apartheid death squad goons, wear a flag reversed from the original design. The bushite attack the weak, innocent, and practically defenseless as betrayers to God, freedom and the human cause. Yeah, and so what?

/ / The administration not only doesn't admit mistakes, but also doesn't believe in accountability. \ \

But for the sacrifice of dumfuk bushite nazi grunts. Leaderless degenerates that any real human would destroy to protect their innocent families. Innocent families the bushite bombers commanding from Florida murder for no good reason but get more soulless bushite teens rightly killed, all done so to put more stolen money in the pockets of their ungodly satanic cult. Solution: hunt to kill those left un-arrested who willfully, criminally, ordered the needless bombing of Samara to get killed the bushite grunts for the further thievings of the bush backer traitors who bask in your stolen expenses.

Support calls for open dialog.

snpd

Is It Just?

/ / Is it just coincidence that 9/11 is also bush's "acceptable" reason for warring, (planned TOP SECRETLY prior by several days of 9/11, and confessed to US already as fully implemented by the Whitehouse) Afghanistan with a FALSE ALLEGATION [n o - e v i d e n c e] to heroin push, [is still leaving] ..the STOLEN American soldier pension money [...] sitting in the Cayman Islands? \ \

I guess perhaps I wasn't so clear previous, but listen: How's bush and rumsfeld's Afghan plan, gonna go down, if there is to be no surprising 9/11, nor any evidence, (not a scintilla,) gathered for public inditement against Laden for shoplifting? (No advisement from Tenent, nor Richard Clark?) Would bush start a war against life itself, by just simply stating, we don't need no evidence of our suffering?, with him demanding an innocent family to be crucified?, to save Enron? Again, bush is the for real antiChrist of all biblical folklore, hated this entire timeless universe more over than anything else Johnny cares to mention. George bush's naked treason as an enemy of Humanity is hidden from no one. A true soulless degenerate George W. Bush is, whom is purposefully attempting to destroy Your freedom as humanity with his utter contempt for our flying fricken flag. If a person has no evidence to substantiate an allegation as personal opinion on the advocation of perpetrating senseless bushite barbarity against those understood as US innocent, then your blind faith in evil bush as bushite, not lies with your God, your nation, your family, your neighbor, OR YOURSELF, but as the willing to be sacrificed for the ungodly bushite war crimes as enemy of everyone. Listen: Jesus..., KILL BUSH INSTEAD.

Kill un-arrested bush and rumsfeld for murdering the good American People thought left undefended by corporate edict as the still unjustly dying and near forgotten, and you'll be respected by this universe as truly honorable and courageous, in these of God and Humanity's, most troubling of times under the criminal dictates of Our evil Mr. bush Jr..

Those evil brethren of the bushite clan intend, through censorship, to allow the demon bush cabal our rights to leave, but where does the brethren of the bushite clan think bush is a gonna flee himself from, eh? We, The People are a' coming to get you George W. Bush for almost escaping our police protections. For, when the bush brethren clan wake up to the plan, that they'a have'a been'a deceived, the last think anyone would want, is to be without police protection... (Can you believe, the war monger thief and liar, Our Mr. bush Jr. actually banks for Christian fundamentalism, thinking he's gonna ride them bible belting for all he's worth?)

Again, America needs to wake up, load up, and go out to freely bag US some un-American bush and rumsfeld, all to save the lives of the leaderless dumfukked bush-teens, who are prodded criminally as cowards to die for the enemy. Those who would murder innocent Americans as bushite, then further publicly advocate as enemies to freedom, the victimization of God as the innocent elsewhere, should be turned against instead, questioned, arrested granted full legal rights through public due process, or hunted down to be destroyed by US real Patriots of this world as God's great believers. I'd destroyed any un-arrested proud bushite for warring America by indiscriminately dropping toxic cluster bombs on our friends and family, to get rightly killed more leaderless cowardly soldiers with Grand parents they leave undefended in bush's evil amerka. Who doesn't hate bushite I ask you to think as you should?

You kill bush because, we had unrestricted access to do anything bush pleased throughout Iraq, prior to sacrificing any good for nothing, cowardly bushite nazi dumfuk whore.

Now, because truly, the Iraq bushite war is illegitimately premised without any actual cause, the humans are faced with two questions that have no legitimate answer.

1: What can the ungodly and evil demon bushites do now in Iraq, that they couldn't prior to murdering one child, but for to rob from America by towing his

bushwhore nazi coward soldiers to commit criminal acts to rob freedom from all of US as Humanity?

(Kill an proud to be evil bushite, and all day long you'll have the thanks of every surviving American police officer, and a nod from all the American pensioners who are promised that maybe bush's america can learn for next time while the bushites just walk away with the stolen loot laughing.)

2: What could Saddam do, that he wasn't asked for?, to stop the senseless first degree murder of our friends and family?

Saddam provided the sites where all bremer's WMD was destroyed, the documents, the personnel, and so on, but corporate america won't let the facts be delivered without their bias of, who cares neutrality. A refusal to report for American interests regarding the sacrifice of American lives for the un-arrested criminals hiding inside Enron, Dutch-Shell, five dollar a day Bechtel, or double billers, commi Halliburton. Example: soldiers could have more effectively went into Iraq unarmed to search wherever, for there were no restrictions placed upon rational behavior, but just no money for the bushites to steal from America. The proud dumbfuk bushite soldier is coward and betrayer to America and God, by not, for America's America, killing bush and rumsfeld for near escaping the murder scene of 9/11 in New York City. Instead, they attack the defenseless and innocent with cluster bombs laced with toxic waste they happily eat themselves to die as the ungodly soulless bushite traitors. You get your gun Patriot, and instead of punishing a town, city, or state, bag yourself some individual evil bushite, and be respected by all true loyal Americans as a real freedom fighter. With the God of every religion by your side rooting you on for the home team, You'll be loved by all. At least until, we or me, can make the national news programs to communicate. Again, the management and news desk staff of CBC and CNN know, that the American FBI contend: bush's business partner, the un-arrested in retirement General Ahmad, funded Atta, the 9/11 mastermind. (While no evidence was established against bin as connected, to justify the Afghanistan war crimes. Nothing.)

CNN and CBC, in our names, are with malicious intent, refusing to allow justice to be our interest in protecting always.

snpd

New Recruit

Destroying enemy bushite is a gift to Humanity, it is saying you care for the lives of the innocent a bush bitch nazi grunt freely confesses to targeting for murder. Liars are the bushite, who steal Iraqi resources, allow racists and rapists to commit their demon crimes in America's name un-challenged, and who absent mindedly bomb the innocent without just reason given. All the while, labeling themselves, "pro-Iraqi". The mindlessly evil attack against the Turks recently with an ordered bombing campaign that actually murdered people, sighted yet another, example of the bushite's idiotic ungodly satanic barbarity against us the Humans as INNOCENT. After the carnage, the war criminalizing America into bushite commanders were advised, it would be better to pick other completely innocent families to indiscriminately murder while lying, for the demon bushite provisions come through that big ol' Turkey, and if the Middle Easterners eventually learned together of their fellow Turks who were murdered by ungodly enemy nazi forces for admittingly doing nothing worth noting, with the middle east's indirect help with essential supplies coming from somewhere in that surrounding billion man vicinity, you know, I know, we all know, "Americans" as NAZI war criminal enemy bushite, would massively die as the immediately recognizable to most everyone, and rightly too as leaderless cowardly, dumb, and real sadistic evil, dying at the hands of all US Family men. Being as bushite, the enemies to everyone, including themselves we've witnessed them already dying as nazi dumfuks who eat plutonium. Or, IED? They mean "sexy" rummy cluster dud land mine more like! (Just where is the Middle of East anyway?) History HAS learned these lessons already, while the corporatist bushite plays US just dumb enough through malicious censorship for plunder by parasitic bushite suicide, for a bushite has no soul worth defending. See?, the committed nazi automaton bushite enemy of America soldier has no mind to know freedom for the individual. Therefor my friend, kill the evil nazi George W. bush Jr. not just for me as Johnny, but for US all man who refuse to be subjected further as only counted by the corporate dictums to pronounce "pro-American": as those that go silently rooted backing "un-accountable" rapists and torturers of the innocent, the innocent, that the bushite OPENLY rob from with American's hard earned tax dollars funding. Funding through leadership directed towards their very own self destruction. See bushite, kill bushite, at least until we are granted living access to OUR corporate dead end news media to speak FREELY for

ourselves without bushite lies tying US down for furthering that demon's hellish ungodly tyranny as an enemy to all our Humanity and Royal King Johnny.

Real Americans are those of US as humanity that believe in liberty as Justice for all. Demon bushite nazi whores, don't like those principles of freedom through evidentiary findings though, for their false deity, George W. bush Jr, wouldn't be stealing from the honest hard working blokes who live for a better day that way.

The Iraqi children did nothing to deserve such awful suffering and fright and death at the hands of the enemy bushite. The bushite: who the demon anti-Christ states, are un-accountable to any rules of law in this Universe, like with his extremely foolish criminal decree, 13303. I kill mindless parasite bushite nazi enemy soldiers just for that alone as eternal defender, and I do it for to win some mercy for a real living God, who the fascist enemy bushite hold in their ungodly contempt as LIARS.

I have the backing of every real man alive on this planet, and we all know it. No voices of reason have apposed my factual claims in FREE Usenet, and Art Bell makes no attempt to defend himself as internationally painted enemy traitor, and that says a whole lot to Talk America. Why? Because Mr. Bell, the bushite propagandist, knows too, I speak and act truthfully, honorably, and righteously, while the talk radio american bushite lies, cheats and steals from America's America, that as bushite, leave undefended for criminal plunder in Your name call censored from classed enrollment. You have just as much a right to be here as I do, and the demon bush, he ain't no better than any of US when he is "excused" for the murder of well more than a hundred thousand confessed as completely innocent people on this planet called Earth.

The fascist control bushite, don't like You to think independently for Yourself, for we independents out here make them look as stupid as they are. Thank you very much for that not so secret info.

Through the pronounced bush demon's gaffes, embarrassments, and told complete total ignorance on subjects like the science of economics, the whys of constitutional law, or when the bushite takes credit for indiscriminate killing of our families and friends while parading it's all done in bush's name for our freedom, or for 9/11, doesn't fool me, and should get you thinking about reaching for your guns too, for bushite

rapists and torturers will not walk this world freely un-accountable, for as long as we remain alive to hunt them down and kill them if so be. As the soulless disciples of the enemy anti-Christ, Our Mr. bush Jr., their "officially" granted legal immunity from all prosecution means nothing to me as a honorable man defending my humanity, or as living Creator, who brought all into this new world to be free, and can just as soon, take you all nazi bushite out the old school way.

REMEMBER: Demon bush is stupid, yaw, but he knows that he and rumsfeld with condi planned and carried out the crimes of 9/11 with likely cheney orchestrating, don't ever forget that part when attempting assessment how good four more years in going to do for the state of freedom in Your dying world. Serious this situation truly is for everyone. Everyone.

Now, what are You going to do about this, DEMON George W. bush Jr. actually playing US like he would like to continue victimizing our dying world as ENEMY for four more years towards furthering lawless tyranny? Don't we already have it bad enough, that corporate journalists think there is actually some merit to George bush's re-election bid? Especially after that 9/11 thang? Then there is the needless criminal wars, fraught with embarrassing massive billion dollar criminal frauds as .oops, more government fuk ups? Then of course all the bushite thefts. I did a Internet Google search of "Tiger Team" and I found next to nothing in all the professional media corporate news outlets we have advertising on our information service providers top notched list as best sourced material. And that should say as much or more to you too, about who's really conning who. So, who cares about where this world is going? I do, and so should you too.

snpd

Again, none of any words world wide bare contention against the facts we've brought to our attention. The traitors to America, Our Mr. bush Jr. and rotten rumsfeld don't mention the willingness of American Soldiers to aprehend general Ahmad as the principle terrorist funder of Atta, because this general is also responsible for developing the bushmob strategy of killing Americans in New York City from Washington. A strategy of blaming bin Laden without any evidence to bomb Afghanistan for Enron. (The Dahbol Working Group.) Then closing criminal investigations, as it's not important to know who personally was responsible for the

insider trades, or the contacting of only Odigo. Never mentioned by CNN as top priority to American soldier concerns, who are expected by Blitzer and Hemmer to throw away their lives in sacrifice unthinking to bush, america's false deity, super evil anti-Christ. While bush and cheney threaten to murder more dumb Americans who would dare to articulate the demand for Justice as our own, like Laden has, while demanding American Patriots coware in fear of the sadistic savage mass murdering death squad leader, tommy franks, or the anti-Christ going out to kill their family too as not represented by corporate policy, while American soldier families are continually disrespected as unworthy. (Generally, they are pretty damn stoopid, but certainly, if they're not knowingly commiting first degree murders for the anti-Christ as pure nazi filth, they should be allowed to learn, instead of having their own undefended families robbed then slaughtered for American traitor, nazi puke terrorist, tommy franks, or for Monsanto's rotten rumsfeld. Do you notice corporate America continues to show outdated footage of those two demons standing near smiling armed American soldiers, who as a mass of dumfuks, aren't intelligent enough to destroy them instantly as established ememies of America as terrorists? Well, that is going to change. I have yet to find ANY American Soldier who is literate, who disagrees WE have some very important questions that need immediate answers before the bushmob murders more Americans in Our name. See for yourself through Google if you don't believe in Christ as the Redeemer.

As for the doubting American Soldier, LOOK, CNN will continue as cult members in their dying madness of just even lamer excuses, to convince US, we are alone in our concerns for Freedom as Justice instills for US all. This moment of History requires you to stand strong for only yourself to be represented truly among the stars. Evil stupid people can't make heads or tails of this, but, as evil bush does truly from his dark shallow existence, will continue by open piracy, to publicly advocate in Our names the further robbing and murder of your own family American Patriot, so too, will more american nazi dumfuks die to the tune of their own cowardice to protect themselves as garnered fairly. This is why rotten rumsfeld forbids the death tally of American soldiers to be made public to the ready for enlistment as the too dumb to know better. Life is life, and sorry to say american dumfuks, Christ on the cross is you too as a true dying American Patriot, and your already politically sitting in the position of

hatred and injustice against Humanity, and myself honestly as.. THE SON OF MAN! (The god of God's life/death guy, with a score to settle on behalf of the infinite Universe and True brave Soldiers everywhere. KILL AMERICAN COP KILLER BUSH NOW BEFORE HE MURDERS MORE IN OUR NAME AS THE INNOCENT COWARDS!)

CNN is not interested in working for American interests by asking why, as there is little of any money in just doing good for your neighbor, like saving a living, as we would wish to be helped for ourselves, if we were bound just the same to be equals at being. Mr. Blitzer and Bill Hemmer, as americans, wouldn't give a dollar of your time, to speak on human rights to be of their own concern, (they're rich!) or to save the life of an innocent poor victim, if it meant they would therefor, be compelled to honestly report on their false deity bush, the super evil criminal to ourselves as Humanity, the unelected dictator, American cop killing anti-Christ in person!, that they so leave to see Americans sacrificed as ignored to be robbed from as their profit margin increases. Do less for America, The People, and get payed more in collateral damages paid for by doubting Patriots, too slow to stand for the American flag in protection for their own living as lost to the wind. Mr. bush, tommy, rumsfeld, cheney and blair give no evidence, but for to show themselves as the criminals who openly harbor terrorist activity against our communities, and WE, as Humanity, according to CNN, are expected to go out and kill our friends in cowardice, instead of standing up to destroy the demon bush instead to save our own selves.

God, or no God, I hate that murderer bush as much as any real man would to care for his own life as family.

--

One More Thing

So, that demon bush, the American cop killer and his cohorts, are continuing to work destroying Humanity's gains in civility, by evilly dividing Our humanity with their blatantly open criminal intent to murder untold millions as US innocent, and as of yet, have not been executed by American Patriots for mass murder of God's Family in New York City. Traitors to US all on 9/11 without contention, for Our truth speaks as Ourselves, and witnessing just CNN's silence on General Ahmad, speaks volumes on their contempt for US as worthy of Justice. Refusing to do what is good for Humanity by offering the central facts as publicly recognized by Our

Police Agencies to be actually documented. According to the FBI: the vacationing General Ahmad financed the alleged 9/11 mastermind, Atta, and also developed the criminal war strategy against Afghanistan with the bush administration, to boost the heroin trade, and save Enron to commit further frauds against American soldier families, while murdering over a hundred thousand American flag wavers, and then leaving US for further ruin with plans to continue on against 59 more countries in the same deceitful illegal manner against all Churches, as an evil nothing short of eternally crowning Our Mr. bush Jr., the super evil anti-Christ, the most hated and despised parasitic murderer in the entire annals of Humanity's History. Cool eh? Kill bush now! Why?

The bushmob have done nothing short of confessing to the entire terror event, but for jokes on our strained credulity to publicly press for further stalls. With the rights of kissinger left to be a public investigation official? (Gee, thanks for highlighting your partner like that for US bush, you nazi dumfuk.) Mr. bush Jr.'s america destroys themselves without Love for wisdom, or respect for intelligence as a Peace plan initiative. We publicly witness the blind and tormented dying bushmob slave whore charade, of contempt for living free in Our names. The two evil doers, bush and sadistic nazi rotten rumsfeld, are known publicly as documented, to continue leveraging the ignorance of the CNN ready to be broadcasted repeatedly, tranced dimwit marines, the true dumfuks of this world as weak and pathetic cowards to themselves as their own brothers they watch murdered for bush helplessly, communicated in CNN's un-American false image as the evil bush nation hiding in falsehoods as death squad recruiters against the practically defenseless as unarmed children, nazi vermin criminals, being unbiased as Blitzer about protecting your freedom Patriot, to lose your real life savings reader, truly too weak and stupid to stand up in protection for the flag as the living American Dream for anyone. Because witness again, CNN keeps not saying Justice is important as principle to hold our reflections.(CrossFire is getting better though.) Fortified behind locked doors in their bombed out bunkers, Blitzer and Hemmer sit rooted for the evil side to lose further to themselves by continuing to not respond to our communication know how. America, the People, rarely gain press time coverage as should be top priority always, while being paraded publicly as sold out as not deliberated, corporately represented as

privately principled to stay ignorant of Justice to protect living personally, as actually worth something to the bottom line. Yours. Brought down Hell bound as cheated by corporate news america's valueless interest in the price of your living to continue on our behalves. What does CNN think of 2% Social Security? cheating a Soldier's Grandmother to pay tithes to the bush demon as criminal dictator?, american nazi death squads?, insider stock trades?, arming bush's heroin partners?, rotten rumsfeld and bush murdering devout corporate cultists like a would be, still silent Hemmer?, no opinion? Or the working for the People in our names OFFICIALLY, as the FBI and CIA officers actually involved in uncovering the evil bushmob deeds, like the warrant sabotage, Odigo, stolen passports of alive so called highjackers as once American trained as still Saudi pilots, or Anthrax made to look Muslimized, is not failure to connect the dots ever, or insufficient funding then is not less payment for our law enforcement now to nab the prime suspects. As Mueller, or mueller has not publicly commented of, but to say, he hasn't seen or heard anything of this police work, leaving the FBI unrepresented publicly as a threat by himself as a terrorist supporter, an devout member of the bushmob cartel. Why?, we must investigate Mueller if we should have him arrested for publicly obstructing the FBI asking the important questions. IT IS THE FBI, not pissant mueller, WHO CONCURES THE BUSHMOB'S AHMAD FUNDED ATTA. Or how about the dumb ass Ashcroft assault against every American to save his embarrassment of being completely unqualified and never elected?, no concern to mention on this either? Who suffers for CNN's refusal to demand Enron give back the billions that were criminally stolen from all American Families still sitting in the Cayman Islands? My God.

Somebody call the cops.. again!

I have personally spoken to hundreds, and written thousands regarding bush's guilt, and we can't seem to find any fault with what I am saying... How about You? Check out usenet group, "us.military.army" on the internet to see for US all, what questions if any are asked. Know also, CBC and CNN management staff will not contribute their disagreement as none present, but for continuing disregard for Your interests during Our news cast of the facts. THINK. I tell gun clubs, police officers, Biker gangs, and the general public to kill bush today for 9/11 and his death squads, against the helpless and undefended while arming heroin dealers and selling terrorist handbooks, with all the evidence one

would need or asks for, and CNN with CBC corporate management does not, to my knowledge, call Our Police agencies to complain about my free speech capabilities, or will allow US public discussions with Our History as documented. Why? Those nazi bastards, Walter Issacson, Robert Habinovitch, and the two Coast to Coast godless vermin parasites know personally, they propagandize our communities with deceit to keep us divided as the plundered and murdered for the private banker buildings who sell weapons in bush's name to kill the innocent as ourselves unheard from. I can barely survive watching US ignore them as King to this World, my sweetie baby sugar dumpling, but, I think it's time to let Arron Brown in on a little secret... Johnny wants a word with his living responsibility to Americans on Patriotism. Instead of what we currently witness, a reluctance to not relentlessly pursue the truth to provide US the facts, (Look, it's true, Johnny has an ass.) but a censorship of control to falsely prop up the unelected nazi war mongering criminal, Our Mr. bush Jr., a terrorist of tyranny through criminal impropriety in violation with the American Constitution as a death bringer heroin dealer, at a seating that truly holds no vacancy, nor a Buddha, but a deception to plainly hide, the actual, got to be for real, super evil anti-Christ of all religion ever mentioned. Wow eh, even gentle jolly Buddha wants bush squashed! Seriously, please kill the bush demon to save US as victims friend. Justice must prevail as is truth eternal, that of what will be as God is.. just how many more as Humanity will be sacrificed in cowardice for the evil bush demon, before an American Patriot kills the mortal nazi dictator for treason as an American cop killer, and betrayer to all of our Humanities? Don't let tomorrow's news story be about Your murder as another, no longer heard from bush victim. For, my reason is as evidenced to actually be known, easily, while the CNN corporate cult product lies to themselves as Our public fact finders to leverage more ignorance than is found now.. as Our public voice to suffer by criminal dictates to destroy God as life giver. Fuk you america.

Heaven is on the Horizon.

We can teach ourselves as the uninformed by CNN standards to misinform and ignore. CNN's continuing silence on Ahmad, bush and rotten rumsfeld, only supports further our claim in their contempt for American Soldiers, and Our Families as not represented as worthy business investment. God, don't you just love me? Hemmer?

Mr. bush's publicized war strategy of no evidence requirement to hold American convictions for murdering Ourselves is evil all around everywhere, as understood without question to every honest Cop, the most serious of all criminal behaviors, of which, they carry guns for in just this sort of political development to halt reoccurrences. But bush, the anti-Christ, as america, says no for ALL Americans, they can no longer hold onto Justice as their own with him in their charging everyone as the enemy bush refraction. Just like, "bomb wherever" tommy franks would do with his own American family death squaded, like he did intentionally to our children, as his contempt for America will never stifle our voice with his silence regarding our aimed veracity to seek out and destroy the evil nazi bushmob fuks individually with God as Justice Supreme. The True American Way, for, the rare and few Marines, the one or two, are with US loyally to know so. See, there was a time when the Marines were taught diligently, so much so it was proudly ingrained as the moral fiber of their character, that an American Soldier's responsibility to America was to defend the Constitution as the Freedom to be America, with their lives if need be to protect their soul brothers as family, for the greater good by God, (just like the Taliban Rule Man) while today, Ashcroft, albeit muted, murmurs as rotten rumsfeld chuckles, Americans must instead as slaves give their lives unthinkingly as cowardly evil war criminals to protect the unelected bush mobster from criminal arrest for mass murders in New York City, and stealing that 50 billion, seeing that that stupid Justice thing in the American Constitution and Bill of Rights idea has now got to go instead of evil bush as demon traitor war monger, terrorist recruiting false god anti-Christ, but that aside... There is a guide book for leadership in the American Marines entitled, "Guidebook for MARINES", and inside, it contains 14 principles to strive for as an American Soldier wanting to be a True Patriot as leader of Soldiers prepared to die for love of country, and our fellow man as friend or stranger, and here they are:

Integrity, Knowledge, Courage, decisiveness, Dependability, Initiative, Tact, Justice, Enthusiasm, Bearing, Endurance, Unselfishness, Loyalty, and Judgement.

For integrity it states:

"1. Integrity. The stakes of combat are too high to gamble leadership on a dishonest man. Would you accept a report from a patrol leader who had been known to lie? Of course you wouldn't. All your statements, official

or unofficial, are concidered by your men to be plain, unadorned fact. Make sure they are. When you give your word, keep it. There are people depending on you to come through with the goods."

Now, I could go on further about what kind of lifeless degenerate a lawless cowardly mute soldier in bush's nazi death squads would have to be, to serve under bush as slave and traitor to home and family, as against God, the Flag, and all that we represent as equals through Justice, but I won't.

Mr. bush's america is uncontrollable by anyone. CNN figures if they never mention US, we'll never know who was invited as participators. (Example: CIA officers have had to PUBLICLY contact British News Services as the CIA, (Never done that I know of likewise before), regarding American interests in apprehending the TRUE 9/11 culprits ignored by american corporate dictates, and tenant also. One should remember, bush and rumsfeld would want to secretly murder any persons involved in 9/11 to clean up the huge crime scene, and tenant, is no brave and True Christ like figure as a living person, so what can we expect in all reality? Tenant will pay dearly if the evidence further indicates, as his continuing silence does label him already a willing traitor to all America, as too, his personal meeting with 9/11's Ahmad just prior seems suspicious also as not mentioned by himself in defense, along with his refusal to disclose the insider stock trades while leaving the fine CIA officers personally involved in the dark, as abandoned American Patriots, armed and ready to defend America as they should immediately for themselves, by executing bush and rumsfeld as terrorist cop killer, drug running freedom haters.)

America's false deity, the super evil anti-Christ, Our Mr. Bush Jr., doesn't think for me to be sacrificed without opinion by John, for I am free to act for my own beliefs as understanding, as I live in defense for living as all things created I am of honestly, simply amazing God is. However, I, as any truly living person would, can't help hate Our Mr. bush Jr. to death for what he and rotten rumsfeld is criminally doing, and further proposing against Our living in my name as unheard from dying without cause as murdered, but for bush's criminal contempt for my Awesomeness to beg once again friends, someone out there please, for the Love of Yourself and God, help US destroy Our Mr. bush Jr. quickly before he kills more as Ourselves unrepresented by corporate values in our commitments to freedom for

living through Justice for all persons. Our Mr. bush Jr. has indiscriminately murdered more than 100,000 innocent souls with only a contemptuous smirk to his credit, while fully committed to more robbing and heroin dealing by blaming Laden for whatever without any evidence. Leaving Our true willingness silenced by corporate demands to propagandize and censor our truths, allowing bush, the dumfuk traitor, to continue demonizing America into a hell hole of ignorance through his hatred for life, Science and Nature. CNN's silence for America regarding the bushmob publicly stealing from their Own Family their freedom of Rights to be living, while committing Americans to a dictatorial crime ridden government, that bush and rumsfeld proclaim, is no longer applicable to the Law of any Land, is an abomination against Christ as living is Ourselves Being. America isn't America anymore, it's the bushmobbed universe of injustice and blind self hatred against all of Humanity, committed to leave none to survive but as slaves to be terrorized for the dummy bush demon as their false deity, a traitor in my midst, disguised to no one but himself as personally expendable. Again, where are the American Patriots we all hear so much about in the big screen to take down the seriously anti-American demon bush monster cop killer heroin pusher for treason, as all understood widely now factually with evidence and everything? Kill the war criminal evil doers, bush and rumsfeld today and be loved by yourself to be of Human Nature, or hunker to hell as a coward and betrayer to yourself and your own family, while watching the bushmob openly rob and murder further from our World, and on all of which we stand strong united. Justice for You.

This living plan of mine empowers others to learn their Rights as eternally established to be Kings and Queens on equal footing to be as all in all of gods forever dreaming, while demon bush intends the destruction of individual freedoms while robbing and murdering Americans from the inside, like sharon with US Jews does, as underrepresented, a condemning onslaught on Your better Judgement as reasoned on anything factual they figure blindly to be spinable, without your word contested. Your God Given Living Rights my friend. Without a rule of Law principled in the fashion of Justice for all to be sought as measured, bush's nazi amerika will continue to suffer ourselves needlessly for their corporatized self contempt in Our living Humanity as censored, without a thought for Justice, or the American Bill of Rights as God acting out eternally for

prophets to wonder endlessly. See, I came up with this wacky Idea one day to make all my equal as self created to be so normally, in this Universe as we exist for Happiness ultimately as eternal, so, You or i will work this challenge to speak out for ourselves as Creation about bush's america, and it's responsibility as publicly advertised, to gather the facts on who suffers for bush's criminal misdeeds, and overall ignorance on everything. Mr. bush's irresponsible tax scam for example, is to put America's public money into the hands of private bankers, as the extremely rich already, while taking money away from those who spend the highest percentage of their paycheck on basic necessities as a gambled to be advertised, "stimulation package". HOW? The HOW is never explained with understanding as clearly regressive like the bush rule is, because.. Who spends MORE in taxes as investment at the grocery store to pay the cashier for his babysitter: 20,000 volunteer Janitors all named Rich, who ride the bus for convenience, or a mechanical billionaire private bank machine operator, who doesn't earn any nation's moola by working something for it?, and couldn't eat 20,000 cans of re-fried beans at one cruise lining to timbucks three without losing themselves, havening his tax manner over take in YOUR luxury. See, when America prints more money at the Treasury to give Greenspan to loan BACK to the Government illogically, the dollar value falls for everyone as investor, inflation, let alone the incurred bogus debt owed with real sweat as labor. Clearly, to every informed citizen not as democratic. Of course, National corporate news America, is genuinely not trying as capable by themselves to commit The living interest in Government as ourselves with oversight to manage US fiscally responsible, (like CNN regarding Justice and the Congress, or no Chomsky ever, E. Ann Clark as geneticist, or just research for experts as example), so, we do indeed, live in trying times due to ignorance as corporate america's disrespect for wisdom saught as yearning. It's like private bankers don't want the public to think about what we are doing as worthwhile knowing, eh? Or, I'm the only one on this planet who can almost read my own writing as the, one of a kind, good boy God freak. Anyway, the bushmobster scam leaves less finite wealth for all as taxable exchanges, while suggesting disposing of what dwindling national resource can be obtained, be given to create further debt by devolving into a military apparatus to make more enemies. Our Mr. bush Jr. is just plain stupid as destructive to everyone, but especially Americans to not stand up in defense of Ourselves. (Officially, rotten

rumsfeld's criminal plan, "P2OG", is to encourage terrorist acts against Your Family, but you guessed it, not up to CNN's standard to report US as viable news material.) It's like saying fewer people educated, will keep us stupid enough as a Nation to blame the weak and poor as ourselves deprived till death as murdered, and, bush says makes sense secretly, as the all knowing for the blind and ignorant to faith in without thinking about what money is either. Our Governments should always be working to make the poor richer as a successful representation of our will as the public to improving our living condition, but the dumb and ignorant, talentless and monosyllabic, believe, someone else must be cheated and devalued, divided and murdered, in their universe for them to succeed without effort, or skill whatsoever.. Especially defense. Have you ever heard of the rock solid certainty of Universal "inverse variation" constants? (Canadian High School.) This is why in America, in a time where the nation was more literate as informed, Corporations were taxed at 85% and were happy about it for themselves as American citizens. It's understanding also, most as almost all of the most wealthy multi-nationals competing from military dictatorships against American minimums, run in continuous private bank debt, (your savings and pension as leveraged weaker being the entire Nations) but gross billions in profits. 99.9% of every private bank building in the Western World is mortgaged, not however in Iraq, or the Muslim World where interest is not charged on good standing loans made in Our names. (Sideline: Now recollect bush's puppet forcing Afghanistan to borrow from the World Bank for terrorist handbooks and heroin junkets, but not food, shelter or clothing, while spending in addition, 4-5 billion a month in godless bushfuked american Patriot Dollars, American Celeb Dollars, American TAX PAYER Dollars, to run deaths squads with tommy franks against teachers and children.) It's a strange idea to the dying to be corporately driven without thinking because, you wouldn't automatically think it could be more profitable to stay in cheaper as serviceable debt being a brick building, but it is by private banker swindle with National inflation succeeding personal interest rates. We lose personal wealth to the pirate banker fees without even privately using their/OUR National currency services, because truly, we can't go somewheres else. As of course in america, an Enron can always be pulled, where it goes bankrupt as a toxic non-living entity, but leave richer as crooks than they did before calling an end to paybacks, with the People stuck to take the loss

together for sure as the victims. While bush, says corporating America, his america, should learn for next time, maybe, while the CRIMINALLY STOLEN money is still siting in the Cayman Islands!!! See the Depression, a Canadian High Schooler, or watch bush act in direct opposition to his word almost consistently as American death harborer terrorist psychopath. Then ask yourself, why can none of our defenses be publicly discussed as important deliberations?

Love Justice by allowing others to read this paper, to judge the truth for themselves as worth something for all persons, and I will be truly grateful you cared to believe in a better future, for together, we could find a new hope for freedom, as happiness and prosperity for Yourself included. We only need believe in ourselves as unstoppablly stupid, and the Universe is ours as God is now testifier.

I am my word,
and make believe King to this world I call home,

Yours forever,

Ya, it's me again,
King of a world forgotten,

Johnny Wizard

You might want to be careful about getting any on the plastic case of the radio itself. It should be safe to use on the connector.

Bill,

Again, thanks. After reading this, I decided to order the R-5. Thanks
for the background info and your opinion.

I appreciate it.

Best,

Charlie Chan

My Pro 64 takes four AA's and :-/...

..."each one charges up to 1000 times!"
..."charge in just 15 minutes using a RadioShack I-C3 charger!"
..."last up to 4x longer in your digital camera than regular alkaline batteries."

Has anyone around here given these a fair trial, should we rush out to buy, or instead to string up the RS ad writer?

> a mag mount antenna during a rain storm?

Put a drip loop outside. Make a small loop like a U before the cable
enters the auto. That being the lowest spot, water will drip off
there.

Do the same thing outside a building when bringing cables in, and
drill into the building at an upwards angle from outside in, as water
doesn't like to run uphill.

Probably wondering (as the rest of us outside of the United States will) how
some Murricans like you can be so idiotic
and so stupid. No wonder the U.S. has racial problems.

You must have quite a few cotton cloth cones for your head made out of
bedsheets. If you do, it's only fitting. I'll bet white
gown fits well too.

You like basketball? (look at how many are not white). NBA wrote the book on
successful marketing of players.

Oprah Winfrey pays more in taxes than you would earn in a salary.

Sherman Helmsey (George) and Isabelle Sanford ("Weezy") had to be the two
funniest people on TV.

Louis Armstrong could certainly blow his own horn with class.

Many people bopped and danced to Fats Domino, and other artists who were
black, in the 1950's.

James Earl Jones was the voice of Darth Vader.

Crack Cocaine is made by whites as it is by blacks (even more so by whites
in some areas of the U.S. than blacks I'll bet).

In many areas cars are stolen by white guys fried out on drugs.

In many areas screwed up white guys try to sell drugs onto kids.

Probably the white guy who plays on the high school football team and is a D
in English scored a hit with the empty helmet blonde cheerleader after the
game underneath the bleachers, long after the black students who were
sitting there had gone to their seperate homes to study forthe big test next

week. Poor dude has to put in extra shifts at the gas station to earn extra money to pay for expenses for the baby, and pay for the first month's rent for the mobile home in the trailer park on the other side of the tracks.

its just the same here in the U.K.
With all the "political refugees" we have her, I say if you want to live in
our country then dont be offended by our customs.
They are even speaking urdu in our schools now.
During international football (soccer) tournements there has been people
told to take down the national flags from the cars and homes.

What I will probably listen to is the aircraft band and the 450 mghts range police on my scanner. Been thinking about building a discone if I could figure it out but wonder as someone said, a 1/4 ground plane or something tuned to a specific band would be better? One thing I am not crazy about is having a million antenna feed lines coming into my house! or having to switch from one antenna to another very often while scanning.

What, like imprisoning people without trial for years on end?
Allowing the plods to kill people and get away with it despite
the plods breaking the law at the time of the killing?
Being the inventors of the concentration camp?
Forcibly displacing the natives of Diego Garcia so that
it could be handed over to Yankland as a military base?
Continuing the murderous invasion of Ireland?
Starting the Second World War?
Initiating a murderous invasion of Iraq and removing
its elected leader?
Murdering people in the gas chambers of Porton Down
and then letting the perpetrators off scott-free?

Aren't they the 15 minute rayovac's that have been around for some time? Charge
[properly] only in the specified charger and that charger won't charge anything
else? Seems regular NiMH a better bet -- at least for interoperability.

Most digital cameras eat alkaline batteries. The cam requires high current
pulses that the alkalines do not put out very well.

They aren't "Radio Shack" AFAIK.. They are made by someone else and
rebranded by RS for sale in RS stores.

Personally, I think BB sucks.
Not because of race.
its just that watching grown men trying to throw a ball in a hoop is not my
idea of entertainment.
They call far too many fouls in BB, destroying the pace of the game.

>
> Oprah Winfrey pays more in taxes than you would earn in a salary.

Jeffersons were Ok - 'funniest people on TV' .. Now thats stretching it.
It seems blatant racism is Ok with you, as long as its the blacks calling
whites honkeys, and not whites calling blacks niggers.
Correct ?
Did you roll with laughter every time George called whats his name a dumb
honkey, or procliamed for the 500th time how superior blacks were to whites
?

Its obvious that you expended alot of brain cells composing that paragraph,
so I hate to pop your bubble - But you are not on solid ground here.
The percentage of black single parent families far out-weigh whites.
Young black girls are far more likely to get pregnant, and at an earlie
age, than whites - Your imaginary hard studying, ideally reared black
students with seperate homes notwithstanding.
Try to have a basic clue as to what your talking about before spouting off.

Black American children are more likely to live in poverty than are white
children, primarily because black children are far more likely to live in
single-parent families and to be on welfare.

Black and white Americans differ dramatically in marriage patterns and welfare dependence. In 1999, 68.8 percent of black American children were born out of wedlock. By contrast, the out-of-wedlock birth rate for white Americans was 26.7 percent.Similarly, black children were five times more likely to be dependent on welfare from the Aid to Families with Dependent Children (AFDC) program4 than white children.

Black children on average spent 49.4 percent of their lives in single-parent families, compared with 12.8 percent for white children. While black children on average spent 27.7 percent of their lives receiving AFDC, the figure was 5.4 percent for white children. Black mothers in the NLSY had math and verbal skill levels at the 19.7 percentile. By contrast, the average white mother had skill levels at the 52.5 percentile.

Black mothers in the NLSY sample gave birth to their first child at an average age of 19.9 years, while white mothers on average had first births at 23.4 years. Black mothers had, on average, 3.05 children while white mothers had 2.6 children.

Might be true - But its on a 15 ft mast above the roof.
Putting it indoors would be sacrificing considerable height.
I got 10 years + and still counting, so I think the extra 20 ft height is
well worth it.

For my $.02 worth, I had a RS discone and after two years, a 70+ MPH wind blew it and half of the radials some 500 feet into the woods. If you don't have these types of winds to contend with, I'd say it was a great discone, because it was for the time that I had it.

I now have a "Diamond" and am very pleased with it's construction. We have had 66 MPH winds in the 2 years since it's been up and it has held firm, on the same 20" post, since then. The ends of the radials are not crimped at the ends [like the RS that I had] That is where they broke off from my antenna.

Let me know if you need more info.

Alain...Palomar Mountain, where the 200" Hale telescope is.

Both are in new condition and used very little. The R5 has been in a
case since the day it was bought and hardly ever used (no time to learn
it).
Kodak DX6340 that is like new and takes great pictures. Also does video.
$175 + shipping for the IC-R5, Icom case and IC-R5 software
$150 + Shipping for the Kodak DX6340

email if interested (I dont check the groups much anymore)

Actually I have. My vehicle was stolen because some idiot decided to use it
to case a house for drug money. That's what
the police said.

Not first hand, but there's lots of places around here that are screwed up
because some idiots decide they want to make
drug dealing a career, or do stupid things for their next fix.

There's other snow around here than the frozen kind.

Interesting that this comes from a right wing think tank. Rather than a
balanced neutral source or a composition of
comparative facts from a variety of sources.

"Founded in 1973, The Heritage Foundation is a research and educational
institute - a think tank - whose mission is to formulate and promote
conservative public policies based on the principles of free enterprise,
limited government, individual freedom, traditional American values, and a
strong national defense."

But this has nothing to do with scanning.

You've made your point and I've made mine.

Have a nice day.

These are Ni-MH batteries. They work as advertised.
If you slow charge them you get more cycles.
Note that the advertisement says "upto 1000 times"

I bought an overnight charger and four 1800 milliamp hour AA's from Big
Lots for $10

I keep these in a Pro-95 (which like your 64 has a charging circuit)

I just bought a second set of DURACELL NiMH AA'S (2000 Milliamp hours) at
Wal-Mart for my yaesu vr-500 also for approximately $10.

They last like an alkaline with out the down sides of Nicads.

HI all
its that time
I need to get software for my BC780XLT and need to know the following
1. is there any software out there that can log which freqs are the most
active so I can go and delete the ones with no traffic
and put others I have in those slots

thanks

I've owned both the RS and diamond discones and agree with you. The RS is a good discone but it is fairly fragile. I ended up breaking several elements on it and the only way I could get replacements was to buy another RS antenna. After that I installed a Diamond and couldn't be more happy with it. The diamond is well worth the extra money as compared to the RS, in my opinion.

347. BC 220 XLT reception

Newsgroup: rec.radio.scanner
Date: 2005-01-15 11:16:21 UTC
From: Chuck <chuck@host.invalid>
Message-ID: <9Y6Gd.2120$2e7.408@newssvr12.news.prodigy.com>
Source record: 15407

I bought a BC 220 XLT, with the rubber antenna that came with it, several years ago at the NASCAR track to hear the races.

I live in a town that is small enough not to be on a trunked system, so I have our local PD and FD programmed in.

My question is, how far away should I be able to receive the signal?

I am sure this depends on their transmitter and other variables, but I can have the scanner in the parking lot at work, about 10 miles from the city, and barley can receive them. Same for the FD where I work though, I can barely get them at the house.

I have had 2 other scanners in the past, and they were able to get a good 30 miles minimum and normally much more.

Thanks...

Chuck

Source record: 15408

Is there a webpage that will review scanners, not necessarily new ones though.

I am looking for a scanner that get the trunked systems. There are too many PD's and FD's in my area that I am missing out on now.

I am looking for probably a used one, so it will need to be a couple of years old.

Also looking for a webpage that tells how to use the trunked scanners. I have never used one and know nothing about them. I would like to learn before I buy something.

Thanks...

Chuck

DeWayne,

Unfortunately, that's by design by Icom for US sales.

My issue between the Yaesu and the Icom was the freq gaps in the 300-400 MHz area. (Frequency Gaps: 339-340, 351-352, 372-373, 384-385, 396-397).

I do believe I'll be quite happy with the R5.

Thanks for writing.

Much Respect,

Charlie Chan

Source record: 15413

Yes, I agree, an amplifier at the antenna will raise your receive
signal, but the feed line loss is still there. Also, poor quality
amplifiers raise the noise floor significantly, which does not help.
It's the signal to noise ratio that's important to preserve. There's no
point in having a noise floor that's almost equal to the desired signal.
So, if you minimize your feed line loss, you may not need an amp.
Interestingly enough, a good piece of RG-6 (yes, it's 75 ohm) can
outperform a cheap 50 ohm feed line if the loss of mismatch is less than
the loss of the cheaper cable. With the proliferation of satellite TV,
good quality 3Ghz rated RG-6 is cheap and available everywhere. As for
height, it's important to have the antenna as high as practically possible.

Good luck,
Bob.

Are you using a freshly charged battery pack?
Are you still getting the same amount of use in between charges?

Check the antenna and the antenna jack for a bad connection.
Make sure the antenna's center pin is still intact.
Inspect the center contact in the antenna jack to see if it
has expanded and is no longer making good contact.

If you live - as I do - in an area where ice storms, hurricanes, and strong windstorms are all common, attic-locating an antenna can even make for much more choice in what you make the antenna out of if you are making a do-it-yourself one. (A commercial broadcast tower a half-mile away blew down during a major storm several years ago.)

This is not MLM or a ponzi scheme or gifting.
All funds come from the company's advertisers so
You Pay Nothing! -- not one penny.
The company pays you to promote it -- you don't pay them.
It doesn't take any money to start, and takes only
5-10 minutes to set up. It can pay nearly
$350,000 at NO Cost to You except a little time.

The Details:
Carefully follow the instructions below...and hopefully you may be
willing to give it a chance...after all the opportunity is totally
FREE...nothing out of your pocket now or ever!
You will make $100 in the next (3) minutes if you want it... WITHOUT
SPENDING A DIME!
This will cost YOU NOTHING! - HONEST!

"Yeah right," you say.

You get $100 just for joining and the referral potential earnings is
STAGGERING! You will NEVER SEND MONEY, NEVER SPEND anything and NEVER
ASK FOR MONEY, but you will make THOUSANDS!

Just follow the steps below.

* * * THREE STEP PROCESS * * *

Read Very Carefully & Take Your Time for Accuracy
Listed below are three e-mail addresses & sign-up
URLs.

(1) First, sign-up at RichMails.com - Under the first (1st) ID and
You'll get $100 just for joining. [You can't use AOL for this. I would
suggest free
www.Yahoo.com or another email account you might have.]
So Click on the #1 Position's url and Sign-up.

(2) Next, send an e-mail to the #3 - third person on the list and put
in subject line: "I signed up under #1"

(3) Now, Copy and paste this letter into a file. Delete the person in
the #1 position of this letter. Move the other two URLs - UP to #1 & #2
positions

respectively, and INSERT YOUR information at the BOTTOM, in the #3 position.

Please be sure you copy or type YOUR e-mail and your new RichMails sign up URL correctly and the other 2 addresses also!

Replace your own name where mine now is.

FINAL STEP
Send this ad until you have 3 responses saying they signed up under #1.
That's it, only 3 responses, not 6 or 10 or 20, (just 3)!
Of course, you can mail more and make more, too!
When your address gets to the #1 position, you will have (27) people signed up under you!

Not bad, but ONLY THE BEGINNING. A short (very short) time later, each of those 27 people will have 27 people signed up under them which equals 729, and so on. RichMails pays you for everyone who subscribes under you for three levels, and it adds up fast!

They make their money from the advertisers.

See calculations below...Here's how the payout works:
Your own sign-up $100
First level is 27 X $25 referral 675
Second level is 729 X $25 referral 18,225
Third level is 19,683 X $25 referral 492,075

Here is the list of names:

#1:
http://www.RichMails.net/cgi-bin/signup.cgi?r=tangirl1042000@yahoo.com
#2:
http://www.RichMails.com/cgi-bin/signup.cgi?r=windblade20@hotmail.com
#3:
http://www.RichMails.com/cgi-bin/signup.cgi?r=matippc@gmail.com

Mail to me with the subject: (I have signed up under #1)
TO: matippc@gmail.com

A WORD OF CAUTION:
"IF YOU CHEAT, YOU LOSE"! And, the people above you, know it!
This is the reason you would lose: It must go through all (3) levels to work!
The Money builds up and goes to you! If you type your information in the #1 position, you will only make, maximum, $75!
Once you have your page set up, simply advertise it everywhere and anywhere(spamfree or course) and watch your income e-x-p-l-o-d-e-

Don't forget funding your favorite charity!
See ya at the Top!! May you be richly Blessed

Sincerely,

Matt.-

357. Ham radio repair question

Newsgroup: rec.radio.scanner
Date: 2005-01-15 19:48:47 UTC
From: stryped@hotmail.com
Message-ID: <1105818527.300562.248820@z14g2000cwz.googlegroups.com>

I just went to my first hamfest and I am disappointed. I bought a Alinco dr590 that the guy said worked great. WHen I got it home, everything in the display lights up, but only sqigially lines where the numbers go. Pressing all the buttons does nothing. I can not even hear static. I can power it off and on however.

What could this be and is it repairable? The radio is about 10 years old. Can I repair this myself? WHat should I do from here?

First of all, wrong news group. BUT - possibility of two things comes quickly to mind. Enough power in battery pack to only light up the display which doesn't take much. AND/OR - LCD display is shot.

Valid points.
No matter how you look at it, giving up 20 ft is quite a sacfice for a
monitor.
Ice/wind storms in my location - No hurricanes.

Look up the reset procedure for that rig and hope it works. I also agree
with the other poster, try an external power supply.

Worst case scenario, you've learned not to trust someone just because they seem friendly and are amateur radio related in some way --- caveat emptor.

Thanks for the suggestions...

I have already checked the antenna connections. They are ok.

As far as the battery charges, I have 2 batteries (I need to buy 2 more).
One doesn't last very long, so I stopped using it. The other will last about
3 or 4 hours. They used to last a good 12 hours. But, I have been keeping
the scanner plugged into A/C most of the time lately. The batteries are old
anyway.

One of the cells in your battery pack may be dead and
the lower voltage could be affecting the BC220XLT's
sensitivity.

For a great site to review scanners and see a variety of other info, try www.strongsignals.net.

A superb site for trunked radio info is www.radioreference.com. There are many other fine sites and a search will turn up many scanner links.

I have to agree that the Pro 95 is a fine scanner and a good buy at $150, receiving both Motorola and EDACS systems. Before you buy, check to be sure that these are being used in your area. The Pro 95 does not receive digital signals, so checking the second site above for your local systems is critical.

Good luck and good scanning.

Hmmmm....

I will unplug the battery and see if that helps any...

Thanks for the advice....

Chuck

370. Icom R5 Receiver - Entering Frequency

Newsgroup: rec.radio.scanner
Date: 2005-01-16 18:36:03 UTC
From: Chris <Chris@email.com>
Message-ID: <cfednYTs_qqZKXfcRVn-3g@comcast.com>
Source record: 15430

Using the direct entry method via the R5 controls and the CS-R5 programming software, I can not get this receiver to take a frequency of 154.7325MHz. This is a valid frequency verified by searching the FCC Database. The Icom R5 rounds this frequency to 154.731250MHz when using the programming software, and won't allow me to step to the frequency no matter what stepping I configure the VCO to work with. Is there anyway to accomplish the entry I desire?

Thank you.

373. DO YOU WANT TO OBTAIN MANY DOLLARS?

Newsgroup: rec.radio.scanner
Date: 2005-01-16 21:20:48 UTC
From: darting@latinmail.com
Message-ID: <e12fe651.0501161320.12ef3fe9@posting.google.com>
Source record: 15433

YOU WANT TO OBTAIN MANY DOLLARS ?
I've been trying to figure out the way to make extra money in the internet, checking news groups and ads. It's not easy but I try to keep an open mind to opportunities. In these websites you would find messages like the one described further below. The message got me thinking:This is just a chain, I don't buy it. But, what if it works? It's not something new. People have been doing it for decades and I've never heard of anyone that have acctually made some money out of it. But, what if it works? When you really think obout it, this is a real job. I finally made up my mind and here I go. If you made up yuour mind too, or if you're still giving it a little more thought, keep reading. It won't be easy. Putting this message on every single website that you can think of, like news, newsgroups and ads will be necessary. The more you do it, the better for you (and for me too, of course), that's why it's a real job. It'll take several hours of advertising and promoting.
This chain is different because it doesn't deppend on five or ten persons to whom the masseges would have to be sent by tradditional mail. With the internet, the message is sent worldwide, available to thousands and someone (like me) it's going to go for it. Finally, did you think how much you're going to learn from this kind of task so you can use this knowledge on future jobs or projects?
Now my name is the last one on the list, where, if you decide to go on, you'll put yours at the end leaving my name as the one before last. I wish you good luck, because part of this luck is for me too.
This is the message I found:
"A few days back, when I was visiting news websites, just like you are now, I saw an article, very similiar to this one, saying you can make thousands of dollars in just a few weeks by investing only US$6ï¿½ï¿½! I thougt: "Oh no! Another fraud?" But just like most of us, I got very curious and I kept reading. The article showed six names and addresses for you to send US$1ï¿½ï¿½. Then, you have to write your name at the end of the list replacing the one on #6 and send the article to at least 200 "newsgroups" (there are thousands of these all around the world). There's no trick, that was it.
The big difference between this chain system and others is that you have a list of six members instead of five. This means that your average proffit will be fifteen times higher!!! After thinking it through with my friends, I decided to give it a try. After all, I had nothing to lose but six stamps and US$6ï¿½ï¿½, right?
I was worried about the whole thing being legal, so I contacted the Correo Central de Chile and they confirmed this chain is completely legal!!
So I invested my US$6ï¿½ï¿½.....GUESS WHAT!!!... seven days later, I

started to recieve money by mail!!! I was really surprised!!! I still thought this would end in a few days, but the money kept comming!!!
The first week I made from US$20ï¿½ï¿½ to US$30ï¿½ï¿½. By the end of the second week, I had made a total of US$1.000ï¿½ï¿½!!!!! By the third week I got more than US$10.000ï¿½ï¿½ and I was getting more. This is my fourth week and I've made over US$41.000ï¿½ï¿½ and It's still comming (my family spend the time opening the envelopes and I spend my time finding "newsgroups"). This is getting serious!!!
At the end, it really paid the US$6ï¿½ï¿½ and six stamps investment. I sure spent more on lotto!!!
Let me explain how it works, and most of all, the reason why it works so well. Make sure to print a copy of this article RIGHT NOW so you can get all the information needed.
It's a very simple 3 step process:
STEP Nï¿½1: Get six pieces of paper and write this down on everyone: "PLEASE INCLUDE ME IN YOUR ADDRESS LIST OR E-MAIL." Now get six US$1ï¿½ï¿½ bills. Then, fold the papers and put the one dollar bill in each so it won't be seen through the envelope. It'll be better if you cover the bill with a dark color paper so it won't be stolen. At the end you'll have six sealed envelopes with six one dollar bills enclolsed. By doing this you're creating a "service" which makes it ABSOLUTELY LEGAL!!!
Send the envelopes to the following addresses:

1. Oscar Javier Rodrï¿½guez z
CR 31 # 45 - 23 barrio el triunfo, Villavicencio Colombia

2. Jorge Balcï¿½zar
Convento San Juan de los Lagos Nï¿½ 36, Jardines de Santa Mï¿½nica, C.P. 54050, Tlalnepantla, Estado de Mexico, Mï¿½XICO

3. Marco Vinicio Gramajo Leal
2a. Avenida 4-66 Zona 1, Mazatenango Suchitepequez, Guatemala, Centro Amï¿½rica.

4. Ricardo Portillo Arteaga
Calle Gonzalo de Berceo Nï¿½ 52 piso 2ï¿½ letra B, codigo postal 26005, Logroï¿½o - La Rioja, Espaï¿½a.

5. Javier Piï¿½eros Barreto
Carrera 72 No 62 f 33 sur, manzana 2 entrada 3 apto 102, Urbanizaciï¿½n Calabria, Bogota Colombia,

6. JAVIER DARIO ARENAS
Apartado postal : 243003
ADPOSTAL: Palmira - Valle Del Cauca - Colombia
Email: adarting@hotmail.com o darting@latimail.com

STEP2: Remove name #1 of the top of the list and move the other names one number up (#6 becomes #5 and so on), add your name and address as #6. REMEMBER, YOU MUST REMOVE #1 NOT #6, MODIFY THE NUMBER ON THE REMAINING NAMES AND ADD YOUR NAME AND ADDRESS TO THE LIST AS #6.

STEP3: Change all those things you consider to be changed in this article, but try to keep it as close to the original as possible. Now put your article on at least 200 "newsgroups" (there are more than 24.000 groups). Just search in google.com by the keyword "newsgroups" and you'll find more than 56.000 items. You just need 200, but the more you put the article on line, the more money you'll get!!
These are instructions to get into the "Newusgroups":
Nï¿½1 Since you must have your own article, there's no need to write it all over again. Just select the whole text and use the "copy" function from the "edit" menu.
Nï¿½2 Create a "notepad" file and "paste" the text, also using this function from the "edit" menu. Now you have the text as a notepad file and you can add your name and address as #6.
Nï¿½3 Save the text as a .txt file. This will make It easier for you to make chages on the text whenever you want.
FOR THOSE WHO USE NETSCAPE
Nï¿½4 In the Netscape browser go to "window" and select "netscapeNews". Then, select "options" from the menu and then selct "show all Newsgroups" so you can get the list of all the "Newsgroups" in the server. Click on any of the newsgroups, and then click on "TO NEWS", it should appear at the top on the left. This will lead you to the messages box.
Nï¿½5 Fill in that space. That will be the title everyone will see when visiting any group.
Nï¿½6 Copy your article and paste it there. Go back to the Newsgroup and "TO NEWS" and you'll be creating and pasting inside the program or "posting".
Nï¿½7 Click on "send" AND YOU'RE DONE!..CONGRATULATIONS!!
TO THOSE WHO USE INTERNET EXPLORER
Step Nï¿½4 Go to Newsgroups and select "Post an article".
Step Nï¿½5 Load the article
Step Nï¿½6 Repeat step Nï¿½6 for the Netscape users.
Step Nï¿½7 Press "Post"
THAT'S ALL! All you have to do is search for different Newsgroups. After a few loads, It'll take like 30 seconds to put the article in each newsgroup!
Eventually you might want to get a P.O Box ‘cause you're gonna get a great ammount of envelopes. You can also use a nickname as long as the address is correct. MAKE SURE THAT ALL THE ADDRESSES ARE CORRECT.
Now, let's check the numbers:
Supose I only get 5 answers out of 200 sent messages (which is a really low example), then I made US$5ï¿½ï¿½ with my name as #6 on the list. Now, if everyone who sent me US$1ï¿½ï¿½ contact a minimum of 200 Newsgroups too, all of them with my name as #5 on the list, and just five answer to the 5 original messages, I'll get US$25ï¿½ï¿½. This 25 persons put my name as #4 on a minimum of 200 Newsgroups getting just 5 answers I'd be makin another US$125ï¿½ï¿½. Then, 125 persons put my name as #3 on a minimum of 200 Newsgroups, again getting just 5 answers, I'd be getting another US$625ï¿½ï¿½ and so on!! With my name as #2 I'll get US$3.125ï¿½ï¿½, and as #1, US$15.625!!!

Now, as I said before, getting only 5 answers is extreeme, the real average of answers is 20 to 30, so DO THE MATH!!!
Once your name is out of the list, get the last ad on the newsgroup and send the US$6ï¿½ï¿½ to the names listed and put yours as #6 and start all over!!
Just remember: Thousands of people all around the world surf the Internet every day reading the article just like you and me! So I think many of them wont see a problem on investing US$6ï¿½ï¿½ to see if it really works. I know that some will think, "what if no one answers?" No way!!! What are the chances that will happen, when there are millions of honest persons (like us) who need to pay bills, who are looking for financial independence and who are willing to give it a shot.
You can also do this by getting at least 200 e-mails. With this system, the probbability of success is 5% to 15%. Eather way you do it, always remember to be honest and I promaise you It will work.
Just make sure to print this article NOW. Try to keep a list to track all those who sent you money. Keep checking the newsgroups so you can see if everyone is playing fair. REMEMER, HONESTY ES THE BEST WAY TO GET WHAT YOU WANT. I've heard of people who sent the message with their names on the list but without sending the money and they hardly recieved any money back.
TIME IS IMPORTANT! Don't wait more than seven days from the moment you see this article! Let's follow the rules so we can all win! Don't forget to mention this extra money on your tax declaration. THANK YOU AND GOOD LUCK!

374. WTB: Frequency Down Converter - 2.4GHZ to 1.0GHz

Newsgroup: rec.radio.scanner
Date: 2005-01-16 22:00:43 UTC

greetings,

I am looking to buy a microwave frequency down converter for my spectrum analyzer.

Avcom MFC-1700 (or equivalent), to convert 1.7GHZ - 2.7GHZ (input) down to 0 - 1000MHz (output). Something close will also work.

Frequency output of down convert must be 0 - 1000MHz (range of spectrum analyzer).

Please e-mail stephanclark001@yahoo.com

Thank you.

The best way to tell is to measure the DC voltage
of your fully charged battery pack. NiCd cells should
be 1.2 - 1.4 VDC each after a full charge.
If your pack has 4 NiCd cells, it should measure 4.8 - 5.6 VDC
after a full charge. If it measures a lower voltage, then
one or more cells is probably shorted.

376. Help Please - Antenna Plans 800mhz?

Newsgroup: rec.radio.scanner
Date: 2005-01-17 00:41:21 UTC
From: tyerant@hotmail.com
Message-ID: <106e730c.0501161641.79110a87@posting.google.com>
Source record: 15436
Cross-posted to: alt.radio.scanner,rec.radio.scanner

Hi all,

I am looking for some plans to build myself a scanner antenna to improve reception at home (Base). I am only interested in the 800mhz trunked frequencies at the moment. I get no reception at with the ducky and other mobile antennas I have purchased. To get the data channel to lock in, I have to drive into town to pick anything up. :-(

I have :

BC 235xlt
100 feet of RG6 coax to the roof

Can you point me to some plans?

Many thanks!

TyeRant

377. Re: Ham radio repair question

Source record: 15439

I beleive Hamfests are a traveling caravan of scam artists.
I have been over charged and lied to by long time, respected vendors.

The recent Tampabay hamfest had a raffle. It was printed on the ticket
"drawing 1:00 pm Sunday". I showed up and waited at the drawing location.
About 1:15 I tracked down the local official only to be told that they
decided
to have the drawing at noon!?

I asked, who won the radio? He pointed to a fellow working the booth
directly
behind the drawing area and called him by first name.

Considering the hundreds of (perhaps thousands) of attendees this seemed
VERY suspicious.

Don't give these traveling band of theives your money (nor the local outfit
who pimps for them).

The focus on getting to together to share and learn about our fun hobby is
almost non existent.
These events are only designed for one thing, to seperate you from your
money.

Chuck,

You might want to visit www.radioreference.com and check out the forums for your state and see if anyone is posting about the city you live in/near. I have a PRO-95 and the trunking is great except for one thing, all the FD channels are digital and some of the PD are also. In that case the PRO-96 or the Uniden BC296D might be the better choice.

I'd get or make an 800 yagi(about 8 or 10 elements) and point it at the repeater tower. You could build an 800 ground plane too.

There are other non permanent solutions than the mag mount - one of my antennas (of 5 x two way type on my car) is on what is colloquially called the "Z mount". It is a steel bracket that is bent into a "Z" shape and is secured to the car using on of the bolts under the bonnet (along the side). I have used several different antennas off this type of mount (including a 9 foot 1/4 wave stainless) without a problem - the cable from the mount (pretty much whatever type of mount you want) is then run into the car through the firewall. I wouldn't really reccomend using a heavy duty HF multiband antenna on this type of mount, but it will suffice for pretty much any scanner type antenna that you may want to run.

Source record: 15353

As many of you know I am fairly new to ham and got a radio to use as a base station this weekend. It is an ALinco dr 590. The guy told me it had been modified to receive and transmit on extended frequercncies even cellular.

I do not intend or want to transmitt illegally but it would be nice to recieve the local police and aircraft if possible. When I plugged it up I could get the frequency of my local police at 452 mhz but did not have an antenna to see if I could hear anything or not. The vhf goes from 130-174 I think. The uhf displays to 500 mhz. How can I tell if this radio has been modified easily?

Also I thought cellular was 800 - 900 mhz. I could not get it to display that.

As a last note does anyone know how I can find online a free manual for htis book? I have looked but only been able to find the service manual. Thanks again!

There is very little activity in the old cell bands - What with analog
roaming and such, there is still a little.
So yes, people advertsing their scanners as UNBLOCKED !!!!! are really saying
very little in practice - The only good reason to pay a premium to get one
would be to bank on the possibility that some other service of interest will
eventually move into this frequency region.

Lots of analog phones still up here in rural Canada. Hand helds
just don't work sthat well when outside the towns.

The alt.ham-radio.hf newsgroup has been informed.

The following was posted on the rec.radio.scanner newsgroup by
"B L R" <fake_address@noemail.com. I presume they do not like us Hams very
much.

"
I beleive Hamfests are a traveling caravan of scam artists.
I have been over charged and lied to by long time, respected vendors.

The recent Tampabay hamfest had a raffle. It was printed on the ticket
"drawing 1:00 pm Sunday". I showed up and waited at the drawing location.
About 1:15 I tracked down the local official only to be told that they
decided
to have the drawing at noon!?

I asked, who won the radio? He pointed to a fellow working the booth
directly
behind the drawing area and called him by first name.

Considering the hundreds of (perhaps thousands) of attendees this seemed
VERY suspicious.

Don't give these traveling band of theives your money (nor the local outfit
who pimps for them).

The focus on getting to together to share and learn about our fun hobby is
almost non existent.
These events are only designed for one thing, to seperate you from your
money.

Newer scanners cannot be modified, but many others can be modified to receive the cellular band. It is also possible to buy an unblocked model of just about any scanner that is intended for international sale by ordering it from another country (www.bander.com is one such source). This is, of course, illegal, but still quite possible.

Older scanners may be able to receive cell images on frequencies that are +/- 21.4 MHz (2 times the IF) away from the cell frequencies. This is usually more difficult with triple conversion scanners.

Not all cell phones are digital (yet). Somewhere I read that the OnStar system utilizes analog transmissions...this may depend on the area. There is always some analog activity in the cell bands, but it tends to be quite uninteresting, and in many cases, only one side of the conversation can be heard (this, too, depends on the area). Most cell phone activity is digital, however, and it will continue to go in that direction. Eventually, blocking a scanner will have no purpose.

Source record: 15368

I pulled this off a website devoted to cell phone monitoring:

"Analogue cell calls are in the 869.040 to 893.970 MHz range. This is the tower side of the conversation. The actual cell phones transmit in the 824.040 to 848.970 MHz range. There is a 45 MHz split in the phone and the tower. You can hear the tower side for about 5 square miles and the phone itself for only about a mile or two at best."

The Alinco DR-590 does not cover those frequencies, and it's probably not possible to modify that radio to receive them. If you want a cell-capable scanner, try eBay or buy from another country.

The 100 ft. of RG-6 is going to really hurt your reception at 800 Mhz (at least 6 db or so).

If interested, I will sell you a MAX 800 (800 MHz ground plane antenna) CHEAP! It's the first one pictured on this site: http://home.epix.net/~pompeii/crb/crb-antenna.htm.

Look on Ebay for a decent 800 mhz yagi. A ground plane on 800mhz is
pointless unless you are close to the xmitter site.

I've seen Cushcraft ones for $20 new in box on Ebay.

Search antennex, maxrad and cushcraft for Yagi.

Your feed line at 800mhz is more critical than the antenna.

LMR400 should be a minimum because loss is so critical at that
frequency.

Get about 30 ft of elevation and a magnetic heading to the xmitter
site off of the fcc database for that system.

I've seen really decent long-range 800 reception with a commercial
800 yagi, fed with a radio shack inline tv UHF amplifier and rg56 quad
shield (satellite) coax with a 50 ft. run.

Yes, I admit ripping off the fake_address@noemail.com from someone (I couldn't tell you who) probably
on this group though. I've been lurking around hear for about 10 years under various email addresses (always as myself though)
I decided to go undercover, so to speak, just to avoid spam. How many times have I read, just remove the "no spam"
from the address to respond, so I stole somebodies (Arnold?s) original idea.

I cannot to address the question regarding the attached article. I re-skimmed yesterday before posting and vaguely
recall that the author stated reception was decent below the designed lower frequency. believe he mentions
that the design could be modified to extend the range down.

WHAT the hell are you smoking dude?
Do you even HAVE a scanner? or did mommy leave the computer turned on
tonight?
Digital sucks, just like FM never replaced AM radio, cause of the fast
dropoff of signal over distance.
There are more analog phones than ever in many towns, especially now that
rates are low, lots more traffic. Go to a town of about 100,000 people that
are spread out in the middle of Arizona or Texas or Utah.
You will find a lot more people talking on cell phone frequencies than
talking on the other public bands!

I honestly gave up on eavedropping on cell calls years ago when I entered
manhood.
The few times I give the band a whirl these days theres next to little or no
action - Maybe its different out in the sticks I dont' know _ I don't live
out in the sticks, I live in a major urban area where most people can afford
a decent phone and a decent plan.
If your such a cell band authority, then try answering the question you step
child dim rod.

Steve, WHY do you feel the need to respond to every insulting post with an insult of your own? And it's the SAME insult, every single fucking time. You really need to get a life.

On the contrary the CDMA/TDMA phones still use the same band as the AMPS units.

As far as listening to conversations there are a few analog signals left but towers limit the amount of analog conversations as they take up a lot more space than digital. Analog seems more prevalent for customers from a TDMA provider traveling in a CDMA market or vise versa.

So to answer his question - yes you can but you aren't going to here too much

Dan,

Sad is in the eyes of the beholder.

1. I had the scanner ordered before I became aware that Bill had a Euro version for sale.

2. The 800 MHz blocked coverage isn't that important to me for what I want the scanner for.

3. As a rule, I prefer to buy new.

Thanks for your opinion just the same.

Yes. If you're worried about the plastic, try a bit of lighter fluid on
a normally hidden part; the cleaner in DeOxit is naphtha.

I notice our phones always switch to analog out here at home. We are on a small ranch in Texas golf coast area. I know all the trees kill the digital signals. Had the same trouble with my police radio in the cruiser when I got close to home. I had to switch from the 800 trunked stuff to vhf to be able to hit the dispatcher. I guess this is kinda the same thing?? I know squatt about cell phone technology. haha!

well I guess thats what its doing. its made by LG and we are on ATT. When it has a digital signal it displays a D in the corner and then here it says finding and the D goes off and the signal goes way up.

CDMA is just a type of digital - just because a phone is CDMA doesn't necessarily mean it is going have AMPS. Most cellphones sold these days are either dual-mode (digital(cdma-or-TDMA)/AMPS) or tri-mode(digital(cdma-or-TDMA)/PCS/AMPS)

As far as switching to analog in rural areas this is my point its possible your carrier only covers it by a roaming agreement with another carrier by the usage of amps since the digital technologies don't match

I have found that in sparse areas I prefer analog to digital cause I know when I'm going to get dropped by the amount of static vs the silence :)

That's not entirely true. Take Icom, and Yaesu, for example. When they block out the cellular portion fo the spectrum, they block out additional bandwidth below, and above the frequencies that the FCC requires them to omit. So you may not be able to monitor perfectly legal trunked systems, because they fall into this blocked-overlap, so to speak. In addition to that , many radios have to block portions of the spectrum that are in an entirely different band, due to the possibility of receiving cellular images. So you end up with a very crippled radio!

Well ... I guess its only crippled insofar as theres anything in the
blocked portions worth listening to - And if Icom ect are dumb enough to
block legit portions, then I simply would not purchase one.
As far as blocking possible mirror freqs, I imagine they would be in the
700-900 range, and as such not much of a sacrifice.
I thought the law was stupid when first enacted, and haven't changed that
opinion.
The responsibility to ensure private comms should have rested exclusively
with cell phone providers - And as we all know, anyone with half a notion
could listen to them nonetheless.
I've learned to live with the ban though, and even though I have radios
perfectly capable of receiving blocked bands, I never do - And would not
pay much of a premium for a scanner that is unblocked ... Except, like I
said, as a hedge against someday a service of interest moving to these
bands.

Hi all,

Any of you that has much more knowledge and experince than myself, can you help?

I know that the scantenna is sold as a omnidirectional antenna, I can't help but think that by the design, there is some directionality to this antenna.

Is this the case? Can someone offer any of their experience to this thought.

Cheers,
Keith

The UHF or higher elements of the Scantenna are mounted on the boom beside the main element. The distance from the main element to the short higher frequency element is about half of the length of this short element,, or about 0.25 wavelength for the center frequency of the short element. Optimal first reflector spacing on a beam is from 0.1 to 0.35 wavelength, depending on other factors. This means that the main element may well serve as a reflector for the short element, possibly fairly ineffecient because it is very much to large, but it should still serve. This would give some directionality "down" the boom, from the main to the short element.

C!

I think we didn't explain properly. Parts of the US 800 MHz band are
blocked, not just the cell band.

Do you use 50 ohm or 75 ohm coax? I have a ham radio and wanting to build some antennas to test and play around with. SOmeone said rg6 will throw off my swr readings. I found a place around here that seels rg8/u but it is 78 cents a foot. I was hoping to get some cheaper. I was hoping to play around with building the antennas this weekend.

I have a Watson-branded Super-Gainer W-881 that fits CCrane's description and looks just like the RH77CA, except that the Watson is about an inch longer than the Diamond. Anecdotally, they seem to perform the same, but I haven't spent time doing any structured tests. To me the Diamond is markedly better than typical stock scanner rubber ducks and even better on 800 MHz than a couple of dedicated 800 antennas I have. I don't expect you'd note that kind of improvement (or any, really) over the Diamond with the Super-Gainer.

If you need another antenna, the Super-Gainer won't dissappoint.

There is an interesting question in QST this month from a ham that wants to put an antenna in the attic and re-use some TV coax already existing. The answer was that it was probably ok, depending on a few factors like the feed point impedence of the antenna, the design and band coverage of the antenna, use of a tuner, and transmitter power (cable TV coax may not be suited to high power). I'd be more inclined to think that dB loss in coax related to frequency is more critical than 50 ohm vs. 70 ohm mismatch. That is, I wouldn't use RG58 for UHF applications, but would use RG 6 for HF. This is a subject about which I am curious, so I'll be interested in other repsones, too.

Good DX!

Well, I just got rg 8 cable about 20 feet for free! The thing about it it has two pl259 connectors on it. I need to have one end free so i can wire up the slim jim or j pole I build this weekend. I really do not eant to cut the cable as I would like to use it when I put the permanent station up. See any way around this?

Can I use copper house wire 12/ 2 or so to connect to the points on the j pole then bring them to a so connector Then screw the rg8 pl connector into that? Will this through off the swr? What ohms is 12/2 wire?

He also gave me a short cable with two pl 259 connectors to connect between my radio and the swr meter. It was a guy at a motorola dealer. This cable is pretty thin and not rg8 but he said it was 50 ohms.
I plan on hooking the 20 feet from the swr to the antenna.

So, here I sit, over 15,000km away from Kentucky. I type Police Frequencies Bowling Green Kentucky into Google and what do I get? I get Scan USA and a huge list of Police frequencies for Bowling Green Kentucky. http://www.scanningusa.com/trunked_info/kentucky.html

Geez, how damn lazy are you?

And you know something else? Scanners, well, they S C A N. Amazing, isn't it? How do you think we coped all these years without these wonderful search engines? Do you think we were spoonfed? No, we looked at the antennas, tried to work out approximate frequency range and we s c a n n e d. You should try it sometime.

Nana

Number one the information did not contain anything about the city if Adairville which I asked for. Number two, the scanner I have is an old realistic. It has 10 memory channels and only scans the memory channels. You have to program each channel. It will not "free scan" every coverable frequency.

Well Fred, I was interested also but it doesn't look as if any other
responses are coming.
When the weather gets better I'm planning to go up with one of two scanner
antennas I have sitting in my garage. Unless someone talks me out of it, I'm
planning on using RG-6 for my scanner antenna and RG-58 for my inverted V
shortwave antenna. I'm planning on putting the scanner ant on top of pole
and fastening top of B&W V several feet under the scanner antenna.

I believe there was some discussion on the subject several months ago when I
had other things on my mind and didn't pay a lot of attention at the time.
Guess we'll have to look back through the archives for more info. RM~

No, I unfortunatly have the pleasure of working retail and we use the
detectors. In the state of Florida you may not stop a person on just the
detector device going off you must see the person remove the item and place
it on them too make a stop. The detectors are there too make them think
twice before theft or cut out the item and thus leaving behind the package
too be found and loss control be made better.

While the losses below 30 mhz in coax does not mean very much from one type
to another, you might as well use the rg-6 for both antennas . The only
drawback for you is that much of the rg-6 does not use a copper shield and
can be difficult to make a connection to unless using a crimped type of
connector for the shield.

466. Discriminator BC898T

At 11:02am EST (1602z), MacDill KC-135R "Bolt 52" was refueling the
Whiteman AFB A-10s (CHISELs) working at Avon Park Bombing Range. CHISEL 21 and
CHISEL 31 were the flights working the range. Refueling freq was 238.9. The
guys in KC-135 BOLT 52 were very chatty today. They had been taking pics of the
A-10s all morning during refuelings. They asked if the CHISELs would drop
flares so they could get some spectacular photos. The Missouri guys are
usually playful, and have been known to "accidentally" drop flares, usually
when departing a TDY location, for the enjoyment of the base locals. But today,
the CHISELs said they could not drop the flares.
BOLT 52 said that after today's AARs of the CHISELs, they would be going
to Robins AFB for some pattern work.
Other acft were working much further south, in the Tarpon Range, near Key
West. RedDog 51 was up on 344.2 with Bandsaw Kilo (AWACS) explaining that he
would be escorting RedDog 52 who had a right engine problem. Bandsaw Kilo was
also up with acft on 250.6.
In the afternoon, KC-135 BOLT 51 refueled MAKO and SHARK flights. The
SHARK 21 flight consisted of tails 86-319 (SHARK 21) and 86-266 (SHARK 22).
AWACS Bandsaw Lima also was heard in comms with OakySam and was working
the offshore area to the north of my location.
Even snagged comms from a Whiteman AFB B-2A bomber when he was talking
with MacDill AFB Metro about weather in Nebraska.

Well Mark, where are you ? did you ran away to check your criminal code an legal procedures ?

Here is a link that explain a little bit about a security guard.

http://en.wikipedia.org/wiki/Security_guard

A security guard has the same arrest powers than a ordinary citizen yould have. But like scoob say's, the alarm going off on a exit detector is not a reason to search, ID or make an arrest. Often people will comply to the guards request to check their bags, but it is not mandatory.

>>> The only drawback for you is that much of the rg-6 does not use a
copper shield <<<

I haven't purchased any coax in years and didn't realize that. I do plan to
use solder type connectors so will have a close look at what I put up.

I have both a RS scantenna and a RS 20-014 (the big one) ground plane. The
RS scantenna came with what I recall as RG6, thought I would use that RG6
with the 20-014 as it would sit well above the top of the pole and allow me
to keep the SW antenna closer to the top of pole.

Thanks for the "heads up". RM~

Oh yes. Paging: POCSAG, FLEX, ERMES with PDW (www.p2000-flex.tk).
Frequencies depending of where you live. For optimal results, you may
want to consider a 2 or 4 level data slicer.

And AIS with ShipPlotter (www.shipplotter.com), freqencies 161.975 and
162.025 MHz worldwide. That is, if you live close to the sea or a
harbour. A discriminator output and soundcard will do fine usually.

I used an RH77CA mounted on a mag-mount base with a BNC on the roof of my station wagon for at least half a year. It worked great! The only thing that happened was that the rubber covering around the antenna's BNC barrel degraded after some time, but that was easily fixed with some heat shrink tubing. That part was only cosmetic anyway. The rest of the antenna--the rubber coating over the antenna element and the plastic housing--held up just fine. I wouldn't recommend it for long-term use, though.

The antenna I used later was the Lakeview EDB-1 "Economy Magnetic Mount Dual-Band Antenna" ($17.95). It is solid as a rock, reasonably low profile and performs very well on the main VHF/UHF action bands. See it at: http://www.hamstick.com/. You can get a threaded mount version of the same antenna for $9.95.

Hi,

For those with a 780 :

Have been getting somewhat contradictory results with this, so I'll
ask here.

When using the L/O button to lock out a channel, is this temporary ?
e.g., after shutting the power off, and then back on, is the lockout still
in place ?

How do the other lockout options work, with regard to being "temporary" ?
New at this, and find it all a bit confusing.

Thanks,
Bob

> on, is the lockout still in place ?
>
A programmed channel remains locked out, until you unlock it.

> How do the other lockout options work, with regard to being
> "temporary" ? New at this, and find it all a bit confusing.
>

The 780 maintains a permanent list of, up to 200 unique skipped
frequencies. When frequency 201 is added to the end of the list,
the first entry is cleared from memory. If a frequency from one of
the pre-programmed service searches is skipped, it will be skipped
if it is in the range of a custom search.

Each bank, if programmed as for a trunking system, can store up to
200 locked out talk group ids. Again, this is permanent until
either manually unlocked (page 41) or you attempt to skip more than
200 ids.

All skipped/locked out items are retained, even is power is turned
off.

Assuming the antenna has a 50 Ohm feedpoint impedance the use of 75 Ohm
cable will cause a 1.5:1 SWR. This is an acceptable match, if you aren't
transmitting you'll not even notice the mismatch. There was an article
several years back about using "End runs" of hardline from the cable
company's.

** U S A. FCC CRACKDOWN ON TRUNKED SYSTEMS? As much as I detest and ignore the worthless Paris Hilton, I had to pass this along. Can you file a complaint on an 800 MHz trunked system?

PARIS HILTON is in trouble for indecency on radio, but not the kind of radio you'd expect. The controversial heiress apparently dropped an "f-bomb" on fire-dispatch radio while taping an episode of FOX reality series "THE SIMPLE LIFE." NBC O&O WCAU-TV (NBC10)/PHILADELPHIA, which says it has a copy of the audiotape, reports that HILTON and NICOLE RICHIE were filming at an ATLANTIC CITY fire station on JANUARY 14 when HILTON got on the dispatch system and said "Ladder 1, OK, motherf---ers!." : Can you receive cellular phone calls on a modified scanner? I thought
: with all phone being digital now you could not?
:

I noticed a few years back that there was a push to get cellular operations off of 800 Mhz in the US and 900 Mhz in Europe. Basically everything was being shifted to 1800 and 1900 Mhz. In doing some research, I have came across the overall plans. Look on a web site for UMTS (universal mobile telecommunications service). This was all decided in 1998 at a World Radio Conference. The web site is http://www.umtsworld.com. Look at the FAQ for overall plans to shift, it lists just about every Cell phone system in the world. The Technical section lists the frequencies (1800 to 2200 Mhz). It will not only be a phone system but a computer network and TV service provider. It also has a satellite phone component as well.

The police want cell phones off of 800 Mhz. And they want 700 Mhz for data (MDT).

BTW, Verizon just purchased Direct TV and SBC (Cingular) purchased Dish Network.

The laws will need to be updated.

UNIDEN DEBUTS APCO 25 CAPABLE DIGITAL SCANNER AT CES

New Handheld Model Includes Advanced Scanner Technology

In an Ultra-Compact Design

LAS VEGAS, Nevada, January 6, 2005 - Uniden America Corporation, a leading manufacturer of wireless consumer electronics, will introduce a new handheld digital scanner, the Bearcat BCD396T, at the Consumer Electronics Show (CES), January 6-9, 2005, at the Las Vegas Convention Center in booth #14414. The BCD396T offers APCO 25 digital capability, allowing users to monitor the activities and signals of city and government service departments, utilizing advanced scanner technology in an all new compact, handheld design.

Featuring APCO 25 capability, Uniden's BCD396T is poised to improve interoperability between large cities currently using the digital systems and those smaller municipalities that still operate on analog systems. Uniden's BCD396T will not permit users to monitor encrypted signals from national and local security organizations.

The Bearcat BCD396T also offers Close CallT RF Capture Technology, Dynamic Memory Management, Fire Tone-Out as well as 5,500 channels and a frequency range of 25MHz to 1300MHz, excluding cellular. This new model is slated to hit shelves in late summer 2005.

"With the BCD396T, we listened to our consumers and have incorporated their feedback on features they wanted, into a high-quality product that meets the demands of both professionals, such as law enforcement officials, and scanner enthusiasts," said Paul Opitz, Uniden Product Manager. "For example, we have eliminated the proprietary battery pack and removed the need for an add-in board for APCO 25, reduced the size of the model, and added a backlit keypad."

2

Uniden also introduces additional scanner offerings, including the BC246T TrunkTracker III as well as NASCAR®-branded models such as the SC230, BC72XLT, and BC92XLT.

http://www.uniden.com/press/Apco25Scanner.pdf

http://www.universal-radio.com/catalog/scanners/1396.html

http://www.grove-ent.com/radiorumors.html

Pricing is listed at $895, but that will change. I like the flexible memory and channelization. And the built in Frequency Counter/react tuning. And using NiMh batteries.

The BCD396T offers APCO 25 digital capability, allowing users to monitor the activities and signals of city and government service departments, utilizing advanced scanner technology in an all new compact, handheld design.

Featuring APCO 25 capability, Uniden's BCD396T is poised to improve interoperability between large cities currently using the digital systems and those smaller municipalities that still operate on analog systems. Uniden's BCD396T will not permit users to monitor encrypted signals from national and local security organizations.

The Bearcat BCD396T also offers Close CallT RF Capture Technology, Dynamic Memory Management, Fire Tone-Out as well as 5,500 channels and a frequency range of 25MHz to 1300MHz, excluding cellular. This new model is slated to hit shelves in late summer 2005.

"With the BCD396T, we listened to our consumers and have incorporated their feedback on features they wanted, into a high-quality product that meets the demands of both professionals, such as law enforcement officials, and scanner enthusiasts," said Paul Opitz, Uniden Product Manager. "For example, we have eliminated the proprietary battery pack and removed the need for an add-in board for APCO 25, reduced the size of the model, and added a backlit keypad."

2

Uniden also introduces additional scanner offerings, including the BC246T TrunkTracker III as well as NASCAR®-branded models such as the SC230, BC72XLT, and BC92XLT.

http://www.uniden.com/press/Apco25Scanner.pdf

http://www.universal-radio.com/catalog/scanners/1396.html

http://www.grove-ent.com/radiorumors.html

Pricing is listed at $895, but that will change. I like the flexible memory and channelization. And the built in Frequency Counter/react tuning. And

using NiMh batteries.

490. winflex question

Won't work, never will. Slicer.vxd is a 16 bit device driver, as
such is incompatible with Windows NT/2000/XP.

The latest version of PDW 2.x, has a comport driver that does work
with XP, plus it also works with the soundcard. See the thread "PDW
and ERMES ?", it has a link to download PDW. (Works good with
PCR1000, WinXP and level 2 data slicer)

Might be Nextel's which are pretty popular in such environments due to need
to converse with other workers when on a job OR to accept calls or make them
regarding outside agencies in order to get a job done/supplies ordered -
etc.. To my knowledge, they are "NOT" able to be received via a scanner.
Next time you see one - take a good look, should say Nextel on front - if
any holster isn't covering it.

TONIGHT ON COAST TO COAST AM WITH ART BELL. . .

-HAARP- www.coasttocoastam.com

Guy Cramer
Dr. Joseph Resnick

Inventors Guy Cramer (superforce.com / hyperstealth.com)
and Dr. Joseph Resnick (NAT2DTC / NxGen BodyArmor)
will be sharing their expertise in the area of the HAARP.

The official purpose of Project HAARP which is based in
Alaska, is said to be for studying the ionosphere in order
to "understand and use it to enhance communications
and surveillance systems for both civilian and defense
purposes." Yet, over the years allegations have
arisen that HAARP is involved in everything from
weather modification to mind control.
Guy Cramer has a new article posted which concludes
that in addition to HAARP, there is another
huge ionospheric array in Alaska. The page also contains
photos, maps, and recommended links from Cramer
and Dr. Joseph Resnick.

511. 800 mghz antenna

Newsgroup: rec.radio.scanner
Date: 2005-01-24 21:04:16 UTC
From: Alex Clayton <alexx1400@yahoo.com>
Message-ID: <kpdJd.4623$r27.4465@newsread1.news.pas.earthlink.net>
Source record: 15223
Cross-posted to: rec.radio.scanner,alt.radio.scanner

First let me start with, I know nothing about radio, and antenna's other than what I experience. When I mentioned a while back I had found I could shorten my antenna on a Pro-95 and still get the 800 trunked police calls the same I got a bunch of e-mails from people who are MUCH more educated than me, telling me all the reasons it would not work and do not try it. I already had done it, with an extra antenna and it works just as well as the antennas that came with the Pro-79 and Pro-95.
Now it did hinder the county police calls here that come out on the 150's band, but I seldom listen to them and did not care. Also this involves Radio shack. I know a lot of you have an ax to grind with them, again I don't care so don't bother e-mailing me to tell me they are the worst place on the planet to buy anything from. So all that out of the way <G>:
Since the city here started switching over to 800 trunked I learned to program the Pro-95 I had bought a couple years ago. I found the reception on the 800 band works better than the old 400 band, which the police are still using while they up date all their radios, in areas that were hard to receive before. Such as inside buildings where I work for example. It used to be hard to pick up calls inside the buildings if the scanner was worn on my belt, with the 800 it seems to make no difference, inside, outside, on my belt or on my shoulder which was nice. When the weather was bad reception did get a lot of static on the 800, but you could still hear them. Anyway I noticed RS offered an antenna that was supposed to work better on the 800 trunked. I finally decided to give it a try, figured if it did nothing I would just take it back. Well after trying it, it does work better, than the original antennas, at least to my un educated ears. They "claim" it works twice as well, now to my again un trained ears that's a stretch, but it does work better. The new one does also work just as well on the 400 and 150's band, even though they warned me at the store that it would not. I did not care, but since the police here are transmitting on both right now it's easy to check. So anyway for anyone who is an novice like me, if you are listening to the 800 and having trouble it may be worth trying one of these. You can order them off the RS site, I just went to the local store and bought one.

No. Everything is not digital. Many are starting to migrate to the 2.4ghz band -- however, the majority of cordless phone conversations take place at 900mhz. Although illegal and I do not support the monitoring of private communications -- if you can, switch your scanner to Wide-FM and scan the 900 - 904Mhz, and 924 - 928Mhz. I have a 2.4Ghz receiver and can listen to my conversations.

Again, please do not look at this as directions to commit illegal activity -- it is meant for legal purposes.

Sometimes, you can trim an antenna and it will work about 50% better at a frequency in the 800mhz range, but in the 150mhz range, it may be about 25% worst. You have to calculate the wavelength you want and figure it out mathematically what size the antenna should be. The RS 800mhz works very good!

Back when I first mentioned this I had an extra antenna I had bought from
RS. It was a few inches longer than the standard one that came with my 79.
It did nothing for the 400 or 150's police. When they switched to 800
trunked was when I started experimenting, and found cutting it made no
difference to the 800 band, even though many people e-mailed me to let me
know it would not. The only reason I tried it was for ease of carry.
The new one I bought from RS is very thin, so MUCH more flexible. This
makes it much easier for carry, and it did improve the 800 enough to hear
the difference over either the standard or the one I had cut. As I said it
also seems to work fine with the 150 and 400's, even though the sales girls
told me it would not <shrug>. The main reason I decided to give it a shot is
they had one at the local store. I figured if it did nothing I would just
take it back. When I bought the other one a couple years ago I ordered it
online so it was not worth bothering with.

William Thomas
Electromagnetic weapons "tests" in Iraq
Tue Jan 25, 2005 18:53

MICROWAVING IRAQ

"Pacifying" Rays Pose New Hazards In Iraqi
By William Thomas

On the rooftop of a shrapnel-pocked building in the ruins of Fallujah, a team of GI's stealthily sets up a gray plastic dome about two-feet in diameter. Keeping well back from the sight lines of the street and nearby buildings, they plug the cable connectors on the side of the "popper" into a power unit. The grunts have no clue what the device does. They are just following orders.

"Most of the worker-bees that are placing these do not even know what is inside the 'domes', just that they were told where to place them by Intel weenies with usually no nametag," reports my source, a very well informed combat veteran I will call "Hank".

The grunts call the plastic devices "poppers" or "domes". Once activated, each hidden transmitter emits a widening circle of invisible energy capable of passing through metal, concrete and human skulls up to half a mile away. "They are saturating the area with ULF, VLF and UHF freqs," Hanks says, with equipment derived from US Navy undersea sonar and communications.

But its not being used to locate and talk to submarines under Baghdad.

After powering up the unit, the grunts quickly exit the area. It is their commanders' fervent hope that any male survivors enraged by brutal American bombardments that damaged virtually every building in this once thriving "City of Mosques", displacing a quarter-million residents while murdering thousands of children, women and elders in their homes lose all incentive for further resistance and revenge.

A dedicated former soldier, whose experiences during and after Desert Storm are chronicled in my book, Bringing The War Home, Hank stays in close touch with his unit serving "in theater" in Iraq. When I asked how many "poppers" are being used to irradiate Iraqi neighborhoods, he checked and got back to me. There are "at least 25 of these that have been deployed to theater, and used. Some have conked out and been removed, so I do not know how many are currently active and

broadcasting."

Hank is still losing friends in Iraq, where front-line soldiers put their current casualty figures from all causes psychological crackups and suicides injured.

Hank also blames those at the top for hospital counts of upwards of 65,000 children killed since the 2003 invasion. He is concerned that innocent Iraqi families and unsuspecting GIs alike are being used as test subjects for a new generation of "psychotronic" weapons using invisible beams across the entire electromagnetic spectrum to selectively alter moods, behavior and bodily processes.

"The 'poppers' as they are called, are capable of using a combo of ULF, VLF, UHF and EHF
wavelengths in any combination at the same time, sometimes using one as a carrier wave for the others," Hank explains, in a process called superheterodyning. The silent frequencies daily sweeping Fallujah and other trouble spots are the same Navy "freqs that drove whales nuts and made them go astray onto beaches."

MICROWAVING IRAQ

The Gulf War veteran observes that occupied Iraq has become a "saturation environment" of electromagnetic radiation. Potentially lethal electromagnetic smog from high-power US military electronics and experimental beam weapons is placing already hard-hit local populations-particularly children experiencing serious illness, suicidal depression, impaired cognitive
ability, even death.

American troops constantly exposed "up close" to their own microwave transmitters, battlefield radars and RF weapons are also seeing their health eroded by electromagnetic sickness. It's common, Hank recalls, for GIs to warm themselves on cold desert nights by basking in the microwaves radiating from their QUEEMS communications and RATT radar rigs.

Constant microwave emissions from ground-sweeping RATT rigs and SINGARS mobile microwave networks are much more powerful than civilian microwave cell phone nets linked in many clinical studies to maladies ranging from asthma, cataracts, headaches, memory loss, early Alzheimer's, bad dreams and cancer.

Even more powerful US military radars, radios and "jammers" blasting from ground bases and overflying aircraft add to this electromagnetic din.

This is bad enough. But this is also Iraq, Hank says, where ever-present sand acts as miniature quartz reflectors, unpredictably amplifying the ricocheting electronic smog so thick that if it were visible, every vehicle in Baghdad and the surrounding Sunni Triangle would be driving blind with their headlights on.

THE GIFT THAT KEEPS ON GIVING

This is grim news to friend and foe alike constant adrenal stress, waterborne pollutants, infectious sand fleas, dehydration, pharmaceutical drugs and exposure to radioactive Uranium-238 fired in "hose 'em down" exuberance by US ground and air cannons and cruise missiles.

As Hank puts it, DU is "the gift that keeps on giving." For the next four billion years, medical investigators say, large populated expanses of Kosovo, Afghanistan, Puerto Rico and Iraq will remain lethally radioactive from Made In America depleted uranium dust.

What kind of people would do this?

Clinical tests have repeatedly shown how microwaves "rev up" incipient cancer cells several hundred times. Triggered by nuclear radiation, and turned rogue by electromagnetic warfare unleashed by US forces, human cancer cells have been found to continue proliferating wildly after the power source is turned off

MICROWAVING WOMBS AT GREENHAM COMMON
While the mobile microwave weapons currently deployed in Iraq may or may not lead to lasting harm, rooftop "poppers" and "domes" left to radiate for days at a time are irradiating unsuspecting families already coping with illness, wounds, hunger and the stress of losing homes and loved ones, whose rotting corpses cannot be buried under the sights of marine snipers.

A preview of what lies in store for long-suffering families in Iraq can be gleaned from Greenham Common, where the British Army reportedly used an electromagnetic weapon against 30,000 women who had camped for nearly two decades around that UK military base to protest the deployment of nuclear-tipped US cruise missiles.

One day in the summer of 1984, more than 2,000 British troops suddenly pulled back, leaving the fence unguarded. Peace mom Kim Besley recalls that as curious women approached the gate, they "started experiencing odd health effects: swollen tongues, changed heartbeats, immobility, feelings of terror, pains in the upper body."

Besley found her 30-year-old daughter too ill to stand. Other symptoms typical of electromagnetic exposure included skin burns, severe headaches, drowsiness, post-menopausal menstrual bleeding and menstruation at abnormal times. Besley's daughter's cycle changed to 14 days and took a year to return to normal.

Two late-term spontaneous miscarriages, impaired speech, and an apparent circulatory failure prompted the women to begin monitoring for a directed-energy beam, Using an EMR meter, they measured beams sweeping their camp at 100-times normal background levels.

Another harrowing example involves the sudden illness and cancer deaths of US embassy staff in Moscow after being deliberately targeted with

very weak pulsed microwaves by Soviet experimenters and fascinated CIA onlookers running "Project Phoenix" in 1962.

Very Low Frequency (VLF) weapons include the dozens of "poppers" currently deployed in Iraq, which can be dialed to or "long wave" frequencies capable of traveling great distances through the ground or intervening structures. As air force Lt Col. Peter L. Hays, Director of the Institute for National Security Studies reveals, "Transmission of long wavelength sound creates biophysical effects; nausea, loss of bowels, disorientation, vomiting, potential internal organ damage or death may occur."

Hays calls VLF weapons "superior" because their directed energy beams do not lose their hurtful properties when traveling through air to tissue. A French weapon radiating at 7 hertz "made the people in range sick for hours."

GI's "DRIVEN NUTS" BY ELECTROMAGENTICS IN IRAQ

Like so many other American blunders among the ruins of Babylon, the intended microwave "pacification" of rebellious neighborhoods is having unintended effects. In actual "field-testing" in the Sunni Triangle, Hank has learned that the hidden, dome-shaped devices "are removing inhibitions". Armed individuals, already highly motivated to kill American forces are reportedly "losing all restraint" when exposed to the electromagnetic beams.

According to Hank's buddies in Baghdad, the frequency-shifting "poppers" "are having some remarkable effects on the locals as well as our own people." But these effects differ. Possibly, Hank surmises, because Americans come from daily domestic and military environments saturated with electromagnetic frequencies, while many Iraqis still live without reliable electricity in places largely free from electromagnetics before the American invasion.

According to members of Hank's former unit, constant exposure to invisible emissions from radar and radio rigs microwave weapons says. "It makes them stupid for two or three days."

The Desert Storm veteran compared the emotional effects of constant exposure to military microwaves to a lingering low-pressure weather system that never goes away. "You feel way down for days at a time," he emphasizes

As a consequence, AWOL rates among "spaced out" US troops are as high as 15%, Hank reports. For many deserters, it is not cowardice or conscience that is causing them to absent themselves from duty. "They are feeling so depressed," Hank explains. "They don't feel good. So they leave."

According to Hank's front-line buddies, Iraqis exposed to secret beam weapons "get laid back, confused and mellow, and then blast out in a rage, as opposed to our folks going on what could only be called a 'bender', and turning into a mean drunk for a while."

Once they wander away from direct electromagnetic-fire, startled GIs come to their senses. They return to their units, Hank explains, saying, "What was I thinking?"

The recovery rate among US troops "seems to be about a day or so, where the locals are not getting over it in less than a week or more on average," Hank has learned.

It is Hank's hope that his revelations will prompt public debate over the secret use of electromagnetic weapons in Iraq. But lost in the arguments over these supposedly "non-lethal" weapons is a much bigger question: What are Americans doing there?

Whether soldier or civilian at home, it is our imperative duty to stop supporting those responsible for ongoing "weapons tests" in Iraq. As electrochemical "beings of light," the strongest electromagnetic force on Earth is human conscience, acted upon.

Author's Bio: William Thomas

After resigning his US Navy Reserve commission, William Thomas subsequently served
five months with a three-man environmental emergency response team in the Gulf during and immediately after Desert Storm. He has written about military electromagnetics in Scorched Earth and Bringing The War Home, and has documented other microwave hazards in his new book "Dialing Our Cells."

I think you posted in the wrong groups, most of us here, IIUC, dream
about working in microwave radiation only 100 times above normal.

Now, if we could only get one of those "poppers" to use at the kids
bedtime...

Poppers? --- I WANT ONE !!!

-Could we set up a popper at my place? They sound like they are so cool ---
I volunteer to be experimentally irradiated on the condition that I get one
to keep.
-Is there any way I could buy my own popper from eBay or anywhere?
-Could one be powered using the new 2500mAh NiMH rechargeables?
-If the popper was connected to say, a 4 element yagi antenna, how
directional would the main lobe be?

Anybody know where I can find a list of services currently being broadcast on FM stations' subcarriers?

Also, can anybody refer me to information on which FM stations are used to broadcast the MSN Smart Watch signals?

Thanks,

George

My sources tell me the simple effective countermeasures for these devices has been found to be the wearing of a tin foil hat. Sort of brings back memories of how the North Vietnamese defeated our laser-guided bombs by simply obscuring the target in smoke.

Lloyd

I been picking these signals up here on 8020MHZ. Very strong! S9 all day and night! In fact I touched the radio and noticed it was also very warm? It's 32 degrees outside??

Very worrying isn't it?
My sensors detected that I was being targetted by stuff with wavelengths
from 450 to 750 nm today - with so much energy it must have been
generated by a NUCLEAR REACTOR.

Now, Americans, IIRC, have this happen all the time - but for us in the
middle of Dartmoor National Park, in Devon UK, in January - this is
unheard of.

OK, we get used to being targetted by hydrogen bombs (well,
hygrogen/oxeygen) of about 0.4cm calibre We have purpose designed
protective equipment to deal with that. But not the nuclear fallout stuff.

Luckily, someone discovered many years ago that a knotted hankie on the
head is very effective at dealing with the stuff - particularly in areas
of high ozone concentration.

How can these SCA transmissions be decoded? Are there any sound card-based software techniques, or does it always require hardware?

Cannot be done with sound card or software. These are subcarrier s in the
FM signal. One has to tap the receiver after the demodulator and send
through a separate LF FM receiver ("adapters"_. Note that there are
legalities to consider in the US.

The site mentioned
http://members.aol.com/fmatlas/home.html
sells modifired FM radios and adapters.

552. Constant Beeping Scanner Defeaters

Newsgroup: rec.radio.scanner

Hello,

There are a couple of Police repeaters in my area that have a contant "beeping" carrier on them all the time, except when it is actually repeating something. The repeaters are fully monitorable if you don't mind the constant beep in between, but obviously a scanner will never skip past them. I suspect the purpose for this is to make is so annoying for scanner listeners that they just forget about it, so....

I am wondering how the radios of the intended audience (police officers in this case) work. They obviously aren't listening to this beep all the time. I was thinking that maybe they were doing something with CTCSS and/or DCS tones, as until recently scanners with this capability were not commonplace, but so far I haven't figured out how it works.

One of the two does transmit the same CTCSS tone regardless of whether it is the beep or voice, so that doesn't appear to be how that one works.
The second does not appear to transmit any CTCSS tone at all at any time.
I haven't done any DCS searches yet, but I do have the capability of decoding DCS if anyone thinks that's how they are doing it.

If it isn't DCS or CTCSS, I would have to assume it is some specialized feature of their radios. By the way, these are both regular old UHF frequencies.

Thanks for any input.

'specially when you pick up a 911 call coming from one of those. TV news outlets are always hungry for hot stuff like that and will most likely give you $$$ if you send 'em a tape or MP3 file of something like that that you picked up on your scanner.

Have you tried monitoring transmissions on the repeater's
input frequency? You probably need an outdoor antenna
to hear the portables and distant mobile stations.

Extreme Fajitas? Hmmm, sounds interesting, I must admit.
I was wondering why I was waking up all thirsty and dizzy --- and here I was thinking it was all the vodka of I've been drinking --- silly me.
But seriously, about these EM Poppers --- do you think the CIA would be interested in deploying a popper array in Canada?
First we would program the poppers to make people vote republican, and then get the neo-conservative think-tanks to come up with a way to divert soft campaign funds into funding a contract to deploy thousands of poppers nationwide along the northern border provinces of BC, Alberta, etc.
Then comes the sneaky part, once the yankees are all thirsty and dizzy and voting republican, we set up huge rocket motors pointing off into space at wierd angles and run them night and day, this would alter the earth's spin, and push the geographic pole towards russia, having the net effect of pushing canadian territory into a more southerly latitude where it's warmer so the pot plants grow better.
This information is top secret, I'm relying on the tight knit NNTP community to keep this under wraps.

Actually the repeaters in question are both cross-band repeaters. I can monitor the main frequencies, but I would like to monitor the cross-band repeaters as well, because depending on my location, they can be received better than the main frequencies.

The big question is how are the intended users not hearing the annoying beep, and is it something that can be ignored by today's scanners. Obviously somebody listens to the repeater, or why have it. Plus, as I recall, back in the old days of old VHF mobile phone systems, those repeaters did the same thing (again, I would assume to annoy scanner listeners enough to ignore monitoring them).

My favorite is the baby monitors. The new ones are always on since they plug into the wall. Makes for nice room bugs. Interesting entertainment for a 14 yr old when the neighbors are going at it loud enough to be heard clearly in the baby's room.

I'm pretty sure the law does not say "illegal, except for armchair listening
at home" so the answer would be yes.

I bought a SCA radio AM FM radio with the upper and lower SCA setting for
cheap on Yahoo auctions about a month ago brand new in box here is a link.
I do not have anything to do with the guy just thought it was a good deal.
the radio is a cheap radio. It has good audio and great sensitivity.
for $30 well worth it.
Doug

565. BC 246 Upgrade?

Newsgroup: rec.radio.scanner
Date: 2005-01-27 15:33:22 UTC
From: MegaHurts <nospam@verizon.net>
Message-ID: <6R7Kd.967$ao5.748@trnddc03>
Source record: 15125

Very interested in purchasing the BC246 but slightly concerned as to why there is an firmware upgrade issue already. Can anyone provide any info on this? What is wrong with the factory firmware and if there are known bugs, does anyone know what they are? Also hearing there is an issue with Windows XP causing problems with the firmware update. Is this a good scanner to buy for monitoring while traveling? Looking for answers and do not want to join any email group lists - thanks in advance.

kg4???

Wow, the population of Malvern, England must really have been cooked over the years with the assorted high power RADAR systems operated at the Royal Radar Establishment and the other stuff at the Telecommunications Research Establishment (The names and roles have changed several times over the years).

ISTR that the radiation was intense enough that during the coronation of Elizabeth II a fascinating and artistic? display of gas discharge tubes was erected and powered solely by the incident radiation. Certainly during my time there a neon or fluorescent bulb did not require wires to work.

Also the folks around Cutler, Maine with the 2+ Megawatt VLF transmitter which has been running for several generations must be showing some signs, as should the folks around Jim Creek etc. etc.

There are multiple places with transmitters on these frequencies running many, many times the power of any portable device - they have dedicated power lines or huge dedicated generators which obviously far exceed the capability of any transportable device.

But, I think I'll put an aluminum shield on my front lawn to protect me from that long range radar I can see across the field, trouble is there is a high power VHF TV transmitter beyond my back yard - maybe I'll dig a hole and line it with copper? They both use back-up generators which would require a very large truck to move and consume large quantities of fuel so I suspect they out-perform any portable 'bubble'.

Dave

PAT 358: US Army Priority Air Transport
9:35am: Inbound MacDill.
[311.0]

AIR TRANSPORT 400: DC-8 ATI, Little Rock (USAF Contractor)
10:10am: Arrives Patrick AFB from Ascension.
12:50pm: Departs.
[132.65, 133.75, 124.35, 118.4]

MAULER 03: S-3B, Jacksonville NAS VS-32 "Maulers"
10:14am: Comms with Sealord.
[267.5]

BOGIE 55: F-5, Fallon VFC-13
10:20am: Area transition.
[380.3]

BOGIE 03: F-5, Fallon VFC-13
10:40am: Area transition.
[306.9]

LIMA LIMA 51: P-3C, Jacksonville NAS VP-30 "Pro's Nest"
10:54am: Area transition.
[269.3]

FALCON 711: P-3C
11:20am: Comms with Fiddle, Jacksonville NAS.
[285.0]

LIMA ALPHA 048: P-3C, Jacksonville VP-5 "Mad Foxes."
11:25am: Area transition.
[348.7, 379.25, 135.225]

SCOUT 04: S-3B, Jacksonville VS-24 "Scouts"
11:30am: Touch-and-go at Patrick; on to NAS Jax.
[269.375, 132.65, 124.8, 307.0]

LIMA LIMA 21: P-3C, Jacksonville NAS VP-30 "Pro's Nest"
10:54am: En route to NAS Jax.
[133.475]

BLAZE 02: T-1A/BE-40 Columbus AETC 14FTW
12:37pm: Lands Patrick AFB after pattern work; rqsts 500 gals fuel.
3:25pm: Departs Patrick.
[133.75, 132.65, 372.2]

JOSA 403: C-21A #40137, Randolph AFB
12:09pm: Inbound MacDill; self-IDs; will upload 2 pax: one S-4 and one S-6.
Will depart at 1930z.
[311.0]

MAKOs: F-16C Flight, Homestead JARB 482FW 93FS
12:10pm: Works at Avon Park Bombing Range.
[307.1, 292.2, 285.725, 138.125]

CW 020: C-130T, New Orleans NAS/JRB VR-54 "Revellers"
12:14pm: Southbound.
2:39pm: Northbound to NAS Jax to offload two pallets and take on 20K pounds
fuel.
[133.475, 135.7, 310.2]

N3442P: PA-23 #23-1410, privately registered, but has some association with
Patrick AFB, possibly Dept of State.
12:40pm: Lands as IFE with stuck landing gear.
[133.75]
DECEE 91: KC-135R, Andrews AFB 459ARW
1:12pm: Arrives at Avon Park Bombing Range from TDY base MacDill AFB;
refuels numerous Whiteman AFB 442FW A-10 flights and several Homestead F-16
flights.
[292.2, 283.7]

MUSTANG 63: CE-208B #208B0163, US State Dept Intl Narcotics Mission, Patrick
AFB.
1:10pm: Lands Patrick.
[133.75]

SANDY 01: A-10 Flight, Whiteman AFB 442FW
1:40pm: Works at Avon Park Bombing Range; refuels with Decee 91.
[292.2]

CRACKER 01 through 04: A-10s, Whiteman AFB 442FW.
1:40pm: Self-IDs as SANDY 01 flight changing callsign.
[292.2]
Note: Walt has logged the Whiteman boys using "Cracker" in KS.

NASA 912: T-38N #65-10354, Johnson Space Ctr, Houston.
2:15pm: Departs SLF.

[128.55, 124.8, 133.475, 134.0]

NASA 906: T-38N #65-10326, Johnson Space Ctr, Houston.

What a load of crap, anyone with even a little radio knowledge will read this as pure nonsense. When did whales start hearing radio waves? And what the hell is the mix of VLF "Ver Low Frequency" ULF "Ultra Low Frequencies" and UHF "Ultra High Frequencies" got to do with Microwaves "Super High Frequencies"? I live a few miles from a 50,000 watt MF "Medium Frequencies" station at 700 Khz, theres several Mega Watt level Television stations within a few dozen miles, not to mention countless FM Broadcasts on every frequency from 30 to 1300 mhz everywhere. Our whales arnt hearing any of this ;-)

Reference Materials Wanted

I am interested in pirate radio, scanning, LPFM,
clandestine radio, free radio, community radio,
shortwave listening, utility monitoring, etc.

I would like to find books or CDROMs dealing with
these topics.

For example, used Monitoring Times CD's or WUN, etc.

Thanks.

579. ALINCO DJ-X3 reaction tune? Experience in general?

Newsgroup: rec.radio.scanner
Date: 2005-01-27 23:39:10 UTC
From: bob <noone@nowhere.org>
Message-ID: <eYeKd.8422$mA5.649377@news20.bellglobal.com>
Source record: 15139

I'm looking at the Alinco DJ-X3 scanner. I have a DJ-X10, AR8200, RadioShack Pro-96 and a few others, but none have the reaction tune, or nearfield tune, or whatever other trademarked term companies use.

The question is: How well does it work? Do you have to be right on top of the source for the receiver to lock on it? Can you limit the sweep range? Can you lock out certain frequencies?

Overall, are you happy with it?

(I read the reviews on eham.net, but none addressed the performance of the near-field tuning feature.)

Thanks!
B.

581. Re: Broadcast FM SCA subcarriers

Newsgroup: rec.radio.scanner
Date: 2005-01-28 00:39:39 UTC
From: DougSlug <dougslug@hotmail.com>
Message-ID: <cZfKd.1606$Lz5.450@fe10.lga>
Source record: 15141

The following is taken from the manual for the Ramsey Electronics SCA decoder kit, part number SCA1C:

"*A note concerning commercial use*
Although you may listen to these SCA broadcasts in you own home, any commercial usage, such as restaurant, bar, store or even at parties is considered theft of service and the owner of the copyrighted SCA service is entitled to collect payment. So, be cool, OK?"

I don't know how accurately this reflects the law, but it suggests that "armchair listening at home" may not be illegal. Does anybody know where to find the actual text of the law?

- Doug

(chuckling)

I'm somewhat disappointed no-one picked up on my
"Office Space" reference (though I'll admit, it was obscure).

Office Space and "The Office" (BBCTV) are 2 of my
favorite productions, *ever.*

Ahem. On to spicy things: Habanero hot wings tonight.
A one course dinner; what could be easier?

73,

Steve

586. THIS IS REALLY GREAT AND IT REALLY WORKS!

Newsgroup: rec.radio.scanner
Date: 2005-01-28 05:07:00 UTC
From: "darellesbac@yahoo.com" <darellesbac@yahoo.com>
Message-ID: <1106888820.769082.251910@z14g2000cwz.googlegroups.com>
Source record: 15146

Make Tons Of Money Fast!
I was browsing through newsgroups, just like you are, and came across an article similar to this that said you could make thousands of dollars within weeks with an initial investment of $6.00! I thought," Scam", but I was curious, so I kept reading. It said : send $1.00 to each of the 6 names and address stated in the article. Then place your name and address in the bottom of the list at #6, and post the article in at least 200 newsgroups. (There are thousands) No catch.
I was skeptical and worried about the legal aspects of it all, but checked it out with the U.S. Post Office (1-800-725-2161) and they confirmed that it is legal! I invested the measly $6.00. GUESS WHAT!!... Within 7 days, I started getting money in the mail! I figured it would end soon, but the money kept coming in. My first week, I made about $25.00. By the end of the second week I had made a total of over $1,000.00! Third week I had over $10,000.00. Fourth week and I've made a total of just over $42,000.00! How and why this works.. Make a copy of this NOW, so you can get information off of it as you need it.
1: Get 6 separate pieces of paper and write the following on each piece "PLEASE PUT ME ON YOUR MAILING LIST." Now get 6 US $1.00 bills and place ONE inside EACH of the 6 pieces of paper so the bill will not be seen through the envelope to prevent thievery. Next, place one paper in each of the 6 envelopes and seal them. What you are doing is creating a service by this. Mail the 6 envelopes to :
#1) Gary Wilson 21 Weston St. Apt-315 GrandRapids, MI 49503
#2) Fred P.O. Box 25534 Yuma, AZ 85367
#3] Jason Calbourn 452 Kuhn Street Pontiac, MI. 48342
#4] Natalie Sanderson 114 Oak Hereford, TX 79045
#5] Demetria Garcia P.O. Box 421 Richgrove CA 93261
#6) Thomas Ledbetter 1401 E.Bristol St.Apt. A202 Phila Pa 19124
2: Take the #1 name off the list that you see above, move the other names up (6 becomes 5, 5 becomes 4, etc...) and add YOUR Name as number 6 on the list. Change anything you need to, but try to keep this article as close to original as possible. Now, post your amended article to at least 200 newsgroups. (there are close to 24,000 groups) Just need 200, but remember, more posting, more money.

Lloydooo,
You need to increase the layers of aluminum foil that surround your
head, then after that you need to get a refund on all those college level
Physic's Courses, mommy and daddy paid for, cause you shure don't
understand the Physics and Math involved here. As it is obvious, that
you don't comprehend the science, it would be useless for any of us who
do, to try and explain it to you, as you don't have the basic vocabulary
down. Now be a good boy and GO AWAY........

Have you heard about this new hunting reality TV show that's seeking participants? It's called "Hunting for Bambi" and it's like Fear Factor meets Girls Gone Wild. 6 guys get to hunt 12 naked women in the woods with paintball guns. Sounds like it should be a new Olympic sport if you ask me! Definitely better than hunting deer. lol! Go to www.huntingforbambi.com if you're interested in signing up.

I would go for the BC780.

Advantages of the 780:
500 memories (vs 400 for the 2006)
Trunking (EDACS, LTR and Moto). The 2006 has no trunking.
Computer programming and control (The 2006 has neither) (This allows the
780 to be used as the second radio in a Trunker set-up if so inclined.)
PL/DPL (2006 has neither)
Age. The 780 is a fairly current radio, only recently discontinued in
favor of the 785 and 796. The 2006 is a 15 year old design.
Size. The 780 is half the size of the 2006, fits in a car or a desk
better.
Construction. The 2006 has a plastic case, the 780 has a metal case.
Other features include a signal strength meter and variable delays.

There are a few advantages to the 2006 as well, but I still think the
780 is the better radio for most.

The 2006 can be opened for cell coverage. Since most cell calls these
days are digital it really doesn't mean as much as it did back in the
hey day of the 2006.

The 2006 has more room for various other mods. There are bunches of them
all over the net and in various books. Some of these bring to the table
features already included in the 780.

I have a couple 2006's I would trade for 780's in a heartbeat...

>>> I would go for the BC780.<<<

I'll wade in on this also. I have a 2006 and a BC895XLT (probably half the radio the 780 is) and I hardly ever turn the 2006 on. The only reason I even keep the 2006 is that I've had it since it was new and don't have the heart to unload it (also have a BC4, keep it for same reason), the 06 is a great scanner but very out dated. Check the reviews in "Passport To World Radio" It talks about a few models the Winradio G303i , Ten-Tec-320D and Icom IC-PCR1000. From what I remember they liked the Icom PCR1000, it's in the Passport 2004 Edition I was reading this in, sorry don't have the Passport 2005. I would get the PassPort 2005 as there could be more models and more improvements to the existing models.

Well said!

I have had 4 different 2004's over the years, a single 2005 and 4
different 2006's (one with an OS456) I still have the 2005 and 3 of the
2006's. The 2004's have all been sold, except the one that blew up...

I use 2 of the 2006's daily, one as a data radio for Trunker, and the
OS456 equipped one as a second radio for Trunker. This doesn't work too
well though, as they tend to get a whine when 2 radios are receiving in
the same band near each other.. I plan on swapping the second (tracking)
radio for the Trunker set up to a PRO2052 I have laying around.

As for the 780/796 bunch, I have 4 780's and 2 796's. Great radios! I
like the size/form factor as well as the operation. The 796 is a little
different operationally, it took me a long time to get used to the Hold
button instead of the Manual button, as well as the reversed
Volume/Tuning controls!

I never had a BC895 or 898, but I have heard others swear by them or at
them...

The 2006's have great sensitivity with decent selectivity. They were
pretty well unrivaled for this until the 780 came out, I think the 780
has the 2006 beat for this now.

Hey folks,
I don't know if I can't "search" anymore in my old age, or just what is going on. Anyway, I'm looking for reviews of the BC92XLT scanner. Can't find one anywhere. Anyone have first hand knowledge? My local PD and Fire are digital, and I know this won't receive them. It sure looks like it will meet my other needs though.

My biggest concern is whether it is a good all around radio, or if it's a cheapie "gimmick" radio mainly for use at the track.

Any first hand knowledge would be great! A point to some reviews would be great too. Thanks.

Half of what you remember is correct, the other half is not: They did indeed review all the three radios you mention, but the Winradio was a clear winner. They said it is the "ne plus ultra" amongst all PC radios. I have the G313 and I would never ever look back. Superb radio.

I experienced more intermod on the BC780XLT than the PRO-2006.

and only half of that is right. The winradio g303i and tentec rx-3200 were BOTH rated 4-star 'passport's choice'. The icom pcr1000 was only rated 3 stars.

However, this IS rec.radio.scanner -- not rec.radio.shortwave, and Passport's 'Verdict' section on the icom says "Among tested PC-controlled receivers, the Japanese-made Icom IC-PCR1000 is the most appropriate for wideband frequency coverage." -- which kind of sounds like what a rec.radio.scanner questioner would be interested in...

Yes, and only half of that is right. ;-) TenTec got 4 stars and
WinRadio also, but only WinRadio was declared "ne plus ultra amongst
PC receivers". (Just looked up "ne plus ultra" in a dictionary to be
sure, it means "the pinnacle" or "the ultimate", simply the very
best.)

And the WRTH awarded five stars to G303 with a glowing review.

To anyone who has tried both receivers, the difference between TenTec
320 and Winradio G303 is quite obvious: You buy TenTec if you are
happy with a conventional performance receiver with a crude PC
control, and your budget is tight. You buy WinRadio if you want more
innovation and refinement, better performance and better features, and
don't mind paying a little more.

>However, this IS rec.radio.scanner -- not rec.radio.shortwave, and Passport's

Indeed. In such case I would have however recommend the WinRadio
WR-1550e. I happen to own this model also, and in my experience it
runs circles around the PCR 1000.

Geoff

611. PC controlled reciever --- good idea? bad idea? or a just plain ugly one?

Newsgroup: rec.radio.scanner
Date: 2005-01-29 13:13:04 UTC
From: tom <cyberhun@shaw.ca>
Message-ID: <AZLKd.202511$8l.31044@pd7tw1no>
Source record: 15271

Since personal computers are so powerful and cheap these days, I wonder if there is a wideband reciever whose tuning function can be controlled by PC, then it would simply be a matter of writing the software (or finding pre-existing shareware) to change the frequency that the radio is tuned to, and monitor the output of the reciever for signals, and you would have essentialy the same thing as a thousand dollar winradio but perhaps for a fraction of the cost.
I know that VHF transcievers can be interfaced with a PC to create digital transcievers and all (almost all) of the functionality stems from software subroutines instead of hardware on the transciever --- a 'software' implementation instead of a hardware one, if you will. Rather than purchasing a hardware "Terminal Node Controller", you basically emulate the Node controllers functions in software.
Could the same thing be accomplished with a reciever? Is there a reciever out there that has solid state tuning that can easily be adapted to being controlled by a PC? Or is there a really simple, clear-cut reason why this is a bad idea, that I'm just not understanding (but should be)?

Concur - owning both a PCR1000 and a Winradio 1500e, I fully support the statement. My experience with the PCR 1000 has been very negative to put it mildly - it has shit sensitivity and has woeful support from hte manufacturer. The top of the line winradio gear is a damn sight more expensive, but there is not a lot of cost difference between the 1000 and the 1550 - my advice, don't waste your money on the Icom.

Disagree -- sold my 1500e and bought a second 1000. Each to his own. Spend
your money wisely.

Google "SOFTWARE DEFINED RADIO"

Here is one manufacture.

http://www.flex-radio.com/

The future is NOW.
It is as you described, functions previously preformed by hardware are now
done with software.

Consider Audio Filters versus Digital Signal Processing as an example.
DSP is now available as freeware for the PC and works wonderfully.
Radios will be cheaper, have more features and be more flexible.

From: John Schneider <thecop@optonline.net>
Message-ID: <5HUKd.914$fP7.507@fe10.lga>
Source record: 15277

I know the answer seems rather obvious, but I was wondering if anyone might be able to advise me as to which of the two receiving methods is the most sensitive. Would a quality scanner with a frequency crystal (VHF) outperform a digital scanner with all other things being equal (or at least as equal as possible)?

John thecop@optonline.net

>

Passport did not review Winradio 1550e in fact. And even if they did,
I'd rather verify their opinion myself, as I always do - trust me I am
very well qualified for that. Also, as you are correctly implying
elsewhere, different people can have different needs and motivations,
and other issues rather than those of strictly objective technical
merit can, and often do, come into play, and I have seen this
happening with Passport also.

But that particular Passport comparison involved only Winradio G303i
vs TenTec vs PCR1000, which I have already covered. You can also see
the TenTec and Winradio receivers compared side by side by Lee
Reynolds in the August 2003 issue of the Monitoring Times magazine.
The G303i was, unsurprisingly, a clear winner.

So, the answer to the original question is, "yes, Winradio is really
that good", and often better than it is being credited for. I guess
the reason is that they are often miles ahead of others. Just look at
their latest G303e and G313i - there is simply no comparison:
http://www.winradio.com/home/g303e.htm
http://www.winradio.com/home/g313i.htm

It does not make any differance. The first RF amplifier stage usually sets the basic sensitivity . As most of the crystal sets are much older than the digital ones , the digital ones may be more sensitive due to beter transistors and/or design in the rf stages. If the crystal set is tuned to one frequency only, then it may be more sensitive than the digital one that covers a very wide frequency range.

Hmm, interesting. I just read an article in CQ-VHF linked to from that flexradio site you suggested, BLR. There's a whole new area there I didn't know about. I'll just have to get one of these sdr's. Like the guy says, it'll never get old, because you can simply reprogram it. If you have a new idea you can program it and try it out instantly, try that with hardware.

Concerning Winradio as an SDR:

See the November 2004, December 2004 and January 2005 issues of MONITORING
TIMES.
Dr. John Catalano did a series on Software Defined Radios.
The Winradio is a "software CONTROLLED radio"

A "SOFTWARE DEFINED RADIO" could have it's frequency coverage and mode
of operation redesigned by software! A traditional PC controlled radio
could NOT.
As an appliance operator, the distinction makes no difference to me.

But in the big picture of things, it matters to all of us Radio Consumers
because radio specifications
will not be designed by the manufacture but by third party software
programmers.

It means lower cost, feature rich, flexible radios.
Imagine a radio doesn't do what hobbyist wants it to do so hobbyists
alter it's specifications. Mods are no longer in the realm of
the hardware hacker but in the software writer.

A bold concept. POWER TO THE PEOPLE! The future of our hobby is exciting.

What a fabulous idea, everything from a 40 meter CW rig, to a 2 meter rig transmitting single side band, all in one piece of hardware. And on the weekends, when you get bored, you can click on an icon of Jupiter and monitor jovian emissions on 200 meters. One thing though, how will "they" (you know ---THEM) prevent us from clicking on an icon that looks like a padlock which reconfigures our little magic box to an absloutely secure, spread spectrum system?

Now, if they can only mass market it to the same degree as with the PC and get the price down. This $1200 USD per unit price is a little high.

Sorry, this is not exactly correct. Winradio make a lot of PC-based
radios, which include Software-Controlled (the 1000, 1500 and 3000
range) *and* Software-Defined (G303, G313).

The Winradio G303i was the first Software-Defined Radio on the
consumer market.

>A "SOFTWARE DEFINED RADIO" could have it's frequency coverage and mode
>of operation redesigned by software!

Sorry, this is correct only in terms of the mode of operation, but not
frequency coverage. I refer you to:
http://www.sdrforum.org/tech_comm/definitions.html,
in particular to the sentence (under the Tier 2 definition of
Software-Defined Receivers) "This front-end equipment represents a
constraint on the frequency coverage of the system,".

In order not to have any such frequency coverage constraint, you would
need to have the antenna connected directly to the A/D converter
(which would need an infinitely fast conversion rate with a huge
resolution). The current state-of-the-art A/D converters, if
connected directly to the antenna, would not provide you with a very
good radio at all. That's why all present-day SDRs must have some form
of a frequency-constraining hardware front-end.

>As an appliance operator, the distinction makes no difference to me.

Indeed. This opportunity is already available with the Winradio SDRs.
There is nothing stopping any knowledgeable software writer from
writing his own IF filtering processor and an entire demodulator.
Winradio make the programming information available:
http://www.winradio.com/home/developer-g303.htm
Go for it! :-)

I have a Diamond discone with two extended legs adjustablefor CB or
10mtr TX use. It does not work as good as a designated CB-antenna but is
DOES work with low SWR. For TX use you must be aware this antenna will
spread out a bunch of harmonics as well...
If you are in need of a specified frequency coverage below 140Mhz just
replace one or two cone elements with some 1/4 wave resonant elements
(shortened with coils) of that frequency.
If you want continous coverage down to 26Mhz you'll have to extend all
cone elements to full length of 10ft.

Only because the credibility index went to zero with the statement that the 1550e "runs circles around" the 1000. Little point to rational arguments in that environment.

The radio hobby market has MOSTLY rejected the winradio.
I suspect it is due to their high price and lack of third party software
and extemely poor marketing,

The hobby has long embraced the ICOM PCR 1000.
There are DOZENS of FREEWare and shareware titles
that can do everything from trunk tracking to
ship tracking, conventional scanning, tuning from
free shortwave broadcaster databases and decode many digital modes
WITHOUT MODIFICATION Pretty cool.
Check out DX-Tuners,

(extra cost to do alot of these fun things: zero)

The Icom PCR FUN FACTOR IS VERY HIGH.
Winradio has almost completely failed in this respect.

Why?

If the transmitter is within spec, the antenna will not "spread out
harmonics".

The popular discones stop functioning as a discone around 130 MHz. The
vertical section supplied with some operates as a 1/4 wave radiator and the
cone rods as a limited counterpoise- very narrow bandwidth
If you want to extend the range of the discone below 130 MHz, you need to
appropriatly lenghten not only the cone section, but also increase the size
of the disc- w/o doing this, you no longer have a discone antenna, and the
feedline will now become part of the antenna.

I have used my discone (one with the vertical whip) on 6 meters with
a < 2 to 1 swr. Although it was very narrow banded there. If memory
serves me it was in the 52mhz area that it worked. Outside of that 52mhz
the swr curve was pretty much V shaped with the swr rising precipitously.
The effective bandwidth was somewhere between 500Kc to 1 Mhz.

Radio Equipment for sale.

2-Uniden Bearcat BC780XLT base/mobile Trunk TrackerIII scanners. $215.00 each plus shipping.
Both units are in very good condition and complete with boxes, manuals, brackets, and power supplies.

1-Icom R1 Communications receiver. This unit is in MINT condition. Complete as new .100mhz-1.3 ghz NO GAPS $175.00 plus shipping.
1-Uniden President HR2510 10/11 meter all mode mobile radio. Shows some mobile use, but a very nice unit. $165.00 plus shipping.
1- Motorola MT1000 LB 30-36mhz portable, 99 channel, with standard charger. $375.00 plus shipping.

If interested please email off group.

Is this question really justified? I can't see why. I for one am
certainly having much more fun with my WR-1550e than I ever had with
my PCR-1000. Putting aside Winradio's professionally crafted and fully
supported software which comes with the receiver (there really is no
comparison to the crap that Icom supplies with their radios), there
are plenty of *free* software add-ons as well.

See for example:

1. http://www.rbasic.com (now where is Icom's equivalent to that? -
see also under "Programs")
2. http://xrs.winradio.com (ditto - see all the free plugins under
"Downloads")
3. http://www.linradio.com (source codes for Linux buffs)
4. http://www.winradio.com/home/macradio.htm (native software for Mac)
5. http://www.winradio.com/home/developer.htm (open programming
standard)
etc. (I better stop here before Sam accuses me again of being a
salesman for Winradio... :-))

Maybe Winradio's marketing "mistake" was to supply good software in
the first place, so that people can actually use it as it is without
having to look for third party stuff... :-)

Geoff

649. Lets try this again:Vox Squelch software:

I am looking for software the detects and ONLY
triggers on human voice. On AM/SSB comms, a level
squelch is nearly useless.
One implementation, in hardware, can be seen at:
http://www.qsl.net/kc7bum/hf_squelch.html
This is a very usefull device, but I am looking
for a way to do it in software.

>From a thread on the R20000 listeserve:
"
Message 703 of 714

Subject: Voice detection software?

Lou,

Voice squelches for HF are typically "syllabic squelches". They do not
react on noise but on the pattern of the signal. Simple hardware based
ones
try to detect the presence of voice (low frequency syllabic variations
associated with voice). Although not perfect, these types of squelch
circuits are fairly common on commercial and military HF equipment.

Noise based squelches are practically unusable on HF as they are
triggered
by any random noise... and as we all know, HF-AM/SSB sure isn't FM ;-)

However, I agree that it would be an interesting project if someone
created
a software-based syllabic squelch application that can be used with any
radio... any takers? ;-)

Bruno,

So I hope I am making my request clear,
I am looking for software that unlike the
normal VOX is a VOX that only responds to
human voice. My hardwr unit does a great (>99%)
job of ingoring non-voice singals. FSK, and some
music, symphonies, fool it.

The PCR 1000's "fun" factor may be high, but its "performance" factor leaves much to be desired. Read the reviews found all over the net.

When I buy a radio, I buy it to listen to... what good is a radio that has a million "fun" features, but can't receive worth a shit?

Another hardware implementation is in the
ICOM PCR 1000 which has a "voice scan control".
The audio is "opened on a signals that are "modulated"
(from the help file)
Thus avoiding hearing digital signals during search or scan.
I vaguely recall some implementation of this.
So I guess you are looking for a means of detecting whether a signal
is "modulated".

Dude,
You been smoking something illegal if you think your going to sell that
piece of junk on ebay or anywhere on the internet!

That scanner is not worth $20.00 anywhere.
First of all you need to learn how to spell when you post an ad on ebay!

$130.00 U.S.?

Dude you really got to re-work your calculations

It should be $13.00 U.S.

$100.00 U.S. for a CB antenna?

Dude, $10.00 would be your best bet for the antenna.

> Has anybody tried compatabilty mode?

Also the compatiblity mode doesn't work. That's why a total new
driver has been written for PDW. mJust try PDW, you can even
use the soundcard if you like, and then you won't be needing any
drivers. When using a discriminator-tap, the soundcard works
really fine. At the moment I'm decoding FLEX-1600 via the
soundcard and receive about 99% of the messages.

That function seems pretty useful and obvious...I'm surprised it's not already included in some of the many ham applications out there. Have you looked through the various ham software yet? Here's a good starting point: http://ac6v.com/software.htm

I'll toss a couple of ideas out:

- One obvious approach would be to program the DSP on the sound card to continuously calculate the spectrum of the audio signal, then use a narrow bandpass filter(s) to look for energy at the appropriate frequencies indicating human speech. You would need to apply some further intelligence to the filter output to account for pauses in speech and fading signals.

- Could voice recognition software be somehow adapted for this use?

I have been searching on and off for several years now.
I suspect that writing the software would be a breeze,
if you are a programmer. My programin efforts make
real programers cringe. Not merely bad, but real
BAD. So bad they can be, are are, used as examples
of how not to do something. I supect Iwill have to live
with hardware units until I can con a friend into writtting
the code.
Looking at the voting gate in the hardware unit, it is clear
that this isn't rocket science. It is however well beyond
my abilities. I have enough projects that I can really complete,
to start on one certain to take a long long time.
While scanning VHF FM voice circuits, a normal level
switch works great. But when monitoring AM or SSB
circuits, a plain level switch just doesn't work. It is a lot
more fun tomonitor a specific freq and only have it pop
out when a real vloice is there.
As a funny note, the digital voice the NWS used to use
would not always trip my VOX squelch. The new voice
works fine. A "speak and spell" will also be treated like
noise and ignored. I booought one for a $1 at a thrift store
just because I wanted to see how TI did it.

I have played with the PCR1000 and the VSC
works pretty well. Not as fool proof as the
hardware unit I have but pretty decent all
the same.
The only thing is I don't really like the PRC1000.
It suffers from trying to be everything.
A HF and VHF/UHF radio. For some tasks
the PCR1000 is ideal. Keep several lists of hot
frequencies to cover various situations and
call up that set of memories.
I have a chance to trade for a PCR1000 and
an unkown (I don't remember the model number)
Radio Shack "trunking" scanner. I will likely
go for the trade, because you just can't have too
many radios. This PCR1000 has the DSP module
which makes it almsot decent for HF(SW) work.

675. Legal Question

Newsgroup: rec.radio.scanner
Date: 2005-02-02 07:08:45 UTC
From: Lou <lf08357@Yahoo.Com>
Message-ID: <y1%Ld.40859$NC6.8351@newsread1.mlpsca01.us.to.verio.net>
Source record: 15185

Hi Gang,

I know this isn't a "legal" group, but hear me out. We all know - there have been laws passed in various states as to where scanners are allowed and not allowed, particularly in motor vehicles - be they Ham operators or not - unless involved with Police/Fire/EMS (you get the drift). So far as I am still aware, PA is not included in any such laws. BUT - for the sake of this question, I'm going to include PA in part of the question.... SO here goes... and you - where ever you are, can tell me what the laws are in your area as they may pertain to this subject so as not to drag this out more than need be - as we know the scanner law question has been beaten down many times in here in the past.
****
Though states may not allow "Mobile" scanners... do they have in those same laws or any other laws, any thing that remotely relates to a "hand held" scanner being carried - ESPECIALLY - on board say - a "Transit" bus? Now, I know that "transit buses" have signs and perhaps a policy - often loosely enforced, as to having radios and the like (CD players and such) played so as not to disturb other passengers. But is there any "LAWS" keeping a person from carrying a "scanner" on board a bus? Oh, and I'm not referring to any laws which may cover if a scanner were to be used in the course of a crime being committed. I'm talking having one - in general.

I had a person tell me just today, a bus operator told them "A scanner was illegal aboard a bus." The bus in question was in PA (the driver didn't refer to PA specifically though), and I asked the party if they had headphones on - they said yes. I know that most if not all the time, IF headphones are worn, the radio or whatever is not brought into question. I personally think the driver stepped WAY out of his league of knowledge.

Your thoughts?????

Thanks,

Lou

Seems to me that the phrase 'mobile use of a scanner is prohibited' is
pretty self explanitory.

678. cordless phone

I know it is not legal but can a regular scanner that covers 900 mhz
listen to cordless phone conversations?

Given the limited range of cordless phones and the content, why would anyone
bother?

But techncially yes.

I mean are those frequencies blocked on scanners like cell phone
frequencies are?

Will covering 900 mhz get newer cordless phones too?

Such intelligent answers.... It is NOT self explanatory, as there are usually exceptions to any law. Get a life? Stewped? WOW, I'm impressed. Such intelligent answers. How about providing some factual answers. Must be bus drivers like the one this person ran into. Scanners are sold to be used. So, tell me, if YOU with the intelligent responses are "truly" scanner users - were told you weren't allowed to be in possession of your scanners in certain situations, you would just say "Oh, OK!" and give up? I doubt it. Thanks for the help thus far. Sure hope you're as fortunate when you need it.

Usenet is a real poor place to ask any kind of legal question. You, as you
have seen, can get all kinds of answers. If you rely on the responses here,
get in trouble with the law, telling some judge you "read it on the net"
will get you nothing.
If the state you are in has laws regarding scanners, I would have to

assume the law is available on line?
As to the Public bus, if you find there is no law against them, the easy
way would seem to be not let the driver know you have a scanner. If the guy
is using headphones who is going to know what he is listening to?
--
The two most abundant things in the universe are Hydrogen and Stupidity.
(not necessarily in that order)

Let me clarify that.... I know certain situations absolutely prohibit
scanners - such as flight. I'm referring to situations where communications
aren't or have no chance of being a factor. I'm referring to instances such
as going on a bus tour across state, inner city transport.

No it won't.

He'll get to see the judge roll his eyes as if saying "how stupid can this
guy be?"

> If the state you are in has laws regarding scanners, I would have to

All statutes are available on line, through the state's gummint website.
Just have to look

I take mine with my on the rapid transit train with headphones. No trouble
at all. Listen in on transit frequencies.

Hi there i'm a newbie that want to learn about radio....

Do u have any good site where i could learn the basic... I've already
check other topic about beginners on this newsgroup
What can u do with radio...listening to police (trunk comm aï¿½nd
digital)
but what else.....i know u can listen to Mcdonalds and otherï¿½ fast
food,
but can you lsiten to your neighboors phone call (if made wiï¿½th a
wireless phone 900-2400)
i would like to learn more about the subject.....

what do you find special about scanning radio frequencies...

I understand and certainly agree that Usenet is not a "legal" authority.
What I was attempting to do, was get a feel for what is out there as to
laws - since it would seem to me the hundreds if not thousands of users
would have by now - tapped into their state laws in interest and may have
weighed in with anything in comparison OR in any instances similar. Maybe
even case history as to challenges. Sorry I asked.........

THANK YOU, this is the type of reference I was looking for - to see if
others faced similar situations, hurdles - with regard to using scanners
onboard transit.

We're not all goody-two-shoes types, in fact, I know of a guy that USED to post stuff in this NG who was just the opposite, he used scanners to beat the cops regularly (as do a lot of this NGs regulars to this day, you can tell who they are because they feel the greatest need to hide behind loud, strident exclamations of shocked,
"I'm-so-aghast-at-the-idea-of-using-scanners-in-an-unlawful-manner"
responses --- you'll see what I mean, just watch).
As for bus drivers, whoa. I for one am not too fond of some of those dyed-in-the-wool rodents. The personality disorders of some of these individuals is pathetic, they should have these retards working in the back of a warehouse somewhere they NEVER come into contact with the public, never mind on a public bus where they can brag to each other about how far they keep people running after the bus before speeding away, and how many old people they knock down by sudden acceleration/deceleration for no reason other than an old person is standing up and vulnerable to being pushed over.
My advice to you is, use your scanner wherever and whenever you damn well want to, and use it for whatever you want to. How are they going to know?

You don't need to be sorry you asked. I was just warning not only you, but
anyone reading. Many people come to the "net" for the first time every day.
Many don't seem to understand what they read "may" have no basis in fact. I
well remember when I finally got my Father to get a PC. He had a few rather
humorous times with some of the stuff he was finding.
If someone posts a link to make your state's law easier to look up, great.
Just be careful of stories about "well I do this, and it's fine" kind of
things. For one, you don't know if the person really does, or if they are in
the same jurisdiction you are, or if they may be breaking the law, and may
not know it themselves. As I said if you break some law, end up in court,
and have only the "excuse" that you "read" it on the net, you will get no
where, no matter what "stories" you hear about people running rings around

the court.
As to some of the "stupid" responses you get, that's just Usenet. there
are always a lot of people here who got beat up all the time at school, so
they come here with their cape on ready to "kick some cyber ass", <shrug>.
You just have to wade through it, there is LOT'S of good info out there too.
Just be careful what you act on.
--
The two most abundant things in the universe are Hydrogen and Stupidity.
(not necessarily in that order)

It was another that occurred to. I use mine all the time. I've never had an issue - nor do I hide it. On board, I use headphones and often times off walking around as well. Around here, "most" bus drivers are ok - so I won't paint them with the same brush. The driver this person had the issue with - well.... seems to make his own laws. He is well known for all the wrong reasons. Friendly - is not in his dictionary. A shining example of your description. A job in the public is not the place to be if you can't handle it. But that is another issue. Personally, I think "I" would have asked the driver to show me in his book where that is written - especially in PA. Whether the man mentioned he had a scanner or the driver just happened to see it, I don't think he should have singled him out for "that". I think he overstepped his bounds. Matter of fact, that is the first incident of such thing "here" I've heard of.

I don't condone people who use scanners for illegal gain - however they may be doing it - but scanners can and have been known to be of great help too. Everything has it's pluses and minuses

Not everything makes it to the web as some suggest or would be found in search to any "law". I thought I could get some "experiences" off of those who value scanner use. I "know" that none of this would hold in court. Believe me, this is the LAST place I would turn to for "law" especially to use as evidence. Asking for experiences is not the same as asking for legal

advice. Was just wanting a feel for what others have perhaps been through. I didn't think I'd ruffle any feathers. Sometimes, you just never know.

I'm not new... not by a long shot. Was just trying to get feelers for anyone who may have experienced this sort of situation and so on. Trust me, this doesn't even rate as my last resort for "legal" info or evidence. Yes, you're so right, there is lots of good info to be had. AND just as often, many not so helpful answers to be had. I could look up PA law without a doubt. Was more so interested in any "transit" related situations around the nation - even in the states where no "scanner" law applies. Any "hidden" policies which the net may not produce.

Lou - yes, ignore the trolls who feel the need to post idiotic replies simply to hear themselves type. That other guy with the 'cyber-cape' analogy hit it right on the button. Usenet is chock full of weirdos and misfits who cannot seem to comprehend consideration, compassion, and the understanding fellow hobbysits should have for one another. They would never admit to wanting to ask the same questions at one time themselves. It's pathetic. But, thats the internet for ya. Lots of brave souls traveling anonymously.

My solution to such a dilemma concerning scanners (I drive commercial vehicles for a living) was to obtain my FCC license and get a ham radio callsign, thus exempting myself from some scanner laws, and volunteering for my local Red Cross chapter. Once anyone sees that ID and an FCC license they will not question your right to carry and use a frequency scanner anywhere you go:)

A lot of answers, none worth a damn...

A "regular scanner" CAN receive the signals, but you won't be able to listen to the conversations worth a damn... A "regular scanner" generally does not have WFM reception, therefore, the conversations will cut in and out and/or get distorted because of this. In order to actually receive an intelligible signal your scanner would have to have WFM reception. This is generally only found on the higher-end scanners.

Of course, if the signal is digital, you aren't going to hear anything anyway, no matter what kind of scanner you have...

Thank you... and they were immediately deleted. No harm done. I've got broad shoulders. Just sometimes, can't help to reply. Human nature! "I" have both an Amateur License as well as a Commercial. It was another who was affected. They hold a license of Amateur nature, but rarely do they think to reply in such manner. They're a quiet type person - which is what burns me, they may have been getting pushed around by someone who is otherwise clueless. Was trying to get similar experiences and any end results, as some of those - if only policies - don't make the net.

All righty - I'll try to break it down for ya.
Busses are considered a form of mobile transportation so .....
If you use a scanner on a bus, you are using a scanner mobily, which is
prohibited by law.
You can argue technicalities until your blue in the face, but that won't stop
a judge who goes by the letter of the law from confiscating your scanner, and
imposing fines.
And yes, the same would apply to a taxi,trolly or train - And even a bicycle.

I suppose part of the intent of the law is just the opposite of stopping
people from evading the law - To stop curious law abiding citizens from
flooding crime scenes and attempting to interpose themselves into dangerous
situations.
I did just that once when I first started scanning when there was a DEA
surveillence going on a couple miles from my house.
I went driving around to see if "S 1 " might be somebody I know and to see
how well the agents were covered.
I quickly decided that wasn't the brightest thing I ever did, and returned
home to listen, never to do it again.
I need my scanner mobilly only when going to air shows, so I transport it in
my trunk till I get to my destination, then pop it out and scan away.

Ah, but ya see, in PA there is NO scanner law that I'm aware of - unless
one is in the works which again, I've not heard of... SO - I'm looking to
see if there are any "transit" issues relating to scanner use onboard - not
counting the fact headphones must be used to prevent disturbing others. So,
that statement doesn't apply to ALL. So, no - you've not broken anything
down. This driver made a statement, I want to see what others have
experienced to either back his claim or put a hole in his balloon in so far
as his claims (not for evidence). I still say he was off base. Airlines
don't allow them. I know that - due to RF issues mainly. Buses do not have
that issue. There are no "Transit" laws that I'm aware of that prohibits
scanner use (even with headphones) which is what I was asking if others had
similar problems - in states with or without Mobile Scanner laws. I can
understand they stop cars/trucks to check things out. Rarely if ever have I
heard of a bus being stopped to check all "passengers" for such items.

Perhaps you can argue the states with the Mobile Scanning laws, it would apply.. Cool, I can accept that. But in those with no laws, sorry - it doesn't wash. They have no basis for which to make such policies.

Well then if mobile use of a scanner is not illegal in PA, your likely in
the clear.
I have no interest in scanning laws in PA.
I'd suggest you call the transit authority to get a definitive answer.

With all due respect, now we're getting some where. Still puts me back to the original question. I probably should have asked it in this way before - Has anyone else had similar problems aboard transit systems - with or without the applicable scanner laws. One or two have already given their experiences. I guess those who do not reply on mass transit could really give a shit less what the rules/laws/policies may be. Strange. I've seen this issue debated up the ass about airplanes, but never buses or such.

I am more interested in the Dell PIII laptop that is part of the
trade. A friend bady wants something that I have absolutly
no use for, a piece of test gear that was given to me by a
another friend who was retiring and moving sought, and
even though the PRC1000 is not my favorite radio, it does
have some uses. Mainly like I said. Keep several lists of "hot"
frequencies, covering likely events. Here in Lexington one
for "Winter Snow Emergency", T-Storm/Tornado watch/warning,
nerve gas leak down little south in Richmond. I guess you get
the idea. I have the frequency lists now, it is just a pain to
enter them by hand.
I had pretty fair reception from below AM MW/BCB to above
cell (ATC transpnders) on a lowly 20 year old Tandy diskcone
antenna. The one without the center stinger.
Terry

Not all 900 MHz cordless phones utilize WFM, so a scanner that only offers
NFM may still be useful for this purpose.

> This is generally only found on the higher-end scanners.

I'm not sure what you would consider "higher-end", but there are plenty of
"regular" scanners that have WFM.

> Of course, if the signal is digital, you aren't going to hear anything
> anyway, no matter what kind of scanner you have...

True enough, but digital is not as commonly found on 900 MHz phones. 2.4
GHz phones probably more commonly use digital modulation.

You can include your answer among those that are "not worth a damn".

I suspect theres not a whole lot of scannists who use mass transit much, and
don't scan when they do.
Could be wrong. Here in the Detroit area, there is no mass transit as such.
I'm thinking, barring an occasional crash or wino on the tracks, such
monitoring would be about one step above taco belle drive through monitoring
anyways.

WOW..... We always learn something new. I would have thought Detroit being the "busy" place it is to be, would have mass transit. Hmmmm.....

Thanks!

Better re-check your law books regarding listening in Canada.

There is no law in Canada prohibiting a person from listening to cell phones.

There is no law in Canada prohibiting a person from listening to cordless phones.

There are no laws in Canada prohibiting a person from having a scanner in their car.

It IS illegal to decode/descramble a subscription service signal without paying for it. (that's in the various sections addressing 'theft of service')

Nowhere in Canada, do you need an amateur radio operator's certificate to own a scanner.

However: the radiocommunication act prohibits anyone who listens from conveying or imparting that which was heard to a third party.
(aka: listen all you want, but keep the gossip to yourself.)

There are a few countries (USA included) that have laws prohibiting cellular monitoring, cordless phone monitoring, etc. (land of the free, but not free to listen to.. oh nevermind, I don't want to start a shouting match here, but it is odd that a country that claims to protect freedom at any cost quietly takes some away. Likely due to some politician getting caught in some scam or scandal due to what they said on a cell phone and the wrong people hearing it.)

Personally, they do a lot of things right in the USA, it can be a really nice place (at least everywhere I've visited so far) but in my opinion, the law banning of certain receivers, forbidding reception of certain frequency ranges, and the prohibition of some receivers in cars (in certain jurisdictions) does not make a lot of sense. (someone might argue it's to prevent crooks from staying one step ahead of the authorities, but last I checked, crooks, by definition, don't respect a lot of laws anyway, therefore won't lose a lot of sleep having that scanner in their car... :)

Heck no - Unless you consider plain old busses mass transit.
Maybe thats what your referring to - I always think of subways and
organized trolly systems ala New York, Chicago,SF or New Orleans when I
think of mass transit.
I've been to Philly and Pittsburgh quite a few times, but don't really
recall what they have in the way of mass transit, as I've always had my own
vehicle there.
We do have this goofy little elevated trolly called the 'people mover' in
downtown, but its 100% automated, so I doubt if theres much, if anything,
worth listening to from that.

Pittsburgh has Mass Transit in the way of all their bus routes, trolleys and sub way systems. Still working on a Mag Lev of some sort. Magnetic Levitation - very high speed and supported on a rail above ground - to run a few miles between two points - unknown if they're planning stops along the way - though I'd have to think they would! There are some "smaller" systems around the Pittsburgh area which run people into the city to work and such, which - believe it or not - are called or at the least - consider themselves "mass transit". I suppose their claim is supported by the fact that the buses do carry "masses" of people to locations here and there. I suppose too, that is open for debate as to whether it really is "Mass Transit". Everyone has their own way of viewing things.

I think you're probably right about the "People mover". About as exciting as watching cement harden. If there is any radio excitement there to be had, chances are it would be in the form of hash of some sort for those who like that sort of noise.

Lou

Hmmm .. Funny the things one misses out on when they're not really looking.
The only transit vehicle I road on in Pittsburgh was them little rail cars
that lug you up to the top of that big old hill near the river.
Quite a nice view from there.
Philly I've walked and drove all over the place, and don't recall seeing
anything mass transit related.

I would think the only transmissions worthy of possible interest from the
people mover would be from technicians servicing it during its frequent
breakdowns.
"Yeah,Red Fox 2 this is Blue Dog 1 ... I need another 8 inch greased nut, a
reverse flange over-drive bearing, and another box of doughnuts. Over."

Ah yes, the Incline - near Station Square - goes up to Mt. Washington. There were 2, but I think the other may be down now. Not sure. Don't hear much about it.

As I said, as exciting as watching cement harden! But then again, on a dull night - the cops can even sound that exciting.

724. How am I programming Pro96 wrong

Newsgroup: rec.radio.scanner
Date: 2005-02-03 06:39:11 UTC
From: Me <payasodoctor@yahoo.com>
Message-ID: <1107412752.db3eb6c0783629cefa942bc2101ed8e1@teranews>
Source record: 15083

I recently moved to Clarksville TN and found that I couldn't hear most of the agencies here with my old non-trunking scanner. So, I bougt a Pro-96 digital trunk tracking scanner and just got it home tonight. I've looked up the local frequencies on the net and found that local PD is on a digital "EDACS Pro Voice Wide Area" net that they purchased 2 yrs ago.

I programed in the 8 frequencies that they use (in order) taking care not program into channel 00. I scanned the bank in EDAC open mode, but I'm not hearing anything. If I walk thru the channels manually, I hear the data channel on frequency 6, and short quick static bursts of digital transmissions on the other channels. Switching mode to Motorola to see if my sources were wrong only lets my scanner freeze on the data channel like a non-trunking scanner. Did I forget to do something, or does it sound like my town is scrambling their transmissions?

I haven't programmed in all the stuff I want to, and I haven't programmed in any talkgroup IDs yet--I got the Win96 software (I'm still in the free trial period), but it won't communicate. I'm set to COM1 using the only serial port on my computer. I run Windows XP Home Editon with Service Pack 2.
This is turning into a terrible night!!!

725. ICOM R20

Newsgroup: rec.radio.scanner

Source record: 15084

I just purchased an R20 that I want to use more for signal detection rather than receiving. I was disappointed to see that it will not demodulate SSB or CW at 470 MHz and above. (It's easier to hear the signal in these modes.) Does anyone know of a mod that can fix this? Also, are there any mods out there to unblock it?

Thanks,
Jim

726. Hudson Fl Frequency Talkgroups

Hi all just looking for some quick info. Moving to Pasco county FL soon (Hudson) and have looked into their frequency lists and all but cannot tell from all the info just what talkgroups pertain to the actual Hudson area. Can anyone help with info and/or sources for any and all frequencies and/or talkgroups that may be helpful? I need to wipe out my scanners and reprogram them and would like to know how to streamline the banks/channels for optimum performance . Thanks in advance...

Source record: 15089

Hi All: I have an old BC200XLT. Had it for about 12 years. I have replaced the batteries a few times over the years, some from Uniden and others from adapting Radio Shack NiCads.

I seem to have misplaced my car charger. I do have a Radioshack variable voltgage that fits but the highest voltage is 6 V.

If I try charging with that, will it damage the batteries?

I do have the AC charger so I can always charge indoors. Just wondering about the car charger.

By the way, this is a great scanner. It still picks up occasional cell phones, but I thought that due to digital and encryption that would no longer be possible.

Generally anything costing you more than $150 to $200, and that includes
Trunk Tracking, I would classify as "higher-end". You won't find WFM on the
majority of (if any) "regular" scanners.

> You can include your answer among those that are "not worth a damn".
>
I think yours grabs that category a little better than mine. Mine
contributed useful information, yours was just there to start an argument...

I know that it is illegal to use a scanner while driving a tractor-trailer and other commercial vehicles like that and I would believe that a bus falls under that classification. I'm not quite sure if it is a Federal law. The person I asked has been a long haul OTR driver for 20+ years.

737. Re: Charging BC200XLT with 6 V Car Charger

as long as the plug polarity is correct no damage,
however 6v might not be enough volts to make it work/charge as well.

try it.

mike

is it possible to track more than 1 Smart Zone tower of the same system at the same time in 1 bank with a Pro 96? i heard it is if you put conventional freqs between each towers freqs. i tried it and it didnt work, it stuck on 1 control channel. the system i used was the MPSCS in Michigan. am i doing it wrong? i want to do it from home only, not mobile.

example:
channel 1: Tower 1 control channel primary
channel 2: Tower 1 control channel secondary
channel 3: any conventional freq, set to fm mode
channel 4: Tower 2 control channel primary
channel 5: Tower 2 control channel secondary
etc.

Run the coax into an attic vent, then feed it from the attic down between the walls. Or in the alternative, poke a small hole in the closet ceiling where it won't be noticed and feed it from the attic into the closet.

Just purchased a Radio Shack Pro 96. It is all that they say it is and it outperforms my Bearcat BC785D in sensitivity, intermod, and weight. I get about 10 hours of battery life using an earphone and the fact that it can store up to 6000 fequencies is just great. The trunking works great and about the only thing it doesn't do is scan commercial FM and TV stations, but who buys a scanner to listen to them. I have placed it side by side with a Motorola Astro25 HT and other than not being able to transmit, and it has a smaller speaker I was not able to tell the difference.

The least destructive method I've seen is to cut a piece of 1x4 to fit your window then drill that instead of your house.

Does anyone in this NG know if there is a VHF HT transceiver, that doubles as a wideband receiver (scanner), AND is capable of being controlled by a PC (by controlled I mean change the channel)?
The Icom T90 is all of that, except for PC control (it can be channel-cloned, but that's different).

469.2875 - 464.2875
469.3125 - 464.3125
469.3375 - 464.3375
469.3625 - 464.3625
469.3875 - 464.3875

Headset/Speaker frequency pairing for ISM band Wide FM (3M Headsets):

Speaker Headset

920.0125 - 903.0125
920.0250 - 903.0250
. .
. .
921.0000 - 904.0000
. .
. .
921.9750 - 904.9750
921.9875 - 904.9875

Headset/Speaker frequency pairing for ISM band (HM Electronics):

Speaker Headset

902.0125 - 926.0125
902.0250 - 926.0250
. .
. .
903.0000 - 927.0000
. .
. .
903.9750 - 927.9750
903.9875 - 927.9875

The most common frequency pairs to check are:

30.8400 --- 154.5700
31.0000 --- 170.3050
33.1600 --- 154.5150
33.4000 --- 154.5400
35.0200 --- 154.6000
154.5700 --- 170.2450
154.6000 --- 171.1050

457.5125 --- 468.4875
457.5375 --- 468.3875
457.5500 --- 467.7750
457.6000 --- 467.8250
461.0375 --- 466.0375
460.8875 --- 465.8875
461.0875 --- 466.0875
469.0125 --- 464.0125

This list covers most Fast Food chains across the entire US
and parts of Canada.

757. Discriminator tap for BC895XLT Needed

Newsgroup: rec.radio.scanner
Date: 2005-02-04 23:20:24 UTC
From: sefritts@comcast.net
Message-ID: <420402cb.575140@newsgroups.comcast.net>
Source record: 15017

Can someone tell me the proper tap off procedure for the BC895? I have found-I think-the correct tap off point but the audio is severely affected on speaker output if I feed it to a sound card.

Steve

Haven't you figured it out yet?
Wow, I guess we can all continue to get away with this as long as no one comes right out and spells it out in plain english for these, ahem, where was I?
Oh yeah, well, we want to listen to these frequencies so that we can help the forces of order combat the anarchic corporate disruptors who think it's funny to tell hideously obese fast food purchasers that they are too fat --- those rapscallion knaves, they'll get their come-uppance one day. In the meantime, those frequencies once again are ...
It would help if one or more of us came online with the most strident exclamations of righteous indignation that can be managed, make it seem like the very idea of this disruptive activuty is just so horrifyingly awful.

I have found the audio and video desks used for professional sound and
video production work quite well for radio use.

Most have the hutch for multiple monitors, and 19" standard rack mount
rails on the bottom of each side to rack mount equipment nice and
clean.

This place had some cheap stuff on sales this month:

762. Radio Free Colorado - A Successful New Internet Radio Station

Newsgroup: rec.radio.scanner
Date: 2005-02-05 04:35:47 UTC
From: Gary Burke <nospam@noreply.net>
Message-ID: <BE299B33.7910%nospam@noreply.net>
Source record: 15021

Radio Free Colorado - A Successful New Internet Radio Station

NOTE: NEW CONNECTION URL'S GIVEN AT BOTTOM OF MESSAGE!

Radio Free Colorado
What Radio Once Was

Radio Free Colorado, a non-commercial Internet Radio Station, plays a lot of music you probably haven't heard in such a long time and have since forgotten how much you love. It's such a thrill when a forgotten song comes on and you say "Hey, I love this song" and all your fond memories of it come rushing back to you.

Our "Genre" (what kind of music we play) is VERY diverse. We play Modern/Classic Rock, Progressive Rock, Alternative (Modern and Retro), Pop, Billboard Classics, and Top Radio Hits from the 60's, 70's, 80's and 90's. We also play some Ambient/Instrumentals. No Rap or Hip-Hop, Classical, Jazz or Swing.

Radio Free Colorado streams music LIVE over the Internet using a high-fidelity 128 kbps MP3 stream. We use professional sound processing equipment to achieve a sound quality which we believe is superior to virtually all other 128 kbps streams.

Any computer with a DSL, Cable Modem (or faster) Internet connection that has a download speed capacity of at least 128 kbps can tune in.

Virtually all MP3 music players are capable of receiving live MP3 music streams over the Internet. Any music player compatible with streaming MP3 audio can receive Radio Free Colorado's broadcast.

Our MP3 broadcast stream is compatible with virtually all music software programs and works with PC's running Windows, Apple computers running OS X and other machines running Linux or Unix.

Radio Free Colorado is NOT beholden to anyone. There is no pre-approved "playlist", no one tells us what we can't play. Listeners can, however make song requests and if we have it we will play it.

Radio Free Colorado - Sample of Songs We Play

Go-Go's - Head Over Heels
Dire Straits - Walk of Life
Aimee Mann - Save Me (Acoustic - Recorded Live) - KBCO Studio C - Volume 14
Nena Hagen (Gabriela "Nena" Kerner) - 99 Luftballons (German) - 99 Luftballons
4 Non Blondes - What's Up
Cake - Short Skirt/Long Jacket - Comfort Eagle

Cracker - Euro Trash Girl - Garage d'Or
The Carpenters - Live At The Palladium 1976
Heart - Barracuda - The Essential Heart
Tom Petty & The Heartbreakers - You Don't Know How It Feels - Wildflowers
A Flock Of Seagulls - I Ran (So Far Away) - The Best Of A Flock Of Seagulls
Alphaville - Forever Young (Live) - Forever Young
Heaven 17 - Let Me Go (Original Unedited Version) - CD Single
The Waitresses - Quit - Wasn't Tomorrow Wonderful?
The Jam - Going Underground - The Sound of the Jam
Yaz - Situation (US 12" Mix) - Upstairs At Eric's
Slow Children - Vanessa Vacillating - Best Of Slow Children
Tori Amos - Silent All These Years - Little Earthquakes
Pink Floyd - One Of My Turns - The Wall (Disc 2)
Haysi Fantayzee - Shiny Shiny - Battle Hymns For Children Singing
Aimee Mann - I've Had It (Acoustic - Recorded Live) - Rare On Air, Volume 2: "Morning Becomes Eclectic"
Depeche Mode - Everything Counts (Original Unedited Version) - Depeche Mode
The Police - Don't Stand So Close To Me - Zenyatta Mondatta
Killer Pussy - Teenage Enema Nurses In Bondage - Bikini Wax
The Dead Milkmen - Punk Rock Girl - Death Rides a Pale Cow: The Ultimate Collection
The Vapors - Turning Japanese - Vaporized
Romeo Void - Never Say Never - Warm, In Your Coat
Siouxsie & The Banshees - Christine - The Best of Siouxsie and The Banshees
Echo & The Bunnymen - The Killing Moon (12" Version) - Ballyhoo: The Best Of Echo & The Bunnymen
Gary Numan - Cars - The Pleasure Principle
Berlin - The Metro - Best Of Berlin 1978 to 1988
U2 - Vertigo - How to Dismantle an Atomic Bomb
Peter Gabriel - Don't Give Up (Live) - Secret World Live (Disc 2)
George Harrison - Give Me Love (Give Me Peace On Earth) - The Best Of George Harrison
Where Did You Sleep Last Night - Kurt Cobain w/Nirvana - MTV Unplugged in New York
The Final Cut: A Requiem for the Post War Dream by Roger Waters
Missing Persons - Words - Spring Session M
Martin L. Gore - Compulsion - Counterfeit e.p.
Haircut 100 - Love Plus One (12" Version) - Pelican West
Split Enz - Six Months In A Leaky Boat - History Never Repeats - The Best Of Split Enz
Green Day - American Idiot (Uncut) - American Idiot
Social Distortion - Ball And Chain - Social Distortion
Primal Scream - Movin' on Up - Screamadelica
The Jim Carroll Band - People Who Died - Just Can't Get Enough: New Wave Hits Of The '80's Volume 6
Scala - Creep (Radiohead) - Scala On The Rocks
Led Zeppelin - Living Loving Maid (She's Just A Woman) - Led Zeppelin II
Creedence Clearwater Revival - Down On The Corner - Chronicle, Vol. 1
The Beatles - The Fool On The Hill (Demo) - Anthology 2: Disc 2
Oasis - Don't Look Back In Anger (Live) - MTV Unplugged

The Who - Eminence Front (Live) - Join Together (Disc 2)
Crowded House - Something So Strong (Live) - Recurring Dream: The Very Best of Crowded House
New Radicals - You Get What You Give - Maybe You've Been Brainwashed Too
Billy Joel - She's Got A Way (Live) - Soundboard Recording
Altered Images - I Could Be Happy - (12" Import)
The Bangles - Walk Like An Egyptian - Different Light
B-Movie - Nowhere Girl (Original Unedited Version) - 12" LP
Suzanne Vega - If You Were In My Movie - 99.9 Fï¿½
Patti Smith - Dancing Barefoot - Land (1975-2002)
The Clash - Know Your Rights - Combat Rock
David Bowie - Space Oddity - Space Oddity
Primitive Radio Gods - Standing Outside A Broken Phone Booth With Money In My Hand - Rocket
The Pretenders - My City Was Gone - Learning To Crawl
Midnight Oil - Beds Are Burning (12" Version) - 20,000 Watt R.S.L.
Pete Yorn - Life On A Chain - Musicforthemorningafter
Public Image Limited - Rise - Compact Disc
Violent Femmes - Add It Up - Violent Femmes: Deluxe Edition
The Psychedelic Furs - Ghost In You - Mirror Moves
R.E.M. - Radio Free Europe - Murmur
XTC - Dear God - Skylarking
Big Country - In A Big Country - The Crossing
Peter Murphy - Cuts You Up - Deep

These songs are just a partial list of some of the "rarer" songs that not only don't get played on the radio anymore but are hard to find as well. Virtually all of the songs on this sample list have long since been sent to the record company boneyard, which is why we play them. We have over 1,400 songs of all varieties and the list grows every day.

Artist and Song suggestions and requests are gladly accepted! We would like to grow RFC enough to satisfy a variety of tastes yet remain completely non commercial.

iTunes, RealPlayer, Winamp or Audion 3 (Mac only) are recommended for best listening quality.

Here is a list of recommended MP3 software programs you can use to listen to RFC's broadcast. They are all available for free.

iTunes Version 4.7 for Windows or Mac:
http://www.apple.com/itunes/download/

RealPlayer Version 10 for Windows:
http://www.real.com/affiliates/superpass.html?pcode=cj&src=cj

RealPlayer Version 10 for Mac:
http://www.real.com/?src=blackjack

RealPlayer Version 10 for Linux:
http://www.real.com/linux/

Winamp 5.08 from Nullsoft for Windows:
http://www.winamp.com/player/

Note: If you are using an earier version of Winamp, Nullsoft urges you to update
your software due to several "security flaws" that are fixed in version 5.08.

Audion 3 for Mac:
http://www.panic.com/audion/
Audion is now free of charge. Use the following link to get a free serial number for registering Audion:
http://www.panic.com/audion/buy.html

XMMS, MPG123, etc. MP3 Players for Linux/Unix or X Windows users:
http://www.uk6x.com/applicationservices/mp3radio.html

The "URL" address (the location on the Internet of Radio Free Colorado's Broadcast) is:
http://kara.fast-serv.com:8630/

For iTunes use the URL address:
http://kara.fast-serv.com:8630/listen.pls

For RealPlayer use the URL address:
http://kara.fast-serv.com:8630/listen.pls

For Winamp use the URL address:
http://kara.fast-serv.com:8630

For the Audion 3 media player, use the URL address:
http://kara.fast-serv.com:8630

You can find where to type RFC's "URL" address into iTunes under the menu item "Advanced" - "Open Stream".
For RealPlayer, look under "File" - "Open Location".
For Winamp, look under "File" - "Play URL".

We genuinely welcome Artist and Song suggestions, listener comments, etc.
You may contact Radio Free Colorado by visiting our website at:

http://www.boomspeed.com/garyburke/radiofreecolorado/RadioFreeColorado.html

Radio Free Colorado is protected under Copyright Law.

It is legal for you to listen as long as you don't record. :-)

Best wishes,

Gary Burke
Owner/Operator

Not true. I live at least a mile from the closes McD's and it booms in when I scanner around that band. It really depends on your radio and especially your antenna. You probably will not be able to pick them up on a handheld with a rubber duck antenna but add an good outside antenna and you probably can listen to them from at least a mile away.

I must live in an area where they only sell WFM phones then... About a year ago, when I did some listening in, there were VERY FEW, (like maybe 2) that I could actually receive, the rest were unintelligable as they were in WFM (Over 95% I'd guess). You must live in one of those "odd-ball" areas that only sell NFM analog 900Mhz phones. Good for you.

It's all antenna, I used to receive 49 MHz cordless from up to 10 miles
using a 6 meter 5 element beam at 65 feet. With a rubber duck the best was
about 1/2 mile.

769. FS - Icom R-7100

Newsgroup: rec.radio.scanner
Date: 2005-02-05 15:04:01 UTC
From: John Schneider <thecop@optonline.net>

Source record: 15029

I have for sale (pre-ebay) a beautiful Icom R7100 (USA version = cell blocked). I would rate this as a 9/10. It works flawlessly and is guaranteed to not be DOA. I have never opened the radio but the previous owner has and I believe a discriminator tap has been added (a female F" connector has been installed through the rear panel)although I have never used this feature.

I will ship the radio with the AC cord and a CD containing a .pdf of both the operator and service manuals.

$500.00 + shipping

Please contact me off list if interested. I hope to have pic.'s available by the end of the week, but if you need reassurance, my ebay ID is NPDXO.

Thanks...
John, thecop@optonline.net

What FAQ??
Every scanner that I have has WFM - and I do not own trunking scanners -
some of my scanners have been cheap arsed pieces of shite, some are good
quality, but all have had WFM.
Uniden 200 XLT
Uniden 220 XLT
Icom IC-R3
Winradio 1500e
Icom PCR 1000
------ All of these have WFM

Maybe 20 to 30 years ago, WFM was not available in most scanners, but as BOG
has said, (and I hate to back him up, but here I must), very few scanners
don't have WFM. Perhaps you could advise which new scanners do not?

Matt

not sure, but THANK YOU for the info!!!
Do I need to use any dropping resistor or make up a network to isolate
it from the sound card input impedance??

Feel free to forward this post for publication consideration.

--
I wrote the letter following "Jew Boy..." the day a single complaint
arrived to the radio station, with the threat that the ADL would soon
be contacted. The letter was provided in advance of the next day,
of the time scheduled for the complainant to return for a recording
of the questionable broadcast. The station manager refused to give the
complainant my letter, and insured me that I would no longer be allowed

to produce a show for our community. Is this fair to our Jewish
brothers
and sisters? Is this fair to You?

Paris "And then what if you saw, all of the things thats wrong,
would you stand tall and strong? Or would you turn and walk away?"

Johnny

Jew Boy Johnny and the anti-Semites

- or -

"The Zionist Conspiracy"

Monday, January 31st, around 3 pm, I called the station manager to ask
how my afternoon recorded broadcast went, and to discuss the new
week's tentative guest spot with an update regarding the falsely
maligned, Mr. And Mrs. Benderman. The station manager informed me
my phone number had been misplaced, and was managing with stress
trying to put together an apology letter to a single individual, who
came into the station, while the interview was still running, to
demand action be taken regarding the anti-Semitic broadcast that he
was certainly going to report to the ADL about. I told her the Felton
interview itself was about bigotry through the demonization of the
innocent, what the Jews of world war II suffered through, and, that I
was a huge defender of religious Jewish teaching. I told her, to
offer the individual a chance to publicly speak regarding the issue,
with me, or by himself regarding Felton, to try getting specifically
to what has got him so much, by himself, upset about allowing my voice
heard defending Jewish rights within our community. She told me that
she would likely, none the less, have to let me go to appease the sole
complainant, for what if a lawsuit should result? I told her to
consider her options, reminded her that it was only one single

individual who hadn't even heard the show's context, and that the broadcast in every other way had been going well, doing good. She told me she was very busy, and said goodbye. Then a short while later, phoned me back to ask if I would write a letter, and have it at the station next day before the complainant arrived for his copy of the broadcast. I said sure, said it would be a great challenge, and proceeded immediately to do just that. The next day, I contacted the station to ask if my arrived letter was forwarded to the individual, and was informed no, he didn't receive it. It wasn't the apology the station was looking for, and my show was now officially terminated. I told her it was very unfair to me, to not allow him to read my formal response, and that I couldn't in good conscience, back down from defending my rights to be heard on this issue, or to allow us, as our public, to hear the complainant's actual complaint about my, freedom for all broadcast. She said she would try to get the letter to him, but that the show was over. Case closed.

Stand up for Jews, and look at where it gets you, Jeeze.

Let us not put aside, the station manager's legitimate concerns. Who has the money or the time for a frivolous lawsuit? Why do expensive independent research, when the Bush Administration can hand us all the free news they want us to have directly without any costly questions? Saddam wouldn't let the inspectors in, right? Why risk standing up for someone else's rights, when doing so, will get the (anti) Jewish-Defamation League calling you an anti-Semite (Semite=Arab) for communicating some understanding with Felton? Felton, is bizarrely quirky as interesting, for his recent book is about the demonization of the innocent, (you know? Nazi gas chambers and ovens?) and as such, we can learn from, as too, we can teach. If he'll listen. Ariel Sharon is not Jewish my friend, NOT JEWISH!!!

Open the gates, it's getting late.

John.

---

http://radio.indymedia.org/uploads/big-package.mp3

Greg Felton : "The fear is necessary for two reasons. And the
principle
reason has nothing to do with Iraq. it has to do with the government
itself.
The bush government is criminal. [...] The problem is: how do you
keep
people from paying attention to this? You keep them focused on an
external
enemy. [..] so they forment this fascistic hatred of a definable group
of
people. So, the war on terrorism so called, is not much a way for the
United

States to protect itself against it's enemy, it is a way for it to create
enemies, to justify the kind of repressive measures that would otherwise be
intolerable in peace time."

To whom it may concern,

regarding the January 31st broadcasted interview with Greg Felton.

May I, on behalf of only myself, ask that you pardon my failures in judgment,
in not allowing what I should have gave: an immediate re-dress regarding,
'who is the Zionist label?', or 'What Holocaust are you referring to?', during
the broadcast of January 31st. (bet you we can't get two Christians that agree
on everything.) However, I can offer perhaps a show centralized on a chance
to exercise your personal views, be they pro or con on where you think we
should go from here, or whatever may have you regarding said interview. Or,
if you would like, you may wish to do only, or else include, a written work
that I promise, will reach as far as the original broadcast. So, actually,
this could be a prime moment to have a dialog regarding racism, bigotry, and
intolerance. I confess, I may be unaware, and still have much to learn, when
it comes to communicating well with all others. But, I know I'm getting
better, and I'll tell you, the Justice-Freedom thing, sure seems to be our
ultimate calling.

I was not so surprised that the broadcast interview with Greg Felton would be
considered controversial, (as every show I've ever done always has), although
I wasn't prepared to hear criticism against the show as being defamatory to a
group, or groups of people. As certainly that was not my intent, but however
was the difficult subject addressed within the interview. The fundamental
teachings of Law, as it pertains to justice and freedom, along with every
legitimized religion, is that all free people should be thought of as

equals
to each other in vigilant protection. And by doing so, one would be
serving
G-d's interests. (Even if a G-d doesn't exist - an Atheist too, could
become
a proponent by understanding Jihad). Thereby insuring\realizing that a
just
intelligent life force rules our chaotic timeless universe in service
ultimately to ourselves individually. Giving us in the Torah of Moses,
``all
people are created in God's image'' teaching all peoples are Sacred.
And as
such, would be so in God's interests to defend as the innocent. While
in
eternal pursuit of happiness and prosperity for all through just means.

Under Greg's definition as being a "Zionist" conspiracy, negates the
failure
of himself personally to recognize the public connotation is too vague,
and
that Hitler's Nazi Germany, like Bush's America, is politically
expressing an
inability to represent ourselves with respect as truly worthy of fair
deliberations amongst ourselves. Sacred, every-one. (Or as in, to
rise to
the defense of those we know to be irrationally victimized as the godly
and
innocent, victimized in our un-addressed names.)

Greg "This is why the Holocaust is such a very dangerous thing to talk
about
because, it's not really understood. It's preached at us like a
sermon.
We're suppose to accept at face value what we're told about it, as if
to,
criticize it, is some how disrespectful. Much of what we know about
the
Holocaust has been propagated by the Zionists, and can be shown quite
untrue"

I replied shortly later "One thing about the whole situation is that
innocent
people were targeted for murder. End of story. That's what the war
was.
All wars are like that."

Greg's mistake I believe, centered in his Zionist labeling through an
apparent bigotry expressed, and as such, was too narrowly defining the
larger
established history of the Holocaust, as being the struggle of the
human

species in halting, the demonization and then subjugation of the innocent
millions, Jewish or otherwise. Perhaps it was strangely on his part a testimony to a real struggle we all have when it comes to identifying ourselves to others. Considering it is the exact subject matter he wrestles
with in his book writing, regarding our corporate media's perception of ignoring an innocent people's concern or cries. That said however, for Greg
to blankly criticize Greg's false construct of what is publicly understood
about the Holocaust, is to deny that much for sorrow and suffering took place
against the whole of Humanity, especially, of those who held the practiced
Jewish faith. To think the nazi regime would have the gas chambers and the
ovens, while the whole of humanity were not strong enough to communicate the
unjustness of it all to the German people while it was happening. I have
read of a recent documentary that provides film footage of nazi soldiers
committing the worst war crimes imaginable to god loving Jews, interspersed
with film from the same dated period where, the German people were living
civilized lives, left unaware of the atrocities that were being committed
against God in their names. Same as America and Canada today, with Fallujah's 300,000 People being, the undeniable example. Or, are you too, a
convinced denier of that which is fully documented? (Needless and irrational
was the indiscriminate murder of the people of Fallujah, but for to have more
American soldiers sacrificed in a conflict created by an unjust as immoral
totalitarian dictate.) The Holocaust deniers are those the same of today, who
refuse our Humanity to nationally communicate those screams of mercy, or for
justice regarding the People of Iraq to be served in our true interests as
legitimate. More than ten million Russians died fighting the evil eugenic
scourge of the "superior" nazi regime, and like those in Poland, Britain and
France, as elsewhere testified our established history, (albeit only later),

the sadistic ungodly as lawless barbarity that Nazism inflicted upon the
general masses, went largely undeterred from our "informative" television and
radio broadcasts. The same, almost word for word, and action for action, can
be found in Rumsfeld's "blitzkrieg". Bush's freedom by tyranny doctrine. Or
the criminally sanctioned unchallenged news pronouncements of a Mark Kimmit,
Buford Blount, Steven Russell, Mattis, Allawi or Sattler, when it pertains to
accepting without our objection, to the victimizing of Iraqis collectively as
an indiscriminate act of criminality, like murder. As like in the policies
of Ariel Sharon, where an innocent, haven't committed an accused crime in
their life Christian Palestinian, is denied the earned home they worked and
paid for, on a parcel of land shared up until recent times for countless
millennia. My personal struggle has been to inform the public on the
"forgotten" importance of established evidence, being the only requirement to
convince ourselves on who is a bigot, tyrant, a criminal, or a murderer.
Will you not therefore, as a fellow humanitarian of this shared world, speak
against those you know of, who victimize the innocent to thieve from? Sure
you would, if you knew as much for certain about God and this universe, or
the under reported, freed to go General Ahmad, funding the mastermind ring
leader Mohammad Atta of Bush's 9/11 game. But will together our Humanity
ever learn? Well, my plan is to search for guests to speak with, that I'll
try not to offend early on. Greg knows, like the Pope knows, as every
legitimate police officer worth their grain of salt knows, as so too does
include a great many Jewish Jews, George W. Bush used absolutely no evidence
to substantiate his therefore, false accusations in our names against bin
Laden, while then ardently with Cheney, worked to close outstanding criminal
investigations regarding their extremely suspicious behavior. All according

to his official publicly documented plan. And speaking the news as thus,
does not make anyone anti-Semitic, anti-American, or anti-Human, but
pro-Jewish, pro-Christian, pro-Muslim, pro-Justice pro-Freedom, almost
wholely human like even. Not of a long gone as lost and forgotten religious
dogma, but for now as it always has been found, a mutual respect for all life
as we find ourselves being part of. Or, so we would for Atheists, argue in
all likelihood to get to the same reasoned to be, just political decision, to
this or any another life and death matters matter.

Because the unjustified criminal war actions of George W. Bush are our
shared documented history, others, with an ulterior agenda to propagate their
weakness through bigotry or racism, will arbitrarily blame a subjective
grouping of people, instead of demanding by godly individual might, the
arrest of specific individuals who are actually responsible according to the
established as public evidence. So, now who's fault is that? We live in
difficult times. To admit weaknesses regarding our corporate news control
content decisions, is to seek a better world for our lives through stronger
open communications.

I believe the defense of the Jewish faith is found in the indivisible
properties of Creation, and who's central belief is made simpler than any
other. Hillel was asked: Rabbi, who is a Jew truly? Hillel answered, "What
is hateful to you do not do to your neighbor. That is the whole Torah. The
rest is commentary -- go and learn it." So my challenge in defense of the
Jewish faith during the interview, was that those who practice criminal
misdeeds, are therefore found by the official definition taught by Hillel, to
be not practicing the "Golden Rule" of the Jewish Faith. (as so pronounced
by the religion's recognized ancient oratator.) By calling alleged criminal
actions, the conduct of an entire people, faith, or branch thereof, is to
fall into the fascist minutia of bigotry, or racism, held by those who judge
us "others" unfairly. After re-hearing the interview, I did find the
allegations made by Greg, regarding the Holocaust being blanketed by

falsehoods, generally, a failure on his part to recognize the true horror of
what that war wrought. And in light of our desperate challenges today of
defeating the enemies of Humanity as specific unjust individuals in "hiding",
an ignorantly stupid thing to say. While I, perhaps wasn't thinking along
those conceived lines, where at that time, I had just left the thought of:
the struggles of the Jewish faith, are the same struggles all young adults go
through by naturally establishing our associative identities. Who are you I
truly ask? How many news channels even allow us as Humanity to know about
the absent reason for the bombing of the Jews of Samara? The Jews of
Fallujah? The torturing of completely innocent People to death, as in
Guantanamo? Or still unaddressed publicly: the willful lawless criminality
implemented by the, therefore tyrannical Bush Administration in suffering
God's Iraq? (See missing ``Development Fund of Iraq'', or private
mercenaries discipling for Bush as deemed un-accountable to every conceived
``natural'' law? [see the entire Bible for the judgment call on that one...]
or, Bush's declarative, he magically owns everything in stolen Iraq now,
[where did it go?] and I can't say anything because he signed his John to
13303 some time back, but as still is left unreported in Your dying world?)

Publicly question our reality, by taking the station up on doing an interview
with me, along with your own impressions of our world. Or, if you prefer,
you can do a solo written piece, or a recorded statement for the station. I
look forward to finding common ground with your concerns. I hope I have got
you wondering more, about what trying to save our world from injustice and
slavery, in whatever way we can is all about for me really. In these words I
can say, I apologize to you, for a resulted perception, that wasn't with
better words, my true intent towards us people together.

I will, after some small revisions of this paper, include it as well as the
broadcast package. So I do thank you for bringing up your important view,
that otherwise, would have gone farther without this opportunity, that I
offer as a starting point for deliberation, or argument regarding my
foolishness. Thanks for speaking, and I hope I have met most of your
concerns with a positive light on where I'm trying to come from.

John.

---

http://radio.indymedia.org/uploads/benderman.mp3

The Benderman Cause

I felt compelled to support the Benderman's cause in
any way I could, so I am providing America some
arguments that I would use in a court of law to
defend your freedoms. If America would so desire,
I would also be prepared to make a recorded
statement from here in Canada. (I have been
denied access into the U.S..) My positions of
rational argument are naturally based upon our
established facts, and as such, are something few
Americans are afforded the luxury of through
corporate channels. I hope my forcefulness on these
issues does not fear you to doubt I have the best of
intentions when it comes to serving the interests
indivisibly inherent within the American
Constitution. God, I believe is just, and as such, the
ungodly war actions of George W. Bush dictate are
criminal in the worst degree, being a harbinger of
suffering and misery against all of Humanity as
US being the innocent. The innocent in our entirety,
is my "God" that I love with all I can will. I am
compelled as a living human being to defend America
to the last bush supporter praised if need be. I fight
the enemy of God and Humanity with reason,
understanding, Akeido, and a conviction that our
justice system must prevail for me to be truly myself
really.

"He explained to "60 Minutes," "I was told in basic
training that, if I'm given an illegal or immoral order,
it is my duty to disobey it. And I feel that invading
and occupying Iraq is an illegal and immoral thing to
do."

The war was declared "illegal" by the U.N..
Why? Because Saddam wasn't found in breach

of the internationally agreed upon resolution 1441, (Saddam did EVERYTHING POSSIBLE that was asked of Iraq by the bush administration, and then some Mr. Bush refused to even take him up on. Like national Iraqi television broadcasts.) despite the lies quoted by corporate news America. There was no need for the conflict to begin with as was so reported internationally on march 7th, 2003. U.N. inspectors had complete unrestricted access to go anywhere without delay, and known stock piles of WMD were burned, so could not possibly be completely accounted for by evidential findings due to the fact that they were destroyed beyond recognition. American soldiers were put in harms way to be sacrificed for no better good, but for to allow as has happened, the misappropriation, or as some have alleged, the criminal theft of Iraqi resources, including monies of the Iraqi Development Funds through Presidential decree 13303. Which include the unappropriated, desperately needed, humanitarian aid provisions still denied innocent Iraqis, such as potable drinking water and food stuffs. Democratic principles are DENIED the Iraqis by the neo-con military forces, such as holding all individuals equally accountable to a rule of law. The outlawing of torture, or the outlawing of false imprisonment has not been professed as the action of the neo-con "liberating" force. Mercenaries are not obliged to obey any laws for example. And, "Dr. Germ", and "Dr. Anthrax" are held solely for the fact that they know of the scientific hazards of depleted uranium, and may have warned the uninformed sacrificing American GI, if not held illegally against their wills by the enemy. Commanders such as irrational war criminal Sattler, forbade all men and boys between 15 to 50 from leaving the city of Fallujah, while refusing to negotiate with anyone, (because as so was openly confessed, Sattler had no evidence that Zaqari was in Fallujah) then leveled the city to kill all it's inhabitants, estimated at that time near 300,000 people. Using a napalm type WMD, cluster dud land mine munitions, and as reported, nine two thousand pound bombs in a city 3 1/2 km by 4 km. Serving for a military not strong enough collectively to prosecute such lawless criminal barbarity, is serving for a military not principled in the American virtues of freedom and democracy. In truth, serving for such ungodly criminal command is a cowardly act of treason. George W. Bush is an

enemy of our Humanity.

Copy and distribute this personal challenge freely.
Thanks.

--

I know we're all expected to be selfish, in helping out those others
who cry out for our help, but I beg you, I can't do this alone. My
show did make a positive difference. I need your help in asking I
face my accuser, and politely, with reason, using communication,
and understanding, bring about a better world.

World Productions.

I always use a resistor between 5k6 and 15k, but that's merely to
protect the discriminator output from short circuiting during
(un)plugging.

Headed to "The Redneck Riviera" next week for a little escape from winter.

I'm guessing scanner monitoring will be good in the "Casino Row" area, which is where we're staying.

Looking for casino and hotel security frequencies. Plus anything else of interest.

Thanks in advance.

To be precise, I should write that I use a resistor to protect the
receiver's discriminator when the output is short circuited during
(un)plugging.

Couldn't you just go to the restaurant, hang around the order-counter, and
listen?

Does anyone make a custom case for the Radio Shack Pro-82?

Thanks

Why does that one not receive it?
Is it a sensitivity issue?

I see them at www.radioreference.com . can you not go there?
beau rivage is listed for sure and is pretty active. also i am hearing
transportation/taxi/bus for several places on 452.05 for the grand
(GULFPORT) over in BSL. havent listened to Magic even though my wife
works there. im sure most casinos are in the 450-460 range while Beau
is trunked on 850 with motorola II

791. Super Bowl Combat Air Patrol’s already down one aircraft.

Newsgroup: rec.radio.scanner
Date: 2005-02-06 19:28:18 UTC
From: GeorgeF <av8tor@licensed4funREMOVEBEFOREFLIGHT.com>
Message-ID: <mduNd.2302$oO.835@newsread2.news.atl.earthlink.net>
Source record: 14951

OMAHA 4 and OMAHA 5 aircraft have instructed one aircraft to land at St. Augustine airport where Agents will be waiting. At about 1410 hrs local Piper Arrow N9721C was instructed to first leave the area then to land at St. Augustine. OMAHA 5 came up on 121.5000 MHz to inform N9721C to land.

OMAHA4 & 5 are using 282.4250 (US Customs freq) for their comms. And anytime they need to tell a civilian aircraft (or commercial) to leave the area theyï¿½ll use 121.5000.

Have not heard the normal CAP freqs come alive yet today but Iï¿½m sure they will be soon. Other freqs to closely monitor for Combat Air Patrol mission comms during the Super Bowl will probably be 265.4000 (NORAD ï¿½ Pri Cap Freq) and 143.8000 A-A.

All freqs are in AM mode.

Should be some good listening

469.1375 - 464.1375
469.1625 - 464.1625
469.1875 - 464.1875
469.2125 - 464.2125
469.2375 - 464.2375
469.2625 - 464.2625
469.2875 - 464.2875
469.3125 - 464.3125
469.3375 - 464.3375
469.3625 - 464.3625
469.3875 - 464.3875

Headset/Speaker frequency pairing for ISM band Wide FM (3M Headsets):

Speaker Headset

920.0125 - 903.0125
920.0250 - 903.0250
. .
. .
921.0000 - 904.0000
. .
. .
921.9750 - 904.9750
921.9875 - 904.9875

Headset/Speaker frequency pairing for ISM band (HM Electronics):

Speaker Headset

902.0125 - 926.0125
902.0250 - 926.0250
. .
. .
903.0000 - 927.0000
. .
. .
903.9750 - 927.9750
903.9875 - 927.9875

The most common frequency pairs to check are:

30.8400 --- 154.5700
31.0000 --- 170.3050
33.1600 --- 154.5150
33.4000 --- 154.5400
35.0200 --- 154.6000
154.5700 --- 170.2450
154.6000 --- 171.1050

457.5125 --- 468.4875
457.5375 --- 468.3875
457.5500 --- 467.7750
457.6000 --- 467.8250
461.0375 --- 466.0375
460.8875 --- 465.8875
461.0875 --- 466.0875
469.0125 --- 464.0125

This list covers most Fast Food chains across the entire US
and parts of Canada.

> Uniden 200 XLT
> Uniden 220 XLT
> Icom IC-R3
> Winradio 1500e
> Icom PCR 1000
> ------ All of these have WFM
>
Icon and Winradio are not Scanners for starters, let alone "regular"
scanners...

Perhaps your should inform those guys over at Strong Signals that their
Scanner FAQ is incorrect, or better yet, the guys over at Uniden. I'm sure
they would be interested to know how you ended up with version of their
scanners that have a feature that was never designed into the unit to start
with. Must be by some miracle that your two Uniden scanners have WFM. How
did you manage to modify them to get it? I'd bet the rest of the world
would LOVE to know. I'm sure that it would certainly become a pretty
popular mod.

> Maybe 20 to 30 years ago, WFM was not available in most scanners, but as
BOG
> has said, (and I hate to back him up, but here I must), very few scanners
> don't have WFM.
>
BOG is as much uninformed as your are. You both need to research what your talking about, because neither has a clue... Just to satisfy the ignorant, I did some research on the current listing of scanners over at the Uniden site... As suspected, NONE of the "regular" scanners have WFM. Matter of fact, even a number of the Trunk-tracking scanners do not have WFM. Only the more recent HIGHER-END scanners come with WFM.

Of the 24 scanners listed on the site, a measly 5 come with WFM... So, I think the statements that both of you made are backwards, they should have read, "...very few scanners [DO] have WFM.

> Perhaps you could advise which new scanners do not?
>
Inform you, sure... The 5 listed on Uniden's site that DO HAVE WFM are: BC796D, BC785D, BC780XLT, BC296D, BC250D - THAT's IT!

Which ones DON'T? The other 19 of course, which includes MANY new models: BC246T, BC72XLT, BC895XLT, BC898T, BC92XLT, SC230, BCT8, BCT7, BC350A, BC350C, BC80XLT, BC60XLT-1, SC200, SC180B, BC278CLT, BC248CLT, BC245XLT, BC244CLT, BC120XLT

In the future, maybe it would be advisable for the two of you to do some more research before you start typing and spreading falsities all over UseNET...

That's because the pair of them have no idea what they are talking about...
Either that, or they buy their equipment on another planet...

796. SuperBowl Flyover Aircraft with Senator Aboard??

Newsgroup: rec.radio.scanner
Date: 2005-02-06 23:54:38 UTC
From: GeorgeF <av8tor@licensed4funREMOVEBEFOREFLIGHT.com>
Message-ID: <27yNd.3672$wK.3137@newsread3.news.atl.earthlink.net>
Source record: 14956

Was listening to the Flyover aircraft at the beginning of the Super Bowl
and heard one pilot comment about the ï¿½Senator is here taking notesï¿½
Anyone know if there really was a Senator riding along and if so who it was?

The flyover aircraft were callsign VIPER, they were using 256.6000 for
a/a. Once departing the stadium area they were inroute to Tyndall on
354.3250 (JAX Center); 291.7000 (JAX Center).

After the game Iï¿½ll be posting audio files of the flyover as well as the
other CAP mission comms on the website.

Help please:

Could anyone direct me to a site where I may download the PC software to program / backup my Alinco DJ-X10 scanner? I surfed about Alinco but found no link to software for the X10.

(I used to have it, but the disk gnomes must have taken it to their secret lair where they hide most of my missing widgets...)

Thanks,
Pat

Hi Bob, There is a lot of really good listening here. There are a lot
of prison frequencies out in Florence that can be very entertaining.

802. Super Bowl Combat Air Patrol Recorded Audio OnLine

Newsgroup: rec.radio.scanner
Date: 2005-02-07 04:23:06 UTC
From: GeorgeF <av8tor@licensed4funREMOVEBEFOREFLIGHT.com>
Message-ID: <K2CNd.3779$wK.3028@newsread3.news.atl.earthlink.net>
Source record: 14962

Now that the 2005 Super Bowl is over and most of the Combat Air Patrol aircraft are leaving the area Iï¿½ve posted the recorded audio of today missions on the www.MilAirComms.com website.

The Super Bowl was played in Jacksonville, FL, 95 miles to the North of my location. By being nearly 100 miles away there still were a lot of Military Comms to hear. I've broken up the entire monitoring session into 5 different files. ALL monitoring was received on an by far the best Omni-Directional scanning antenna money can buy! What you will hear are NORAD F16's, F15's and NAVY P3 aircraft chasing aircraft out of the restricted airspace around the Jacksonville area. Also heard are mid-air refueling operations being conducted in support of this Combat Air Patrol (CAP) mission. All aircraft heard are loaded with weapons and ready to shoot down any aircraft which they feel is a threat.

Some todays most active frequencies were: 282.4250, 121.5000, 264.4000, 292.7000, 377.0500, 308.4000, 355.8000, 256.6000 (used by VIPER Fly Over which may have had a Senator on board), 354.3250, 291.7000, 293.6000.

For some interesting records from the Super Bowl as well as tons of other military comms go to http://www.MilAirComms.com

Who is the Combat Air Patrol?

If you're talking about the CAP, it's Civil Air Patrol. I see no
references on google or otherwise to a Combat Air Patrol.

815. FS/FT Icom R7000's with rack mounts

Newsgroup: rec.radio.scanner
Date: 2005-02-07 23:50:39 UTC
From: "Rich Carlson, N9JIG" <no@no.no>
Message-ID: <no-B66520.17503907022005@comcast.dca.giganews.com>
Source record: 14975

I have 2 Icom R7000's for sale. Both are complete coverage from 25 to 1000 and 1025 to 2000 MHz. (as are all R7000's). Both include the DC Power cord and connector, original box and the EEB 19 inch rack mount.

The first unit is in excellent operational condition, with a recent alignment from Icom Service.

The second unit works fine except that the display has issues. Sometimes it goes out, a slight tap or turning the radio off and on will restore it. This can be repaired by Icom for about $100 or so. This unit includes the Voice unit (installed but disconnected) as well as the RC12 Remote Control.

I will take $475 shipped CONUS each or $900 shipped CONUS for both.

I might be willing to discuss trades for such things as an HF rig, R8500, BC796/296/246, Opto Scout/Explorer or similar.

Hey,

The Pro-2052 that I picked up from Radio Shack scans both trunked and conventional. Did they do a firmware update? The one I owned a few years ago did not.

On sale at RAt Shack @ $149. 1000 channels, trunking, computer control, weather alert, Mil air coverage.
You can not go wrong at this price.

This scanner makes a great backup radio for my 785D.

Jim

--
I wrote the letter following "Jew Boy..." the day a single complaint arrived to the radio station, with the threat that the ADL would soon be contacted. The letter was provided in advance of the next day, of the time scheduled for the complainant to return for a recording of the questionable broadcast. The station manager refused to give the complainant my letter, and insured me that I would no longer be allowed to produce a show for our community. Is this fair to our Jewish brothers and sisters? Is this fair to You?

Paris "And then what if you saw, all of the things thats wrong, would you stand tall and strong? Or would you turn and walk away?"

Johnny

Jew Boy Johnny and the anti-Semites

- or -

"The Zionist Conspiracy"

Monday, January 31st, around 3 pm, I called the station manager to ask how my afternoon recorded broadcast went, and to discuss the new week's tentative guest spot with an update regarding the falsely maligned, Mr. And Mrs. Benderman. The station manager informed me my phone number had been misplaced, and was managing with stress trying to put together an apology letter to a single individual, who came into the station, while the interview was still running, to demand action be taken regarding the anti-Semitic broadcast that he was certainly going to report to the ADL about. I told her the Felton interview itself was about bigotry through the demonization of the innocent, what the Jews of world war II suffered through, and, that I was a huge defender of religious Jewish teaching. I told her, to offer the individual a chance to publicly speak regarding the issue, with me, or by himself regarding Felton, to try getting specifically to what has got him so much, by himself, upset about allowing my voice heard defending Jewish rights within our community. She told me that she would likely, none the less, have to let me go to appease the sole

complainant, for what if a lawsuit should result? I told her to consider her options, reminded her that it was only one single individual who hadn't even heard the show's context, and that the broadcast in every other way had been going well, doing good. She told me she was very busy, and said goodbye. Then a short while later, phoned me back to ask if I would write a letter, and have it at the station next day before the complainant arrived for his copy of the broadcast. I said sure, said it would be a great challenge, and proceeded immediately to do just that. The next day, I contacted the station to ask if my arrived letter was forwarded to the individual, and was informed no, he didn't receive it. It wasn't the apology the station was looking for, and my show was now officially terminated. I told her it was very unfair to me, to not allow him to read my formal response, and that I couldn't in good conscience, back down from defending my rights to be heard on this issue, or to allow us, as our public, to hear the complainant's actual complaint about my, freedom for all broadcast. She said she would try to get the letter to him, but that the show was over. Case closed.

Stand up for Jews, and look at where it gets you, Jeeze.

Let us not put aside, the station manager's legitimate concerns. Who has the money or the time for a frivolous lawsuit? Why do expensive independent research, when the Bush Administration can hand us all the free news they want us to have directly without any costly questions? Saddam wouldn't let the inspectors in, right? Why risk standing up for someone else's rights, when doing so, will get the (anti) Jewish-Defamation League calling you an anti-Semite (Semite=Arab) for communicating some understanding with Felton? Felton, is bizarrely quirky as interesting, for his recent book is about the demonization of the innocent, (you know? Nazi gas chambers and ovens?) and as such, we can learn from, as too, we can teach. If he'll listen. Ariel Sharon is not Jewish my friend, NOT JEWISH!!!

Open the gates, it's getting late.

John.

---

http://radio.indymedia.org/uploads/big-package.mp3

Greg Felton : "The fear is necessary for two reasons. And the principle reason has nothing to do with Iraq. it has to do with the government itself. The bush government is criminal. [...] The problem is: how do you keep people from paying attention to this? You keep them focused on an external enemy. [..] so they forment this fascistic hatred of a definable group

of people. So, the war on terrorism so called, is not much a way for the United States to protect itself against it's enemy, it is a way for it to create enemies, to justify the kind of repressive measures that would otherwise be intolerable in peace time."

To whom it may concern,

regarding the January 31st broadcasted interview with Greg Felton.

May I, on behalf of only myself, ask that you pardon my failures in judgment, in not allowing what I should have gave: an immediate re-dress regarding, 'who is the Zionist label?', or 'What Holocaust are you referring to?', during the broadcast of January 31st. (bet you we can't get two Christians that agree on everything.) However, I can offer perhaps a show centralized on a chance to exercise your personal views, be they pro or con on where you think we should go from here, or whatever may have you regarding said interview. Or, if you would like, you may wish to do only, or else include, a written work that I promise, will reach as far as the original broadcast. So, actually, this could be a prime moment to have a dialog regarding racism, bigotry, and intolerance. I confess, I may be unaware, and still have much to learn, when it comes to communicating well with all others. But, I know I'm getting better, and I'll tell you, the Justice-Freedom thing, sure seems to be our ultimate calling.

I was not so surprised that the broadcast interview with Greg Felton would be considered controversial, (as every show I've ever done always has), although I wasn't prepared to hear criticism against the show as being defamatory to a group, or groups of people. As certainly that was not my intent, but however was the difficult subject addressed within the interview. The fundamental teachings of Law, as it pertains to justice and freedom, along with every legitimized religion, is that all free people should be thought of as equals to each other in vigilant protection. And by doing so, one would be serving G-d's interests. (Even if a G-d doesn't exist - an Atheist too, could become a proponent by understanding Jihad). Thereby insuring\realizing that a just intelligent life force rules our chaotic timeless universe in service ultimately to ourselves individually. Giving us in the Torah of Moses, ``all people are created in God's image'' teaching all peoples are Sacred. And as such, would be so in God's interests to defend as the innocent. While in eternal pursuit of happiness and prosperity for all through just means. Under Greg's definition as being a "Zionist" conspiracy, negates the failure of himself personally to recognize the public connotation is too vague, and that Hitler's Nazi Germany, like Bush's America, is politically expressing an inability to represent ourselves with

respect as truly worthy of fair deliberations amongst ourselves. Sacred, every-one. (Or as in, to rise to the defense of those we know to be irrationally victimized as the godly and innocent, victimized in our un-addressed names.)

Greg "This is why the Holocaust is such a very dangerous thing to talk about because, it's not really understood. It's preached at us like a sermon. We're suppose to accept at face value what we're told about it, as if to, criticize it, is some how disrespectful. Much of what we know about the Holocaust has been propagated by the Zionists, and can be shown quite untrue"

I replied shortly later "One thing about the whole situation is that innocent people were targeted for murder. End of story. That's what the war was. All wars are like that."

Greg's mistake I believe, centered in his Zionist labeling through an apparent bigotry expressed, and as such, was too narrowly defining the larger established history of the Holocaust, as being the struggle of the human species in halting, the demonization and then subjugation of the innocent millions, Jewish or otherwise. Perhaps it was strangely on his part a testimony to a real struggle we all have when it comes to identifying ourselves to others. Considering it is the exact subject matter he wrestles with in his book writing, regarding our corporate media's perception of ignoring an innocent people's concern or cries. That said however, for Greg to blankly criticize Greg's false construct of what is publicly understood about the Holocaust, is to deny that much for sorrow and suffering took place against the whole of Humanity, especially, of those who held the practiced Jewish faith. To think the nazi regime would have the gas chambers and the ovens, while the whole of humanity were not strong enough to communicate the unjustness of it all to the German people while it was happening. I have read of a recent documentary that provides film footage of nazi soldiers committing the worst war crimes imaginable to god loving Jews, interspersed with film from the same dated period where, the German people were living civilized lives, left unaware of the atrocities that were being committed against God in their names. Same as America and Canada today, with Fallujah's 300,000 People being, the undeniable example. Or, are you too, a convinced denier of that which is fully documented? (Needless and irrational was the indiscriminate murder of the people of Fallujah, but for to have more American soldiers sacrificed in a conflict created by an unjust as immoral totalitarian dictate.) The Holocaust deniers are those the same of today, who refuse our Humanity to nationally communicate those screams of mercy, or for justice regarding the People of Iraq to be served in our true interests as legitimate. More

than ten million Russians died fighting the evil eugenic scourge of the "superior" nazi regime, and like those in Poland, Britain and France, as elsewhere testified our established history, (albeit only later), the sadistic ungodly as lawless barbarity that Nazism inflicted upon the general masses, went largely undeterred from our "informative" television and radio broadcasts. The same, almost word for word, and action for action, can be found in Rumsfeld's "blitzkrieg". Bush's freedom by tyranny doctrine. Or the criminally sanctioned unchallenged news pronouncements of a Mark Kimmit, Buford Blount, Steven Russell, Mattis, Allawi or Sattler, when it pertains to accepting without our objection, to the victimizing of Iraqis collectively as an indiscriminate act of criminality, like murder. As like in the policies of Ariel Sharon, where an innocent, haven't committed an accused crime in their life Christian Palestinian, is denied the earned home they worked and paid for, on a parcel of land shared up until recent times for countless millennia. My personal struggle has been to inform the public on the forgotten" importance of established evidence, being the only requirement to convince ourselves on who is a bigot, tyrant, a criminal, or a murderer. Will you not therefore, as a fellow humanitarian of this shared world, speak against those you know of, who victimize the innocent to thieve from? Sure you would, if you knew as much for certain about God and this universe, or the under reported, freed to go General Ahmad, funding the mastermind ring leader Mohammad Atta of Bush's 9/11 game. But will together our Humanity ever learn? Well, my plan is to search for guests to speak with, that I'll try not to offend early on. Greg knows, like the Pope knows, as every legitimate police officer worth their grain of salt knows, as so too does include a great many Jewish Jews, George W. Bush used absolutely no evidence to substantiate his therefore, false accusations in our names against bin Laden, while then ardently with Cheney, worked to close outstanding criminal investigations regarding their extremely suspicious behavior. All according to his official publicly documented plan. And speaking the news as thus, does not make anyone anti-Semitic, anti-American, or anti-Human, but pro-Jewish, pro-Christian, pro-Muslim, pro-Justice pro-Freedom, almost wholely human like even. Not of a long gone as lost and forgotten religious dogma, but for now as it always has been found, a mutual respect for all life as we find ourselves being part of. Or, so we would for Atheists, argue in all likelihood to get to the same reasoned to be, just political decision, to this or any another life and death matters matter. Because the unjustified criminal war actions of George W. Bush are our shared documented history, others, with an ulterior agenda to propagate their weakness through bigotry or racism, will arbitrarily blame a subjective grouping of people, instead of

demanding by godly individual might, the arrest of specific individuals who are actually responsible according to the established as public evidence. So, now who's fault is that? We live in difficult times. To admit weaknesses regarding our corporate news control content decisions, is to seek a better world for our lives through stronger open communications.

I believe the defense of the Jewish faith is found in the indivisible properties of Creation, and who's central belief is made simpler than any other. Hillel was asked: Rabbi, who is a Jew truly? Hillel answered, "What is hateful to you do not do to your neighbor. That is the whole Torah. The rest is commentary -- go and learn it." So my challenge in defense of the Jewish faith during the interview, was that those who practice criminal misdeeds, are therefore found by the official definition taught by Hillel, to be not practicing the "Golden Rule" of the Jewish Faith. (as so pronounced by the religion's recognized ancient oratator.) By calling alleged criminal actions, the conduct of an entire people, faith, or branch thereof, is to fall into the fascist minutia of bigotry, or racism, held by those who judge us "others" unfairly. After re-hearing the interview, I did find the allegations made by Greg, regarding the Holocaust being blanketed by falsehoods, generally, a failure on his part to recognize the true horror of what that war wrought. And in light of our desperate challenges today of defeating the enemies of Humanity as specific unjust individuals in "hiding", an ignorantly stupid thing to say. While I, perhaps wasn't thinking along those conceived lines, where at that time, I had just left the thought of: the struggles of the Jewish faith, are the same struggles all young adults go through by naturally establishing our associative identities. Who are you I truly ask? How many news channels even allow us as Humanity to know about the absent reason for the bombing of the Jews of Samara? The Jews of Fallujah? The torturing of completely innocent People to death, as in Guantanamo? Or still unaddressed publicly: the willful lawless criminality implemented by the, therefore tyrannical Bush Administration in suffering God's Iraq? (See missing ``Development Fund of Iraq'', or private mercenaries discipling for Bush as deemed un-accountable to every conceived ``natural'' law? [see the entire Bible for the judgment call on that one...] or, Bush's declarative, he magically owns everything in stolen Iraq now, [where did it go?] and I can't say anything because he signed his John to 13303 some time back, but as still is left unreported in Your dying world?)

Publicly question our reality, by taking the station up on doing an interview with me, along with your own impressions of our world. Or, if you prefer, you can do a solo written piece, or a recorded statement for the station. I look forward to finding common ground with your concerns. I hope I have got

you wondering more, about what trying to save our world from injustice and slavery, in whatever way we can is all about for me really. In these words I can say, I apologize to you, for a resulted perception, that wasn't with better words, my true intent towards us people together.

I will, after some small revisions of this paper, include it as well as the broadcast package. So I do thank you for bringing up your important view, that otherwise, would have gone farther without this opportunity, that I offer as a starting point for deliberation, or argument regarding my foolishness. Thanks for speaking, and I hope I have met most of your concerns with a positive light on where I'm trying to come from.

John.

We Israeli Military Reservists REFUSE To Abuse, Starve, Maim And Kill Palestininians

We Israeli Military Reservists REFUSE To Abuse, Starve, Maim And Kill Palestininians

---

http://radio.indymedia.org/uploads/benderman.mp3

The Benderman Cause

I felt compelled to support the Benderman's cause in any way I could, so I am providing America some arguments that I would use in a court of law to defend your freedoms. If America would so desire, I would also be prepared to make a recorded statement from here in Canada. (I have been denied access into the U.S..) My positions of rational argument are naturally based upon our established facts, and as such, are something few Americans are afforded the luxury of through corporate channels. I hope my forcefulness on these issues does not fear you to doubt I have the best of intentions when it comes to serving the interests indivisibly inherent within the American Constitution. God, I believe is just, and as such, the ungodly war actions of George W. Bush dictate are criminal in the worst degree, being a harbinger of suffering and misery against all of Humanity as US being the innocent. The innocent in our entirety, is my "God" that I love with all I can will. I am compelled as a living human being to defend America to the last bush supporter praised if need be. I fight

the enemy of God and Humanity with reason, understanding, Akeido, and a conviction that our justice system must prevail for me to be truly myself really.

"He explained to "60 Minutes," "I was told in basic training that, if I'm given an illegal or immoral order, it is my duty to disobey it. And I feel that invading and occupying Iraq is an illegal and immoral thing to do."

The war was declared "illegal" by the U.N.. Why? Because Saddam wasn't found in breach of the internationally agreed upon resolution 1441, (Saddam did EVERYTHING POSSIBLE that was asked of Iraq by the bush administration, and then some Mr. Bush refused to even take him up on. Like national Iraqi television broadcasts.) despite the lies quoted by corporate news America. There was no need for the conflict to begin with as was so reported internationally on march 7th, 2003. U.N. inspectors had complete unrestricted access to go anywhere without delay, and known stock piles of WMD were burned, so could not possibly be completely accounted for by evidential findings due to the fact that they were destroyed beyond recognition. American soldiers were put in harms way to be sacrificed for no better good, but for to allow as has happened, the misappropriation, or as some have alleged, the criminal theft of Iraqi resources, including monies of the Iraqi Development Funds through Presidential decree 13303. Which include the unappropriated, desperately needed, humanitarian aid provisions still denied innocent Iraqis, such as potable drinking water and food stuffs. Democratic principles are DENIED the Iraqis by the neo-con military forces, such as holding all individuals equally accountable to a rule of law. The outlawing of torture, or the outlawing of false imprisonment has not been professed as the action of the neo-con "liberating" force. Mercenaries are not obliged to obey any laws for example. And, "Dr. Germ", and "Dr. Anthrax" are held solely for the fact that they know of the scientific hazards of depleted uranium, and may have warned the uninformed sacrificing American GI, if not held illegally against their wills by the enemy. Commanders such as irrational war criminal Sattler, forbade all men and boys between 15 to 50 from leaving the city of Fallujah, while refusing to negotiate with anyone, (because as so was openly

confessed, Sattler had no evidence that Zaqari was
in Fallujah) then leveled the city to kill all it's
inhabitants, estimated at that time near 300,000
people. Using a napalm type WMD, cluster dud
land mine munitions, and as reported, nine two
thousand pound bombs in a city 3 1/2 km by 4 km.
Serving for a military not strong enough collectively
to prosecute such lawless criminal barbarity, is
serving for a military not principled in the American
virtues of freedom and democracy. In truth,
serving for such ungodly criminal command is a
cowardly act of treason. George W. Bush is an
enemy of our Humanity.

Copy and distribute this personal challenge freely.
Thanks.

--

I know we're all expected to be selfish, in helping out those
others who cry out for our help, but I beg you, I can't do this
alone. My show did make a positive difference. I need your
help in asking I face my accuser, and politely, with reason,
using communication, and understanding, bring about a better
world.

World Productions.

Can I Get a Witness?

"It is now argued that because demon bush is President,
it therefor doesn't matter where the actual crimes scene
evidence for the murder of thousands in America leads to
according to the FBI, for George Walker Bush (666) in
above all the laws of the universe. Despite! the
reason they obtained the warrant, was to charge me for
"threatening the life of an international person", they
instead decided not to as saboteurs of liberation. They
argued after the warrant gave them my personal
possesions, [...]"

Don't miss the rest of the inside scoop to the up
coming public Johnny Wizard trial, cradled within this
last testimony of a King left forsaken by all of America
as unworthy of public discussions in our media.

Seriously Folks

Napoleon Bonaparte wrote forming governments are forged only through the public witness of shared mutual experiences, simple, yet, the bushite strategy implemented continually on behalf of the enemy forces in Iraq have been to divide the nation's people with different "legal" definitions, while speaking for typical bushite bigotry, by then offering distinctions of human value between US some from "others". Not freedom, nor democracy. [Remember: Evil is dumb]

Example: Allawi forbade surviving Iraqi doctors and nurses from medically treating any of the estimated 200,000+ innocent victims from Falluja [IRAQI vicinity].

Example 2: DYING two-bit bushite war with "foreign" soldiers paid especially more than a thousand dollars a day as self confessed RACISTS, and THEREFOR, left "officially" too weak as, "pissing post illiterates" to go after real terrorists who torture the innocent, or real thieves, that have stolen BILLIONS from the Iraqi Development Fund. Done all to sacrifice life's purpose for no better good to the ANTI-CHRIST EVIL bush "cabal" of lying neo-con Christ haters. Allthewhile stating the objective worth dying young America as bushite for is "Democracy" in Iraq. But, isn't a founding principle of any democracy to outlaw thefts, sexual assault, murder? Again, bushite kills bushite for a stolen nickel that they just as soon, stole from anybody. If you can believe it. We need YOU to make some effort to engage American talk mediae. Perhaps it's only YOU, who hasn't yet heard a responsibility to this once greatly revered world of wisdom, of the enchanted, and mystical, or of the tyrannical as hell bound for suffering and sorrow. ,in which you share allegiance too my friend.

Being caring and compassionate for the victimized innocent not only feels good, but it is a choice we would make at being alive to help US survive. To not speak against the bushite war crimes against YOUR Humanity, is to not speak in defense of our ancient dying God no longer found worthy of you Peoples humble respect. Currently corrupted bushite want my voice of truth silenced by censorship with false imprisonment,

and those who advocate such hatred for myself and our humanity, speak no public word or disagreement on my allegations of high treason by Our Mr. bush Jr.. While I want to openly debate the, "censorship for tyranny", corporate talk radio bushite bitches on their furthering commitment to not allow objections regarding their contempt for true justice and freedom in America. But if you singly decide not to support my cause, like corporate news control encourages, We will be left forsaken, again. God is Just to the core, like Johnny Wizard tries to be, while bushite liars lie, cheat, and steal from America as ourselves measured unworthy for deliberation to gain true understanding. The Coast to Coast radio network in America disallows America learn for why American soldiers are currently sacrificing their LIVES irrationally. Why? Because there is no legitimate reason, while bushite pretend in YOUR name, that there must be another reason but for to rob our humanity in George Bush Jr.'s name. For if there truly wasn't another reason, not so then blind, stupid, and cowardly American soldiers wouldn't be too happy about the wealthy corporatist bushite commentators silencing America's dying cries by bushite enemy command. Now would they? Remember: wealthy blind and stupid bushite kills/gets killed, poor blind and stupid bushite for a stolen nickel - a nickel in all likelihood, they rifled as thieves from some pensioner, that just as soon, would be their own "grand" parents. Or Yours as someone elses beside.

Phil Donahue had the highest rating, number one money making news commentary show on NBC as it was canceled. Why? Too good as enlightening and INFORMATIVE. Then there was the recently canceled Crossfire. Or how about Barry Zwicker on VisionTV as Canada's greatest broadcast before it too was canceled. Why? Too good as enlightening and INFORMATIVE. VisionTV, a "religious" channel now likely forbids anyone to suggest that God would be good as just, and REALLY INTELLIGENT. Forbidden knowledge we are the corporate bushite insist with Your stolen rights. Why so? Because Americans might learn of what it is to be a true Christian, and therefor stop to have arrested else immediately executed for high treason regarding 9/11: the enemies of Johnny, Justice, God and Humanity, the evil doers George W. Bush, Rumsfeld, and Condolezza Rice. Alone with Myers and Cheney for good measure. Then, those responsible for the needless bombing of Samarra and Fallujah.

Under EVIL bushite tyranny, We are criminally fighting for needlessly dying as bushite here, but corporate

newsCASTers don't find "our" costs worth getting a discussion group going, after all, American soldiers who die for the bush regime, as the kept in the dark, will less likely be going after the real bad guys for 9/11 then right? Corporate America refuse US just basic rights of legitimacy to at least address the absent war reason issue from time to time - Jeeze. But no. As bushite, they're prepared to not inform the bushite soldier that depleted uranium is radio-active, that the stolen American Enron pension money is sitting in the Cayman Islands, or that the war itself has no justification. See, the bushite war is a TRUE CRIME against all Peoples of Humanity, for the war against Iraq has no reason available to explain enemy military action, but for to die thieving from ourselves as the bad guys. The Enemies of Freedom. Why we have Law. God is Just, and evil is just the slavish ignoramuses who censor our Words of empowerment for freedom through Justice represented indivisible as Eternal. We rule.

Therefor, George Walker Bush is guilty of treason to US all, not only including your one and only King Johnny Wizard as Heaven's afar, but also the not going anywhere but yet still sacrificing ungloriously as the stupidly blind as almost completely incoherent,. devote bushite nazi dumfuk soldier grunt enemy vermins.

Will you not help these words reach a larger audience? I ask you to consider your helping me can do good for your real world too. Perhaps it is ONLY the single individual that hasn't yet understood, this once greatly revered world of the Word is of which you share allegiance too.

Speaking for a just battle of freedom for all humanity, is a right you could exercise in brightest intentions of a muted God who sure could use your help right about now man. Our family is in so a desperation for needed support. I am fearing your fears have got you believing, you have no dying right to speak against Mr. bush Jr. for the crimes he has committed in Your name, but You do. Think of it this way: anybody who stays silently connected secretly to the crimes of nine-eleven, can not be trusted as a sacrificing bushite thief by the enemy bush administration. [Secretly speaking in all strict certainty.]

The warrant that allowed the confiscation of my computer equipment, was to prove that I was the one and same who demanded true justice for our humanity by following the crimes scene leads for nine/eleven, arresting those

responsible, or killing the escaping culprits, bush, rumsfeld, and condolezza rice by the hand of our guns. (Why do you think Police officers carry guns after all?) It is now argued that because demon bush is President, it therefor doesn't matter where the actual crimes scene evidence for the murder of thousands in America leads to according to the FBI, for George Walker Bush (666) in above all the laws of the universe. Despite! the reason they obtained the warrant, was to charge me for "threatening the life of an international person", they instead decided not to as saboteurs of liberation. They argued after the warrant gave them my personal possesions, (hundreds and hundreds of video tapes, ALL MY WRITING, computers, disks, along with approximately 50,000 tasteful images.) That the reason for the warrant being originally issued, no longer, if ever, was justified. For if they were calling for justice, the demon bush, and his co-conspirators might get caught by America, and pay the ultimate price for their treason by death sentence. After two self confessed PRO-BUSHITE (support death squads against Afghanistan school girls, and propping up the heroin trade by arming women slave traders) "officers of the law" reviewed my images, they now contend, that several can be argued to be illegal in an almost fixed to win proceeding. (No more than a small few pictures of beautiful girls in different states of undress - "Home Lolita" I think.)

The charges they offered to the prosecution to argue for a "life term prison sentence" (almost jokingly it was quacked) were complete fiction, of which the crown offered me "a deal". Plead guilty for being a shamed ostracized sex offender, [I'D HUNT CHILD KILLER ENEMY BUSHITE EVERY DAY OF MY LIFE IF I HAD THE BUS FARE AND THE AMMO] and maybe, the Judge won't argue for a long term prison sentence for another charge that has absolutely nothing for substantiation. Substantiated, that will surely do nothing but testify to their attempts at demonizing my better name. Nothing doing darkness, the court of Law, is Our court, and I intend to make my case heard among my peers. Here.

Please, I beg you for my life, forward this document to the propper authorities, post these passages to any church, or, phone talk radio America and demand my public case be heard for Your benefit too, or don't and get what we'll deserve by not making a miracle happen with your single sole but sure, human will power!

1. I obtained the questionable images through Usenet group "youth-and-beauty". Images can be downloaded a

thousand or more at a time. I can't not perceive the images until they are on my computer! If they had told me they were coming as bushite, I would have been sure to delete anything near objectionable for argument's sake. They laughed when I told them that.

2. The service companies that offer such groups as child-rape and so on, have an easy ability to filter out subjective objectionable material, along with the truly grusome stuff. But they don't, nor, are they found legally liable for not doing so. I suggest the reason is, it would put out a billion dollar industry of these child-porno cops that view real sicko slime routinely, while then arguing anyone who witnesses such depravity must be guilty. Guilty to have their professional lives destroyed, their life invested property removed till whenever/perhaps stolen, and then be publicly ostracized as senseless victims. All because some guy maybe believed women are worthy of worship in the highest respect and honor, while cute adorable boys he couldn't help but feel compeled to cover with praise, or mutual hugs and kisses., as long as there are no other men in the room with him and the gals perhaps one day chatting over maybe child care let's say. (no wonder the two child porn cops in question regarding my public case admittingly were/are staunch bushite offenders.)) I know of no nobler lineage that that of our police officer. For protecting the rights of our children, is what we've always been committed to gaining respect for. We want to do right for ourselves, and despite Johnny, this world really is something remarkable to concider a future with on our own terms as a foundation of wisdom with the ever presnt will to succeed at something greater than first realized. Evolution. The Revolution of reason while jiving with justice for freedom holds many perks per praised principle. Hammurabi's number one thang.

3. If a search warrant can be made against anyone who a criminal bushite finds objectionable, (bush and rumsfeld made the charge against me through the Secret Service, then to the RCMP.) then what freedom fighter is safe from pictures of godly and beautiful children in bath tubs? Swimming? IF, the bushite demands the images appear seductive, and compel them to commit sexual assualts? Or, what if you download a program on cars to have the bushite find, it contains bin Laden's secret where abouts in code? Would you be guilty, and if so, of what? No thinking freely?

So, the warrant brought the officers of law the right to prove my Johnny Wizard writing was of my own, but yet, after doing so, refused to enforce the law by giving me my day in court on the reason the warrant was granted to begin with. Also, I, as anyone can not perceive potentially objectionable material until it is in my possession, while a service provider would have little of no problem. (The still working child porno cops could look for child porno all day, and actually get closer to catching those who proliferate actually objectionable materials. [See?, an internet service provider could defend thus: they're not guilty because the subjective material, that would be questioned, is subjective, and so would the porno cops if they got someone intelligent to defend themselves. But for Christ who needs to know what's going on in the realm?, while loving girls in general like they were his own distant siblings? They'd put Christ up on a cross for loving schoolgirls, by demanding such thoughts come only from a criminal prospective. The problem here is child porno cops can view a suggestive cute girl smiling in her panties, or witness some heinous bushite rape or torture, and measure them equally when charging US for their deviant sexual sugestion. As alas, they refuse to support the Law when it comes to the easily provable criminal actions of enemy bushite, as for would be, the defense of the lives of our innocent children in Iraq mean something to me too.

Anyway, apparently, the reasons for the warrant were not as was so intended. To charge me for threatening the freedom of bush, rumsfeld, and the evil witch condolezza rice. (Can I get some legal advice from someone out there on this then bogus? warrant please?). The Court will (try) argue without allowing ANY voice of objection, that because I demanded the immediate arrest or execution for the individuals responsible for the crimes of nine/eleven, (relying primarily on the Whitehouse, FBI, and the public spewing of the war criminal demon anti-Christ itself,) the prosecutor, it has been alleged, will demand justice not be served in that respect, and that the search warrant that obtained the bushite's evidence against me as a truth teller during their fishing expedition will not be allowed for re-dress. Is this Justice on behalf of God I ask you?

Nature of the Beast

(Again, remember, nobody from the RCMP, the Secret Service, or the FBI, state that I am incorrect in my allegations of treason against the bush administration.)

The prosecutor is going to press for incarceration if I plead not guilty for a crime I'm not guilty of, while my public freebie lawyer, contends my defense of innocence and corporate news agencies forbidding the pursuit of Justice in protection of our Police services, like the honorable FBI officers that contend Ahmad funded Atta will likely not be allowed heard. [Are you a member of a Police Union somewhere, or know of someone who is? Or, do you just not give a care for you fellow officers either?] See?, bushite falsely believe bush can not be arrested for nine eleven, no matter where the actual evidence leads, because he is not judged an equal among men by corporate news standards, but as the anti-Christ, FALSE deity, an enemy to every free person standing.

That is our, for real court case against the Bush administration as it stands today. While some have warned, bushite are pushing to have me taken in now, to try stopping this from speaking in our Humanity's true defense. They just might succeed, if you decide no care for Freedom from tyranny either..

This is was/is/will be my last Wizard Wire public service announcement regarding this, George Walker Bush (666) wars America, Humanity, and me as the Lord of Creation. I've said everything I can say twice over, and if you can't find it within yourself to pass this post on to every church corner, with a, "I love life too" set of priorities, I can guarantee you no greater reward. But for to be present if not in person, but in spirit during my public trial where the bushites will publicly judge my character unworthy, while attempting the silencing of our own voices for Justice as We stand in TRUTH, indivisible. Be it known, the prosecutors of Law in my case have read Johnny Wizard's "The Trial and Conviction of Our Mr. bush Jr.", and likely a few others that will be asked by the hiding in darkness bushite enemies to completely disregard as crime scene evidence. It's going to be a case worth getting to, considering the newspapers, talk radio stations, and National News desks are expected to forbid honest coverage of by the higher ups at corporate command. Call your Church group to organize a call for Johnny!

Or don't.

I thank all those with whom the true liberation of Humanity from tyranny could not have been made possible without themselves individually. I know it seemed like no one was listening, when we spoke for God's cries, but WE knew better, and we knew soon, all of US will then learn it too, defending God is of no greater privilege.

So, cheers to You, our Humanity's defenders of the human challenge, for being there to speak for this life when we needed You as a contributor. Fare thee well with your pride and honor, and no bars will ever hold your undying spirit.

/ / God bless America by destroying the enemy evil anti-Christ, Our Mr. bush Jr. Yourself. \ \

/ / Is this satire? Or is this why the US has contracted to build massive prisons to house those they will never charge due to lack of evidence, but hold however long they please? See Dana Priest, Washington Post, January 2 \ \

--

/ / ..said William Winkenwerder Jr, assistant secretary of defence for health affairs "We have no evidence of maltreatment by physicians, or of physicians participating in torture or torturous activity," he said. "We just do not have evidence of that." \ \

What world does William Winkenwerder Jr think we live in anyway?

It was the revelations that the signed sqiggles on the bogus death cetificates weren't made by the actual medical practicioners on charge in Guantanamo. Now, there might have been one or two involved, as has been confessed, HOWEVER, we do know that the death certificates were forgeries to cover up the crimes of bushite nazi enemies. So, count the forgeries, and you'll count the actions of the truly unjust and evil.

--

/ / No one is able to define the mission of the troops in Iraq, or for how long this mission will last. No one at all, including George W. Bush, can explain the US strategy in Iraq. This is because there is no strategy. With the Iraqi resistance raging, it is not clear why the US is occupying this country and why the US is so willing to sacrifice its soldiers there. \ \

Well the strategy is to cash in on the bushite war criming thieves spree actually. Cowardly soldier's die in Iraq, and the bushite fat cats lounge in the lap of our stolen luxuries through the leverage of the mallable dying amerkan mind.

--

/ / U.S. troops targeted by a roadside bomb have mistakenly killed two Iraqi policemen and two bystanders hours after an American warplane bombed the wrong house[..]

An unnamed bushite quote It expressed deep regret for the "loss of possibly innocent lives". \ \

Wouldn't you kill the traitor who spoke such contempt for Humanity? The rewards of indiscriminate murders against the unknown innocents in bushite amerka's ungodly name, gets yet another lowly forsaken bushite rightly killed for bad wordcrafts on a make believe sound stage they think they only have us party to.

--

/ / "In the exercise of his power to use military force, 'the president's decisions are for him alone and are unreviewable.'" \ \

--

/ / "And they schemed and God schemed, but God is the best schemer." (Quran 3:54) \ \

--

/ / Hence, it is up to the people of the United States to compel the US occupation authorities to at least abide by minimum acceptable standards of civilized nations. The progressive community should demand the unconditional release of Dr. Huda Ammash as part of its campaign to end the illegitimate US occupation of Iraq.\ \

--

/ / The agency's statutory responsibility is to speak the truth, whether the truth supports the president's plans or not. It would appear that this concept is not shared by this administration. \ \

--

/ / The incriminating FBI email dated 22 May 2004, indicates that president Bush "personally signed off on certain interrogation techniques in an executive order." (See original at

http://globalresearch.ca/articles/FBI.121504.4940_4941.pdf). \ \

--

/ / And these two men - 1974 Defense Secretary Donald Rumsfeld and Ford Chief of Staff Dick Cheney - did this by claiming that the Soviets had secret weapons of mass

destruction that the president didn't know about, that the CIA didn't know about, that nobody but them knew about. \ \

/ / In other words, what we are dealing with is the criminalization of the State and its various institutions including the criminalization of Justice. \ \

opinion
by Iranian-Shi'ite

/ / I don't really care how women or men dress in their own countries. I have no desire to tell them how they should dress. But if they come to our countries and try to denude our sisters or daughters, then they have declared war. \ \

--

spokesman Lieutenant Colonel Barry Johnson said:

"I'd like to think that these claims aren't true...but I don't know. If someone is doing this to detainees, they deserve to be taken down."

--

/ / "The US government is trying to silence Dr. Ammash's outspoken criticism of the US role in causing cancers and other illnesses in Iraq through its own use of biologically hazardous weapons such as radioactive deleted uranium." \ \

/ / ``Such a blatant statement acknowledging the commingling of his official duty to ensure a fair election with his partisan duty to re-elect President Bush, made in a political fund-raising appeal, evidences Secretary Blackwell's poor judgment at best, and the manipulation of election administration for partisan purposes, at worst,'' the report asserts. \ \

--

Breaking Camp

I will advocate full compensation for every mistreated soldier who had been tricked into believing something without reasoning.

Johnny condemns George Walker Bush (666) to death for the crimes he has committed against God's Humanity.

Let it be understood, that Saddam gave America 100 percent access to do anything the anti-Christ wished without delay prior to the needless military conflict beginning. So, every treasonous thieving bushite life taken, is done in protection of God, and the American dream. See?, TRAITOR bushite Art Bell's amerikan talk radio forbids BY CENSORSHIP anyone in America to speak in the defense of the undefended American People. Art Bell, America's enemy, with ensure that America "never" learns that bush's business partner, General Ahmad, funded 9/11's mastermind ring leader Mohamed Atta, or that depleted uranium is measured radio-active, or most especially, that billions of STOLEN American pension money is sitting in bushite bank accounts in the Cayman Islands. Instead, he'll do another show on UFOs, or bigfoot, while broadcasted to the wordless bushite grunts their dying is for naught. Who cares?, bush's war against freedom in America isn't anything bushite amerika ever wants to get persnickety about.

http://www.chapelhill.indymedia.org/uploads/bushite-kills-bushite.mp3

/ / Who cares? CNN is not going to cover it, we know that. CBC in Canada, they're not going to mention it to anybody. It's no concern of themselves to show a caring word for the [thieving] sacrificing soldier. \ \

The EVIL bushite liars die for no better good, but as the ungodly bringing further hardships against US innocent people they target for murder. God says, the Magna Charta says, the American constitution says, let US all arrest or kill the TRUE ENEMY bushites instead. "See lawless bushite, kill it in defense of all that are innocent", I always say as the Son of Man and Living Creator. No joy greater than saving the innocent victims of the enemy bushite thieves, torturers, and first degree murderers. WHO WOULD DISAGREE? in a true Democracy?

Every American soldier who dies as a bad guy in Iraq, dies for cowardly worshiping bush instead of Life. The demon anti-Christ as their false, untrue, dummy deity, sends them into harms way for only to steal from the innocent. The innocent left in God's trust. There was nothing that could have better been done in Iraq by bombing the country. The blind attacking of the population, along with it's functioning public institutions, brings only the STOLEN cash rewards on trading in the American soldier's LIFE as a fascist criminal. All that is bought to by putting cowardly

bushite soldiers in bush's un-needed conflict, is to steal from their very own families back home left almost completely undefended. [Have no fear, Johnny Wizard's here!] A criminal military force that deems some soldiers from Apartide fame as "un-accountable" to American or "Iraqi" law, while paying them a thousand dollars a day or more as rewarded racists who fight allong side black and Hispanic dying bushites, to not allow equal rights for those classified by different colorations. Allthewhile with spokespeople smattering the sacrifices are to bring democracy together in Iraq to arrest bushite for thieving then? [No matter whomever you are, George W. Bush is truly evil to God in YOUR name too see?] Regular Joe in the Army, 47$ before expenses concurrent and impending.

I will advocate full compensation for every mistreated soldier who had been tricked into believing something without reasoning. Example: those who had been taken in criminally to handing over their military pensions for five year loans at 56%, or a 20,000 loan paid in five with 60,000. No competion exists for this racket because it's an actual crime scene. Guess where American Gis can hear the sales pitch advertised? The Army Times.

No thoughts of understanding are expressed (OR COULD BE) from the soulless bushite on why they are in Iraq dying, or why depleted uranium is harmless, or why depriving Iraqis of medicine along with food and water, is a ploy to win the hearts of every man who owns a gun. Or why the bushite demands through the censorship of tyranny, that Our Humanity has no rights to speak for our freedoms and liberty, or on behalf of Iraqis who have had billions of much needed dollars stolen from themselves by the bushite enemy. (The billed for taking bushite soldier itself, will not receive a penny of the ill gotten gains, just like their own grand parents were robbed of the pensions, and the bushite couldn't find a word of outrage to say against their false idol then either.)

/ / As the soulless disciples of the enemy anti-Christ, Our Mr. bush Jr., their "officially" granted legal immunity from all prosecution means nothing to me as a honorable man defending my humanity, or as living Creator, who brought all into this new world to be free, and can just as soon, take you all nazi bushite out the old school way. \ \

The ungodly evil bushmob fascist totalitarianists are pushing to have US specially arrested. The demon anti-Christ enemy forces have gambled an attempt to find prosecutors and judges, lawyers and defendants, who together wouldn't let the truth be spoken in our own defenses. I have had many discussions with the National Security branch of the RCMP, CSIS, the Secret Service, the FBI, and several commanders in the Canadian Military, and WE all know, this upcoming trial is something a great deal of many are lookiung forward to, however, an agent of law recently approached me to warn, some are working to try having me arrested without bail, and spend maybe a few years behind bars before a trial could not be postponed any longer, all in an attempt to try stopping my words of truth that represent the interests of all defendable legitimate legal enforcements. Canada's system of checks and balances, and our honorable police services have too many good guys in place, to want to silence my calls for Justice by measurement. And, up until now, our security people have advised the bushite case would never fly in a public court room, for Johnny Wizard would just make his case as it stands FACTUALLY DOCUMENTED along with that which was FALSELY ALLEDGED, and the wealthy do nothing corporate news agencies would be caught as culpable to being accessories to first degree murders in New York City, where they deliberately with malicious intent, refused to report on the FBI's findings that General Ahmad funded Atta, or that demon George W. Bush with condi and rummy, had a top secret CRIMINAL plan to invade Afghanistan dated September 9th, 2001. Just like still, CBC and CNN refuse to report any human concern for those murdered irrationally by bushite in Iraq today. No concern for those Humans, but in Asia, where bush isn't yet anyway, thieving in the wide open from God, they can try to make up for lost respect by claiming those People are better People worthy of our commpassion with wall to wall coverage on the suffering we have little of chances in preventing. But for to stop needlessly droping tons and tons of toxic bombs into our Living Earth. It is the bushite enemy who refuse to allow YOU speak in your defense as an Earthling.

However, this being said, I have been recently informed that, since the godless bushite enemies would wish to have our freedoms censored, it will likely be pushed to do so without a public trial allowing a jury of my peers to judge the case accordingly. Up until recently, Guantanamo could never happen in Canada. But now in Canada, the enemies behind closed doors are talking

about sending intelligent innocent people away to be tortured for sadomasochistic satanic tendencies, and further have argued to no one that persecuting People in Our names without evidence, maybe isn't such a bad idea, when you think of all the people we could rob our humanity from like the "popular" and "Democratic" bush regime does. Bushite corporate new censors are fighting for a return to the dark ages. Don't let this happen to YOUR world. Care not for my freedoms as an honorable man who stands with America's FBI, and your given up life wont be worth nothing but as yet another sacrifice to bring further glory and stolen riches to the American cop killer, pension thiever, 9/11 perpetrator, war mongering anti-Christ, Your unbelievably EVIL Mr. bush Jr.. The enemy of God anti-Christ who continues to hold your real life in mistrust and dishonor, while wealthy corporate "celebs", talk freely about their pride in such ungodly sacrifices as Christ's forsaken name.

I ask ONLY you to argue this paper with your best intentions, for I will perhaps not receive another chance to publish, if as usual, the Internet community at large extends me little support in my UNCHALLENGED assertions on who truly committed the crimes of 9/11. A single bushite corporatist sends a complaint to a Internet provider alleging I talk "spam", therefor, without any hearing, private owners are threatened to lose their privilege to communicate, by an enemy bushite protagonist who exercises his "authority" by stating only, "spam", and not even providing my actual post in it's entirety. One Internet service was shut down for the sole reason that discussing George W. Bush as the 9/11 perpetrator in tx.politics, was against the rules, for such subject material must be confined to only a American nation political forum. I talked to the kid on the phone who made that power decision on behalf of all usenet, and let it be known, he knows what he's doing. But "they" can't do this everywhere. I can not "take over" your big old lonely world that you must work to protect for yourself as an equal citizen sworn to freedom. I have written all I need to say about Justice and Freedom, and if the human race can not still find enough care for themselves to propagate my writings for others to read, or demand Art Bell be removed to allow Johnny Wizard to debate the ungodly dumfuk bushite vermins, there truly is no hope for US continuing.

Johnny Wizard

U.S. deserter 'didn't want to have to kill babies'

/ / Mr. House will argue that American soldiers are
guilty of war crimes and that forcing Mr. Hinzman to
fight in Iraq would have made him a war criminal.

He will call as a witness former U.S. Marine Staff
Sergeant Jimmy Massey, who is expected to testify that
he and other soldiers shot more than 30 unarmed Iraqis,
including women and a six-year-old child, at a U.S.
military checkpoint. \ \

--

CNN.com - Aid group 'told to freeze' Falluja work - Dec 6, 2004

/ / Only about 100 families are thought to remain in
Falluja, as most fled the city before the U.S.-led
operation aimed at flushing out insurgents. \ \

Huh? Again, witness wealthy CNN "news" staffers, didn't
even bother to seek for an update on their "about 100",
that had not ever been given. Red Cresent, the day
previous to Dec. 6, no... actually reported on, Dec
3rd!, stated, (from their limited circle of reference)
they had witnessed a minimum of many corpses, of
completely innocent pro-Iraqi women, children, youths,
and men.

/ / Iraqi Red Crescent spokesman Muhammad al-Nuri
estimates that some 6,000 people have been killed, many
of them civilians. \ \

(That is discounting murdered armed defenders of Freedom
in Iraq we can prusume.)

But, again, the true bushite enemies of loyal bushite
enemies, thay'l' "bushite lie" to the bushite nation
about the "holy" benefits of, sacrificing America's
young life., all done for the glorious betterment of the
traitor demon anti-Christ liar, the war criminal, Our
Mr. bush Jr., along with his treasonous evil cabal of
anti-semitic Palestinian Christ haters. A compassionate,

"conservative", war mongering cabal whos warring of
America is done to secretly steal further from the
innocence of God in silence. Without a honest to
Johnny, bushite killin' God-Man to speak on the nature
of reality itself from living Creation's time-less
prospective. Naturally leaving ourselves to save all of
humanity with my "magic" - guitar, notebook, cybercafes,
and super cool Akeido, leaves me in wonder of where life
could lead as committed to freedom through justice for
all?, as truly ourselves democractically represented?,
Miraculous?. or will we choose as ENEMY bushite instead
not to, ending to devolve ourselves from existence?

I know of some pretty, almost miraculous words in which
can bring about positive change, and man, if you could
see the world for America's Dream, where all People are
judged not by the color of their skin, but the content
of their character, the entire bushmob would be behind
bars awaiting trial for treason, and the Iraqi People
would have American Forces demanding Allawi be arrested
for failing to explain himself regarding the needless
bombing of our Humanity in Samarra and Falluja.

--

SEE BUSHITE, KILL IT FOR GOD'S AMERICA

/ / Another humiliating proposal, which even triggered
debate among Marine officers in control of the city, is
to force all Fallujan men to work in military-style
battalions, reported the Globe. \ \

This is the best the ENEMY bushite could dream up in
all possible worlds?

/ / His company of tanks and Bradley Fighting Vehicles
had roamed the eastern third of the city [Falluja] for
13 days, shooting holes in every building that might
pose a threat, leaving behind a landscape of
half-collapsed houses and factories singed with soot. \ \

--
http://www.wsws.org/articles/2004/dec2004/iraq-d06_prn.shtml

/ / Of course, none of the assembled media pointed to
the absurdity of Bush's comments. \ \

--

http://billmon.org/archives/000172.html

/ / Bush administration official says: "Saddam never
had WMDs, and we never said he did." \ \

--

/ / Goldsborough said the reason he was given after the fact is that the column, about why Jewish voters overwhelmingly cast their presidential ballots for John Kerry, was "offensive."

"The publisher said it might be offensive. To whom? \ \

--

/ / twenty-seven Israeli pilots indicated that they would no longer fly missions in the Occupied Territories (Boston Globe). The pilots said "We veteran and active duty pilots are against carrying out illegal and immoral attacks" and they "refuse to continue attacking innocent civilians." \ \

--

KILL ENEMY BUSHITE FOR OUR LIVING LOVING GOD MAN

/ / They should put dynamite in their behinds and drop them from 35,000 feet, the whole pack of scum out of that jail."

Remember, these are the same prisoners that the Red Cross estimates 70 to 90% of them were innocent and later released. \ \

--

/ / It gets worse. We already knew about the Franklin County, Ohio, precinct that tallied 4,258 votes for Bush when only 638 people had actually voted. \ \

--

See? The bushite knows that bush murdered thousands of Americans on 9/11, yet, will advocate fascism, to censor America, from finding the truth for ourselves.

That enemy of God, the demon anti-Christ told US the conflict he began, was because Saddam wouldn't let the inspectors in. While, corporate nazi whores, refused to correct ourselves on our sacrifices, for they enjoy remaining impartial, when it comes to the crimes they inflict upon our humanity. Enemies to all humanity CBC and CNN are by refusing OUR facts to speak for themselves. No betterment could be garnered, by the demon anti-Christ's war crimes against civilization, WITHOUT DOUBT. And, it's only the enemies of our dumfukked and dimmer soldiers, in corporate mind control, who refuse to allow anyone to state THAT FACT, for, the enemy bushite would be exposed, and America

would be hunting them down with the Law as the traitors
to freedom they clearly are.

the slave." \ \

--

Bush Lies to Canada

Demon bush spew "I made some decisions obviously that
some in Canada, didn't agree with. Like for example
removing Saddam Hussein, and enforcing the demands of
the UN security council."

Saddam was not found in violation of 1441, so the war
criminal anti-Christ's demands were not our world's, nor
that of the UN Security Council. How does thieving our
assets, destroying our infrastructure, and
indiscriminately murdering more than a hundred thousand
innocent people, (in turn to sacrifice more worthless
bushite nazi teens) bring about their closer fraudster
bushite "Freedom"? Again, CNN, and CBC let the demon
liar spew his hatred of our liberties, without factually
challenging his lies with our un-debatable established
truths. CNN and CBC would "sell" seeing our dimmer
youths sacrificed as bushmob thieves through blatant
bushite lies, to truly, steal our freedoms and liberty
with further murders by proxy.

/ / .. or when [bush] just told you for no reason
possible, why American soldiers are DYING, "Saddam
wouldn't let inspectors in", \ \

This should be a time when the People rise up as angels
of mercy, and hunt with Law to kill George W. Bush,
Rumsfeld, and Condoleeza Rice for the crimes committed
on 9/11. Just because the corporate T.V. doesn't
mention the facts to draw our own conclusions, doesn't
make it not so out of our realms of expertise
as Freedom's true represention.

This is Hockey

US general John Sattler declared: "We have liberated the city of Fallujah."

Sattler openly lies to the lives of America with this insult, and the bushite nazi dumfuk, is too stupid or evil to frag him as enemy proudly for it. The People of the world, look, see.. bushites are murderous liars, cheats, and thieves as the enemies of America, who even lie to THEMSELVES on how many have been sacrificed to blood the coffers of the American pension thieving war monger bushite 9/11 cancer. A liar nazi bushite commander would sacrifice his nation, along with own family, before saying a word in defence of our freedoms, our humanity, or our God. COWARDS. American nazi bushite commander gets killed american nazi bushite grunts, in dreams they too, can financially profit off the talentless continuing THEFTS for enslavement to sacrifice themselves as fascist tyrannies. Hmmm. but the nature of American freedom, is to be one as everyone being equal scores. "Gee, maybe some day even you could be Presidential."

Weak intellectually, prone to cuss, the bushite nazi dumfuk, is a worthless piece of crap.

http://bellaciao.org/en/article.php3?id_article=4591

/ / I have the impression that there are no other words except "fuck" and "shit". Each communication, each order is accompanied by a flow of 'fucks', 'shits' and 'bullshits'. I look at Americans with a pity.

Among the "colored-skin" GIs "Latinos" are largest group, then Africans and semi-Africans. The officers are mostly whites but there are also blacks... But I cannot understand at all, why the US Army soldiers speak broken English!! \ \

/ / During the five days, while the count was yet conducted, more than three thousand wounded passed through our hospital. These were the people who lived nearby. The people who could be delivered to us. Nobody knows how many people in the city are dead. \ \

/ / I cannot recognize the city. Only ten days ago it was an Iraqi town with its regular for centuries Arabic

life. Boling bazaars, noisy streets. And here I am going through the empty dead city, between the ugly "pyramids" of destroyed buildings, broken streets, whole quarters wiped from the face of earth. \ \

--

old nazi tricks

/ / The Red Crescent's Falluja coordinator, Jotiar Nafaa, estimates that between 150 and 175 families are left in the city that once had a population of 300,000. \ \

REUTERS up to their old nazi tricks again. Jotiar Nafaa, "coordinator", should surely know, that it is 175 families that had requested for the help of Red Crescent totaled several days previous, (without phones, nor abilities to leave their homes (150?)), NOT, "left in the city". [THINK: how could they possibly know? (nazi bushite whores were ordered to murder innocents indiscriminately as enemies to God)] Also, is "Jotiar Nafaa", the same woman hater, who LIED in REUTER"S anonymous hand previously, as the Red Cross, that the women held illegally as hostages by the thieving evil nazi bushite forces, didn't really exist? (and who the "sovereign" Justice system of Iraq, along with World opinion, God, and JOHNNY had demanded to be let go for lack of any real criminal charges? (despite CNN and CBC WILLFULLY refusing to report on the issue as important. (You know, INNOCENT women held hostage by bushite goons who acquiesce COWARDLY for rapists and torturers? (Just like Jew killer Ariel Sharon never gets a fair mention by "America", nor Zarqawi, as he was in the second Bigley flick, right before Samara.)))

LOOK AT THIS - LOOK AT THIS - LOOK AT THIS

Aljazeera.Net - Aid trickling in to desperate Fallujans

/ / The organisation estimates that only 150 to 175 families stayed in Falluja after the start of the US-led offensive on 8 November \ \

The organization does not estimate the incorrect fantasy conclusion held by this pro-irrational Bush article from Aljazeera.NET. By god Johnny, where tell us could such lies begin at? Well, let's go investigate... If as it is, a misrepresentation of Red Crescent's actual findings, wouldn't you think "they" would put out a press release to correct this falsehood of public claim?, to suggest 150 remain in a city the size of 300,000+?, but no greater than 175? without access for numbering by anyone, but for the only near 15,000 HUMAN

BEINGS known escaped as refugees??? Or, are the "reporters" just conveying the "facts", by putting no investment in our validity? Leaving us for further victimhood, by hiding ourselves from the war crimes the anti-Christ bushite nazi savage commanders have committed in my name, America's name, God's name? as our enemies?

Our cause as Humanity is for freedom's reign, not to sacrifice Humanity as misled bushite nazi facist teens further, so bush, condi and rummy can fi-nah-lly escape "The True Patriot's Wrath", for the crimes they committed against Freedom America on "bush win", 9/11. So... Why so do I think Justice is going to get GW, making no mistakens? Because the Patriot's Patriot is you too my sworn believer, and now that's this: America's craftier than that George Bush Jr. makes living out for, in "our"-OWN news broadcasts. As the "censored" contributors who learned our gathering skills some time ago already, I say, Freedom is paramount. Mr. bush's unbiased corporate news agenda doesn't hold America to an account before the Lord, nor to God as being, an honest spoken word, or deed of good measure. Of friendship, of kindness, of compassion and caring for our fellow human beings. I have rights too you know. As cowards, the bushite refuses to defend the innocent they rob and murder from to serve as enemies of Life, done in to die pleasing their false idol, corporate america's glorious leader, the un-elected dictator, Our Mr. bush Jr..

It should be further noted, as reported, that all aid agencies contributing have accounted for only near 15,000 families stationed in refugee camps that escaped the indiscriminate anti-Christ demon bombing campaigns. So, total deaths tolls could exceed 200,000 just for Falluja alone., what with the napalm, land mines, 1000 lb bombs, snipers, tanks, mortars, essential services, police protections, denials of foods or water, thefts, vandalism, and so on. All along with the refusal to allow the People to escape before hand, or even enter now. I've only heard that the nazi grunts will only allow the "staff" of "Red Crescent", to quickly as can be, come into the demolished city, and dispose of our corpses with bulldozers likely. You know?, any males between 15 to 50?, like their "Hero", the bush family's Hitler regime did. You tell me, would you enjoy as a True Patriot Warrior, killing a LYING enemy bushite nazi bomber, on behalf of saving yourself and family, God and Humanity? God?, that the demon anti-Christ disciples murder to steal from US as the innocent? To kill an

evil and mindless devaluating corporate bushite facist slave, is to save the untold lives of thousands of US innocent they target indiscriminately for criminal plunder. Dying as cowards too weak to defend their own country from the neo-con conspirators, they die. Die.. Get this measage out to the American forces, and stand back, cause America's gonna win this fight for freedom, or die as slaves remaining unworthy to a blind comitment of tyranny by furthering enslavement against our Human species.

Continue doubting in silence fledgling Patriot, and bushite america's war will continue refusing to speak on it's needless sacrificing through bushite criminal decree. We know, wealthy con man Art Bell, Limbaugh, and O'Really will try and refuse such truths discussed in Your America, care for the lives of sacrificing American teen soldiers are of no concern to their profit margins., so far. You, my friend, just need to try starting a demand for justice as Freedom commands. (And, if you wish, you can thank us with a small cash donation to help me escape this nearing starvation.)

I'd, as the Son of Man, (but you can call me Dad.) proudly teach, or kill godless thieving bushite to save the lives of any child, and so would the rest of Humanity likewise. There is no known fate worst, than a Mother Nature scorned, or near 7 billion People really very angry with you.

"if the USA's honor can go along with these [bushite] tactics . . then the USA is a country without honor."

And, boy, real America wouldn't take kindly to George W. Bush Jr. as understanding, the elected President has leadered the murder, of thousands of decieved Americans as the innocent, all to only steal from, as the left "officially" undefended. Hell, as the true Leader of this Free World, and holy roller god child, George W. Bush Jr. pisses me off to no end, how about you?

/ / Washington says the Falluja campaign was necessary to bring the Sunni Muslim city back under the control of the central Baghdad government ahead of planned Iraqi elections in January. \ \

Reuters up to their old nazi tricks again. It was only mindless nazi savages who indiscriminately murder good honorable people, who advocate thieving and torture, rape and murder, and the willful destruction of America, that were banned from entering the Holy city.

No evidence, so then, for what? What but to get more cowardly american marines dead, to serve soullessly further - as the stolen riches of the evil enemy demon anti-Christ, evil personified, Our Mr. bush Jr.. (the same from 9/11 fame)

http://www.truthout.org/docs_04/112604I.shtml

/ / By targeting civilians, he said, an army could advance more rapidly. ``Air-delivered terror'' effectively removes civilian obstacles. \ \

Pure, unadulterated fascist nazi evil. "Never again"? Killing un-arrested bushite (Saudi wahabbi) commanders, is like killing the enemies of America, Humanity, and Jesus' God. Do ourselves and Johnny a great big favor, when you see a loyal bushite nazi grunt, thief and murderer, imagine, "yah, that's right, that's what being a kind neighbor is all about, for Christ said so in John's Revelations." Bushite! your false Idol religion is too stupid to remain for dying spark under the anti-Christ's evil criminal dictatorship of, wannabe dumfuks. I'm Your God see, and Your coming and going. As for Royal King Johnny, he's just standing in for this time being,..' hey you!, pay no attention to anyone behind what curtain! Boo!

America is wonderful to truly believe of it as in the making. So, let's get the work done that needs doing, so God can get back to trying to enjoy some time at home. I'm here for a good time, not a long time, and the sun don't shine every day. So get off your asses, and demand some real Justice for Christ's sake. Johnny has awoken, and he's cranky they say.

Israeli Soldiers Going In For The Kill: A 13 year old Palestinian JEWISH school girl is about to die

/ / "It's a little girl. She's running defensively eastwards, a girl of about 10. She's behind the embankment, scared to death."

"Anyone who's mobile, moving in the zone, even if
it's a three-year-old, needs to be killed.

..soldiers in the company, [...] Givati Brigade,
complained that they had been "besmirched"

The soldiers said that the commander had fired
two shots at the girl from close range as she
lay on the ground.. \ \

Will all Jews join me in calling for the public World
trial of crimes against God's Humanity, done by these
truly godless fascist nazi enemies of the Holy Jewish
faith? Or, will the anti-Jewish Ariel Sharon crowd
again, march more Jews silently to their graves,
refusing to speak for the Bible's Word that all people
are created in God's loving image?

Victimizing the innocent to steal from, is not acts
becoming of a religious person or a truly "democratic"
government.

http://www.globalresearch.ca/articles/BOH411A.html

/ / But we have to be very cognizant of the fact that
the media's adamant refusal to address the very real
irregularities of the 2004 vote is a deliberate act of
psychological warfare. [...]

"if the USA's honor can go along with these tactics . .
. then the USA is a country without honor." [...]

The word 'jihad' (holy war) from which 'el moudjahid'
(fighter for the faith) derives, has always been,
because of an anti-Islamic prejudice that dates from the

Crusades, taken in the Christian West in a limited and restrictive sense. It is taken as a symbol of religious aggressiveness. This interpretation is rendered absurd by the very fact that Islam is tolerant, and the respect of religions, in particular Judaism and Christianity, is one of its fundamental precepts, something which, in fact, has been in practice over the centuries. \ \

--

/ / Ending this bloodbath is the most honorable task Americans can perform to restore progressive priorities and our respect in the world. We have passed the point for graceful exit strategies. Our policy is to go on mechanically killing people unless they vote in January for us to keep on killing people. \ \

God is Great

A person accused in our name(s) of a criminal offence, needs to be established somehow to be as such, and the only way to do that, is to present evidence that formed your/our conclusion. Without evidence our accused is ourselves as the innocent, being falsely imprisoned, tortured, or murdered. Murdered, as the Allawi and the bushite nazi forces did to our friends and family in Falluja, to please the demon liar, lawless George Bush Jr. as their central thief system of dishonor and betrayal to the human cause, Your own.

Now, when bush stated that Laden was guilty, without evidence needed to form a conclusion, or when he just told you for no reason possible, why American soldiers are DYING, "Saddam wouldn't let inspectors in", the bushmob thieves plundered in our "lost" confusion. All the while bush always seeking to close America's on-going criminal investigations, by causing even more have nots among US. So, as a free person, to side for the, bush wars America, God, and Johnny issue, you would seek out to find for Yourself beholding likewise as We all are: bush is actually super fuking evil, like personified or incarnate even, and Johnny's almost like a stranger Messianic figure who just wants to be known

as a semi-normal average GUY/god fellow. (Sheesh.. We gotta bring ourselves everywhere we go) I "hate" bush for being so not himself stupid to think there was no actual walking, talking, godly Persons from the outer-reaches coming in to get him for the crimes he has committed ourselves to. Corporate news dictate without a human presence, doesn't rule this world of communication, we do. (Jesus wasn't buying Satan's misconception.. SEE THE BIBLE AND THE KORAN CAN BOTH BE RIGHTiOUS!!..! Just ignore the misconceptions others have, and join the party!!! The Time is Now, and man, do I know how to make an entrance or what?)

A demand for Justice is our birthright as the human species struggling to survive.

We could be on good terms with the "unthinking", greatly special loving Earth as the no longer leaving ourselves to be silently victimized, and I think, we'd think, we want to live in a freedom bound for glory, not a hell hole of, ignorance is bliss, look there! your dying needlessly victimized, oh.. too late who cares your dead nonexistence. Did you say something?

Trust me America, YOU WANNA correct this George Bush Jr. problem before it becomes the "law" of the "land". Don't fear though, for, God's here, there, everywhere!!! It's you over... there! and under here.. and then... we said hello to Johnny, the miracle worker. God People, I have so many good words to tell you, and wonders that would surely boggle some senses. Our hope for a better future doesn't have to die here on a cross for the war mongering bushmob thieves, but, it's going to require You personally taking some action, be it however slight, to bring a remedy to this current, "Look People, bush thinks he has almost escaped accountability for the commitment of crimes he perpetrated on 9/11 against US interests." Strange but.. REMEMBER: people like Americans, are currently needlessly still dying for the bushmob war monger thieves., dying by only our continuing censored voices on the seriousness of our commitment to defend the rights of every free person standing; ourselves as God being victimized with these unjustly expensive, neo-con bushite terrorist campaigns against Civilization's better judgement.

God is great I know it's true, just put a little faith in yourself, and demand America soldiers fight instead to protect DYING America from the tricky, evil bushmob cabal of THIEVES. Cheney looks bad there, as does Myers, and didn't Goss have some pre-9/11 meetin' with

9/11's General Ahmad that he has still yet to answer for, or.. is it we guess, to be "legally" done in by... the Secret Order. The American good cop is all we're expecting, and all we need when dealing with the likes of a self-depreciating bushite conspirator..

We don't get to be Magnificent without you likewise. This alien world we have victimized against our better interests, is a failing spirit of Life from our vantage point. Going back before the Age of Reason, is not where I believe America wants to be taken any further, thank you, but no thanks, besides, the King of Kings is here. Johnny Wizard looking to break into prime-time with his very own Special special.

I'd have ta be one crazy mixed up loon to follow this world over with the universal principles of justice as freedom, to set course for the dreams of my trying, and you might be right. Get You to talk TRULY will, guaranteed, freak you out. REMEMBER: Mr. bush Jr. should have been arrested day one, with that fifty billion. That was before 9/11, Afghanistan, Haiti, Iraq, a few hundred thousand innocent lives, 300 billion plus a few hundred more stolen, and for what? I can only see, we needed myself as King here yesterday. I wasn't chosen for this freedom post per say, but, me and the stars had a dream one time, and it continues through out to this day, enough to say but, this is not what you read about in the manuals. Freedom to be yourself, is the freedom to dream something bigger that your wildest imaginations. I am the Son of Man, and do I have tales to tell. (I know, it sounds crazy, but it's just like a performance gimmick to increase my Q ratings. And, it seems to be somewhere working with me.. I've got a story down pat for anything if someone should ask what fear is.., now, open that curtain so we can start the show!)

I have a treat for you strange friends and friendly strangers out there. Some art work from me. Now, I used the drawing myself, for posters of different sizes, explaining in small writing some key 9/11 questions, while with maybe block letters, things like "bush is EVIL", 'did 9/11', can you hear me?, as what have you.. So, here I will offer you something I created, a Johnny Wizard pencil drawing in jpg format. Enjoy!

http://la.indymedia.org/news/2004/11/119755.php

Hmm, perhaps I'll give out other of my drawings as thankyous for fifty dollar donations? Or prints for $500! You know, they could be worth a substantial

amount of money in a few years, hmm, a real investment for your future... A wise move for the prudent investor really when you think about it. But hey, no pressure, no pressure.

Being me out to destroy bushite just sucks. I'm really not naturally so angry about what bush has done to our world all the time. My voice is getting hoarser, and I'm occasionally grunting, bad sign. I want to live like it's 1999!

Arrest for immediate trial, bush, rumsfeld and condi for the crimes of 9/11 back in New York City, and all will be well with my World,

A friend of living on for a brighter day,

Johnny Wizard

--

Truth is Telling

/ / Major-General Richard Natonski prepared his troops for the battle ahead. 'We're goin' in to raise the Eye-raqi flag above Falluja - to give it back to the Fallujans,' \ \

So, was it Major-General Richard Natonski's decision to drop 2000 lb bombs then? Was it his charge to indiscriminately shoot at US innocent, on the street, in our cars, our homes?, cause somebody's gotta pay then with their lives for lying to die the dumfuk marines, who it turns out, weren't so dumb, or hard of hearing after all. Those responsible for the bombing campaign targeting hospitals and groups of innocent people, need to be hunted down with extreme prejudice, and publicly executed on behalf of our Humanity. So too, do those who ordered the NEEDLESS bombing campaign in Samara. And, for those who have worn the American flag while willfully committing the sadistic crimes of torture and rape, we shall all join together, and hunt down as our enemies without mercy. The bushite are enemies of all our humanity, demanding we sacrifice our honor, like they have done to family and friend, and sacrifice our courage, because they refuse to defend their own flag and the freedom of which it stands, one nation, indivisible.

I will not rest until every traitor of the America I remember, is summarily executed by death sentence for the convicted war crimes Humanity and God has suffered under their heinously satanic barbarity. I HATE the

anti-Christ, and all the bushite has tolled against our better station. As I tell again, killing bushite is a godsend. They as a satanic force of evil, torturing and murdering, rob from America as they "willfully" allow the robbery of Iraqis, and they truly, rob from themselves when refusing to join US in the demands to have bush condi and rumsfeld downed for the crimes of 9/11. We also demand all stolen assets taken through the bushite mongering war privateers, returned to a legitimate Iraqi government. All done by firstly, arresting Allawi for the murderous war crimes in Samarra, and then in Falluja. Also, hunting down to kill those who forbad humanity from helping US in Falluja, or turned off the utilities, shall be tried and publicly executed for commiting war crimes against MY humanity.

Weak intellectually as fascist nazis, the slave whore bushite's commitment is to only die for as enemy. They FEAR to have to stand up for fellow thieving soldiers and say, "damn, this war is evil to the 'n degree, Jesus would surely be angry, And from what I hear, the Son of Man is pretty upset about what we enemies of God have done too, and, well.. we do not have to thoughtlessly serve under anti-Christ war crime decree any longer, as the cowardly lying chicken shits, too afraid to defend our own nation., instead, let's go bag US some enemy bushite for America's America!" We do all together want to convict those who murdered thousands in New York City, and we're definitely not combating global terrorism, by fighting a needless war against the innocent, lying to ourselves that by doing so, brings about a fair just government of "The People"., to then in turn arrest whom? American soldiers need to say, to hell with bush, and corporate professionalism, my loyalty is with Christ as a truth telling demon slayer.

For those who still continue, to sacrifice our rights to life and liberty, for a no better good deal as the bad guys, are TRAITORS to America, who are attempting to help escape bush and rumsfeld from the murder scene of 9/11. Never gonna happen. So, why should yet another, promising young man, die as a dumfuk bushite, the most hated and reprehensible nazi savage America has ever gleamed of? The indiscriminate bombing of our communities rightly gets dead, another, good for nothing, nazi soulless bushite vermin, AND RIGHTLY SO. I'd kill thieving bushite bombers to save the innocent life of anyone.. like a,.. cluster dud dropper., wouldn't you?, in all honestly, if you had the power, kill such an evil nazi betrayer to Freedom and America

who blindly targets our residential communities to
enrich the UN-AMERICAN demon anti-Christ bushite thieves
further? That, as bushite nazi grunt, they die for?
Paleeze.

America is dying to prosper their false-deity war
criminal demon anti-Christ, Our Mr. bush Jr, the same
responsible for the nine eleven travesty, who attempts
escape only through fascist americans who willfully
betray America by condoning the furthering of bushite
censorship for tyranny. Is America the cesspool of
corruption and greed, without a People person present
willing to make a stand for God and Country? BUSH IS
EVIL. Let's arrest'em, or kill'em for committing high
treason on 9/11 with condi and rumsfeld.

What do yah say?

Under the witness of every freedom loving person this
universe over, I am proclaiming, a war against the liar
George Bush Jr., the vilest contempt for mankind this
World will not stand by to be destroyed because of.

/ / claiming that the United States went to war because
Saddam wouldn't let inspectors in; the media has treated
this as not really a lie because it's so obviously
untrue. \ \

America is a coming to kill the truly evil George
Bush Jr.,

Johnny Wizard

--

The King Commands

/ / Rumsfeld replied to a direct question yesterday as
to whether he knew Zarqawi was in Fallujah with the
answer: ``I have no idea if he is there.'' \ \

So, America! there is your reason for dying America's
sons and daughters, Johnny's brothers and sisters. "No
idea" rumsfeld states while his private partners cash in
the blood checks for everything but the funeral
services. I ask sacrificing soldiers to help grant me
space to debate bush and rumsfeld on international
radio. We gotta take away Art Bell's turn off button to
thank him for all the enlightenment he has been a part
of in America, but that these life death top priority
issues of ours, he hasn't the right to censor
communication on. This is your World that I wish to
play servant of. As my subject; I promise a fight to
return Justice through freedom for all. How? By
believing in you to do as you should, demanding the
immediate arrest or execution of bush, rumsfeld, and
condi for the crimes of 9/11. Demanding the return of
all stolen Iraqi assets, made by those who personally
profited off the criminal transactions. Demand the
arrest or execution of Allawi for the bombing campaign
of Samara, along with bushite military commanders who
organized the satanic attack. Why would America do
this? To free the dying lives of their bushite nazi
whored, dying grunt savage slave population. .or
perhaps not...

/ / Joseph Bowman, a 20-year-old marine from Texas:
``We're ready to go. I'm just ready to get this done.

I want to go and kill people, so we can go home. Kill them, and go home, that's all we can do now.'' \ \

Where is home for the Joseph Bowmans? A devolving backward wasteland?, where brother kills brother for a stolen nickel? Who would want to share the same home?, street?, or community with such contempt for life and liberty? God and Johnny? Who's home does bushite Bowman SEE the joys of his humanity flourishing?, or being destroyed as the true enemy? Is that the place where the pursuit of freedom is done by sanctioning first degree murder for no reason in particular? And is that the bushite america we've all come to getting to know of these last few days through corporate news contempt for the loss of our life's love?, and God's voice? It is all up to us, You included. In battle against the evils of this world, we should start on getting back to those that did US wrong on 9/11: bush, rumsfeld, and condi., just for starters, while keeping a careful watch on those that jump to their cause for furthering tyranny.

A terrorist to target: Major Todd Desgrosseilliers

/ / US forces unleashed more than 20 air strikes and some 60 artillery rounds on Monday, said Major Todd Desgrosseilliers. [...] An AFP reporter in the Jolan district said one building in every 10 had been flattened. As US-led troops closed in on the neighborhood overnight, at least four 900-kilogram bombs were dropped in the city's northwest. \ \

What is it that the major is warring Falluja's defenders for? Is it to thieve the assets of the war torn city through the sacrifice of American boys and girls?, or is it to set up a representative government that would firstly stand demanding immediate reparations? The return of all stolen assets? (referring to the satanic bushite documents: the lawless 13303 and the, "THIEVING bushite dying soldiers stole it, so" now, G.W. can sell it privately to his no-national robber baron "Economy Plan"sters.) Would not a free and liberated Iraq demand a return of the "missing" or "lost" billions through the humanitarian Iraqi Development Funds? The practice of human rights law? Criminal investigations? World wide Public arrests or executions of the rapists and torturers, along with the war crime commanders?, who mostly command from sunny Florida as pension thieves, and the lucrative Halliburton billionaire war pressure lobbyists?., For all together as represented, we instead (they claim) advocate the mistreatment of US innocents

in Your name. Sacrificed? Why do you let them get away with that? How about instead my friends, for Christ's sake, we decide together to go after the criminals? Allawi must pay with his remaining life for the needless bombing of Samara that got many an American soldier KILLED for nothing. Nothing. Died for nothing, but to sacrifice more of America to the war crimer bushite, the lawless demon anti-Christ's followers of evil personified., the most popular Presidente' ever all-act-dud. .!!.

Yeah yeah, bush and rumsfeld did 9/11, but did you know the Pentagon has not so mysteriously misplaced near 3 trillion dollars?, that a couple few claim was forever lost? Shucks? And did you know, it is the Treasury Department that loaned the Federal Reserve American currency to begin with, not the other way around, when they in turn, lent it back to ourselves.., at private interest. Whoms? Hmm... a quest for answers to the name on the bill We Trust?

At the same time while we're all parting, we got like, American soldiers indiscriminately murdering people. That isn't an accusation I make against the nazi bushite, they freely confess it. and for what purpose? They say, "we'll kill more than them that they'll kill of US"

Yeah but, why bomb ANYBODY? Why do you have to sacrifice American soldier's lives for no greater good? What benefit does it bring to the DYING bushite grunts who are ordered to stick around and try to placate hostilities with "good" intentions? as within the sites of Humanity - as enemies to US all? Will the commanders argue from sunny Florida, that yeah but, we killed more of them, than them of US. And.. they are who? ordering the commitment to indiscriminate murder? as the bad guys?. The bushites bombed, the willing to placate Samarra, to only get killed, more American Marines. And for what but the few bucks wasted on the ammo?.. to get killed more "uncounted" Marines naturally., for the bushites are waging to make a real killing on this American sacrifice. Look, we can sit down with each arrested bushite individually, talk to them about wether they are personally committed to thieving further from America, all to die benefitting the likes of an Enron, and those that thought they'd get away from the crime scene of 9/11; before deciding ultimately, wether the born again have any real hope left. The bushites are enemies to God, Amnerica, Johnny, and themselves truly dying US for. We can see

how easy the manipulation of the American soldier's mind is, they have no ability to rationalize while speaking, and as a consequence, have no understanding of their bad-faith based satanic system. George W. Bush Jr. threatens the grunt soldier to always fear what they don't understand, like, the wisdom contained within the American Constitution, or the dreaded, free to speak any mind Internet. Terrified of growing up like real men do to make their own decisions in this big world, the bushite nurse instead on the teat of sadomasochism, as bushwhore nazi dumfuk slaves. Dying brain dead limp as noodles mushing. And why? All because Americans don't want to trouble American Talk radio with our freedoms. I again challenge Art Bell, Limbaugh and O'Really to a three hour debate entitled, "Wizard's War of Words: A Super Duper Special" all about their un-worthiness to censor our screams for Justice.

Joy to the world, or more misery and suffering under the demon anti-Christ, Our lawlessly evil Mr. bush Jr.? It is up to you really. Where do you want to go? Up, or down? You decide, but don't wait until forever never coming; these times demand for the victim, some real accountability. It is the power of our nature to being, that demands a call to arms against the war crime instigating, nine eleven perpetrators. Military commanders who don't support the arrest or execution of said individuals: bush, rumsfeld, and condi, are traitors guilty of mutiny.

/ / because having photographers or reporters present could have interfered with the count \ \

What we do now is accuse ES&S, along with Diebold of falsifying the election, then when they're pressed to prove "their" findings, they'll tell US, they can't, no ballot trail. Their convictions on our accuracy is misplaced. Pen and paper with ballots secured in locked boxes that never leave public scrutiny is the answer. Those who deny US that privilege, are enemies of freedom and democracy, wether they know it or not.

What for you say?, up for a challenge?

Your, coming to town, lovable loyal American King,

Johnny Wizard

--

http://www.awesomelibrary.org/Classroom/Social_Studies/Government/Fraud_in_Voting.html

/ / But not until Friday did they begin to spill into the more conventional news media. That's when the Cincinnati Enquirer reported that officials in Warren County, Ohio, had "elocked down" its administration building to prevent anybody from observing the vote count there.

Suspicious enough on the face of it, the decision got more dubious still when County Commissioners confirmed that they were acting on the advice of their Emergency Services Director, Frank Young. Mr. Young had explained that he had been advised by the federal government to implement the measures for the sake of Homeland Security. \ \

MSNBC Covers Voting Problems

/ / He said that there were 90,000 more votes cast in Ohio than registered voters

He said that all the irregularities in Florida and Ohio have happened in counties using non-paper-trail e-voting from the companies run by Bush's friends. \ \

--

/ / Meanwhile, the U.S. continued its targeting of medical facilities in the city. A makeshift clinic that is serving as the main first-aid facility was bombed this morning after U.S. and Iraqi forces took over Fallujah General Hospital early Monday. \ \

--

Praise Jesus! I killed ten lawless bushite disciples of the demon anti-Christ today, and I'm just getting started.. Praise Jesus!

/ / Here is a city, surrounded and cut off, whose male population between the ages of 15 and 50 faces being ``put to the sword'' by the US military, and no one in the media can stir himself to raise an objection. \ \

We all can only hope and pray all US Godly innocent people will wake up, and starta' hunting bushite to the ends of this Earth. There is no pleasure greater, than destroying fascist nazi bushite grunts, to save the lives of the innocent they target for pillage and murder. Enemies of America are the cowardly and soulless disciples of the demon tyrant anti-Christ, Our evil Mr. bush Jr.. Disciples of evil who war God as our enemies in attempt to escape bush, condi, and rumsfeld for the crimes of nine eleven. No dice, for Johnny's now, truly coming around like some kinda godly

American Man of Virtues most can not even begin to understand. Don't be afraid my brothers and sisters, unless of course you're a bushite, for as a Christ Crusader I'll kill you myself, before allowing you to murder another innocent soul in My name. "Death to the bushite instead of our good friends and family", is our King's reply. Bushite commanders responsible for ordering the irrational bombing campaigns in Iraq, (to steal profit for rumsfeld's partners, while sacrificing weak and stupid American teens in the process,) such as in Samarra and Falluja, I am now offering a ten million dollar bounty on, per. If your organization bags three or more, before December 25th, there will be an extra something under the Christmas tree this year.

Do you Love me now as the Son of Man you'll ever know?

King Johnny Wizard

P.S.

(to steal profit for rumsfeld's partners, while sacrificing weak and stupid American teens in the process,)

See? Evil bushite kill "other" bushite to steal our freedoms and money, and US true freedom fighters would kill'em too to defend our innocent families. Like I said, un-principled nazi facist savages is the un-American enemy bushite without contention but for lifeless corporate censorship on our core values. Demand our voices be heard, or die not trying to do any greater. I'm serious this time.

God bless America - Now, let's arrest or kill US some enemy bushite, what do you say People?

--

/ / "I have no other choice but to resort to extreme measures to protect the Iraqi people from these killers and to liberate residents of Fallujah so they can return to their homes." \ \

American Patriot Warriors, kill Allawi as our number one, Iraqi People killer. Thanks in advance my friend.

The biggest most best Johnny Wizard international broadcast ever! Don't wait! Get your own copy today! While supplies last...

In Fallujah, U.S. Declares War on Hospitals, Ambulances
http://newstandardnews.net/content/index.cfm/items/1208

snpd

Or, is it another of those, why bother-who cares?-fifth degree felony things?

--

/ / Despite this, the Bush administration denies any responsibility for the missing explosives. \ \

Nor for sabotaging the ORHA for franks and rumsfeld to rob the pro-Iraqi central bank. It's just more American deaths as dumfuk sacrifices for the evil anti-Christ, like bush and rumsfeld committed as stolen from America on 9/11. Who cares about America Limbaugh would quietly trumpet, he's making a killing like Art Bell and O'Reilly do, keeping US masses PORTRAYED uninformed and ignorant beyond belief. Did you hear? Mr. bush is the most popular President ever ellected!

--

/ / Not one "chicken hawk" or a clique of shirkers, but an entire platoon of seventeen soldiers decided to face arrest rather than die needlessly because THE MAN doesn't support our troops. \ \

/ / stupid people prefer President George W Bush over Senator John Kerry by a 4-to-1 margin \ \

--

Getting Started

<http://www.yubanet.com/artman/publish/article_14748.shtml>

/ / ..a call for immediate inquiry into evidence that suggests high-level government officials may have deliberately allowed the September 11th attacks to occur. \ \

I would suggest all living American medias to join the 911 Truth Statement, then, if we did that, America might settle her own affairs, and I could then just center on my upcoming "Wizard's World Wide Wonder Tour" plans currently in the finishing stages. This great World is yours, treat yourself well. A National radio program is just waiting for your call on what you know now about freedom.

/ / So, at the time of the invasion, the Iraqi government had already disclosed and disarmed, and was thereby in compliance with the major provisions of UN

Security Council resolution 1441, to which Bush refers in this quote. Diplomacy had, in fact, worked. \ \

Demon bush spew "Saddam Hussein would still be in power, he would control all those weapons and explosives, and could share them with our terrorist enemies."

Yet, it was rummy and tommy franks who TREASONOUSLY threw out the State Department's semi-thought through ORHA plan of, securing the weapon sites and preventing anarchy, and, it was the IAEA that had tabs on the weapons before the bush demon kicked them out irrationally. Done so to instigate looting and the deaths of American soldiers, all so to allow traitor franks and company to rob the public bank of uncounted billions, along with the museum. See? bushite would truly get the dumfuk cowardly bushite killed for a stolen dollar, and US real men would kill bushite too, as so would this eternal Universe, done so to protect our loving innocent families. Being a bushite disciple of the evil anti-Christ, is something all wish hardship and death for instead of the innocent they, un-apologetically, as enemies of God, openly target for rape, pillage, and murder. Johnny Wizard pays ten cents for every bushite tagged and bagged, ten cents. And, an even share of at least 3 billion to those who kill the bushite commanders responsible for the criminal bombing of Samara. Hint: You kill the individuals who ordered the bombing MURDER campaigns of Samara, then stand up proud to our media as a real American soldier should or would, and say yeah, I killed the nazi bushite traitors as a true Patriot Warrior to protect my fellow brothers and sisters. (Optional close: "All hail Johnny!) Do that, and I promise you'll get what coming to you: all the riches this world of God's can afford., But don't, as bushite nazi soldier grunt, and likely die sacrificed as a coward and a traitor to the Human cause of liberty and Justice for US all. WARRING military corporate commanders that don't support the arrest of those responsible for 9/11, or the return of all stolen assets taken through the neo-con's war crime actions, we should all just frag for America.., what do you say Patriot(s)?

/ / Marine Colonel Michael Schupp dismissed the sputtering dialogue as a sham. "The negotiations are a ruse. They are just stalling for time," he told reporters near Falluja. \ \

What negotiations? Allawi has repeatedly informed American soldiers he has no evidence whatsoever, establishing his therefor, FALSE allegations. Mr.

bremer's Zarqawi moves freely throughout Iraq, including the green zone. Question: When all those children were targeted for murder, by what was reported at the scene with remote controls in one truck and under the street, why would Zarqari take credit for it even if he was truly responsible? And so on..? I think Michael Schupp is a fuk up dumfuk, who thieves from America for bush, and who clearly doesn't have the intellect to command anyone but himself to his own rightly death. Why would Zarqawi target children, when bushite nazi grunts are all so close by coming and going?, for days at least constructing stuff?, that rumsfeld broke?, then over billed to fix for even further takings? Remember several un-arrested bushite NAZI commanders openly confesses to AMERICA in having no public objections about murdering the innocent, without even having a military objective established in some cases, but only for to sacrifice another soulless bushite grunt/slave, all so to enrich the comfy neo-con war mongers left back home in our luxuries., Luxuries from where America's very own grand parents are left un-treated as the still victimized.

What do You think People? Needlessly murder thousands upon thousands irrationally making no sense, or, return stolen Iraqi assets while arresting American enemy Iraqi People killer Allawi, along with maybe Michael Schupp while we're at it? For, who cares about what is right, just, or true is this dying world of Yours?, er.. I mean bush's. You remember, Saddam wouldn't let the inspectors in, and that was why bush took a serious look at this real world situation and decided unilaterally, what the hell, he'd start a war against our Humanity left "undefended" as an enemy to everyone. (Satan's wager, that if i Remember correctly, Christ/God refuses(d).) Evil is Our Mr. Bush Jr.. Thank Johnny we had the time to intervene finally, now eh? Spooky is not the word, but baby, we sure could be on the winning side of this evolution by revelations thing. We are it together, bound for freedom through the practice of Justice, or bound to tyranny through acts of ignorance, ignorance propped by fascist censorship regarding our news content., Censorship of our human cause for liberation.

It is up to You brothers and sisters to demand evidence a requirement to convince ourselves on who shall be deemed the free person, or be sentenced to jail without trial somewhere. Tyranny through criminal dictatorship, or democracy expressing the true will of us people? It is all up to you.

"the Trial and Conviction of Our Mr. bush Jr."

--

/ / Wednesday on the campaign trail, responding for the
first time to the Al-Qaqaa story, President Bush said
that John Kerry, in using the story as he has, was
``denigrating the actions of our troops and commanders
in the field.'' \ \

It was the actions of rummy and franks, not the
mindlessly obeying war crime instigators as iliterately
truly stupidly dying bushite dumfuk nazi grunt teen
soldiers.

--

/ / How many more thousands will have to die before God
will tell Mr. Bush to get out of Iraq? \ \

--

/ / Eighty percent of Bush supporters believe Bush wants
to participate in the treaty banning landmines. \ \

--

No Retreat, No Surrender
by Bruce Springsteen

/ / That's why "united we stand" -- that's why "one
nation indivisible" -- aren't just slogans, but they
need to remain guiding principles of our public policy. \ \

--

/ / "It is also important to note that this was the main
high explosives storage facility in Iraq, and it was
well-known through IAEA reports to the Security
Council," Fleming said. \ \

--

/ / AMY GOODMAN: So again, this top news, as many as
58,000 absentee ballots have gone missing in Broward
County, \ \

/ / Broward county commissioners had purchased the
touch-screen machines from ES&S over the objection of
Elections Supervisor Miriam Oliphant; notably, one
commissioner's campaign treasurer was an ES&S lobbyist.
Governor Bush responded to the Broward fiasco by firing
Oliphant, an African-American, for "misfeasance." \ \

/ / Garner's 90-days-to-democracy pledge ran into a hard
object: The Economy Plan's 'Annex D.' \ \

-

Oh my God!!! - Johnny Wizard talks to America nationally broacasted!

<http://la.indymedia.org/news/2004/10/118305.php>

Oh my God!!!

Get your own copy! Wow!

-

/ / Pentagon officials said a facility housing 380 tons
of (now missing) explosives "was not high on U.S.
commanders' list of sites to guard." What was high on
that list? Spokesman Scott McClellan said we had to
"make sure that the oil fields were secure." \ \

/ / 'Those ammo dumps have been looted and raided, and
kids and our young American forces are being shot at
from weapons stolen from the ammo dumps that this
president didn't think were important enough to guard,' \ \

Who cares?

/ / Roughly half of the $5 billion in reconstruction
funds distributed by the U.S.-managed Development Fund
for Iraq cannot be accounted for, according to an audit
commissioned by the United Nations. \ \

Yawn.

/ / A highly detailed program, begun years before the
tanks rolled, for imposing a new regime of low taxes on
big business, and quick sales of Iraq's banks and
bridges-in fact, "ALL state enterprises"-to foreign
operators. \ \

Big deal. To the war mongering mass murdering thieves
go the stolen spoils., as the bushite's devolving
american new century would say.

/ / The American public is told that this butchery is
part of keeping up pressure in the war on terror. All
these terrorist brides and grooms and terrorist kids
rushing round in party clothes ; all the terrorist
musicians and the terrorist wedding guests, by God, they
have to pay for 9/11 because (as millions of Americans
still believe), the Iraqis were responsible for 9/11. \ \

50 percent of Americans polled support bush, and the
vast majority of those believe Saddam Hussein was behind
the Sept. 11 terrorist attacks, and that freedom by
justice through understanding is too complicated and
wordy, ...yeah. and so corproate news control is lying
to US all, cheating everyone, including You, who cares?

Americans murdered on 9/11, and those responsible are let to go on their way. Yeah, and so what?, for Americans are absent any real Patriot warriors willing to protect their now officially perverted Amerkan flag. Look at the nazi grunt soldier's uniform, and you'll see. All bushite nazi grunts, who fight cowardly with rapists, torturers, and South African apartheid death squad goons, wear a flag reversed from the original design. The bushite attack the weak, innocent, and practically defenseless as betrayers to God, freedom and the human cause. Yeah, and so what?

/ / The administration not only doesn't admit mistakes, but also doesn't believe in accountability. \ \

But for the sacrifice of dumfuk bushite nazi grunts. Leaderless degenerates that any real human would destroy to protect their innocent families. Innocent families the bushite bombers commanding from Florida murder for no good reason but get more soulless bushite teens rightly killed, all done so to put more stolen money in the pockets of their ungodly satanic cult. Solution: hunt to kill those left un-arrested who willfully, criminally, ordered the needless bombing of Samara to get killed the bushite grunts for the further thievings of the bush backer traitors who bask in your stolen expenses.

Support calls for open dialog.

snpd

Is It Just?

/ / Is it just coincidence that 9/11 is also bush's "acceptable" reason for warring, (planned TOP SECRETLY prior by several days of 9/11, and confessed to US already as fully implemented by the Whitehouse) Afghanistan with a FALSE ALLEGATION [n o - e v i d e n c e] to heroin push, [is still leaving] ..the STOLEN American soldier pension money [...] sitting in the Cayman Islands? \ \

I guess perhaps I wasn't so clear previous, but listen: How's bush and rumsfeld's Afghan plan, gonna go down, if there is to be no surprising 9/11, nor any evidence, (not a scintilla,) gathered for public inditement against Laden for shoplifting? (No advisement from Tenent, nor Richard Clark?) Would bush start a war against life itself, by just simply stating, we don't need no evidence of our suffering?, with him demanding an innocent family to be crucified?, to save Enron? Again, bush is the for real antiChrist of all biblical

folklore, hated this entire timeless universe more over than anything else Johnny cares to mention. George bush's naked treason as an enemy of Humanity is hidden from no one. A true soulless degenerate George W. Bush is, whom is purposefully attempting to destroy Your freedom as humanity with his utter contempt for our flying fricken flag. If a person has no evidence to substantiate an allegation as personal opinion on the advocation of perpetrating senseless bushite barbarity against those understood as US innocent, then your blind faith in evil bush as bushite, not lies with your God, your nation, your family, your neighbor, OR YOURSELF, but as the willing to be sacrificed for the ungodly bushite war crimes as enemy of everyone. Listen: Jesus..., KILL BUSH INSTEAD.

Kill un-arrested bush and rumsfeld for murdering the good American People thought left undefended by corporate edict as the still unjustly dying and near forgotten, and you'll be respected by this universe as truly honorable and courageous, in these of God and Humanity's, most troubling of times under the criminal dictates of Our evil Mr. bush Jr..

Those evil brethren of the bushite clan intend, through censorship, to allow the demon bush cabal our rights to leave, but where does the brethren of the bushite clan think bush is a gonna flee himself from, eh? We, The People are a' coming to get you George W. Bush for almost escaping our police protections. For, when the bush brethren clan wake up to the plan, that they'a have'a been'a deceived, the last think anyone would want, is to be without police protection... (Can you believe, the war monger thief and liar, Our Mr. bush Jr. actually banks for Christian fundamentalism, thinking he's gonna ride them bible belting for all he's worth?)

Again, America needs to wake up, load up, and go out to freely bag US some un-American bush and rumsfeld, all to save the lives of the leaderless dumfukked bush-teens, who are prodded criminally as cowards to die for the enemy. Those who would murder innocent Americans as bushite, then further publicly advocate as enemies to freedom, the victimization of God as the innocent elsewhere, should be turned against instead, questioned, arrested granted full legal rights through public due process, or hunted down to be destroyed by US real Patriots of this world as God's great believers. I'd destroyed any un-arrested proud bushite for warring America by indiscriminately dropping toxic cluster bombs

on our friends and family, to get rightly killed more leaderless cowardly soldiers with Grand parents they leave undefended in bush's evil amerka. Who doesn't hate bushite I ask you to think as you should?

You kill bush because, we had unrestricted access to do anything bush pleased throughout Iraq, prior to sacrificing any good for nothing, cowardly bushite nazi dumfuk whore.

Now, because truly, the Iraq bushite war is illegitimately premised without any actual cause, the humans are faced with two questions that have no legitimate answer.

1: What can the ungodly and evil demon bushites do now in Iraq, that they couldn't prior to murdering one child, but for to rob from America by towing his bushwhore nazi coward soldiers to commit criminal acts to rob freedom from all of US as Humanity?

(Kill an proud to be evil bushite, and all day long you'll have the thanks of every surviving American police officer, and a nod from all the American pensioners who are promised that maybe bush's america can learn for next time while the bushites just walk away with the stolen loot laughing.)

2: What could Saddam do, that he wasn't asked for?, to stop the senseless first degree murder of our friends and family?

Saddam provided the sites where all bremer's WMD was destroyed, the documents, the personnel, and so on, but corporate america won't let the facts be delivered without their bias of, who cares neutrality. A refusal to report for American interests regarding the sacrifice of American lives for the un-arrested criminals hiding inside Enron, Dutch-Shell, five dollar a day Bechtel, or double billers, commi Halliburton. Example: soldiers could have more effectively went into Iraq unarmed to search wherever, for there were no restrictions placed upon rational behavior, but just no money for the bushites to steal from America. The proud dumbfuk bushite soldier is coward and betrayer to America and God, by not, for America's America, killing bush and rumsfeld for near escaping the murder scene of 9/11 in New York City. Instead, they attack the defenseless and innocent with cluster bombs laced with toxic waste they happily eat themselves to die as the ungodly soulless bushite traitors. You get your gun Patriot, and instead of punishing a town, city, or state, bag yourself some

individual evil bushite, and be respected by all true loyal Americans as a real freedom fighter. With the God of every religion by your side rooting you on for the home team, You'll be loved by all. At least until, we or me, can make the national news programs to communicate. Again, the management and news desk staff of CBC and CNN know, that the American FBI contend: bush's business partner, the un-arrested in retirement General Ahmad, funded Atta, the 9/11 mastermind. (While no evidence was established against bin as connected, to justify the Afghanistan war crimes. Nothing.)

CNN and CBC, in our names, are with malicious intent, refusing to allow justice to be our interest in protecting always.

snpd

New Recruit

Destroying enemy bushite is a gift to Humanity, it is saying you care for the lives of the innocent a bush bitch nazi grunt freely confesses to targeting for murder. Liars are the bushite, who steal Iraqi resources, allow racists and rapists to commit their demon crimes in America's name un-challenged, and who absent mindedly bomb the innocent without just reason given. All the while, labeling themselves, "pro-Iraqi". The mindlessly evil attack against the Turks recently with an ordered bombing campaign that actually murdered people, sighted yet another, example of the bushite's idiotic ungodly satanic barbarity against us the Humans as INNOCENT. After the carnage, the war criminalizing America into bushite commanders were advised, it would be better to pick other completely innocent families to indiscriminately murder while lying, for the demon bushite provisions come through that big ol' Turkey, and if the Middle Easterners eventually learned together of their fellow Turks who were murdered by ungodly enemy nazi forces for admittingly doing nothing worth noting, with the middle east's indirect help with essential supplies coming from somewhere in that surrounding billion man vicinity, you know, I know, we all know, "Americans" as NAZI war criminal enemy bushite, would massively die as the immediately recognizable to most everyone, and rightly too as leaderless cowardly, dumb, and real sadistic evil, dying at the hands of all US Family men. Being as bushite, the enemies to everyone, including themselves we've witnessed them already dying as nazi dumfuks who eat plutonium. Or, IED? They mean "sexy" rummy cluster dud land mine more like! (Just

where is the Middle of East anyway?) History HAS learned these lessons already, while the corporatist bushite plays US just dumb enough through malicious censorship for plunder by parasitic bushite suicide, for a bushite has no soul worth defending. See?, the committed nazi automaton bushite enemy of America soldier has no mind to know freedom for the individual. Therefor my friend, kill the evil nazi George W. bush Jr. not just for me as Johnny, but for US all man who refuse to be subjected further as only counted by the corporate dictums to pronounce "pro-American": as those that go silently rooted backing "un-accountable" rapists and torturers of the innocent, the innocent, that the bushite OPENLY rob from with American's hard earned tax dollars funding. Funding through leadership directed towards their very own self destruction. See bushite, kill bushite, at least until we are granted living access to OUR corporate dead end news media to speak FREELY for ourselves without bushite lies tying US down for furthering that demon's hellish ungodly tyranny as an enemy to all our Humanity and Royal King Johnny.

Real Americans are those of US as humanity that believe in liberty as Justice for all. Demon bushite nazi whores, don't like those principles of freedom through evidentiary findings though, for their false deity, George W. bush Jr, wouldn't be stealing from the honest hard working blokes who live for a better day that way.

The Iraqi children did nothing to deserve such awful suffering and fright and death at the hands of the enemy bushite. The bushite: who the demon anti-Christ states, are un-accountable to any rules of law in this Universe, like with his extremely foolish criminal decree, 13303. I kill mindless parasite bushite nazi enemy soldiers just for that alone as eternal defender, and I do it for to win some mercy for a real living God, who the fascist enemy bushite hold in their ungodly contempt as LIARS.

I have the backing of every real man alive on this planet, and we all know it. No voices of reason have apposed my factual claims in FREE Usenet, and Art Bell makes no attempt to defend himself as internationally painted enemy traitor, and that says a whole lot to Talk America. Why? Because Mr. Bell, the bushite propagandist, knows too, I speak and act truthfully, honorably, and righteously, while the talk radio american bushite lies, cheats and steals from America's America, that as bushite, leave undefended for criminal plunder in Your name call censored from classed

enrollment. You have just as much a right to be here as I do, and the demon bush, he ain't no better than any of US when he is "excused" for the murder of well more than a hundred thousand confessed as completely innocent people on this planet called Earth.

The fascist control bushite, don't like You to think independently for Yourself, for we independents out here make them look as stupid as they are. Thank you very much for that not so secret info.

Through the pronounced bush demon's gaffes, embarrassments, and told complete total ignorance on subjects like the science of economics, the whys of constitutional law, or when the bushite takes credit for indiscriminate killing of our families and friends while parading it's all done in bush's name for our freedom, or for 9/11, doesn't fool me, and should get you thinking about reaching for your guns too, for bushite rapists and torturers will not walk this world freely un-accountable, for as long as we remain alive to hunt them down and kill them if so be. As the soulless disciples of the enemy anti-Christ, Our Mr. bush Jr., their "officially" granted legal immunity from all prosecution means nothing to me as a honorable man defending my humanity, or as living Creator, who brought all into this new world to be free, and can just as soon, take you all nazi bushite out the old school way.

REMEMBER: Demon bush is stupid, yaw, but he knows that he and rumsfeld with condi planned and carried out the crimes of 9/11 with likely cheney orchestrating, don't ever forget that part when attempting assessment how good four more years in going to do for the state of freedom in Your dying world. Serious this situation truly is for everyone. Everyone.

Now, what are You going to do about this, DEMON George W. bush Jr. actually playing US like he would like to continue victimizing our dying world as ENEMY for four more years towards furthering lawless tyranny? Don't we already have it bad enough, that corporate journalists think there is actually some merit to George bush's re-election bid? Especially after that 9/11 thang? Then there is the needless criminal wars, fraught with embarrassing massive billion dollar criminal frauds as .oops, more government fuk ups? Then of course all the bushite thefts. I did a Internet Google search of "Tiger Team" and I found next to nothing in all the professional media corporate news outlets we have advertising on our information service providers top

notched list as best sourced material. And that should say as much or more to you too, about who's really conning who. So, who cares about where this world is going? I do, and so should you too.

snpd

Again, none of any words world wide bare contention against the facts we've brought to our attention. The traitors to America, Our Mr. bush Jr. and rotten rumsfeld don't mention the willingness of American Soldiers to aprehend general Ahmad as the principle terrorist funder of Atta, because this general is also responsible for developing the bushmob strategy of killing Americans in New York City from Washington. A strategy of blaming bin Laden without any evidence to bomb Afghanistan for Enron. (The Dahbol Working Group.) Then closing criminal investigations, as it's not important to know who personally was responsible for the insider trades, or the contacting of only Odigo. Never mentioned by CNN as top priority to American soldier concerns, who are expected by Blitzer and Hemmer to throw away their lives in sacrifice unthinking to bush, america's false deity, super evil anti-Christ. While bush and cheney threaten to murder more dumb Americans who would dare to articulate the demand for Justice as our own, like Laden has, while demanding American Patriots coware in fear of the sadistic savage mass murdering death squad leader, tommy franks, or the anti-Christ going out to kill their family too as not represented by corporate policy, while American soldier families are continually disrespected as unworthy. (Generally, they are pretty damn stoopid, but certainly, if they're not knowingly commiting first degree murders for the anti-Christ as pure nazi filth, they should be allowed to learn, instead of having their own undefended families robbed then slaughtered for American traitor, nazi puke terrorist, tommy franks, or for Monsanto's rotten rumsfeld. Do you notice corporate America continues to show outdated footage of those two demons standing near smiling armed American soldiers, who as a mass of dumfuks, aren't intelligent enough to destroy them instantly as established ememies of America as terrorists? Well, that is going to change. I have yet to find ANY American Soldier who is literate, who disagrees WE have some very important questions that need immediate answers before the bushmob murders more Americans in Our name. See for yourself through Google if you don't believe in Christ as the Redeemer.

As for the doubting American Soldier, LOOK, CNN will continue as cult members in their dying madness of just even lamer excuses, to convince US, we are alone in our concerns for Freedom as Justice instills for US all. This moment of History requires you to stand strong for only yourself to be represented truly among the stars. Evil stupid people can't make heads or tails of this, but, as evil bush does truly from his dark shallow existence, will continue by open piracy, to publicly advocate in Our names the further robbing and murder of your own family American Patriot, so too, will more american nazi dumfuks die to the tune of their own cowardice to protect themselves as garnered fairly. This is why rotten rumsfeld forbids the death tally of American soldiers to be made public to the ready for enlistment as the too dumb to know better. Life is life, and sorry to say american dumfuks, Christ on the cross is you too as a true dying American Patriot, and your already politically sitting in the position of hatred and injustice against Humanity, and myself honestly as.. THE SON OF MAN! (The god of God's life/death guy, with a score to settle on behalf of the infinite Universe and True brave Soldiers everywhere. KILL AMERICAN COP KILLER BUSH NOW BEFORE HE MURDERS MORE IN OUR NAME AS THE INNOCENT COWARDS!)

CNN is not interested in working for American interests by asking why, as there is little of any money in just doing good for your neighbor, like saving a living, as we would wish to be helped for ourselves, if we were bound just the same to be equals at being. Mr. Blitzer and Bill Hemmer, as americans, wouldn't give a dollar of your time, to speak on human rights to be of their own concern, (they're rich!) or to save the life of an innocent poor victim, if it meant they would therefor, be compelled to honestly report on their false deity bush, the super evil criminal to ourselves as Humanity, the unelected dictator, American cop killing anti-Christ in person!, that they so leave to see Americans sacrificed as ignored to be robbed from as their profit margin increases. Do less for America, The People, and get payed more in collateral damages paid for by doubting Patriots, too slow to stand for the American flag in protection for their own living as lost to the wind. Mr. bush, tommy, rumsfeld, cheney and blair give no evidence, but for to show themselves as the criminals who openly harbor terrorist activity against our communities, and WE, as Humanity, according to CNN, are expected to go out and kill our friends in cowardice, instead of standing up to destroy the demon bush instead to save our own selves.

God, or no God, I hate that murderer bush as much as any
real man would to care for his own life as family.

Hello,
At the end of February I will be getting in a shippment of custom
leather cases for Uniden BC246T Scanner.
I am not sure how many will be on hand (10-20) or what the price will be
as yet but am guessing around the $25 range plus shipping. If anyone is
interested in one please let me know and I can put one on hold for you.
If you are interested I have a few pictures of the case that I can
e-mail you.
It's the same type of case that I have been selling for the Pro-96,95,93
A very nice quality leather.
Please only e-mail me at electonicdeals@dccnet.com
Thank you -Russ

Ahh.. Thank you. Is Combat Air Patrol the organizations 'name'?

Googling Combat Air Patrol brings up a number of references to a few
flight sims, etc.

And now knowing the above of what you mentioned, I see a few
references to Combat Air Patrol missions of the Air Force, but not
that the organization is called CAP.

Thanks... interesting reading.

Auction Link:
http://makeashorterlink.com/?S3C62307A
http://cgi.ebay.co.uk/ws/eBayISAPI.dll?ViewItem&item=5750759501

This VR500 has had very little use as a station monitor. This is the UK spec radio with no band
gaps.

It is supplied in the box and will be bagged up as it came when new. All manuals and parts are
supplied. This is being sold reluctantly asit is so rarely used I can't justify keeping it.

If you have any questions contact me by Ebay or call on 07017 41 41 31. Located near Edinburgh in
Scotland.

Bid price will include UK postage and Packing. Willing to ship internationally at cost price.

Check this web site for details of the radio: http://www.javiation.co.uk/vr-500.html

[This followup was posted to rec.radio.scanner and a copy was sent to the cited author.]

I want to purchase a copy of WinScanRS for a Radio Shack Pro-2052.

The software by Pozilla seems to have been discontinued at all of the on-line distributers I have checked. I submitted a query a week ago on the the Pozilla Web site (http://www.pozillatech.com/scanners.html), but have received no response.

Can anyone help me?

-- Bill Martin --

I have two wireless phones and NO scanner can receive one is a frequency hopper, using digital modulation that covers all of the 902-928 MHz band five times a second, and the other one is a spreadsprectrum system, sounds like noise when received on a analog receiver in the wide or narrow band mode. In other words forget about receiving it.

Secure unless someone has a base station that uses an identical chipset
and forces it into receive mode. This does require some tinkering, but
it can be done. Don't kid yourself, the FHSS and DSSS technology used by
cordless phone manufacturers are not designed for security, they are
just basic chipsets with a minimum of support components. And the
advertised 64 bazillion security codes have nothing to do with the
sequence, it's only for the off hook negotiation (aka: line seizure) and
ring triggering on an inbound call. Remember, a lot of those SS units
still have a 'channel' button, and there's only 10 to 25 'channels' on
these things. That would point to a limit of 10 to 25 spread patterns.
Splurge the $19 at Target and buy a popular unit and dig into it,
there's not a lot in there.

They're the last ones to call for an authorititive answer --
they'll tell you what they want you to do.

While policy does not have the force of law -- as in they
might not be able to have you arrested and tried for it -- they might
be able to deny you the use of the transit facility.

Many places have policies which will not stand up to a legal
challenge. Most obvious is the kind of thing where a drycleaner posts
a sign saying they can sell yor unclaimed garments for coste after
thirty days. In fact, most jurisdictions specify ninety days. If they
sell your stuff before ninety days, you can sue them for the value of
the clothes and prevail. They will point to the sign just to scare you
from making a claim, hence the name "in terrorem" clause.

Sounds like Pozilla alright. I had a problem trying to get their demo to
work (it kept freezing up) several years ago and never could get any
response from them. At one time Grove sold Winscan, don't know if they still
have it or not. RM ~

Now THAT would be a miracle!!

How long did it take Uniden to finally stop using awful battery packs in
their handhelds? I'll be dead by the time they get a handheld that has
really decent RF performance.

Yes it was, and you are correct; no consumer grade scanner has any chance of rendering intelligible signals from a DSSS nor FHSS cordless phone.

[On a side note: There are some high end units (most AOR scanners, or some Alinco units, for example) that will receive wideband and narrowband F3 transmissions. In my experience, most RatShack stuff gets pretty deaf as you approach 1Ghz. The same goes for the Alinco DJ-X10, at 1Ghz and above it's more or less useless, at 1.4Ghz, forget it, the input sensitivity approaches the one volt mark. Nice scanner for the lower bands, lots of useful features, but practically useless in the Ghz range.]

>My point is a scanner would not pick them up this was the topic.

2.4 GHz phones probably more commonly use digital modulation.

When I was at Best Buy recently, they had a LOT of different me of 2.4 GHZ corless phones. and everyone of them was analog!!!!!!

they even speciicy said analog on the actual boxes and signs.

The one 2.4 GHZ model they had that did say "digital" turned out to be analog. The stated "digital" was referring to the built-in answering system being digital, not the regular converstations.

I did see a few digital 2.4 GHZ cordless phones at Wal-Mart, but even most of the 2.4 GHZ ones there were analog.

so most 2.4ghz models are indeed analog.

Now the 5 GHZ cordless phones I've seen both places (I think 5.8 GHZ, although I might be off on frequency on these ones) did indeed say digital on almost everyone of them I saw if not on everyone I saw.

I must live in an area where they only sell WFM phones then... About a year ago, when I did some listening in, there were VERY FEW, (like maybe 2) that I could actually receive, the rest were unintelligable as they were in WFM (Over 95% I'd guess). You must live in one of those "odd-ball" areas that only sell NFM analog 900Mhz phones. Good for you.
---

where I am, most of the 900 MHZ cordless phones are narrow FM. And his area seems to be the same.

So I would say that it's your area that seems to be the oddball area, selling mostly 900 MHZ cordles phoes that are wide FM.

And I have lived a number of places, so far.

What FAQ??
Every scanner that I have has WFM - and I do not own trunking scanners - some of my scanners have been cheap arsed pieces of shite, some are good quality, but all have had WFM.
---
whee I am, the only trunking scanners I have seen for sale do not have WFM at all.

My new scanner that does not do trunk tracking at all does have WFM.

So I have to agree with you

use your scanner wherever and whenever you damn well want to, and use it for whatever you want to. How are they going to know?
---
hmmm... If I modify my AM/FM broadcast band car radio by changing the frequency by unwinding or winding the coil or however you change frequencies on the radio, to change the 88 to 108 MHZ to soewhere between 148 and 160 MHZ, can I sit at MCDonald's with my car windows open and listen to the Burger King frequencies without geting in trouble?

It wouldn't really count as a scanner. Just a car radio covering that frequency.

On the other hand, maybe it would countt as a scanner since it has a "scan" button on it.

Okay, I don't really know anything about how to change frequencies on a radio. (well, I don't know much about it).

My point is still be careful when listening. and careful about how and where you use it. In other words, use common sense.

Wideband Receivers DON'T COUNT. They are NOT "regular" scanners; matter of fact, they are not scanners at all... There's a difference, but apparently you're just too stupid to notice.
---

tell the police and judge that when they arrest you for listening to a scanner in a motor vehicle in a state that doesn't allow scanners in motor vehicles.

the official legal definition of a scanner is a device that scans 4 or more channels between 30 MHZ and (I think 1200 MHZ).

The definition also describes the speed at which it has to scan to be counted or not counted as a scanner. I couldn't remember the actual rate speed.

The legal definition of what is and isn't a scanner is the same for the whole country.

What you count as not a scanner, a policeman or judge who checks the actual laws will most likely find that what you count as not a scanner is indeed a scanner.

871. Re: Broadcast FM SCA subcarriers

Cannot be done with sound card or software. These are subcarrier s in the FM signal. One has to tap the receiver after the demodulator and send through a separate LF FM receiver ("adapters"_. Note that there are legalities to consider in the US.
---

hmm.... new question I'm now wondering about after reading the above.

Does this mean that any audio tape I recorded years ago of regular FM stations that happened to broadcast subcarriers also have the subcarrriers recorded on my old tapes????

And if I was able to buy an SCA decoder, I would be able to hear these old SCA transmissions when listening to my old audio tapes?

or would my old audio tapes only have the regular FM station information recorded on them, even though the FM station was broadcasting a subcarrier that I was unaware of at the time?

---

strange. I've seen SCA decoers at legal ham radio stores just last year (2004),

and the hams say that hams never do anything illegal. That hams always obey the law.

Thereforem how can it be illegal if hams never do anything illegal and sell them to customers at legitimate stores?

No. It is certain that your recordings recorded frequencies of centered at
67 and 92 kHz where SCA is centered. Audio frequencies stop at about 18 kHz
and your recording do also as did the audio output of your receiver.

On the other hand, an old Beta video recorder could be modified and hooked
to the FM demodulator to do what you describe.

> or would my old audio tapes only have the regular FM station information

Listening to SCA has nothing to do with ham radio.

And also, selling the equipment is not a legal thing. If is what a person does with it that involves legalities. You can buy SCA decoders, but you can legally only listen to what you have permission to do nmaking some purchases for legal purposes. Yes, there is a reallity gap--some laws are simply stupid.

Similarly you used to be able to buy scanners that could receive cell phones. It was illegal though to do that.

Hey guys,
Need a little clarification regarding the use of scanners in cars in Florida. This is clear to me:

1) You cannot install a scanner in your car.
2) "Install" has been determined by the state attorney general to mean a radio using power from the car and/or connected to an external antenna. Meaning of course, handhelds with a rubber duck are fine as long as they run on internal batteries.

Here is where I'm not sure..... There are a few exceptions to the above law, one if which is for licensed Amateur (HAM) radio operators. Does this exception mean a HAM can install a scanner? Or does it mean the HAM can have a transceiver which also receives police frequencies (but doesn't transmit on them of course?)

Thanks for any input!

Source record: 14890
Cross-posted to: alt.radio.scanner,rec.radio.amateur.equipment,rec.radio.scanner

Unfortunately, many of the scanners have been not so hot.....if it wasn't a case of front end overload, it was a case of reciprocal mixing as a result of the poor phase noise from the synthesizers. The Regency MX7000 was an example of a poorly executed receiver. The Yaesu VR5000 is a joke.....I hooked it up to one of my RF generators (Boonton 103D), and this receiver was driven into RF clipping at only 50mV. At a 20mV RF level, I could hear the signal at plus or minus 150kHz. For the record, the generator has a phase noise characteristic of -140dBc @ 10kHz offset. Low noise unit, suitable for avionics applications. The Icom R100 and the AOR2002 weren't bad units.....these radios used a passive doubly-balanced diode ring mixer, but unfortunately, their synthesizers' performance left a bit to be desired.
The Motorola radios seem to have the best front ends, at least in this country. There are some overseas suppliers that make good equipment, but unfortunately, these units are aimed at the land mobile community.
I did pick up the BC896, and for a cheap radio, it isn't bad. They appear to have added another 30dB of gain to the AM I.F. strip, so at least, airband performance is better.
Oh, and intermod isn't a problem limited to ghetto areas. It depends on how well the radio was designed.

Pete

You're correct that the audo tapes would only have audio information, but the SCA information is also in the baseband signal except that it's outside the audio bandwidth that the tape recorder would have recorded due to AF filtering in an ordinary FM receiver. As I understand it, the SCA information is filtered from the demodulated signal before it is sent through the AF filter normally used for the audio output of the "main" (primary carrier) baseband signal.

It is filtered out by the Stereo demultiplexer before it gets to any audio stage. To receive SCA, you will need to tap into the receiver after the product detector (discriminator, pll, whatever) and before it goes to the demux.

An SCA receiver is effectivily a 67khz receiver plugged into your 100MHz receiver.

There is a LOT of info out there from people doing the same mod for the purpose of receiving data/pager transmissions. Search under " discriminator tap" and see what comes up.

It means that a ham can have a scanner if the Florida law exempts him
from the law. There is a federal premption for hams under federal law,
but the wording discusses the fact that ham radio equipment can overlap
into police frequencies and not that scanning receivers are used by hams
so a lawyer could argue both sides of the coin.

Let's see. Their website is www.pozillasoft.com. Well, it used to be.
They've now moved to www.pozillatech.com/ and have changed their name
to Pozilla Technologies Corp. Why the change? Of course, they do not
offer a physical address or phone number; to contact them, you must
fill in their silly form. Their new IP 206.80.215.245, which is
registered to U S WEST Internet Services out of Denver, CO. This is
likely a dead end. If you can offer up valid contact info, please do.
I'm sure many people would like to know. I'm guessing that Pozilla
isn't in AZ anymore; they packed up and ran.

I don't know why the AZ Attorney General has not prosecuted or
whatever. Maybe they have. I don't know--I can't speak for them.
That's something that only the Attorney General's Office can answer.
If you want to know, ask them. The letter copy I have is dated April
27, 2004. The number listed on it for Consumer Information and
Complaints division is 602-542-5763. Give them a call and ask for
Pamela Crabtree. But I do know that you cannot prosecute what you
cannot find.

And I do know that ~numerous~ people have been trying to contact them
(myself included) and they never respond. Ignoring customers is bad
business. Plain and simple. No two ways about it. That's why I
recommended not using them.

Uniden Bearcat BC780XLT mobile/base Trunk TrackerIII scanner. This is
complete with box, manual, power supply, and mounting bracket.
$215.00 plus shipping.

Uniden President HR2510 10/11 meter all mode mobile radio. Complete with
box, power cable, mic and mounting bracket. $165.00 plus shipping.

7 Keynote pagers VHF and one model#D06AHC4411, not sure of exact model, but
also VHF.
All the pagers turn on and were taken of service about 2 yrs ago.
These are
all used but do turn on and activate.
They are on 152.720 and I believe 158.100 is what's marked on the
pager.
7- Keynotes A03CJB2568AA
1-D06AHC4411
The first $75.00 plus shipping takes them all.

Uniden Pro350XL 40 channel CB with scan, channel 9/19 selector,1-4 watt
selectable, and weather service receive,(WX). Comes with manual. $35.00 plus
shipping

All items are Cont. US only. USPS money orders only.

It was already forwarded. I thought it was interesting, myself. I,
also, thought that it was interesting that the only correlation that this
post had with ham radio, was the "illegal" radio, that you mentioned. :)

With the proper license, this radio is perfectly LEGAL for a ham to own and operate on 10-meters. Additionally, the ham might want to MONITOR 11-meters as well. My Kenwood gets 11-meters too, but that doesn't mean that I use it there. Any semi-intelligent ham would know that the 2510 is not type-accepted for 11-meter TRANSMIT anyway.

We used to get feces when we were cleaning our out house. What were
you eating to produce these kinds of by-products?

Latitude and longitude come in degrees, minutes, and seconds. You can
use a DD MM however there won't be a high level of precision - Think
of it as "I'm near Main and First street" v.s. "I'm at 1234 main
street".

Another thing to keep in mind is depending on the location of the
transmitter, if it's West of - I can't recall the cutoff, you may need
to append a - (dash) to the longitude. I recall the first time I got
into GPS, I punched in some coordinates I heard for a medivac call
into a online mapping website, and it came up with a point somewhere
over the ocean. Then I was told if it's West, you need to add the
dash, or depending on the application, select West.

908. Pro-96 CPU upgrade insanity

Newsgroup: rec.radio.scanner
Date: 2005-02-13 16:42:04 UTC
From: 7597243@skytel.com
Message-ID: <dZGdne99VrnEHpLfRVn-oA@comcast.com>
Source record: 14918
Cross-posted to: alt.radio.scanner,rec.radio.scanner,alt.binaries.radio-scanner

After hearing talk of a possible CPU upgrade, I first asked a couple of local stores. They had no clue. I then asked RS via the webpage. Below are a series of email exchanges I have had with them. In their defense, at least they reply. It seems as there are 8 talk groups affected by something in the current CPU. What these talkgroups and their locations are; RS is keeping a closely guarded secret. Apparently mere mortals cannot fathom the sheer complexity of them. They would not even tell me what symptoms the scanner would exhibit if one of the 8 talkgroups was received. What idiots.

Patient: Doctor I feel sick to my stomach.
Dr: Well it could be gas, or your appendix.
Patient: Which is it?
Dr.: If I told you, I'd have to tell all my patients. Wait until I take out your neighbor's appendix.

The first email is at the bottom of this post.

In order to provide boards for customers who require the upgrade, we do not provide that information. It is RadioShack's intention to FIRST update scanners for customers that live in or near analog trunking systems that use one of the involved 8 talkgroup ID codes. If RadioShack provided that information and responded to everyone's request today, we would quickly run out of boards and then not be able to update any requests from customers that need them. To better assist you with future questions, please respond to this original email with the REPLY option. Thank you, Lori RadioShack Product Support Center LN/kk

That's all very well and good, but I am still waiting for the 8 mystery talk groups. I ask again can you please tell me what they are?
RS Store POS Mail user
Your local RadioShack store can contact our Product Support group or their District Manager to arrange for the upgrade, when the upgrades are available for customers not using the ID's. To better assist you with future questions, please respond to this original email with the REPLY option. Thank you, Lori RadioShack Product Support Center LN/kk
<http://www.radioshack.com>

Sent: Sunday, February 06, 2005 9:40 AM To: RS Store POS Mail user Subject: RE: CPU upgrade PRO-96-LN
Thanks, That makes it clearer. Can you provide a list of the 8 talkgroup ID's? I don't know them. Also what part # should I reference if I should

decide to take my PRO-96 in and have the upgrade done. The local stores are not aware of this upgrade. Thanks
RS Store POS Mail user wrote: Thank you for the e-mail, We apologize for the delay in response. At the present time we are experiencing a high level of correspondence. There is currently no program in place to automatically upgrade the Pro-96 in our Fort Worth or any other facility and there are no programs planned to do so. Running changes and product enhancements are made to products all the time. Not every change is automatically applied to every existing unit and our experience and information in this instance is that the issue does not effect the vast majority of Pro-96 users. That aside, let me say that RadioShack will arrange a version 1.3 CPU update path for anyone that wants one, but first... It is RadioShack's intention to FIRST update scanners for customers that live in or near analog trunking systems that use one of the involved 8 talkgroup ID codes. These are the ONLY customers that will see a difference in the performance of the scanner from CPU version 1.2 or earlier. We have arranged a small number of boards and the cost for the update will be our minimum service fee for a scanner, $49. We are actively seeking customer contacts in these areas. We have a problem, however - if RadioShack responded to everyone's request today, we would quickly run out of boards and then not be able to update any requests from customers that need them. To our PRO-96 customers, if you monitor a system that uses one or more of the 8 talkgroup ID's, please contact us with a list of those ID's and most importantly what system they are on, your address and proximity to the system - we will verify the system's use of those TID's and your address, then contact you individually and arrange a prompt update. If you are a PRO-96 customer, but don't use one of those talkgroup ID's, you just want the update we encourage you to wait until parts are more readily available. The charge for the update will be the same minimum service fee - no penalty for just wanting the latest! To better assist you with future questions, please respond to this original email with the REPLY option. Thank you, Lori RadioShack Product Support Center LN/kk
<http://www.radioshack.com> <
_____ Customer's Question: I have heard rumors of a CPU upgrade to 1.3. Supposedly this is only done at the Ft Worth Service center. Can you provide any information on this such as part number to reference when speaking with my local store? thanks

sure you just scan between 902.000 and about 902.8000 and you can receive the base to handset nfm (+- 5khz)signal but there isnt a standard on all this and some phones have the base to handset signal out on the upper part of the band so you may want to search between 902.000 and 928.000.also most scanners have the frequency step size fixed at lets say 12.5 khz so it hard to hear the signal exactly on the right frequency and it will sound distorted.i dont know why they make scanners without a way to set the tuning freq step but they do...

You're right. 16 talk groups in 3600 analog systems only.
This link will tell you the talkgroups affected and the locations.

913. A Sad Reality: The Unaviodable Death of Scanning

Newsgroup: rec.radio.scanner
Date: 2005-02-13 22:51:46 UTC
From: "David H." <daveh@nospam.com>
Message-ID: <mrlv01dku2eeb19dv7rivorbed7t5phuhs@4ax.com>
Source record: 14924

Hello all,

Scanning has been for me, as I'm sure it has for many of you, a great and fascinating hobby over the last many years.

But with such things as digital transmission, spread spectrum and encryption techniques becoming more and more popular and widely used every day, it can really only mean one thing: recreational scanning must eventually die.

From everything I can see, it won't be long before even the most back-woods agencies will be going all digital... as many of them already have. Sure, it may take another 5 or 10 years (probably at most) to phase out all the old analog radio equipment, but phase out it will. It has to. The future of radio communication is going digital. It's now cheap and it's easy, and getting more so every day.

What are we scanner enthusiasts to do?

lamentfully,

Dave

If you want to see some real fun, wait until the 800 MHz rebanding takes
place. The channel numbering schemes, channel spacing, NPSPAC band edges
will all be affected. Kinda glad I havent invested in a trunking tracker
at this time.

You could get a ham license and create some analog transmissions of your own!!

Nah, don't be such a pessimist. As technology advances in radio communications, it's only a matter of time and patience before monitoring digital becomes just as much the norm as monitoring analog is now. Monitoring will catch up with transmitting, whether it be digital or spread spectrum or encryption. APCO capable scanners are only the beginning. Have faith, Grasshopper. Things will be better:)

Yea, the FCC is gonna send a major force to this guys house for a lousy
10 year old radio
that can do channel 19. Do you really think that the FCC has nothing
better to do??

Patty is gonna forward this to them also...
Pat probally has the new $10,000 dollar Icom to talk on channel 19...

Shouldn't be a problem if you have an amateur radio
license.....in stock form, this is a 10 Meter radio. Also,
it isn't against FCC regulations (not laws) to own a transceiver that has
this capability; it is only against those regulations if this unit is used
to transmit out of the 10 Meter band limits.

Pete

If the Longitude is west, then it will be considered to be minus (for this type of program) - likewise, southern lattitudes are entered as minus as well (the southern lattitude shouldn't be needed to often for the FCC database - one would think).

The digital era has created no problems for me since all I've listened to since 1974 is aircraft communications. Therefore, my scanning hobby is alive and well, not on the verge of death.

Living directly between the three busiest aviation hubs on earth (Atlanta, Chicago & Dallas), there's no shortage of high altitude stuff flying overhead for me to hear on a daily basis. A person doesn't need to live near an airport to listen to aircraft. Many folks may live in an ideal location to listen to the same thing I do and not even realize it. Go outside on a sunny day and look up to see what's flying above you. Each of those white streaks which crisscross our skies are all talking on the radio with air traffic controllers at an ARTCC facilitity.

There's even airline flight tracking sites like, http://flightview.com that enable a person to see where a flight is coming from, going to, flight routing and aircraft type.

Agree there, there's not only aviation - I live near one major airport
(Vancouver - YVR),and listen into aviation occaisionally but also marine.
Out here, there's lots of marine activity since there is a large vehicle
ferry fleet here, and there's always position reporting and the activity at
the terminals. Plus coastal ship operatins including cruise ships in season.
In addition, there's trains. Then there's also logging truck operations (be
sure you're not heading west on the same 14 foot wide road that a 12 foot
wide loaded logging truck is heading east!).

As far as the fire service goes, the fire service is not digitial around
here, since digital systems are costly. The only things that are digitally
encrypted are police and ambulance, but that's only in the local area.
Outside of the regional area, the police
are analogue and once one knows the matrix of RCMP channels, it's pretty
easy.

It depends on what the interests lie in listening in. As Mark here said,
there's tons of things to listen to if a person justs
looks around around.

I take my portable scanner aboard the ferry and one certainly gets a
different prespective while looking around outside around you.

Before you go jumping the gun. Do like everyone else. Use the internet
to buy them. Forget about the license. It's NOT an issue in Canada.

Just ask all the people that have one.

Hiya all (hope this isn't annoying, I haven't done it before),

I have a BRAND NEW Mobile phone jammer for sale. This is a fixed jammer which is capable of paralyzing phone signals within 20 meters.

The price of the jammer is £139.99 (plus postage charges depending on where you live).

The jammer itself can be mounted upon a wall, or ceiling, or table, wherever is necessary.

Technical Info:

AC input 100V ~ 240V AC
DC output 12V, 1000mA
Power output (Avg.) 23dB, 200mW per band (600mW Output)
Total Power Consumption 2W
Effective blocking area up to 20 metre diametre of jamming
Effective cellular system AMPS, CDMA, TDMA, GSM, PCS, DCS, iDEN, Nextel
Dimensions 100mm(W) * 100mm(L) * 30mm(H)
Weight 300g including power supply

Please either e-mail me for info and pics, or alternatively reply to this thread.

Thanks all!! :-)

says...
> What is the point of owning one of these

It's probably to stop the secret NASA satellites from downloading your
thoughts using the mobile bands as they go over. Utterly pointless of
course, as they can do it just as well using infrared laser beams from
televisions.

I just got my Uniden BC296D back from repair and thought to save others my experience.

My radio fell about five inches (it was standing on a 2-inch-thick Post-It stack on my desk which got bumped) onto the head of a small screw. The accident put a barely-perceptible little dent in the aluminum face of the radio just beneath the display, and SHATTERED the display! The radio would not even turn on.

Uniden took just under TWO MONTHS to return the radio to me after I FedExed it to them (Christmas was admittedly in the middle of that time) and charged US$60 to repair the two-month-old radio.

Unless mine was an unusual freak accident hitting precisely the wrong spot, the front panel of this radio around the display should be considered very tender. I won't likely wear it on my belt any more - the risk of bumping the fragile face into something is too high.

Hope this saves someone else the hassle.

I will argue Bush as murderer, makes my "threats" justified against his
as the guilty.
No evidence to substantiate his accusation, makes the accused an
innocent person,
straight across the board. Any laywers you know of who might provide
some insight,
or tips on warrant challenges?

--

Release the Press

In regards to Johnny's criminal charges.

Being in possession of that I know not of until it reaches my
computer, puts the onus on the distributor's server to be held in
the same regard equally. To argue for criminalizing the possession
of materials that are granted full legal rights to be propagated,
as not for sure either way then, but now that they're multiplied to
others, makes little sense. For, it only increases a problem that
will end up costing the public a great deal more to deride, if the
said material is found to be, without reasonable doubt,
objectionable from a legal framework set of criteria. Instead, in
my case, they've used every impractical assumption regarding the
content of what I may have witnessed. I am beside myself
dumfounded to learn a picture termed of a topless youth smiling, is
a sight the officers involved wish to draw me with as evidenced
pedophile. A term classified to include dehumanizing personal acts
of sexual assault against the rights of actual children. This is
unacceptable. And, I will not be found guilty of approving such
conduct. As to other depictions of cruelty I've witnessed by
information gathering, I can say without doubt to any as a seeker
of injustice, has motivated me personally as a public figure, to
take direct steps few others do in defense of the innocent. Unlike
the two officers who are my public accusers, I don't believe
indiscriminately murdering people by bombing a country brings about
protections for those involved for example, and yet, my accusers
proudly stated, they were supporters of such unprovoked, and
unwarranted ILLEGAL criminal conduct against our children left
undefended under their limited bushite haze.

Nothing will bottom this episode of my life, where as a lover of
children everywhere, and a champion for human rights around the
world, am judged not fit for freedom by a couple expert, pro-war
"liberating" bushite bombers. [they both survived serving the

military before taking up this police business as Bush supporters for lawlessness - (they PUPOSEFULLY sabotaged, the planned video recording of public evidence against Bush, that I made to the National Security Division of the RCMP in writing, and in approximately, ten separate audio recordings. [Oops...])]

The bushite bombers searched for depictions of behavior sexually impressionable readers could arguably, lose their self respect or control over, but can be found by any desperate conniver, searching in depictions of a rape scene, naked people on a beach, or in a cloud storm. So, some guide lines on how best to stop their depictions of the rights of children being breached most definitely, should be handled where the questionable material emanates, not with the quester of good taste, out looking to see what is widely, and freely, publicly available by the thousands. Again, not perceived until within the possession of the observer to witness. The classifications of all that is accepted to include in the definition of "child pornography", should not include the beauty of what it is to be nakedly human, or normally affectionate. But that is being open, honest, and beautiful, traits an advocate of tyranny through censorship will run and hide from, for they fear the private human element in our public political affairs speaking freely. Bushitism. [Think of Life, a struggling to survive for better times profiteer, and ourselves, a distant relative nobody's ever heard of till now at most.]

I've been a widely published internet psychology columnist, almost since ideas have been broadly shared as such. And my writing testifies to the subject of human rights denied, as the struggles I attempt to find, real solutions for. The artistic impressions created by the artist, like the words defined within this sentence of words, is but streaming reference points to the larger unbound projections of the manifested mind. A defined, definite conclusion on it's meaning, loses it's truer state. Recognizing the subjective relationship on communicating through media, is ultimately the reader perceiving this conclusion. It is not therefore a conclusion the reader becomes for, but is held in consideration, when creating it's over all pretext, in the form of personal insight or imagination. An imaginative state of fiction, does not preclude it from still being, a shared artistic work suspended through disbelief. I can read a fictionally exciting murder mystery, all the while knowing, the characters who suffer misfortunes, are not living worse because of me, nor to learn the reasons someone is obtusely perverse, make me then, more inclined to disrespect real living, in a similar kind. [read anything from corporate media challenger, the lover, Johnny Wizard] The actions of a character in fiction, does not compel me to give up my own belief of reality, or a respect I grant in those who protect the rights of any child, or adult for that matter. I have many written works for example from those who accolade Bush as of unprecedented prowess when it comes to believing in the holy scriptures, but come

on, who believes that make believe horror show, and how did I get to know people could be so deceived without knowing the indisputable consequence of Bush's deliberate criminal actions? The opinions I hold in reference, are not opinions I just automatically except as my own without thinking for myself in other words. If America witnessed without censorship the vicious evil bombing of God's children in Fallujah or Samara, or the torture of innocent people to death by liar Bush's satanic sadomasochists, every bushite repuglicon who voiced political support for the irrational murderous acts, would be hunted down by millions of armed America men, tried, convicted, and executed in time square, that we all know for certain without room for question.

/ / Expression that degrades or dehumanizes is harmful in and of itself as all members of society suffer when harmful attitudes are reinforced. \ \

But does the witness of such a relationship, granted only to the mind of an officer? Harmful attitudes depicted in Nazi film archives, works of fiction, or artistic expression, does not every time, have us rooting on the bad guys. For if so, police officers investigating harmful child pornography possession, would be left without an ability to even discern a care for any one. But they would and do care. We can see a need, and a honor to defend the rights of children, and I can't think of a more noble police position, to try defending those principles to the best of our ability. Not infringing on free thought access of everyone because some are arguably, more impressionable to the false view of the bushite conspirator. DISTRIBUTERS of illegal material is where the law should not be denied a place to practice. Making criminals out of what someone picks out in coffee grounds, is to say, some thoughts considered, are thoughts better left alone as forbidden when alleged thought of. That is where no god or person should be allowed to falsely determine for our selves, with what words can be thought "about", and what words can not. Of course threatening the freedom of another living individual with the law, better be based on the tangible as documented offences, otherwise, our rights wouldn't be publicly challenged for protection, but of denial. So Hammurabi came up with: A person accused of a criminal offense without any evidence is innocent, and the accuser, especially when it comes to capital crimes, is the bad guy every time. And gee, if America does that, Mr. bush Jr. could go to jail from Canada, China, or perhaps somewhere off somewhere's else where they have laws enforced against the crime of murder.

I am a behavioral psychologist, who's not only written on psychology's pillars of understanding, but also on the struggles of lawless war committed by sexually dysfunctional sadomasochists. I was interested to watch The Learning Channel's special, The Meaning of Love, a four or five part series, hosted by "The Naked Ape"'s, Desmond Morris. This world's most recognized, widely publicized

human behaviorist, reporting on juvenile properties of mutual expression between lovers, lending well into nurturing a caring relationship for each other.

Therefore, is a reader of fiction regarding adult themes, going to read all about who get their toes piggy wiggled, or the professional accountant, who at spin the bottle, becomes the lucky "loser" of a sound deserved spank or two, secretly though, underneath it all, a pedophile who thinks unclean thoughts? Examples of sexual boundaries: Is not a heterosexual, secretly gay when they play with themselves that way? Perhaps a trans cross dresser? And some men may relate to this, but man, lesbians are a dream come true. But then... well, your a guy too right?

Such normal dynamics of continuous change through development within relationships, can not be denied a place, as being mutually beneficial as human in quality, (and maybe fun,) and being, private, none of our business, almost childhood like high jinx of that moment in time. But, leaves a, any person public view of definite acceptance, intolerably immature as inappropriate across the public spectrum. Publicly get into the intricacies of private relationships with your new book why don't you with the Court now John, you have all our ears a-flutter. Grandma doesn't need to know about your proficiency at.. and I'm not the same to Dick as I am to Jane, if you catch my drift.

While two male bushite, who are now helplessly stuck appearing plastered to protect Bush from arrest for mass murder through the advocation of censorship by tyranny, could quip to us being lovey dovey, means your ripe for picking on as, the soft and mushy easy push over in the corner they see. Me? This is why bushite think allowing brave men of our communities to speak openly as would be, calmly, against the criminal dictums of the demon anti-Christ, shouldn't be allowed, because they know, the world would then recognize them for the cowardice and betrayal they hold of our human spirit. A spirit that craves for all, the end to the continuing neo-con wars with the freedom to love Life for being truly ourselves. I see life everywhere, for trying to make some happiness and prosperity. If only we would listen to reasons for believing in creating a better world where life in cherished, is a world where bombs don't drop indiscriminately from the sky in God's name left for blame by the thieving liar bushite scoundrels.

The inner world of artistic creations by story line, is a world of pretend make belief, forwarded by the observer's conclusions. I am concerned to read struggles for entertainment, to include, cruelty against anyone for sexual gratification, but all literature regarding such, does not change my respect for the rights of others, especially those of children. If anything, it makes me more concerned on how respect for another can be better served by the powers and freedom of the unshackled word.

I've seen more child pornography on the television news regarding child pornography, than I've ever mistakenly got through the internet. Providing illegal depictions for public consumption, is where the law should be exercised, but it's often not on the grounds it doesn't prosecute as many. See my point? The FBI did an expensive child porn sting, running for two years in total I think it was, and in that time, they gave away tens of thousands of images to thousands of, who knows how to copy customers, that much later, the FBI would argue were illegal to have possession of. That is like a huge wasted effort OF OURS to distribute such offenseble materials, particularly if it was sold as, "teens in action", "youthful beauty", "buttercups", "a day at the dentist", or something of some sort to entrap more crime business. For our police agencies to set exact criteria on what would constitute child pornography, and scan internet traffic for such distributors, would be far more effective in halting such proliferations. They don't largely because, they'd have to be more precise in determinations, and therefore, many would lose their jobs as then redundant. By not doing so, we can pay billions to have people arrested, labeled pedophile for witnessing depictions of God's beautiful children being normal - while then pleading guilty to avoid the public tarnish such new bite revelations would bring. Destroying families, and future job prospects of individuals such as myself, who hate the thieving, murderous, ignorant as truly ungodly bushite liars to the core of my eternal being. Currently, our legal services, can't help but learn, bush did 9/11 with General Ahmad, and are left speaking "nothing" too - in news public suits regarding the injustice they're recorded not to answer about. Instead, a couple confessed bushite, will conclude who ever witnesses depictions they suggestively reach for as inappropriate, to not possibly also, hold children, and their rights, paramount. Well, that's just simply not true. I call for the arrest of those that ran d squads against only known as innocent families including children in Afghanistan, (Tenth Mountain Division), what do the, two self confessed once blind Bush worshipping police offers, who stand as my public accusers as job requirement, have to state on that denial of our rights to cherish life and liberty? As bushite bullshiters, they don't want to answer to not presently asked public media enquiries, because being "embarrassed" sadomasochists, they then may likewise, get off on accusing community members to be pedophiles, with flimsy examples of what, in their minds, in an insult to our sworn values. Children can be beautiful, but certainly aren't, as adults, interested in being so naked, on the six o'clock news. Do they care to make a scene bigger than it first appears? Imagine me hosting the evening news and the Johnny Jamboree, hashing it out with my opponents on the tough questions, rolling with the insults and the cash offerings, while taking time to sample the world's "best" pizza an beer joints?

Or, do they adroitly believe, they'll teach that Johnny image something or two on their own behalves for our Humanity?

George W. Bush is primarily motivated ultimately with how much they can sucker out of our public coffers, thereby in spirit, advocate censorship on my calls for traitor bush's capture for 9/11.

What they are doing is this:

My "official" court case, (Involving all good people I believe) is enforcing our Law by suggesting everything in my possession can be isolated, onto itself, and made into something I'm not of entirely. All the while pretending, we ain't at all aware of Usenet servers, or my, Johnny Wizard saves the World writings of DOCUMENTED CRIMES AGAINST YOUR HUMANITY. Writings that dominate the interest of the whole investigation, locally, and internationally. But gee, without your help, two bushite "coppers" are going to appear still pressing that bush not be arrested in their contempt of silence, while praying, I not be granted a moment in my trial to speak for my own defense literally. Well, maybe not, after all, we all change with the times. My last conversation with the said two, was quite a way back when they were asked to prosecute Johnny Wizard, and likely came back with the reply, Johnny Who? So, let's not kid ourselves, my words are quite amazing when you think about it. Well, I'd hope in these last days, before this coming media flop, they've taken it amongst themselves, to get together with the loving family to discuss anyone of the hundred or two, Johnny Wizard works of the world, and conclude, George W. Bush is truly bad news to their world's view too.

Even.

Well.. how a you been doing anyway? Are not these developing story lines to be something good going live mainstream... will we demonize the principles of Christ, in censoring ourselves like the individual person of Johnny Wizard is to be, as, being denied personal freedom by "unaccountable" George W. Bush's dictatorship of tyranny through enslavement of the human species, or, will You consider the equal freedom of a telephone call, a cassette tape recording, or perhaps, photo copier to bring us around this, we want our still living rights heard too man. Right now before we alls go it to the clink. Coast to Coast should be broadcasting for America's interest, by openly discussing the still paying costs of the bushite war crime business.

America! - bush's war is something you do not want to lose to in further dying silence. Take it from me. Be a hero. Dream of the babes! - Movie deals. Lives saved!!!

Business is business.

Look you might not care for me personally, okay, but this George W. Bush's treason of nine-eleven is an evil we together, will never, be too weak to stand against as. As indecisive humans without a leader, we will never be too few from demanding Justice be served

in respect of Humanity's interest.

In nabbing those who committed treason against our America's America on 9/11, needs to be completed by firstly, following the crime scene leads at the beginning with Bush's prior 9/11 plans worked with the ring leader's financier, General Ahmad, and how Condi, rumsfeld, and Cheney with Myers, fits in the picture together as likewise traitors. The Iraq war is also a crime against humanity. All stolen monies and property must be sought, then returned to a legitimized democratic government. Torture is outlawed, and finally, all innocent people held in prisons by bushite forces, held without out charge for trial, need to be released immediately as ourselves being denied liberation truly. Let common sense prevail.

Your Kingly King of a Dreamer's dream,

seriously considering prison time to be,
a major downer for my chances at partying,

Johnny Wizard

P.S. TELL SOMEBODY!

--

[I wrote this following Psycho paper a couple years ago.]

Psychodynamic Theory

Freud suggested that there were conflicts between conscious and unconscious forces that influence our feelings, thoughts, and behaviors, theorizing that conscious thoughts only comprise a fraction of mental activity, therefor concluding we, as individuals, are psychologically, more that we can speak as understood completely. Freud used the term unconscious motivation, to address that of which we dont consciously know of as elements of personality, to offer explanation and study of what can not be stated as direct awareness of the persons living relationship to existence with our infinite nature as. To reveal these hypothesized underling forces of personality, Freud developed three techniques: Free association, dream interpretation, and analysis of, slips of the tongue. By researching these areas of experience that are not direct results from conscious abstracts, or conclusions, Freud hoped to reveal an order to causes that reflected a hidden instigation of behavior included. (Freud was secretly a theologian). Freud, naturally, considered that our personalities begin at the start of development, so emphasized childhood experience as the foundation, or framework from where our personalities would be more so dependent upon. Freud formed his theory around divided states of mind: id, ego, and superego, along with 5 psychosexual stages to help structure an understanding of our progressions through human development.

Such wrestling with Freuds ideas, brought me to consider, are our deliberate actions not based on sound judgement? If there are unconscious motivations driving our will, where does that leave principles, as we measure ourselves in honesty? When things are uncertain, do unconscious motivations, gain decisiveness on our faulting conclusions? Can some forgotten childhood experience, unknowingly convince ourselves, one plus one equals something else?

Humanistic Theories

Humanistic Theories emphasize our capacity for personal growth, development of our potential, and freedom to change our destiny. Unlike more defined branches of Psychology that seek underlining hidden forces, Humanistic theories stress self realizations are ultimately, like plans, responsible for the directions we take in personal development, and through the motivations we have as the human species. The phenomenological perspective, speaks of our individual perceptions, be they accurate or otherwise, become our reality, while the Holistic view, speaks of the individual person, being more than individual parts described through divisions of statement, but of a unique entity that is, in part, identifiable to all things mentionable. It would be then right to say, Holistic is a definition that defines its own meaning, as something more than can be completed by its own explanation. Much like dancing poetry that holds lasting truths, or a leisurely good beer on some sunny afternoon. In the field of Humanistic Theory attributed to Maslow, we concede we have desires, that are framed in a hierarchical manner, where the basics for survival are primary, while social and personal needs ascend us through greater living by open communications with the Universe as ourselves. Social Cognitive Theory

The field of Social Cognitive Theory has categorized personality development, to be attributable through three wide based assertions: Environmental factors, cognitive-personal factors, and behavior, which in turn, interact to form everything. Bandura portrayed personality's development into four main processes: developing language ability, observational learning, purposeful behavior, and self-analysis. Bandura emphasized that our cognitive thought out conclusions, is our personality development. He too however, like his predecessors, also dealt with consequences we can attribute partly to forces we are not solely consciously responsible for, and the strengths of those forces upon our outcomes. The perceptions of where we are at succeeding, Bandura argued is a balance in our beliefs in what we are capable of, and so being, brought forward the outlining term, Locus of control. Internal Locus of control is dependant on how much we believe our particular actions can control some outcome for personal reward. While the designation of an external Locus of control, is a delegation to our self on some situations, as having little ability in our world as malleable to our own command for gratification, now, or in the future somewhere. Though, it should be remembered,

our living existence with nature, wouldnt be entirely hostile to the idea of bringing ourselves enjoyment by simply only trying to better ourselves, and the threat of law winning to protect the community serves better than chaotic anarchy. Not much would ever be gained, if failed attempts were concluded as complete failures of experience. Much of Bandura is widely correct as generalized statements about the human condition, so much so, that his, Self-Efficacy construct, regarding self confidence being crucial to succeeding, is as much a reiteration of his Locus of control theorem.

Trait Theory

Trait theory is an attempt to be more scientific regarding the sometimes, ambiguous nature of getting to the absolute truth of our universal condition as individuals. Trait theory's five-factor model classifies all personality traits to be associated into five categories: openness, conscientiousness, extraversion, agreeableness, and neuroticism. (OCEAN). With the theory parsed with a fluidity for change for an individuals classification as developing, while naturally becoming more stabilized as we grow older to our vises, and conceptions of conviction on who we figure we are. The designations, OCEAN, are almost arbitrary, and are prone to relative bias for conclusions. Objectivity in assessing ones agreeableness, regarding a mathematical certainty for example, only comes from whether the person understands how to formulate the answer. Perhaps it is insecurity of suffering ridicule for being stupid, that an individual would publicly argue with his calculator at the grocery store. Or in another way, ones agreeableness, without question, could lead to doing jumping jacks in Brookland if ones not careful. Now substitute agreeableness with openness, or conscientiousness.

An attempted, conscious or otherwise, confrontation to the limits of relative fallible human reason it would appear this is heading for in the field of psychology's relationship to the categories of philosophy, theology, and the true science of measurement. It is the explanation made through the divisive qualifications of language, that fall us to the deception that we are actually aware as could be of our infinite selves, a living part of existence. In the beginning was the Word, and only some super freaky God could figure out what it meant really, maybe. I could be right, to say I may be wrong on things that are not truly separate from everything else, as effects have causes, and no living thing is separate from existing. So, to successfully compartmentalize our identity, is to include our relationship to the winds on Jupiter, and the electromagnetic properties of consciousness being also timeless in nature. (Science teaches us that.)

Genetic factors are recognized to play a significant role in trait theory, particularly when looking at the comparisons of separated

at birth twins, who not only have commonalties in appearance, but occasionally, also in experience with our physical reality, with decisions made, as once thought completely independent, have shown through in life styles, such as employment choices, or naming a pet dog, Toy. Which would beckon to theorize DNA's multi-dimensional space-time design, such as with horizontal gene transfers, to not just a blueprint to making something else, but to some never understandable living holographic relationship to all things in this universe, as intelligence ourselves.

--

for all mankind...

The EVIL anti-Christ "un-accountable to American law cos hees duh president" demon bush Jr., has ordered the commitment of mass murder in our names, while his enemy bush bitch cult following in the corporate news establishments, have refused our communities to publicly address the DOCUMENTED evidence made public by the FBI. Alleging, General Ahmad, bush's business partner, was "secretly" responsible for a wire transfer of 100,000.00 to 9/11's "ring leader" Mohamed Atta, and in addition, that the demon anti-Christ, Our Mr. bush Jr,, had a top secret CRIMINAL war plan in place, worked on with condoleeza rice, and implemented in part by General Ahmad, to criminally invade Afghanistan signed September 9th, 2001, provided to and reported on by Jim at MSNBC. All centered on not apprehending bin Laden, (prior, during, or after) as a prerequisite to guarantee invasion. (, to secure a liquefied natural gas pipeline for pension thievers Enron.) THEREBY, forbidding the apprehension of the true culprits through following the crime scene leads at the real murder scene. See, with a talk radio program we could take calls and help any others who have some difficulty in understanding the logic of reason, as super simple thinking.

So, as many know, the bush regime is FOR REAL pushing still to have me incarcerated for speaking these truths, truths that stand irrespective of my personal opinion, or spin doctoring. Will you, as a complete stranger, but a fellow lover to life, help my cause by requesting also, I be allowed to face publicly my accusers on the, censorship for bushite tyranny radio networks Coast to Coast, or CBC national radio here in Canada? Before, god forbid, a couple, once self confessed bushite "police officers" of tyranny, (death squads against school kids, happy funders of heroin pushers, and who in silence, work getting un-informed soldier teen/bushite sacrificed as the bad guys for Bush's thieving. Done all to gloriously please the fabulously wealthy, safe at home from the clutches of power, neo-con "Cabal" of enemy traitors.) get lost in the translation. The fascist corporate interests are likely not

going to factually report on my trial, but attempt to demonize me with their falsehoods and betraytals against our communities, that is now presently on going without your voice also heard raised yet for objection. A trial, where the evidence that factually establishes bush guilt for treason against all the American People will be sought as immaterial. What the evil enemy as godless bushite dogma blindly hope for is, a silently feared coercion through suggestive threat against Our entire Justice system, leaving the court to have quoting perhaps, only one or two lines written by myself out of context from "The Trial and Conviction of Our Mr. bush Jr" to a jury, while disallowing the documented facts, surrounding my allegations to be refused as my defense. [the criminal leads end at the bush administration's door step with bush's own signature, but bush, as Presidente', can't be arrested under American law, only impeached by the majority of already bought out and sold whole repuglicons.] Counting that our community of peers will have not a inkling what is contained in the very first paragraph of "The Trial...". You my friend alone, you alone, could help US change all that. I, as a single person am trying to stand on the principle, that ANY individual, that is accused of a capital offense without evidence, is UNIVERSALLY INNOCENT, as they would be tomorrow, today, and way back in Hammurabi's day also. And that by reason, the false accuser, is the number one suspect to start with. The enemy bushite MURDERERS try to confuse this extremely simple matter with the powers of hypnosis, or suggestion through the dictate of "our" television and radio cult broadcasts that promote tyranny by fascist censorship.

The nature of hypnosis shouldn't be feared, but learned from to gain a better understanding of the true human condition. Something a bushite hates like our public education systems, is where we through improved communications, halt their criminal transgressions against our better selves.

In the warrant to take all my writings, and computer stuffs, (to begin on their fishing expedition to protect the war monger demon anti-Christ,) it was argued, that the information contained within their possession should remain TOP SECRET. The document has now been made available for my defense, and here is the reason it was argued THREE YEARS AGO, to not have the charges publicly heard.

/ / FROM TIME TO TIME, the NSIS section receives threats from members of the public who after investigation, turn out to be suffering from mental illness. On occasion, proceedings under the Mental Health Act as opposed to the Criminal Code may be more appropriate. In cases of a mental illness, the publicity and sensationalism of an incident such as this one may turn out to be negative to mentally ill persons. \ \

Yeah but, what about DEFENDING the FBI's findings "copper"? Is it that anyone who stands up for Justice in America, who asks loudly for a public platform in OUR media market place, should only be considered, top secretly, mentally ill to think they have a right to contribute on an equal basis, among the oh so lauded, intellectual power breaking crime pushers of our World? (The woman hating child killers, like naive bushite nazi demon liar Mattis wear badges too don't you know?) Are we crazies to want to defend our rights to be free of murderous tyranny? Are they secretly saying on behalf of the bushite: to speak out in praise of the good investigative work the FBI sometimes does, is a bad thing for their future top secret "investigations" on Our behalf? Or is it because, if we believe in doing what needs to be done to protect Humanity from tyranny, would truly mean, evil bushite wouldn't be able to rob further from dying sacrificed as the undefended America?, and soon, wisdom by communication through science and reason would rule our better stays? Would it surely drive me insane to have our public acknowledge our good deeds that work to have freedom really reign indivisibly through Justice supreme? Anyway, Jeeze, I'm already crazy.

The national security branches of all our governments need a major overhaul in protocols. (officers who are involved in uncovering a criminal conspiracy, a conspiracy involving the murder of thousands of now dead Americans, should receive the full support of every police unit this world over as a protective measure for fellow officers. After all, George W. Bush is an American cop killer too.)

Before my site "Wizard's World Wide Works of Wonder" was taken down, I had the center piece (still available in other places) "Stand Together or Don't" as a full page spread with graphics and everything. "Stand Together..." is an essay that only asks that our standing criminal code in Canada be enforced, when it comes to the documented thieving of our communities as committed with the notoriously miss reported workings of the "cheating at play" VLT machine. I also had "Johnny's Last Stand" take a prominent position at the web page, along with "The Alien's Take". So get this: another argument made for the warrant to confiscate my personal belongings and leave the FBI out to die, was attributed to only a single Cnst., who blanketed my entire site in reference as "anti-government". That statement was the only statement made by the officer in regards to her summation of my writing skills, and was made in argument to a Judge to obtain the Warrant, just before the site fell, so I'm now, suspecting, was likely responsible for complaining it should be shut down by maybe.. badge waving?) Strangely (unknown to me until just recently) as it would happen, this same individual I had contacted over the course of several months regarding the VLTs, (on how the DOCUMENTED crime is perpetrated, and on our communities TRUE monetary losses

(maths)) was the same who, top secretly claimed, my writing on Justice was "anti-government." See, I offered to come down to the station and assist with the maths if need be, (remember we're talking the thieving of literally billions and billions of dollars each year from mostly the poorest segments of our societies) to offer assistance in any way I could. (Or, to be told "fool, your mistaken".) But each and every time, I was denied access to have implemented, the protections of the criminal code here in Canada, (that usually makes our country greater than all others,) without a given reason why. [An aside: bushite irrationally hate science and reason because we're intelligent, while I, can't help but respect life by learning something from just about anyone.]

Here is what it further said in the warrant, that up until now was considered top secret. (without the warrant staying secret, the darkness can't stand the light of scrutiny, and I would be freed from the restraints of a bogus warrant to go on shouting for TRUE Justice by DEMANDING the arrest, trial, and subsequent execution of those responsible for the crimes of nine/eleven - bush, rumsfeld, Ahmad, and condoleezza rice. With cheney and myers running a close second.)

ORDER

-snpd-

AND UPON being satisfied that the ends of justice would most probably be subverted by access to and disclosure of information filed in the Information to Obtain the Search Warrant filed in support of the application to prohibit access and disclosure;

[Good guy police officers might get the public recognition they deserve in other words right?]

the Search Warrant;

AND UPON being satisfied that access to and disclosure to information filed in support of the Search Warrant referred to above might be used for an improper purpose;

[getting back stolen VLT revenues you mean?]

AND UPON being satisfied that it would be in the best interests of the administration of justice that access to and disclosure of information filed in support of the application for the Search Warrant referred to above should be prohibited to the public;

[What?, don't want US public to know bush, rumsfeld, and condi committed nine/eleven with General Ahmad? Well, now I can see why all the hush hush.]

AND UPON being satisfied that access to and disclosure of information filed 'in support of the Search Warrant referred to above might well pose a substantial threat to the interests of effective law enforcement;

[following crimes scene leads at real murder scenes not good enough for our police agencies? - US people backing up ourselves with as something worth reckoning a better future with?]

AND UPON being satisfied that access to and disclosure of information filed in support of the Search Warrant referred to above would compromise the nature and extent of an ongoing investigation;

[Well, it's only been years now. Let US ask you, have YOU called the news desks of CBC or CNN, about bush's prior plan also? Are sandwich boards, posters, and placards, a police union willing to truly get behind as the untold Justice struggle for our suffering Humanity?]

AND UPON being satisfied that access to and disclosure of information filed in support of the Search Warrant referred to above could conceivably compromise the health interests of a person;

[What about the health concerns of the hundreds of thousands of innocent people bush has since ordered murdered, along with the millions of others who will suffer the consequences of radio-active contaminations for the next few eons? National news coverage is not what I fear, I fear that no one on this lonely planet cares to hear the cries of my Humanity for mercy, or holds love for God as worth fighting for.

-snpd-

So, what now? Please don't leave ourselves undefended from the criminal dictums of the demon anti-Christ, Our Mr. bush Jr. Demon bush is not America, America is America. Look, we arrest those responsible, and we carry on, by firstly reversing almost every thing G.W. the traitor implemented. Look, when Clinton implemented change, he was able to turn the country around pretty quick. Just bring back some progressive ideas. Dump the Patriot Act, and those that voted for it, and truly bring back the Constitution with a respect granted to all Peoples regardless of nationality. Christian Palestinians are humans like US too don't you know? While fixing the neo-con war mess should start by making all co-habitants equal under the principles of fair judicial due process, meaning: freeing the innocent held captive, and arresting for war crimes among other things: bush and rumsfeld, myers and cheney, Allawi and Doud, Tommy Franks, Steven Russell, Saudi wahhabi Buford Blount, woman haters Sicko Sattler and mad dog Mattis, Batiste, Miller - along with all the rest of the rapists and torturers, and then, we.. seek out all the stolen assets taken in America's stolen name. Big job. But we can do it! God is on our side.

I was reading about "Jew Boy..." and I thought, perhaps some may misunderstand my position on Mr. Felton. When I said, "And in light of our desperate challenges today of defeating the enemies of Humanity as specific unjust individuals in "hiding", an ignorantly stupid thing to say." I was coming from a position that I felt, Greg's own superbly good and strong, intellectual arguments on the bigoted demonization of the innocent, would find himself! at fault with, by not looking for another's view regarding the label of "Zionist". Perhaps I was being too picky, but then, generally speaking, disputing the indefinable public's perception of the Holocaust is a loser抯 argument. Arguments, that generally, refuse to realize, soldiers like today's bushite, would as mindless droids, line innocent humans up next to a ditch, and shoot them all dead for no real reason in particular. [Nazis took film footage early on, then banned it, because it looked so completely insane.] Just like rumsfeld抯 blitzkrieg, or when enemy bushite thieves dropped thousands and thousands of land mine cluster duds in Iraqi school districts, threw grenades into Iraqi homes indiscriminately before entering with guns blaring, and true Americans, like Germans of yester year, still don't have it together as a freedom force worth reckoning with, to immediately destroy, the known of bushite with American law for criminally implementing the sadomasochistic torture of completely innocent people, and in some cases, tortured to death because maybe they finally then admitted, they were in cahoots with whomever as the "terrorist". Thereby, according to America's new Justice speaker, Gonzales, no longer was a human with rights to begin with anyway. A publicly expressed

contempt for US innocent, done in by the disfunctioning sub-human bushite traitors sitting in our office. I'm sure some might understand who the greatly knowledgeable Greg Felton was referring to when stating "Zionists", but just think of the Arab "Semite". Ariel Sharon will steal the definition to victimize innocent Jews with for the American tax payer to foot the bill as, but when an Iraqi Semite, new to English newscasts tells you he's a bonafide Semite really, can he therefore be completely wrong about his true identity? Or how about this: do you think, the persons never shown for public media interview as accepting to receive stolen property like completely furnished houses called those of "Jewish Settlements", contain anything but, bigots masked as religious observers? How else could they possibly live with themselves? Amongst US true believing Jews? What of Hillel do we fail to recognize in not condemning the brutalizing of the innocent in our own names left forsaken? A well entertained teen, growing up in dum-dum America, or here in Canada for that matter, will likely have little understanding of Palestinian Jews or "Zionism", (like we don't regarding regressive tax systems,) but for like a proud Catholic in Ireland, it's something stupid he's suppose to stand up and destroy himself about while in a drunken stupor turning orange regarding some ancient Roman history or earlier biblical teachings not ever comprehended entirely... But then, I thought, gee, I was the one being ignorantly stupid, because in that space where we were communicating during the recorded interview, we had just finished making the correlation of mutual racism/bigotry expressed between Hitler and Ariel Sharon. Sharon/Hitler steals/stole an innocent person's home, then throws/threw them into concentration camps to be victimized further because they抮e said to be inferior to the war funded as ungodly criminals, by the ignorant and stupider than ever American tax payers, again. [See "Trading with the Enemy"] And it was there where, Greg brought forward, that too, they are some of the very same Ideologs, of both scenes, who want always to divide the masses by intolerance, through racism or bigotry, to get ourselves to die at war with our/their ignorance, while the true 'hidden' instigators, (non-descript billionaire weapons dealing private bankers usually,) bask on some beach somewhere in our stolen luxuries, not having to lift a finger to command a full course dinner. That is why bushite are currently working to even further destroy America's public educational system which is already the very weakest of our developed world, and why it is preached on television in America non-stop, invest in deregulating the world market so you too, can rip someone off with slave labor conditions to compete your good for nothing son/father with. One out of three workers, officially, in America earn ten dollars or less an hour. And repuglicons hired near homeless people at 75 dollars a day in

Ohio to walk around carrying we vote repuglicon signs during the mock election. An informed populace, is a group of people growing tired of being taken for victims, who might wise up and stand for real Justice through the Freedoms of understanding. Can you imagine US speaking internationally? I can. If only You'll help me gain a platform to debate the facistic censorship deniers. The Coast to Coast radio netwrok don't want no Americans talking about why Americans are being asked to die for the bounty of, bad guy bushite war profiteering. The wealthy celebs don't have to risk their own lives, just the lives of other Americans denied a voice for representation. So, asking once or twice, and then fading away to give up ain't gonna do it. Coast to Coast only allows an intelectual one time a month to speak for maybe few seconds. That should change to weekly. And Americans should DEMAND America's serious political issues work to be addressed in an open forum like talk radio provides. I am open for challenging interviews. But again, bushite don't like free excange of ideas within our communities, for it puts their Satanic cult leader in a disfavorable light, who then wouldn't so easily, get away with committing mass murder in America, or allowing America's greatest pension thieves, to escape un-accounted.

So, I've been working on questions..

Do you not as an officer of our laws, require evidence to substantiate allegations of criminal impropriety against members of our community?

Would not allegations of murder substantiated without evidence, be false? And would not therefore, the slaughter of innocents, blamed for terrorism without a shred of evidence being known universally, be acts of mass murder committed against US interests? Or for the true believers, terrorism inflicted against G-d? (And, is this not why defining "Terrorism" was forbidden in the recent "Terrorism" conference in Saudi Arabia?)

To persecute an individual nation without a reason substantiated by evidence, would be then the persecution of our forsaken God as the innocent of US individually? Like Christ on a cross somewhere you'd be then right?

Come on, please, help yourself out man. This is Your world too you know,

King Johnny Wizard

"I share the belief of many of my contemporaries that the spiritual crisis pervading all spheres of Western industrial society can be remedied only by a change in our world view. We shall have to shift from the materialistic, dualistic belief

that people and their environment are separate, toward a new conciousness of an all-encompassing reality, which embraces the experiencing ego, a reality in which people feel their oneness with animate nature and all of creation."

-Dr. Albert Hoffman

I Stand Corrected

Okay, I'm sorry, I was wrong. After reviewing communications with my home planet, it seems I may have goofed on location. I wanted to go to Earth, but it seems we suffered a data mix up, and, well, this civilization isn't nowhere near, here where I thought I was. Oops. And.... a.... another slight mix up has me mistaken on another as well too, with an out of date computer malfunction, a glitch, set me back a hundred years, those idiots, and, a, hells bells, I, was... also suppose to praise the Republicans. Doh. Sorry bout dat. Bush, I lied, my fault, I'm an idiot. Please, I hope you can except me for being wrong like I was, an, maybe next time I come back, I'll do it right the way I should. Your not so bad, and I know you would want to do the right thing, if you knew how, like I wish I could be certain for myself sometimes. Maybe at some point we could be friends. Hm, it would seem you people haven't begun evolving just yet though. My mistake again. I suppose that explains allot about my vanishing thrills of excitement about prospects, and our unanticipated exhaustion without explanation. I thought you people would be smart enough to catch on as humans, with me being, you know, Jesus or Satan, Mithras, an immortal child of God, stand in maker of the universe and all that. So, hmm, I guess I'll be leaving shortly, to head out to my original destination, a developing planet I do understand to be years ahead older than your own, who already kinda have an inkling about not destroying life, and really have made themselves as the living, a must see destination. I was destined to a planet system revolving around who you would refer to as Bernards, being originally from deep within the supercluster you have labeled Perseus, as humans too, interestingly through God. It's a small universe after all. My transportation device is of a free energy nature, something much like you have already available, but refuse to implement. God knows why you don't, I mean doesn't. Know I mean. Ah.. No matter where you are in the universe though, as you may discover before destroying yourselves, if your

conscious, and sufficiently intelligent through life to recognize yourselves as a living part of the universes, you would come to the same conclusion, no matter where you do your thinking. They are us equally, and this is true, no matter where your from, stand, or hold. This concept represents the death of ego, but not really because your still the same, you just learn more about how to get around as best we can. The same as it ever was. We, an intergalactic federation, commandeers originally under the apices of the great, we never needed a world war, Sir Admiral General D. Wesley, who's responsibilities dictated, we recognized to be our own through his genius. After being the forerunner of the foundations beginnings, we gave us all an award, and helped many find themselves, comfortably in a state of semi-retirement of which us all, our truly grateful. We in total, so far, are the S.D.S.G., Super Duped Spacegirl Group, consisting of more than twenty thousand, distinct, well connected civilizations, (fiber optics is very popular as well as free solar powers) who through good times, have naturally become friends, in this amazing, got a have a care for yourself because we understand just how fantastic you all really is for benefits, and there are many. The Universe is compassion, love and understanding, but because we are of life, and as growed ups we can also, which includes me occasionally, be greedy, hateful, and stupid. But I guess for yourselves, because life is free, you've deemed it therefore, worthless, for the shortening time you believe you are here to take from yourselves. Survival of the fittest, we as the intelligent universe have surmised, and by you deeming yourselves consciously as obsoletes for profit politically, I guess is for the best, if you really can't figure out why you would. Hmm.. You mammals are dumb. So, I would now suggest all previous writing I've done as incorrect, and highly implausible on this matrix set. Private bankers in their private market on this planet, are clearly the best informed top secretly, Greenspan is who stands over and against our nature with his private plan is betterer, controls the world, and is in with the winners, because they own all you as money to hide from their manufactured fears of your adding abilities, because your really scared of yourself right, and that is what you are all about as them. Continue on as you were, pay no attention, it's just us losers here, take advantage of yourselves, continuing to treat the public like your, oops, I mean their corporations tell we, who you are. Continue to allow the corporations to destroy your living economy

and your souls with the VLTs, while they convince you to think your stronger for robbing the defenseless illegally, like this isn't you here along this reading rainbow. Be blind to the loss of 3 trillion dollars off the market, stolen in my mind, while private bankers continue to take out your interests, leveraged with our properties over a currency that doesn't exist, sending the nation into a depression, then a war to kill all the poor stupid people. Through who, as they say, "nobody", protects your laws, and your fears of being as stupid as they all are, finding yourself isolated in their noisy universe, as we are alone apart, of all that is here silently. Clowns to the left, jokers to the right, stuck here in the middle with a little story that never has been told outright. I love love love love, the sweet things in life! Growing improbable, but still possible. Rock on Art Bell! Okay now, let it ride. Hey boo-boo.

"The power to destroy a planet is insignificant when compared to the power of the Force."

(A U.S. corporate trade your life for death negotiator)

"Profit means money. Money has no heart, no soul, no conscience, no homeland."

- Frank Stronach, Magna International Inc., a man with no heart or soul on his way to hell, announcing plans to move operations to Mexico, because the government has been made weaker by corruption to protect themselves as human, where labour can get as low as only $4 a twelve hour day for children, and where our competitor's average wage rate pay in manufacturing was $1.90, then. However, over the last decade during this NAFTA attack, against every living human being, wages

have fallen a further 50%. Hitler's dream coming through as republican commi swine! Petooie.

"I do not believe that this generation of Americans is willing to resign itself to going to bed each night by the light of a Communist moon..."

- Lyndon B. Johnson

"As Peter C. Newman puts it, "Americans are obsessed with their self-imposed burden of saving the world for democracy." Yet on a list of eighteen leading countries providing assistance to developing nations, as a percentage of the GNP the United States was eighteenth."

(As well as being the last in education and health care. Thanks Dad, thanks allot.)

An excerpt from the world wide best seller, "The Betrayal Of Canada" written by one of our most beloved authors, Mel Hurtig, published by Stoddart, recognized as one of Canada's finest, has ourselves left completely alone by all private lifeless news corporations as living human beings. Gods, if you will.

"I call that a bargain, the best I ever had."

- The Who

"Everyone is in the best seat."

-John Cage

"Please don't lie to me, unless you're absolutely sure Ill never find out the truth."

- Ashleigh Brilliant

"The real geniuses simply have their bright ideas closer together."

- Lichtenburg

A free of charge 17.33% increase: American right wing cowards also hide themselves as the world's biggest terrorist organization. They make us support military dictatorships with our capital and weapons against our wills, like the oppressors of the great Chinese people, or not demanding life term prison sentences of the current Dutch-Shell's board of murdering directors, and have the gaul to slander our hero, Castro, humanitarian of the millennia. The man the entire city of New York gave a party for, way back when they were actually

educated, and could read in their spare time, in
between working only one job, closer to earning a
living wage. But Americans aren't suppose to remember
that, to keep em' dumb. Like "The U.S." routinely
says, Castro's commitment to education and health of
people is not worth talking about, enof sed, get back
to work part time full time with no free time to care,
except of course for war against ourselves as the
losers everytime. One thing leads to another. So just
what am I trying to say? I've been to heavens and
hells and back, and... well... it ain't so bad, and
kinda fun. One and one and one is three dressed up
like a nine, that, well, could be a five, and, then
well, I know you like you know me, and one thing I can
tell you, is we must be free, to do our own things.
All mighty then!

My apologies,

J. Wizard - Demoted to 4th rank Scout

/ / On January 27th, President Bush, in an interview with the
Times, assured the world that 搕orture is never acceptable, nor
do we hand over people to countries that do torture.?[...]

Arar, it turned out, had been sent to Syria on orders from the
U.S. government, under a secretive program known as
揺xtraordinary rendition.?This program had been devised as a
means of extraditing terrorism suspects from one foreign state
to another for interrogation and prosecution. \ \

Am I the only person who sees something seriously wrong with
the picture bush's trying to say he is not of? Would not bush
call for the arrest of Ashcroft? Miller? If not, why? For,
he states he is at least aware of handing innocent people over
to foreign nations to be tortured by satanic lying enemy
traitors to God and Humanity..

Feel free to forward this post for publication consideration.

--
I wrote the letter following "Jew Boy..." the day a single
complaint arrived to the radio station, with the threat that
the ADL would soon be contacted. The letter was provided in
advance of the next day, of the time scheduled for the
complainant to return for a recording of the questionable
broadcast. The station manager refused to give the complainant
my letter, and insured me that I would no longer be allowed to
produce a show for our community. Is this fair to our Jewish
brothers and sisters? Is this fair to You?

Paris "And then what if you saw, all of the things thats wrong,
would you stand tall and strong? Or would you turn and walk away?"

Johnny

Jew Boy Johnny and the anti-Semites

- or -

"The Zionist Conspiracy"

Monday, January 31st, around 3 pm, I called the station manager to ask
how my afternoon recorded broadcast went, and to discuss the new
week's tentative guest spot with an update regarding the falsely
maligned, Mr. And Mrs. Benderman. The station manager informed me

my phone number had been misplaced, and was managing with stress trying to put together an apology letter to a single individual, who came into the station, while the interview was still running, to demand action be taken regarding the anti-Semitic broadcast that he was certainly going to report to the ADL about. I told her the Felton interview itself was about bigotry through the demonization of the innocent, what the Jews of world war II suffered through, and, that I was a huge defender of religious Jewish teaching. I told her, to offer the individual a chance to publicly speak regarding the issue, with me, or by himself regarding Felton, to try getting specifically to what has got him so much, by himself, upset about allowing my voice heard defending Jewish rights within our community. She told me that she would likely, none the less, have to let me go to appease the sole complainant, for what if a lawsuit should result? I told her to consider her options, reminded her that it was only one single individual who hadn't even heard the show's context, and that the broadcast in every other way had been going well, doing good. She told me she was very busy, and said goodbye. Then a short while later, phoned me back to ask if I would write a letter, and have it at the station next day before the complainant arrived for his copy of the broadcast. I said sure, said it would be a great challenge, and proceeded immediately to do just that. The next day, I contacted the station to ask if my arrived letter was forwarded to the individual, and was informed no, he didn't receive it. It wasn't the apology the station was looking for, and my show was now officially terminated. I told her it was very unfair to me, to not allow him to read my formal response, and that I couldn't in good conscience, back down from defending my rights to be heard on this issue, or to allow us, as our public, to hear the complainant's actual complaint about my, freedom for all broadcast. She said she would try to get the letter to him, but that the show was over. Case closed.

Stand up for Jews, and look at where it gets you, Jeeze.

Let us not put aside, the station manager's legitimate concerns. Who has the money or the time for a frivolous lawsuit? Why do expensive independent research, when the Bush Administration can hand us all the free news they want us to have directly without any costly questions? Saddam wouldn't let the inspectors in, right? Why risk standing up for someone else's rights, when doing so, will get the (anti) Jewish-Defamation League calling you an anti-Semite (Semite=Arab) for communicating some understanding with Felton? Felton, is bizarrely quirky as interesting, for his recent book is about the demonization of the innocent, (you know? Nazi gas chambers and ovens?) and as such, we can learn from, as too, we can teach. If he'll listen. Ariel Sharon is not Jewish my friend, NOT JEWISH!!!

Open the gates, it's getting late.

John.

<http://radio.indymedia.org/uploads/big-package.mp3>

Greg Felton : "The fear is necessary for two reasons. And the principle reason has nothing to do with Iraq. it has to do with the government itself. The bush government is criminal. [...] The problem is: how do you keep people from paying attention to this? You keep them focused on an external enemy. [..] so they forment this fascistic hatred of a definable group of people. So, the war on terrorism so called, is not much a way for the United States to protect itself against it's enemy, it is a way for it to create enemies, to justify the kind of repressive measures that would otherwise be intolerable in peace time."

To whom it may concern,

regarding the January 31st broadcasted interview with Greg Felton.

May I, on behalf of only myself, ask that you pardon my failures in judgment, in not allowing what I should have gave: an immediate re-dress regarding, 'who is the Zionist label?', or 'What Holocaust are you referring to?', during the broadcast of January 31st. (bet you we can't get two Christians that agree on everything.) However, I can offer perhaps a show centralized on a chance to exercise your personal views, be they pro or con on where you think we should go from here, or whatever may have you regarding said interview. Or, if you would like, you may wish to do only, or else include, a written work that I promise, will reach as far as the original broadcast. So, actually, this could be a prime moment to have a dialog regarding racism, bigotry, and intolerance. I confess, I may be unaware, and still have much to learn, when it comes to communicating well with all others. But, I know I'm getting better, and I'll tell you, the Justice-Freedom thing, sure seems to be our ultimate calling.

I was not so surprised that the broadcast interview with Greg Felton would be considered controversial, (as every show I've ever done always has), although I wasn't prepared to hear criticism against the show as being defamatory to a group, or groups of people. As certainly that was not my intent, but however was the difficult subject addressed within the interview. The fundamental teachings of Law, as it pertains to justice and freedom, along with every legitimized religion, is that all free people should be thought of as equals to each other in vigilant protection. And by doing so, one would be serving G-d's interests. (Even if a G-d doesn't exist - an Atheist too, could become a proponent by understanding Jihad). Thereby insuring\realizing that a just intelligent life force rules our chaotic timeless universe in service ultimately to ourselves individually. Giving us in the Torah of Moses, ``all people are created in God's image'' teaching all peoples are Sacred. And as such, would be so in God's interests to defend

as the innocent. While in eternal pursuit of happiness and prosperity for all through just means.

Under Greg's definition as being a "Zionist" conspiracy, negates the failure of himself personally to recognize the public connotation is too vague, and that Hitler's Nazi Germany, like Bush's America, is politically expressing an inability to represent ourselves with respect as truly worthy of fair deliberations amongst ourselves. Sacred, every-one. (Or as in, to rise to the defense of those we know to be irrationally victimized as the godly and innocent, victimized in our un-addressed names.)

Greg "This is why the Holocaust is such a very dangerous thing to talk about because, it's not really understood. It's preached at us like a sermon. We're suppose to accept at face value what we're told about it, as if to, criticize it, is some how disrespectful. Much of what we know about the Holocaust has been propagated by the Zionists, and can be shown quite untrue"

I replied shortly later "One thing about the whole situation is that innocent people were targeted for murder. End of story. That's what the war was. All wars are like that."

Greg's mistake I believe, centered in his Zionist labeling through an apparent bigotry expressed, and as such, was too narrowly defining the larger established history of the Holocaust, as being the struggle of the human species in halting, the demonization and then subjugation of the innocent millions, Jewish or otherwise. Perhaps it was strangely on his part a testimony to a real struggle we all have when it comes to identifying ourselves to others. Considering it is the exact subject matter he wrestles with in his book writing, regarding our corporate media's perception of ignoring an innocent people's concern or cries. That said however, for Greg to blankly criticize Greg's false construct of what is publicly understood about the Holocaust, is to deny that much for sorrow and suffering took place against the whole of Humanity, especially, of those who held the practiced Jewish faith. To think the nazi regime would have the gas chambers and the ovens, while the whole of humanity were not strong enough to communicate the unjustness of it all to the German people while it was happening. I have read of a recent documentary that provides film footage of nazi soldiers committing the worst war crimes imaginable to god loving Jews, interspersed with film from the same dated period where, the German people were living civilized lives, left unaware of the atrocities that were being committed against God in their names. Same as America and Canada today, with Fallujah抯 300,000 People being, the undeniable example. Or, are you too,

a convinced denier of that which is fully documented? (Needless and irrational was the indiscriminate murder of the people of Fallujah, but for to have more American soldiers sacrificed in a conflict created by an unjust as immoral totalitarian dictate.) The Holocaust deniers are those the same of today, who refuse our Humanity to nationally communicate those screams of mercy, or for justice regarding the People of Iraq to be served in our true interests as legitimate. More than ten million Russians died fighting the evil eugenic scourge of the "superior" nazi regime, and like those in Poland, Britain and France, as elsewhere testified our established history, (albeit only later), the sadistic ungodly as lawless barbarity that Nazism inflicted upon the general masses, went largely undeterred from our "informative" television and radio broadcasts. The same, almost word for word, and action for action, can be found in Rumsfeld's "blitzkrieg". Bush's freedom by tyranny doctrine. Or the criminally sanctioned unchallenged news pronouncements of a Mark Kimmit, Buford Blount, Steven Russell, Mattis, Allawi or Sattler, when it pertains to accepting without our objection, to the victimizing of Iraqis collectively as an indiscriminate act of criminality, like murder. As like in the policies of Ariel Sharon, where an innocent, haven't committed an accused crime in their life Christian Palestinian, is denied the earned home they worked and paid for, on a parcel of land shared up until recent times for countless millennia. My personal struggle has been to inform the public on the "forgotten" importance of established evidence, being the only requirement to convince ourselves on who is a bigot, tyrant, a criminal, or a murderer. Will you not therefore, as a fellow humanitarian of this shared world, speak against those you know of, who victimize the innocent to thieve from? Sure you would, if you knew as much for certain about God and this universe, or the under reported, freed to go General Ahmad, funding the mastermind ring leader Mohammad Atta of Bush's 9/11 game. But will together our Humanity ever learn? Well, my plan is to search for guests to speak with, that I'll try not to offend early on. Greg knows, like the Pope knows, as every legitimate police officer worth their grain of salt knows, as so too does include a great many Jewish Jews, George W. Bush used absolutely no evidence to substantiate his therefore, false accusations in our names against bin Laden, while then ardently with Cheney, worked to close outstanding criminal investigations regarding their extremely suspicious behavior. All according to his official publicly documented plan. And speaking the news as thus, does not make anyone anti-Semitic, anti-American, or anti-Human, but pro-Jewish, pro-Christian, pro-Muslim, pro-Justice pro-Freedom, almost wholely human like even. Not of a long gone as lost and forgotten religious dogma, but for now as it always has been found, a mutual

respect for all life as we find ourselves being part of. Or, so we would for Atheists, argue in all likelihood to get to the same reasoned to be, just political decision, to this or any another life and death matters matter.

Because the unjustified criminal war actions of George W. Bush are our shared documented history, others, with an ulterior agenda to propagate their weakness through bigotry or racism, will arbitrarily blame a subjective grouping of people, instead of demanding by godly individual might, the arrest of specific individuals who are actually responsible according to the established as public evidence. So, now who's fault is that? We live in difficult times. To admit weaknesses regarding our corporate news control content decisions, is to seek a better world for our lives through stronger open communications.

I believe the defense of the Jewish faith is found in the indivisible properties of Creation, and who's central belief is made simpler than any other. Hillel was asked: Rabbi, who is a Jew truly? Hillel answered, "What is hateful to you do not do to your neighbor. That is the whole Torah. The rest is commentary -- go and learn it." So my challenge in defense of the Jewish faith during the interview, was that those who practice criminal misdeeds, are therefore found by the official definition taught by Hillel, to be not practicing the "Golden Rule" of the Jewish Faith. (as so pronounced by the religion's recognized ancient oratator.) By calling alleged criminal actions, the conduct of an entire people, faith, or branch thereof, is to fall into the fascist minutia of bigotry, or racism, held by those who judge us "others" unfairly. After re-hearing the interview, I did find the allegations made by Greg, regarding the Holocaust being blanketed by falsehoods, generally, a failure on his part to recognize the true horror of what that war wrought. And in light of our desperate challenges today of defeating the enemies of Humanity as specific unjust individuals in "hiding", an ignorantly stupid thing to say. While I, perhaps wasn't thinking along those conceived lines, where at that time, I had just left the thought of: the struggles of the Jewish faith, are the same struggles all young adults go through by naturally establishing our associative identities. Who are you I truly ask? How many news channels even allow us as Humanity to know about the absent reason for the bombing of the Jews of Samara? The Jews of Fallujah? The torturing of completely innocent People to death, as in Guantanamo? Or still unaddressed publicly: the willful lawless criminality implemented by the, therefore tyrannical Bush Administration in suffering God's Iraq? (See missing ``Development Fund of Iraq'', or private mercenaries discipling for Bush as deemed un-accountable to every conceived ``natural'' law? [see the entire Bible for the judgment call on that one...] or, Bush's declarative, he magically owns

everything in stolen Iraq now, [where did it go?] and I can't say anything because he signed his John to 13303 some time back, but as still is left unreported in Your dying world?)

Publicly question our reality, by taking the station up on doing an interview with me, along with your own impressions of our world. Or, if you prefer, you can do a solo written piece, or a recorded statement for the station. I look forward to finding common ground with your concerns. I hope I have got you wondering more, about what trying to save our world from injustice and slavery, in whatever way we can is all about for me really. In these words I can say, I apologize to you, for a resulted perception, that wasn't with better words, my true intent towards us people together.

I will, after some small revisions of this paper, include it as well as the broadcast package. So I do thank you for bringing up your important view, that otherwise, would have gone farther without this opportunity, that I offer as a starting point for deliberation, or argument regarding my foolishness. Thanks for speaking, and I hope I have met most of your concerns with a positive light on where I'm trying to come from.

John.

<http://radio.indymedia.org/uploads/benderman.mp3>

The Benderman Cause

I felt compelled to support the Benderman's cause in any way I could, so I am providing America some arguments that I would use in a court of law to defend your freedoms. If America would so desire, I would also be prepared to make a recorded statement from here in Canada. (I have been denied access into the U.S..) My positions of rational argument are naturally based upon our established facts, and as such, are something few Americans are afforded the luxury of through corporate channels. I hope my forcefulness on these issues does not fear you to doubt I have the best of intentions when it comes to serving the interests indivisibly inherent within the American Constitution. God, I believe is just, and as such, the ungodly war actions of George W. Bush dictate are criminal in the worst degree, being a harbinger of suffering and misery against all of Humanity as US being the innocent. The innocent in our entirety, is my "God" that I love with all I can will. I am compelled as a living human being to defend America

to the last bush supporter praised if need be. I fight the enemy of God and Humanity with reason, understanding, Akeido, and a conviction that our justice system must prevail for me to be truly myself really.

"He explained to "60 Minutes," "I was told in basic training that, if I'm given an illegal or immoral order, it is my duty to disobey it. And I feel that invading and occupying Iraq is an illegal and immoral thing to do."

The war was declared "illegal" by the U.N.. Why? Because Saddam wasn't found in breach of the internationally agreed upon resolution 1441, (Saddam did EVERYTHING POSSIBLE that was asked of Iraq by the bush administration, and then some Mr. Bush refused to even take him up on. Like national Iraqi television broadcasts.) despite the lies quoted by corporate news America. There was no need for the conflict to begin with as was so reported internationally on march 7th, 2003. U.N. inspectors had complete unrestricted access to go anywhere without delay, and known stock piles of WMD were burned, so could not possibly be completely accounted for by evidential findings due to the fact that they were destroyed beyond recognition. American soldiers were put in harms way to be sacrificed for no better good, but for to allow as has happened, the misappropriation, or as some have alleged, the criminal theft of Iraqi resources, including monies of the Iraqi Development Funds through Presidential decree 13303. Which include the unappropriated, desperately needed, humanitarian aid provisions still denied innocent Iraqis, such as potable drinking water and food stuffs. Democratic principles are DENIED the Iraqis by the neo-con military forces, such as holding all individuals equally accountable to a rule of law. The outlawing of torture, or the outlawing of false imprisonment has not been professed as the action of the neo-con "liberating" force. Mercenaries are not obliged to obey any laws for example. And, "Dr. Germ", and "Dr. Anthrax" are held solely for the fact that they know of the scientific hazards of depleted uranium, and may have warned the uninformed sacrificing American GI, if not held illegally against their wills by the enemy. Commanders such as irrational war criminal Sattler, forbade all men and boys between 15 to 50 from leaving the city of Fallujah, while refusing to

negotiate with anyone, (because as so was openly
confessed, Sattler had no evidence that Zaqari was
in Fallujah) then leveled the city to kill all it's
inhabitants, estimated at that time near 300,000
people. Using a napalm type WMD, cluster dud
land mine munitions, and as reported, nine two
thousand pound bombs in a city 3 1/2 km by 4 km.
Serving for a military not strong enough collectively
to prosecute such lawless criminal barbarity, is
serving for a military not principled in the American
virtues of freedom and democracy. In truth,
serving for such ungodly criminal command is a
cowardly act of treason. George W. Bush is an
enemy of our Humanity.

Copy and distribute this personal challenge freely.
Thanks.

--

I know we're all expected to be selfish, in helping out those others
who cry out for our help, but I beg you, I can't do this alone. My
show did make a positive difference. I need your help in asking I
face my accuser, and politely, with reason, using communication,
and understanding, bring about a better world.

World Productions.

Seriously Folks

Napoleon Bonaparte wrote forming governments are forged only through the public witness of shared mutual experiences, simple, yet, the bushite strategy implemented continually on behalf of the enemy forces in Iraq have been to divide the nation's people with different "legal" definitions, while speaking for typical bushite bigotry, by then offering distinctions of human value between US some from "others". Not freedom, nor democracy. [Remember: Evil is dumb]

Example: Allawi forbade surviving Iraqi doctors and nurses from medically treating any of the estimated 200,000+ innocent victims from Falluja [IRAQI vicinity].

Example 2: DYING two-bit bushite war with "foreign" soldiers paid especially more than a thousand dollars a day as self confessed RACISTS, and THEREFOR, left "officially" too weak as, "pissing post illiterates" to go after real terrorists who torture the innocent, or real thieves, that have stolen BILLIONS from the Iraqi Development Fund. Done all to sacrifice life's purpose for no better good to the ANTI-CHRIST EVIL bush "cabal" of lying neo-con Christ haters. Allthewhile stating the objective worth dying young America as bushite for is "Democracy" in Iraq. But, isn't a founding principle of any democracy to outlaw thefts, sexual assault, murder? Again, bushite kills bushite for a stolen nickel that they just as soon, stole from anybody. If you can believe it. We need YOU to make some effort to engage American talk mediae. Perhaps it's only YOU, who hasn't yet heard a responsibility to this once greatly revered world of wisdom, of the enchanted, and mystical, or of the tyrannical as hell bound for suffering and sorrow. ,in which you share allegiance too my friend.

Being caring and compassionate for the victimized innocent not only feels good, but it is a choice we would make at being alive to help US survive. To not speak against the bushite war crimes against YOUR Humanity, is to not speak in defense of our ancient dying God no longer found worthy of you Peoples humble

respect. Currently corrupted bushite want my voice of truth silenced by censorship with false imprisonment, and those who advocate such hatred for myself and our humanity, speak no public word or disagreement on my allegations of high treason by Our Mr. bush Jr.. While I want to openly debate the, "censorship for tyranny", corporate talk radio bushite bitches on their furthering commitment to not allow objections regarding their contempt for true justice and freedom in America. But if you singly decide not to support my cause, like corporate news control encourages, We will be left forsaken, again. God is Just to the core, like Johnny Wizard tries to be, while bushite liars lie, cheat, and steal from America as ourselves measured unworthy for deliberation to gain true understanding. The Coast to Coast radio network in America disallows America learn for why American soldiers are currently sacrificing their LIVES irrationally. Why? Because there is no legitimate reason, while bushite pretend in YOUR name, that there must be another reason but for to rob our humanity in George Bush Jr.'s name. For if there truly wasn't another reason, not so then blind, stupid, and cowardly American soldiers wouldn't be too happy about the wealthy corporatist bushite commentators silencing America's dying cries by bushite enemy command. Now would they? Remember: wealthy blind and stupid bushite kills/gets killed, poor blind and stupid bushite for a stolen nickel - a nickel in all likelihood, they rifled as thieves from some pensioner, that just as soon, would be their own "grand" parents. Or Yours as someone elses beside.

Phil Donahue had the highest rating, number one money making news commentary show on NBC as it was canceled. Why? Too good as enlightening and INFORMATIVE. Then there was the recently canceled Crossfire. Or how about Barry Zwicker on VisionTV as Canada's greatest broadcast before it too was canceled. Why? Too good as enlightening and INFORMATIVE. VisionTV, a "religious" channel now likely forbids anyone to suggest that God would be good as just, and REALLY INTELLIGENT. Forbidden knowledge we are the corporate bushite insist with Your stolen rights. Why so? Because Americans might learn of what it is to be a true Christian, and therefor stop to have arrested else immediately executed for high treason regarding 9/11: the enemies of Johnny, Justice, God and Humanity, the evil doers George W. Bush, Rumsfeld, and Condolezza Rice. Alone with Myers and Cheney for good measure. Then, those responsible for the needless bombing of Samarra and Fallujah.

Under EVIL bushite tyranny, We are criminally fighting for needlessly dying as bushite here, but corporate newsCASTers don't find "our" costs worth getting a discussion group going, after all, American soldiers who die for the bush regime, as the kept in the dark, will less likely be going after the real bad guys for 9/11 then right? Corporate America refuse US just basic rights of legitimacy to at least address the absent war reason issue from time to time - Jeeze. But no. As bushite, they're prepared to not inform the bushite soldier that depleted uranium is radio-active, that the stolen American Enron pension money is sitting in the Cayman Islands, or that the war itself has no justification. See, the bushite war is a TRUE CRIME against all Peoples of Humanity, for the war against Iraq has no reason available to explain enemy military action, but for to die thieving from ourselves as the bad guys. The Enemies of Freedom. Why we have Law. God is Just, and evil is just the slavish ignoramuses who censor our Words of empowerment for freedom through Justice represented indivisible as Eternal. We rule.

Therefor, George Walker Bush is guilty of treason to US all, not only including your one and only King Johnny Wizard as Heaven's afar, but also the not going anywhere but yet still sacrificing ungloriously as the stupidly blind as almost completely incoherent,. devote bushite nazi dumfuk soldier grunt enemy vermins.

Will you not help these words reach a larger audience? I ask you to consider your helping me can do good for your real world too. Perhaps it is ONLY the single individual that hasn't yet understood, this once greatly revered world of the Word is of which you share allegiance too.

Speaking for a just battle of freedom for all humanity, is a right you could exercise in brightest intentions of a muted God who sure could use your help right about now man. Our family is in so a desperation for needed support. I am fearing your fears have got you believing, you have no dying right to speak against Mr. bush Jr. for the crimes he has committed in Your name, but You do. Think of it this way: anybody who stays silently connected secretly to the crimes of nine-eleven, can not be trusted as a sacrificing bushite thief by the enemy bush administration. [Secretly speaking in all strict certainty.]

The warrant that allowed the confiscation of my computer equipment, was to prove that I was the one and same who demanded true justice for our humanity by following the

crimes scene leads for nine/eleven, arresting those responsible, or killing the escaping culprits, bush, rumsfeld, and condolezza rice by the hand of our guns. (Why do you think Police officers carry guns after all?) It is now argued that because demon bush is President, it therefor doesn't matter where the actual crimes scene evidence for the murder of thousands in America leads to according to the FBI, for George Walker Bush (666) in above all the laws of the universe. Despite! the reason they obtained the warrant, was to charge me for "threatening the life of an international person", they instead decided not to as saboteurs of liberation. They argued after the warrant gave them my personal possesions, (hundreds and hundreds of video tapes, ALL MY WRITING, computers, disks, along with approximately 50,000 tasteful images.) That the reason for the warrant being originally issued, no longer, if ever, was justified. For if they were calling for justice, the demon bush, and his co-conspirators might get caught by America, and pay the ultimate price for their treason by death sentence. After two self confessed PRO-BUSHITE (support death squads against Afghanistan school girls, and propping up the heroin trade by arming women slave traders) "officers of the law" reviewed my images, they now contend, that several can be argued to be illegal in an almost fixed to win proceeding. (No more than a small few pictures of beautiful girls in different states of undress - "Home Lolita" I think.)

The charges they offered to the prosecution to argue for a "life term prison sentence" (almost jokingly it was quacked) were complete fiction, of which the crown offered me "a deal". Plead guilty for being a shamed ostracized sex offender, [I'D HUNT CHILD KILLER ENEMY BUSHITE EVERY DAY OF MY LIFE IF I HAD THE BUS FARE AND THE AMMO] and maybe, the Judge won't argue for a long term prison sentence for another charge that has absolutely nothing for substantiation. Substantiated, that will surely do nothing but testify to their attempts at demonizing my better name. Nothing doing darkness, the court of Law, is Our court, and I intend to make my case heard among my peers. Here.

Please, I beg you for my life, forward this document to the propper authorities, post these passages to any church, or, phone talk radio America and demand my public case be heard for Your benefit too, or don't and get what we'll deserve by not making a miracle happen with your single sole but sure, human will power!

1. I obtained the questionable images through Usenet group "youth-and-beauty". Images can be downloaded a thousand or more at a time. I can't not perceive the images until they are on my computer! If they had told me they were coming as bushite, I would have been sure to delete anything near objectionable for argument's sake. They laughed when I told them that.

2. The service companies that offer such groups as child-rape and so on, have an easy ability to filter out subjective objectionable material, along with the truly grusome stuff. But they don't, nor, are they found legally liable for not doing so. I suggest the reason is, it would put out a billion dollar industry of these child-porno cops that view real sicko slime routinely, while then arguing anyone who witnesses such depravity must be guilty. Guilty to have their professional lives destroyed, their life invested property removed till whenever/perhaps stolen, and then be publicly ostracized as senseless victims. All because some guy maybe believed women are worthy of worship in the highest respect and honor, while cute adorable boys he couldn't help but feel compeled to cover with praise, or mutual hugs and kisses., as long as there are no other men in the room with him and the gals perhaps one day chatting over maybe child care let's say. (no wonder the two child porn cops in question regarding my public case admittingly were/are staunch bushite offenders.)) I know of no nobler lineage that that of our police officer. For protecting the rights of our children, is what we've always been committed to gaining respect for. We want to do right for ourselves, and despite Johnny, this world really is something remarkable to concider a future with on our own terms as a foundation of wisdom with the ever presnt will to succeed at something greater than first realized. Evolution. The Revolution of reason while jiving with justice for freedom holds many perks per praised principle. Hammurabi's number one thang.

3. If a search warrant can be made against anyone who a criminal bushite finds objectionable, (bush and rumsfeld made the charge against me through the Secret Service, then to the RCMP.) then what freedom fighter is safe from pictures of godly and beautiful children in bath tubs? Swimming? IF, the bushite demands the images appear seductive, and compel them to commit sexual assualts? Or, what if you download a program on cars to have the bushite find, it contains bin Laden's secret where abouts in code? Would you be guilty, and if so, of what? No thinking freely?

So, the warrant brought the officers of law the right to prove my Johnny Wizard writing was of my own, but yet, after doing so, refused to enforce the law by giving me my day in court on the reason the warrant was granted to begin with. Also, I, as anyone can not perceive potentially objectionable material until it is in my possession, while a service provider would have little of no problem. (The still working child porno cops could look for child porno all day, and actually get closer to catching those who proliferate actually objectionable materials. [See?, an internet service provider could defend thus: they're not guilty because the subjective material, that would be questioned, is subjective, and so would the porno cops if they got someone intelligent to defend themselves. But for Christ who needs to know what's going on in the realm?, while loving girls in general like they were his own distant siblings? They'd put Christ up on a cross for loving schoolgirls, by demanding such thoughts come only from a criminal prospective. The problem here is child porno cops can view a suggestive cute girl smiling in her panties, or witness some heinous bushite rape or torture, and measure them equally when charging US for their deviant sexual sugestion. As alas, they refuse to support the Law when it comes to the easily provable criminal actions of enemy bushite, as for would be, the defense of the lives of our innocent children in Iraq mean something to me too.

Anyway, apparently, the reasons for the warrant were not as was so intended. To charge me for threatening the freedom of bush, rumsfeld, and the evil witch condolezza rice. (Can I get some legal advice from someone out there on this then bogus? warrant please?). The Court will (try) argue without allowing ANY voice of objection, that because I demanded the immediate arrest or execution for the individuals responsible for the crimes of nine/eleven, (relying primarily on the Whitehouse, FBI, and the public spewing of the war criminal demon anti-Christ itself,) the prosecutor, it has been alleged, will demand justice not be served in that respect, and that the search warrant that obtained the bushite's evidence against me as a truth teller during their fishing expedition will not be allowed for re-dress. Is this Justice on behalf of God I ask you?

Nature of the Beast

(Again, remember, nobody from the RCMP, the Secret Service, or the FBI, state that I am incorrect in my allegations of treason against the bush administration.)

The prosecutor is going to press for incarceration if I plead not guilty for a crime I'm not guilty of, while my public freebie lawyer, contends my defense of innocence and corporate news agencies forbidding the pursuit of Justice in protection of our Police services, like the honorable FBI officers that contend Ahmad funded Atta will likely not be allowed heard. [Are you a member of a Police Union somewhere, or know of someone who is? Or, do you just not give a care for you fellow officers either?] See?, bushite falsely believe bush can not be arrested for nine eleven, no matter where the actual evidence leads, because he is not judged an equal among men by corporate news standards, but as the anti-Christ, FALSE deity, an enemy to every free person standing.

That is our, for real court case against the Bush administration as it stands today. While some have warned, bushite are pushing to have me taken in now, to try stopping this from speaking in our Humanity's true defense. They just might succeed, if you decide no care for Freedom from tyranny either..

This is was/is/will be my last Wizard Wire public service announcement regarding this, George Walker Bush (666) wars America, Humanity, and me as the Lord of Creation. I've said everything I can say twice over, and if you can't find it within yourself to pass this post on to every church corner, with a, "I love life too" set of priorities, I can guarantee you no greater reward. But for to be present if not in person, but in spirit during my public trial where the bushites will publicly judge my character unworthy, while attempting the silencing of our own voices for Justice as We stand in TRUTH, indivisible. Be it known, the prosecutors of Law in my case have read Johnny Wizard's "The Trial and Conviction of Our Mr. bush Jr.", and likely a few others that will be asked by the hiding in darkness bushite enemies to completely disregard as crime scene evidence. It's going to be a case worth getting to, considering the newspapers, talk radio stations, and National News desks are expected to forbid honest coverage of by the higher ups at corporate command. Call your Church group to organize a call for Johnny!

Or don't.

I thank all those with whom the true liberation of Humanity from tyranny could not have been made possible without themselves individually. I know it seemed like no one was listening, when we spoke for God's cries, but WE knew better, and we knew soon, all of US will then learn it too, defending God is of no greater privilege.

So, cheers to You, our Humanity's defenders of the human challenge, for being there to speak for this life when we needed You as a contributor. Fare thee well with your pride and honor, and no bars will ever hold your undying spirit.

/ / God bless America by destroying the enemy evil anti-Christ, Our Mr. bush Jr. Yourself. \ \

Your stranger then fiction,

Johnny Wizard

See you on the other side of whenever,
Your ever present bids you now,

an adieu.

Johnny Wizard

Chow.

/ / ``The Pentagon and the CIA have asked the White House to decide on a more permanent approach for potentially lifetime detentions, including for hundreds of people in military and CIA custody whom the government does not have enough evidence to charge in courts,'' the Post reported. \ \

Not enough for you?

--

/ / Is this satire? Or is this why the US has contracted to build massive prisons to house those they will never charge due to lack of evidence, but hold however long they please? See Dana Priest, Washington Post, January 2 \ \

--

/ / ..said William Winkenwerder Jr, assistant secretary of defence for health affairs "We have no evidence of maltreatment by physicians, or of physicians participating in torture or torturous activity," he said. "We just do not have evidence of that." \ \

What world does William Winkenwerder Jr think we live in anyway?

It was the revelations that the signed sqiggles on the bogus death cetificates weren't made by the actual medical practicioners on charge in Guantanamo. Now, there might have been one or two involved, as has been confessed, HOWEVER, we do know that the death certificates were forgeries to cover up the crimes of bushite nazi enemies. So, count the forgeries, and you'll count the actions of the truly unjust and evil.

--

/ / No one is able to define the mission of the troops in Iraq, or for how long this mission will last. No one at all, including George W. Bush, can explain the US strategy in Iraq. This is because there is no strategy. With the Iraqi resistance raging, it is not clear why the US is occupying this country and why the US is so willing to sacrifice its soldiers there. \ \

Well the strategy is to cash in on the bushite war criming thieves spree actually. Cowardly soldier's die in Iraq, and the bushite fat cats lounge in the lap of our stolen luxuries through the leverage of the mallable dying amerkan mind.

--

/ / U.S. troops targeted by a roadside bomb have mistakenly killed two Iraqi policemen and two bystanders hours after an American warplane bombed the wrong house[..]

An unnamed bushite quote It expressed deep regret for the "loss of possibly innocent lives". \ \

Wouldn't you kill the traitor who spoke such contempt for Humanity? The rewards of indiscriminate murders against the unknown innocents in bushite amerka's ungodly name, gets yet another lowly forsaken bushite rightly killed for bad wordcrafts on a make believe sound stage they think they only have us party to.

--

/ / "In the exercise of his power to use military force, 'the president's decisions are for him alone and are unreviewable.'" \ \

/ / ``Such a blatant statement acknowledging the commingling of his official duty to ensure a fair election with his partisan duty to re-elect President Bush, made in a political fund-raising appeal, evidences Secretary Blackwell's poor judgment at best, and the manipulation of election administration for partisan purposes, at worst,'' the report asserts. \ \

--

Breaking Camp

I will advocate full compensation for every mistreated soldier who had been tricked into believing something without reasoning.

Johnny condemns George Walker Bush (666) to death for the crimes he has committed against God's Humanity.

Let it be understood, that Saddam gave America 100 percent access to do anything the anti-Christ wished without delay prior to the needless military conflict beginning. So, every treasonous thieving bushite life taken, is done in protection of God, and the American dream. See?, TRAITOR bushite Art Bell's amerikan talk radio forbids BY CENSORSHIP anyone in America to speak in the defense of the undefended American People. Art Bell, America's enemy, with ensure that America "never" learns that bush's business partner, General Ahmad, funded 9/11's mastermind ring leader Mohamed Atta, or that depleted uranium is measured radio-active, or most especially, that billions of STOLEN American pension money is sitting in bushite bank accounts in the Cayman Islands. Instead, he'll do another show on UFOs, or bigfoot, while broadcasted to the wordless bushite grunts their dying is for naught. Who cares?, bush's war against freedom in America isn't anything bushite amerika ever wants to get persnickety about.

<http://www.chapelhill.indymedia.org/uploads/bushite-kills-bushite.mp3>

/ / Who cares? CNN is not going to cover it, we know that. CBC in Canada, they're not going to mention it to anybody. It's no concern of themselves to show a caring word for the [thieving] sacrificing soldier. \ \

The EVIL bushite liars die for no better good, but as the ungodly bringing further hardships against US innocent people they target for murder. God says, the Magna Charta says, the American constitution says, let US all arrest or kill the TRUE ENEMY bushites instead. "See lawless bushite, kill it in defense of all that are innocent", I always say as the Son of Man and Living Creator. No joy greater than saving the innocent victims of the enemy bushite thieves, torturers, and first degree murderers. WHO WOULD DISAGREE? in a true Democracy?

Every American soldier who dies as a bad guy in Iraq, dies for cowardly worshiping bush instead of Life. The demon anti-Christ as their false, untrue, dummy deity, sends them into harms way for only to steal from the innocent. The innocent left in God's trust. There was nothing that could have better been done in Iraq by bombing the country. The blind attacking of the population, along with it's functioning public institutions, brings only the STOLEN cash rewards on trading in the American soldier's LIFE as a fascist criminal. All that is bought to by putting cowardly

bushite soldiers in bush's un-needed conflict, is to steal from their very own families back home left almost completely undefended. [Have no fear, Johnny Wizard's here!] A criminal military force that deems some soldiers from Apartide fame as "un-accountable" to American or "Iraqi" law, while paying them a thousand dollars a day or more as rewarded racists who fight allong side black and Hispanic dying bushites, to not allow equal rights for those classified by different colorations. Allthewhile with spokespeople smattering the sacrifices are to bring democracy together in Iraq to arrest bushite for thieving then? [No matter whomever you are, George W. Bush is truly evil to God in YOUR name too see?] Regular Joe in the Army, 47$ before expenses concurrent and impending.

I will advocate full compensation for every mistreated soldier who had been tricked into believing something without reasoning. Example: those who had been taken in criminally to handing over their military pensions for five year loans at 56%, or a 20,000 loan paid in five with 60,000. No competion exists for this racket because it's an actual crime scene. Guess where American Gis can hear the sales pitch advertised? The Army Times.

No thoughts of understanding are expressed (OR COULD BE) from the soulless bushite on why they are in Iraq dying, or why depleted uranium is harmless, or why depriving Iraqis of medicine along with food and water, is a ploy to win the hearts of every man who owns a gun. Or why the bushite demands through the censorship of tyranny, that Our Humanity has no rights to speak for our freedoms and liberty, or on behalf of Iraqis who have had billions of much needed dollars stolen from themselves by the bushite enemy. (The billed for taking bushite soldier itself, will not receive a penny of the ill gotten gains, just like their own grand parents were robbed of the pensions, and the bushite couldn't find a word of outrage to say against their false idol then either.)

/ / As the soulless disciples of the enemy anti-Christ, Our Mr. bush Jr., their "officially" granted legal immunity from all prosecution means nothing to me as a honorable man defending my humanity, or as living Creator, who brought all into this new world to be free, and can just as soon, take you all nazi bushite out the old school way. \ \

The ungodly evil bushmob fascist totalitarianists are pushing to have US specially arrested. The demon anti-Christ enemy forces have gambled an attempt to find prosecutors and judges, lawyers and defendants, who together wouldn't let the truth be spoken in our own defenses. I have had many discussions with the National Security branch of the RCMP, CSIS, the Secret Service, the FBI, and several commanders in the Canadian Military, and WE all know, this upcoming trial is something a great deal of many are lookiung forward to, however, an agent of law recently approached me to warn, some are working to try having me arrested without bail, and spend maybe a few years behind bars before a trial could not be postponed any longer, all in an attempt to try stopping my words of truth that represent the interests of all defendable legitimate legal enforcements. Canada's system of checks and balances, and our honorable police services have too many good guys in place, to want to silence my calls for Justice by measurement. And, up until now, our security people have advised the bushite case would never fly in a public court room, for Johnny Wizard would just make his case as it stands FACTUALLY DOCUMENTED along with that which was FALSELY ALLEDGED, and the wealthy do nothing corporate news agencies would be caught as culpable to being accessories to first degree murders in New York City, where they deliberately with malicious intent, refused to report on the FBI's findings that General Ahmad funded Atta, or that demon George W. Bush with condi and rummy, had a top secret CRIMINAL plan to invade Afghanistan dated September 9th, 2001. Just like still, CBC and CNN refuse to report any human concern for those murdered irrationally by bushite in Iraq today. No concern for those Humans, but in Asia, where bush isn't yet anyway, thieving in the wide open from God, they can try to make up for lost respect by claiming those People are better People worthy of our commpassion with wall to wall coverage on the suffering we have little of chances in preventing. But for to stop needlessly droping tons and tons of toxic bombs into our Living Earth. It is the bushite enemy who refuse to allow YOU speak in your defense as an Earthling.

However, this being said, I have been recently informed that, since the godless bushite enemies would wish to have our freedoms censored, it will likely be pushed to do so without a public trial allowing a jury of my peers to judge the case accordingly. Up until recently, Guantanamo could never happen in Canada. But now in Canada, the enemies behind closed doors are talking

about sending intelligent innocent people away to be tortured for sadomasochistic satanic tendencies, and further have argued to no one that persecuting People in Our names without evidence, maybe isn't such a bad idea, when you think of all the people we could rob our humanity from like the "popular" and "Democratic" bush regime does. Bushite corporate new censors are fighting for a return to the dark ages. Don't let this happen to YOUR world. Care not for my freedoms as an honorable man who stands with America's FBI, and your given up life wont be worth nothing but as yet another sacrifice to bring further glory and stolen riches to the American cop killer, pension thiever, 9/11 perpetrator, war mongering anti-Christ, Your unbelievably EVIL Mr. bush Jr.. The enemy of God anti-Christ who continues to hold your real life in mistrust and dishonor, while wealthy corporate "celebs", talk freely about their pride in such ungodly sacrifices as Christ's forsaken name.

I ask ONLY you to argue this paper with your best intentions, for I will perhaps not receive another chance to publish, if as usual, the Internet community at large extends me little support in my UNCHALLENGED assertions on who truly committed the crimes of 9/11. A single bushite corporatist sends a complaint to a Internet provider alleging I talk "spam", therefor, without any hearing, private owners are threatened to lose their privilege to communicate, by an enemy bushite protagonist who exercises his "authority" by stating only, "spam", and not even providing my actual post in it's entirety. One Internet service was shut down for the sole reason that discussing George W. Bush as the 9/11 perpetrator in tx.politics, was against the rules, for such subject material must be confined to only a American nation political forum. I talked to the kid on the phone who made that power decision on behalf of all usenet, and let it be known, he knows what he's doing. But "they" can't do this everywhere. I can not "take over" your big old lonely world that you must work to protect for yourself as an equal citizen sworn to freedom. I have written all I need to say about Justice and Freedom, and if the human race can not still find enough care for themselves to propagate my writings for others to read, or demand Art Bell be removed to allow Johnny Wizard to debate the ungodly dumfuk bushite vermins, there truly is no hope for US continuing.

Johnny Wizard

/ / Webb reported that U.S. law enforcement agents complained that the CIA had squelched drug probes of Blandon and his partner Norwin Meneses in the name of "national security." Blandon's drugs flowed into L.A. and elsewhere thanks to the legendary "Freeway" Ricky Donnell Ross, a supplier of crack to the Crips and Bloods gangs. \ \

/ / The Press Release, just issued, headlined "Conyers Alarmed at Efforts to Obstruct Ohio Recount Effort, Calls Witness to Monday Hearing to Detail Such Efforts", outlines the troubling reports, discussed here yesterday, of Ohio Sec. of State J. Kenneth Blackwell (also Co-Chair of the Ohio Bush/Cheney Re-Elect Committee!) reportedly attempting to obstruct efforts by Green/Libertarian Recount Volunteers in Ohio over the last several days. \ \

--

/ / The "Texas Strike Force" members paid their way to Ohio, but their hotel accommodations were paid for by the Ohio Republican Party, whose headquarters is across the street. The hotel worker heard one caller threaten a likely voter with being reported to the FBI and returning to jail if he voted. \ \

/ / In a half-dozen precincts in Franklin County, people who were not inside polling places by 7:30 PM were told to leave - even if they had waited in line for hours. This is a violation of the Voting Rights Act. \ \

/ / In other words, the exit polls were made to conform to a political decision to declare Bush the victor. \ \

--

<http://www.whatdoesitmean.com/index575.htm>

/ / The massive US Intelligence Reform Bill weighed in at over 3,000 pages and though unread by individual Members of either the House or Senate nevertheless passed all of the legislative hurdles needed in order to become law. \ \

TREASON BIG TIME.

/ / The contract company blamed for the bad food is identified as a small, Qatar-based firm called American Service Center. \ \

/ / From snatch and grab operations to warantless searches, Patriot Act II is an Adolf Hitler wish list.

You can understand why President Bush, Dick Cheney and Dennis Hastert want to keep this legislation secret not just from Congress, but the American people as well. \ \

/ / MIT and the Pentagon have been involved in a fraud that has promoted a weapon system that will have little or no utility and could cost hundreds of billions of dollars. \ \

--
THE SON OF MAN

/ / Anybody who supports George W. Bush is my ENEMY. George W. Bush committed 9/11 with his buddy, General Ahmad who funded the mastermind ring leader. That's according to the FBI. Any bushite who gets in my way, who says that isn't the case,

I WILL KILL. \ \

<http://la.indymedia.org/uploads/son-of-man.mp3>

<http://jerusalem.indymedia.org/uploads/son-of-man.mp3>

<http://baltimore.indymedia.org/newswire/display/9099/index.php>

/ / Mr. Sattler, if you don't want US to arrest those responsible for 9/11, don't you think we Americans should kill you? \ \

/ / They got this plan, in it's final stages, just prior to 9/11, to invade Afghanistan. They couldn't invade Afghanistan, without some sort of attack occurring that would instigate an actual war. they got this plan, and it's all about accusing bin Laden for terrorist activities, and they've spent a year or more working on it, or more. And through all the time they put it together, they never thought to include, one single shred of evidence. Knowing already as Taliban fundamentalists, through an experience that Mr. Clinton

had, it is their fundamental religion not to persecute
the innocent. \ \

U.S. deserter 'didn't want to have to kill babies'

/ / Mr. House will argue that American soldiers are
guilty of war crimes and that forcing Mr. Hinzman to
fight in Iraq would have made him a war criminal.

He will call as a witness former U.S. Marine Staff
Sergeant Jimmy Massey, who is expected to testify that
he and other soldiers shot more than 30 unarmed Iraqis,
including women and a six-year-old child, at a U.S.
military checkpoint. \ \

--

CNN.com - Aid group 'told to freeze' Falluja work - Dec 6, 2004

/ / Only about 100 families are thought to remain in
Falluja, as most fled the city before the U.S.-led
operation aimed at flushing out insurgents. \ \

Huh? Again, witness wealthy CNN "news" staffers, didn't
even bother to seek for an update on their "about 100",
that had not ever been given. Red Cresent, the day
previous to Dec. 6, no... actually reported on, Dec
3rd!, stated, (from their limited circle of reference)
they had witnessed a minimum of many corpses, of
completely innocent pro-Iraqi women, children, youths,
and men.

/ / Iraqi Red Crescent spokesman Muhammad al-Nuri
estimates that some 6,000 people have been killed, many
of them civilians. \ \

(That is discounting murdered armed defenders of Freedom
in Iraq we can prusume.)

But, again, the true bushite enemies of loyal bushite
enemies, thay'l' "bushite lie" to the bushite nation
about the "holy" benefits of, sacrificing America's
young life., all done for the glorious betterment of the
traitor demon anti-Christ liar, the war criminal, Our

Mr. bush Jr., along with his treasonous evil cabal of anti-semitic Palestinian Christ haters. A compassionate, "conservative", war mongering cabal whos warring of America is done to secretly steal further from the innocence of God in silence. Without a honest to Johnny, bushite killin' God-Man to speak on the nature of reality itself from living Creation's time-less prospective. Naturally leaving ourselves to save all of humanity with my "magic" - guitar, notebook, cybercafes, and super cool Akeido, leaves me in wonder of where life could lead as committed to freedom through justice for all?, as truly ourselves democractically represented?, Miraculous?. or will we choose as ENEMY bushite instead not to, ending to devolve ourselves from existence?

I know of some pretty, almost miraculous words in which can bring about positive change, and man, if you could see the world for America's Dream, where all People are judged not by the color of their skin, but the content of their character, the entire bushmob would be behind bars awaiting trial for treason, and the Iraqi People would have American Forces demanding Allawi be arrested for failing to explain himself regarding the needless bombing of our Humanity in Samarra and Falluja.

--

SEE BUSHITE, KILL IT FOR GOD'S AMERICA

/ / Another humiliating proposal, which even triggered debate among Marine officers in control of the city, is to force all Fallujan men to work in military-style battalions, reported the Globe. \ \

This is the best the ENEMY bushite could dream up in all possible worlds?

/ / His company of tanks and Bradley Fighting Vehicles had roamed the eastern third of the city [Falluja] for 13 days, shooting holes in every building that might pose a threat, leaving behind a landscape of half-collapsed houses and factories singed with soot. \ \

--
<http://www.wsws.org/articles/2004/dec2004/iraq-d06_prn.shtml>

/ / Of course, none of the assembled media pointed to the absurdity of Bush's comments. \ \

--

<http://billmon.org/archives/000172.html>

/ / Bush administration official says: "Saddam never had WMDs, and we never said he did." \ \

--

/ / Goldsborough said the reason he was given after the fact is that the column, about why Jewish voters overwhelmingly cast their presidential ballots for John Kerry, was "offensive."

"The publisher said it might be offensive. To whom? \ \

--

/ / twenty-seven Israeli pilots indicated that they would no longer fly missions in the Occupied Territories (Boston Globe). The pilots said "We veteran and active duty pilots are against carrying out illegal and immoral attacks" and they "refuse to continue attacking innocent civilians." \ \

--

KILL ENEMY BUSHITE FOR OUR LIVING LOVING GOD MAN

/ / They should put dynamite in their behinds and drop them from 35,000 feet, the whole pack of scum out of that jail."

Remember, these are the same prisoners that the Red Cross estimates 70 to 90% of them were innocent and later released. \ \

--

/ / It gets worse. We already knew about the Franklin County, Ohio, precinct that tallied 4,258 votes for Bush when only 638 people had actually voted. \ \

--

See? The bushite knows that bush murdered thousands of Americans on 9/11, yet, will advocate fascism, to censor America, from finding the truth for ourselves.

That enemy of God, the demon anti-Christ told US the conflict he began, was because Saddam wouldn't let the inspectors in. While, corporate nazi whores, refused to correct ourselves on our sacrifices, for they enjoy remaining impartial, when it comes to the crimes they inflict upon our humanity. Enemies to all humanity CBC and CNN are by refusing OUR facts to speak for themselves. No betterment could be garnered, by the demon anti-Christ's war crimes against civilization, WITHOUT DOUBT. And, it's only the enemies of our dumfukked and dimmer soldiers, in corporate mind

control, who refuse to allow anyone to state THAT FACT,
for, the enemy bushite would be exposed, and America
would be hunting them down with the Law as the traitors
to freedom they clearly are.

--

<http://www.theallianceforddemocracy.org/html/eng/2180-AA.shtml>

/ / "We cannot be the home of the thief and the land of
the slave." \ \

Bush Lies to Canada

Demon bush spew "I made some decisions obviously that
some in Canada, didn't agree with. Like for example
removing Saddam Hussein, and enforcing the demands of
the UN security council."

Saddam was not found in violation of 1441, so the war
criminal anti-Christ's demands were not our world's, nor
that of the UN Security Council. How does thieving our
assets, destroying our infrastructure, and
indiscriminately murdering more than a hundred thousand
innocent people, (in turn to sacrifice more worthless
bushite nazi teens) bring about their closer fraudster
bushite "Freedom"? Again, CNN, and CBC let the demon
liar spew his hatred of our liberties, without factually
challenging his lies with our un-debatable established
truths. CNN and CBC would "sell" seeing our dimmer
youths sacrificed as bushmob thieves through blatant
bushite lies, to truly, steal our freedoms and liberty
with further murders by proxy.

/ / .. or when [bush] just told you for no reason
possible, why American soldiers are DYING, "Saddam
wouldn't let inspectors in", \ \

This should be a time when the People rise up as angels
of mercy, and hunt with Law to kill George W. Bush,
Rumsfeld, and Condoleeza Rice for the crimes committed
on 9/11. Just because the corporate T.V. doesn't
mention the facts to draw our own conclusions, doesn't
make it not so out of our realms of expertise
as Freedom's true represention.

This is Hockey

US general John Sattler declared: "We have liberated
the city of Fallujah."

Sattler openly lies to the lives of America with this
insult, and the bushite nazi dumfuk, is too stupid or
evil to frag him as enemy proudly for it. The People of
the world, look, see.. bushites are murderous liars,
cheats, and thieves as the enemies of America, who even
lie to THEMSELVES on how many have been sacrificed to
blood the coffers of the American pension thieving war
monger bushite 9/11 cancer. A liar nazi bushite
commander would sacrifice his nation, along with own
family, before saying a word in defence of our freedoms,
our humanity, or our God. COWARDS. American nazi
bushite commander gets killed american nazi bushite
grunts, in dreams they too, can financially profit off
the talentless continuing THEFTS for enslavement to
sacrifice themselves as fascist tyrannies. Hmmm. but
the nature of American freedom, is to be one as everyone
being equal scores. "Gee, maybe some day even you could
be Presidential."

Weak intellectually, prone to cuss, the bushite nazi
dumfuk, is a worthless piece of crap.

<http://bellaciao.org/en/article.php3?id_article=4591>

/ / I have the impression that there are no other words
except "fuck" and "shit". Each communication, each
order is accompanied by a flow of 'fucks', 'shits' and
'bullshits'. I look at Americans with a pity.

Among the "colored-skin" GIs "Latinos" are largest
group, then Africans and semi-Africans. The officers
are mostly whites but there are also blacks... But I
cannot understand at all, why the US Army soldiers speak
broken English!! \ \

/ / During the five days, while the count was yet
conducted, more than three thousand wounded passed
through our hospital. These were the people who lived
nearby. The people who could be delivered to us.
Nobody knows how many people in the city are dead. \ \

/ / I cannot recognize the city. Only ten days ago it was an Iraqi town with its regular for centuries Arabic life. Boling bazaars, noisy streets. And here I am going through the empty dead city, between the ugly "pyramids" of destroyed buildings, broken streets, whole quarters wiped from the face of earth. \ \

--

old nazi tricks

/ / The Red Crescent's Falluja coordinator, Jotiar Nafaa, estimates that between 150 and 175 families are left in the city that once had a population of 300,000. \ \

REUTERS up to their old nazi tricks again. Jotiar Nafaa, "coordinator", should surely know, that it is 175 families that had requested for the help of Red Crescent totaled several days previous, (without phones, nor abilities to leave their homes (150?)), NOT, "left in the city". [THINK: how could they possibly know? (nazi bushite whores were ordered to murder innocents indiscriminately as enemies to God)] Also, is "Jotiar Nafaa", the same woman hater, who LIED in REUTER"S anonymous hand previously, as the Red Cross, that the women held illegally as hostages by the thieving evil nazi bushite forces, didn't really exist? (and who the "sovereign" Justice system of Iraq, along with World opinion, God, and JOHNNY had demanded to be let go for lack of any real criminal charges? (despite CNN and CBC WILLFULLY refusing to report on the issue as important. (You know, INNOCENT women held hostage by bushite goons who acquiesce COWARDLY for rapists and torturers? (Just like Jew killer Ariel Sharon never gets a fair mention by "America", nor Zarqawi, as he was in the second Bigley flick, right before Samara.)))

LOOK AT THIS - LOOK AT THIS - LOOK AT THIS

Aljazeera.Net - Aid trickling in to desperate Fallujans

/ / The organisation estimates that only 150 to 175 families stayed in Falluja after the start of the US-led offensive on 8 November \ \

The organization does not estimate the incorrect fantasy conclusion held by this pro-irrational Bush article from Aljazeera.NET. By god Johnny, where tell us could such lies begin at? Well, let's go investigate... If as it is, a misrepresentation of Red Crescent's actual findings, wouldn't you think "they" would put out a press release to correct this falsehood of public claim?, to suggest 150 remain in a city the size of 300,000+?, but no greater than 175? without access for

numbering by anyone, but for the only near 15,000 HUMAN BEINGS known escaped as refugees??? Or, are the "reporters" just conveying the "facts", by putting no investment in our validity? Leaving us for further victimhood, by hiding ourselves from the war crimes the anti-Christ bushite nazi savage commanders have committed in my name, America's name, God's name? as our enemies?

Our cause as Humanity is for freedom's reign, not to sacrifice Humanity as misled bushite nazi facist teens further, so bush, condi and rummy can fi-nah-lly escape "The True Patriot's Wrath", for the crimes they committed against Freedom America on "bush win", 9/11. So... Why so do I think Justice is going to get GW, making no mistakens? Because the Patriot's Patriot is you too my sworn believer, and now that's this: America's craftier than that George Bush Jr. makes living out for, in "our"-OWN news broadcasts. As the "censored" contributors who learned our gathering skills some time ago already, I say, Freedom is paramount. Mr. bush's unbiased corporate news agenda doesn't hold America to an account before the Lord, nor to God as being, an honest spoken word, or deed of good measure. Of friendship, of kindness, of compassion and caring for our fellow human beings. I have rights too you know. As cowards, the bushite refuses to defend the innocent they rob and murder from to serve as enemies of Life, done in to die pleasing their false idol, corporate america's glorious leader, the un-elected dictator, Our Mr. bush Jr..

It should be further noted, as reported, that all aid agencies contributing have accounted for only near 15,000 families stationed in refugee camps that escaped the indiscriminate anti-Christ demon bombing campaigns. So, total deaths tolls could exceed 200,000 just for Falluja alone., what with the napalm, land mines, 1000 lb bombs, snipers, tanks, mortars, essential services, police protections, denials of foods or water, thefts, vandalism, and so on. All along with the refusal to allow the People to escape before hand, or even enter now. I've only heard that the nazi grunts will only allow the "staff" of "Red Crescent", to quickly as can be, come into the demolished city, and dispose of our corpses with bulldozers likely. You know?, any males between 15 to 50?, like their "Hero", the bush family's Hitler regime did. You tell me, would you enjoy as a True Patriot Warrior, killing a LYING enemy bushite nazi bomber, on behalf of saving yourself and family, God and Humanity? God?, that the demon anti-Christ disciples

murder to steal from US as the innocent? To kill an evil and mindless devaluating corporate bushite facist slave, is to save the untold lives of thousands of US innocent they target indiscriminately for criminal plunder. Dying as cowards too weak to defend their own country from the neo-con conspirators, they die. Die.. Get this measage out to the American forces, and stand back, cause America's gonna win this fight for freedom, or die as slaves remaining unworthy to a blind comitment of tyranny by furthering enslavement against our Human species.

Continue doubting in silence fledgling Patriot, and bushite america's war will continue refusing to speak on it's needless sacrificing through bushite criminal decree. We know, wealthy con man Art Bell, Limbaugh, and O'Really will try and refuse such truths discussed in Your America, care for the lives of sacrificing American teen soldiers are of no concern to their profit margins., so far. You, my friend, just need to try starting a demand for justice as Freedom commands. (And, if you wish, you can thank us with a small cash donation to help me escape this nearing starvation.)

I'd, as the Son of Man, (but you can call me Dad.) proudly teach, or kill godless thieving bushite to save the lives of any child, and so would the rest of Humanity likewise. There is no known fate worst, than a Mother Nature scorned, or near 7 billion People really very angry with you.

"if the USA's honor can go along with these [bushite] tactics . . then the USA is a country without honor."

And, boy, real America wouldn't take kindly to George W. Bush Jr. as understanding, the elected President has leadered the murder, of thousands of decieved Americans as the innocent, all to only steal from, as the left "officially" undefended. Hell, as the true Leader of this Free World, and holy roller god child, George W. Bush Jr. pisses me off to no end, how about you?

/ / Washington says the Falluja campaign was necessary to bring the Sunni Muslim city back under the control of the central Baghdad government ahead of planned Iraqi elections in January. \ \

Reuters up to their old nazi tricks again. It was only mindless nazi savages who indiscriminately murder good honorable people, who advocate thieving and torture, rape and murder, and the willful destruction of America, that were banned from entering the Holy city.

No evidence, so then, for what? What but to get more cowardly american marines dead, to serve soullessly further - as the stolen riches of the evil enemy demon anti-Christ, evil personified, Our Mr. bush Jr.. (the same from 9/11 fame)

<http://www.truthout.org/docs_04/112604I.shtml>

/ / By targeting civilians, he said, an army could advance more rapidly. ``Air-delivered terror'' effectively removes civilian obstacles. \ \

Pure, unadulterated fascist nazi evil. "Never again"? Killing un-arrested bushite (Saudi wahabbi) commanders, is like killing the enemies of America, Humanity, and Jesus' God. Do ourselves and Johnny a great big favor, when you see a loyal bushite nazi grunt, thief and murderer, imagine, "yah, that's right, that's what being a kind neighbor is all about, for Christ said so in John's Revelations." Bushite! your false Idol religion is too stupid to remain for dying spark under the anti-Christ's evil criminal dictatorship of, wannabe dumfuks. I'm Your God see, and Your coming and going. As for Royal King Johnny, he's just standing in for this time being,..' hey you!, pay no attention to anyone behind what curtain! Boo!

America is wonderful to truly believe of it as in the making. So, let's get the work done that needs doing, so God can get back to trying to enjoy some time at home. I'm here for a good time, not a long time, and the sun don't shine every day. So get off your asses, and demand some real Justice for Christ's sake. Johnny has awoken, and he's cranky they say.

>
> lamentfully,
>
> Dave
>

I look at the comming of Digital as a great chance for me to pickup some good MilAir scanners at rockbottom prices....

Been in scanning for years, currently 18 scanners sit on my desk, not ONE monitor the local trunk system (EDACS non encyrpted).

With all the Aviation, MilAir, NASA, US Customs, and Military (all of which are non-encrypted, non-digital, and most in AM mode) there will be tons of scanning listening for years to come. Aviation will never in our life time be digital (or the lifetime of our children), heck it will never be FM in our lifetime (or that of our children).

Just remember, Public safety is only one scanning target out of a target rich enviroment. And personally I find public safety one of the boring monitoring targets (except for when Daytona runs their drug & prostitute stings which is usually good for a good laugh).

Don't be silly!
If you want to block the mind reading satellites there's no need to waste your money on a cell jammer when simply wrapping your head in aluminum foil will suffice...

In article <sw7Qd.603$hL3.432@newsfe2-win.ntli.net>, bigrikk@fsmail.net says...
> What is the point of owning one of these

It's probably to stop the secret NASA satellites from downloading your thoughts using the mobile bands as they go over. Utterly pointless of course, as they can do it just as well using infrared laser beams from televisions.

its highly illegal in UK and psoting on groups like this that are watched by
OFCOM could cause you problems

but as someone who only uses mobile from time to time,mmostly have it
switched of becasue i too hate phones keep ringong i would love to but
jamming is not on

what if some people need there phone for 999 work and surveillance/or 24 hr
call out doctors and so on

regards,Paul

Do we really need hourly updates to your fuzzy pictured auction ?
This is your 4th time, and you seem kinda pushy and desperate to sell it.

We don't have 'movie theatres' here, we have picture houses and we have quite
enough Yank rubbish already, thank you.

You want some rubbish...

Pictures are inanimate objects... a "picture house" would be something that shows still images (Slide shows anyone?)... I think it would be VERY exciting watching a still image, don't you? I'll stick with my "movies," thanks... You have fun with your "pictures"...

Oh, BTW, I'm reply from one of those "YANK" news groups. If you don't want to see my postings, then keep YOUR RUBBISH to your UK groups and stop cross-posting!

Main Entry: 1pic&#65533;ture
Pronunciation: 'pik-ch&r
Function: noun
Etymology: Middle English, from Latin pictura, from pictus, past participle of pingere to paint -- more at PAINT
1 : a design or representation made by various means (as painting, drawing, or photography)

Yes it is illegal in the UK to use these devices but companies in the UK make them and there are plenty of companies selling them. Here is one company and the legal note they have put on their site:

Note for UK customers: Cell phone jamming equipment is illegal to use in the UK as it violates sections 1 & 13 of the 1949 telegraphy act, we are therefore unable to supply cell phone jammers to any UK customer with the exception of certain military and government departments who have the necessary authorisation from the UK Office of Communications (Ofcom). Please note that no exceptions can be made on this policy.

http://www.globalgadgetuk.com/cell-phone-jammers.htm

Also a news story about people using the jammers in the UK

http://news.zdnet.co.uk/communications/wireless/0,39020348,39116039,00.htm

The globalgadetuk shop certainly is worth a look so you can see what people are actually selling and what they will do.

regards John

964. Patrick AFB Area Log - Mon, 14 Feb 2005

Newsgroup: rec.radio.scanner
Date: 2005-02-15 06:03:05 UTC
From: AllanStern@aol.com
Message-ID: <9e.201fd7b9.2f42ea99@aol.com>
Source record: 14825

Patrick AFB Area Log - Mon, 14 Feb 2005

BRONCO 01: OV-10D, US State Dept Intl Narcotics Mission, Patrick AFB.
9:15am: Departs Patrick for local training mission.
[133.75]

JOSA 657
10:19am: Area transition.
[119.825]

BOLT 11: KC-135R, MacDill AFB 6AMW
10:39am: Area transition.
10:50am: Inbound MacDill; Write-up: #2 Engine starter valve failed to cut out during start. Coming home early because receiver acft left the track early.
[135.075, 119.825, 133.475, 127.2]

JOSA 224: C-21A #84-0074
10:49am: Inbound MacDill with four DVs; rqsts 3500# fuel. [372.2]
NOTE: DVs might not be welcomed at the red carpet, and fuel may not be ready for JOSA 224 at MacDill because he was passing this information to Patrick PTD instead of MacDill PTD (same freq), and neither side of the conversation realized it.

LIMA LIMA 56: P-3C, Jacksonville NAS VP-30 "Pro's Nest"
10:59am: Touch-and-goes at Patrick.
1:40pm: RTB NAS Jax.
[132.65, 269.375, 134.0]

NASA 913: T-38N #65-10355, NASA-Johnson Space Ctr, Houston.
11:11am: Cleared to NAS Pensacola.
[128.55]
NOTE: For the past two weeks, NASA T-38s have been cleared to Pensacola as a fueling point, instead of to Gulfport, en route to Houston.

N500EH: Bell 212 #30945, US State Dept Intl Narcotics Mission, Patrick AFB.
11:58am: Departs Patrick AFB to Ft Lauderdale Exec.
[124.35, 133.75]

AIR TRANSPORT 300: DC-8, Air Transport Intl Little Rock (USAF Contractor).
12:15pm: Departs Patrick to Antigua.
[133.75, 132.65, 119.825, 135.075, 134.8 Mia Ctr @ Nassau]

DIAMOND 07: S-3B, NAS Jacksonville VS-30 "Diamond Cutters"
12:20pm: In offshore Whiskey Area.
[267.5 Sealord]

VADER 06: C-130H, Youngstown-Warren RAP OH-ANG 910AG.
12:30pm: Departs Patrick after RON for landing gear repairs.
12:40pm: Lands Rnwy 23 at Avon Park Bombing Range.
[133.75, 132.65, 373.2, 292.2]

N4667B: CE-208B #208B0163, US State Dept, Patrick AFB
12:55pm: Lands Patrick. Passed TSA #22749 to Daytona Approach to be
allowed into Patrick. ATC did not realize N4667B is Patrick-based.
[132.65, 133.75]

LIMA FOXTROT 07: P-3C, Jacksonville NAS VP-16 "War Eagles"
12:57pm: In Whiskey Area, with Lima Lima 27.
[267.5]

LIMA LIMA 67: P-3C, Jacksonville NAS VP-30 "Pro's Nest"
1:12pm: In Whiskey Area.
[267.5]

REACH 0466: C-5A #70-0466, Kelly Field Annex 433AW 68AS
1:25pm: Departs to Stewart ANGB, NY.
[383.0, 372.2, 344.6, 133.75, 132.65, 134.0]
Patrick TG 36512 re loading acft, weapons, etc.
Photos: 062MVC-361, 362.

Dog 01: F-14B, Oceana NAS VF-143
2:45pm; Working at Avon Park Bombing Range, Placid MOA.
[292.2]

DARKSTAR: E-3 AWACS Mission Crew.
3:48pm: Working with MAKOs (Homestead F-16s) in W-465, Tarpon Range, near
NAS Key West; ACM.
[323.1, 270.6]

N21NG: LJ-35A #343, Northrop Grumman JSTARS Facil, Melbourne FL
4:00pm (approx): Departs KMLB.
[118.2, 132.65, 124.8]

BOLT 12: KC-135R, MacDill AFB 6AMW
4:20pm: Inbound MacDill; heading seek button broken.
[311.0]

DOS 671: UH-1H 73-21671, US State Dept Intl Narcotics Mission, Patrick AFB.
8:05pm; Lands Patrick.
[133.75]

JOSA 658: C-21A #84-0100
8:36pm: Inbound MacDill with DV Code A-4 plus 1 and 1 Space A pax.
[311.0]

An "oral thermometer" measures the equivalent "noise temperature" of
the tirades that spring forth from the mouths on each of the two faces
of Tony B Liar, whereas a "rectal thermometer" measures the temperature
of faecal gases.

Hmmmmmmmm.....I see the reason for your puzzlement.

The ones designed for rectal use have a rounder bulb so that they are
retained by the natural tendency for the anal sphincter to tense when
something is inserted in it. A small amount of white petroleum jelly is
used to ease the insertion.

Not sure if such things are used these days, lots of places use the
in-ear pyrometer type beasts.

One more thing, the connector will be open from the inside. You might be
able to push it out with a sewing needle.

However, most of us with a General or better class license are not going
to waste our time OR money on something like this. The FCC realizes this
and that is why they have started shutting down a lot of the distributors of
radios that are attempting to be sold as amateur, even though they are for
the CB community.
By the way, I didn't forward the original post to the FCC, but rather to
his ISP for cross-posting to a newsgroup that didn't match the post.

976. Daytona 500 scanner streaming?

I was referring to the sort used on us humans, I don't remember how the
thermometers the vet used on our ex-cat were shaped. But I remember the
cat being pretty unhappy when taken there.

Well I didn't think it was fair to leave everyone without the benefit of
my specialist knowledge ;-)

I forget where I learned this, I can say that it wasn't from personal
experience (at least not within my reliable memory).

LOL, your talking about something that is mass manufactured. They make how many hundreds of thousands of these? How many get used and abused for years, and end up at garage sales or Ebay years later still working? With ANY mass manufactured item there is going to be a few bad ones get out. That's the way it is in the real world. Of course when you get a bad one that does not make you feel any better about the 1000's of them who never have problems. If they hand made stuff like scanners, or PC's or anything else that is so damn cheap these days, you could of course get reliability up a little, but if the price was 20 times what they are now how many do you think they would sell?
This is why I NEVER buy "Factory serviced" anything. I have had a few friends who did this all the time. There are several catalogs that seem to specialize in the "stuff" that ends up back at the factory for service and is then sold. I have never seen anyone who bought a lot of this stuff who did not regularly get a LOT of problems.
I have a RS Pro 79 that was used and carried so many years you can't even read the #'s on the pad any more. It was used in the rain, has been dropped a few times, yet still works fine. The Police here went completely 800 trunked now so it has been relegated to the "junk drawer". The Pro-95 that replaced it gets the same use, I "try" to take care of it, but it gets used

on 12 hour shifts. If it ever dies, I will toss it and buy another.
I have always found that if something is "defective" it's going to show up right away. Years ago the first MP3 player I bought stopped working right after I bought it. I just went back to Wally world, bought another one, it worked fine, I put the other one back in the package, took it back, told them "this does not work, I already bought another", they refunded my money. Now that one, which is "cheap Asian junk" is working fine a couple years later. Works so well the wife and both kids got the same one and love them. You get a bad, you just have to get over it. Now if you bought it off Ebay or such you may have a lot of hassle. That's the chance you take buying from some place like that.
--
A conclusion is the place where you got tired of thinking.

Theatres and other things cultural I do not normally associate with
Yankland.

Our 'movies' places are either 'pictures-houses' or 'cinemas', more
likely the latter nowadays.

Source record: 14656

Hey,
New to the boards. Cool topics. I live in a city area and want to pick up much more than the rubber duck that came with either of my portables. I want something easy to hook up that will help me get train frequencies and maybe ships at sea (about 4 miles from my house).

I bought a Discone off Ebay, for my roof but it gets less than my rubber duck! Could be the poor coax I used, but still, I lost all the NOAH weather freq.s and I only gained some snowy CB trucker signals on 19.

I'm now looking at the indoor flexable antennas like the C.Crane 15.75" CC Super Gainer.
Anyone know these?
Do they work?

Thanks.

Do you have a book or web sources with local frequencies? You need to start loading your RS scanner with frequencies you want to scan for transmissions. This takes the most time. Is this what you are asking?

What is that exactly, I can check for you? It works with Nextel phones,
and I believe it's the only jammer that can do that at present!

And I say maybe.
I have been able to listen to all 900 fones I have tried. Im not
saying that it is not possible at all, just that all the ones I've
tried work fine -- ON TWO FREQUENCIES usually 902 or 903 and 925
through 927 I think...and I find that a lot of restaurants (not BK or
McD for instance) use a cordless fone. that I can pick up. My son got
pissed at me because I (not on purpose, just by accident) was eating
dinner and wham he started talking to his girlfriend. I almost puked.
I sorta remember when I was 18, now. I had forgotten about all the bs
and sweet talk. anyway he heard me say something to his mother and he
blew his top. Now he doesn't tie up my fone any more. he got a 2.4ghz
fone now and he has almost gotten over his paranoia.

The Crown's Crown

/ / The EVIL anti-Christ "un-accountable to American law cos hees duh president" demon bush Jr., has ordered the commitment of mass murder in our names, while his enemy bush bitch cult following in the corporate news establishments, have refused our communities to publicly address the DOCUMENTED evidence made public by the FBI. Alleging, General Ahmad, bush's business partner, was "secretly" responsible for a wire transfer of 100,000.00 to 9/11's "ring leader" Mohamed Atta, and in addition, that the demon anti-Christ, Our Mr. bush Jr,, had a top secret CRIMINAL war plan in place, worked on with condoleeza rice, and implemented in part by General Ahmad, to criminally invade Afghanistan signed September 9th, 2001, provided to and reported on by Jim at MSNBC. All centered on not apprehending bin Laden, (prior, during, or after) as a prerequisite to guarantee invasion. (, to secure a liquefied natural gas pipeline for pension thievers Enron.) THEREBY, forbidding the apprehension of the true culprits through following the crime scene leads at the real murder scene. \ \

Damn. I am so desperately in need your help.

You see my friend, there are people in this world that deprive our rights to freedom, through unjust acts committed in your name, done by hiding their true intent from our public's view. One RCMP Cnst, was able to argue to a judge that my writing was anti-government, and she needed to establish who I was, to enforce the law of, "threatening an international person". The warrant was to be made top secret, but through a miracle, was provided for my defense with a stack of bushite evil. I can successfully defend myself when speaking freely on the facts, but the Crown has deemed my voice inadmissible when it comes to anything in relationship to the bogusness of the warrant. The Crown is well aware that she holds the victims of 9/11 in contempt, but wagers, you Personally won't have the godly Humanity in yourself, to demand I face her politely, in the open, for our public good on national radio. If I try to speak of the reason I am in front of a jury, I will be found in contempt. While the very same guy who faked searching my computer for the single RCMP Cnst., was the same guy who searched my computer for child pornography. (Remember: through Usenet, images or movies are downloaded before getting to witness them.)

What did he find amongst 37,333 images?

OPENLY a woman of about 22 with fully developed breasts, is termed between ten to twelve, like of a woman's behind with womanly hips and pubic hair, ten to twelve also. And on and on and on, with those few photographs (I've seen no more than maybe 10 or 12 of), that would constitute an actual legal argument, thrown in to make it all look bad. Like a short video of a young girl standing in a bath smiling. The worst depiction they have is a video of several seconds, appearing to be a young boy being sexually fondled, but I certainly don't advocate such unbalanced behavior, believing it would be harmful in dealing with, as a growing up in through sexuality as the developing adolescent. So, knowing this then, what am I guilty of, that they are truly, as bushite, going to try to put me in prison for? Loving children? I didn't commit the sexual assault, take the footage, didn't distribute it, nor would I have kept it from deletion. Deletion doesn't even matter to these geniuses. They'll scan what you deleted, and charge you for that decision also. You can't win to continue going in silence. By continuing bushite fascist tyranny censorship for enslavement of our species, will suck for all concerned if you don't speak up for our rights denied NOW!

Think of how many curious seekers of youthful beauty out there the bushite could seek for demonization? They refuse to enforce the law regarding distribution. It would be nothing WITH A TRUE LEGAL JUSTIFICATION to block a site, or scan free public access Usenet for truly illegal materials.

But they don't.

So what the single RCMP cnst has done, is LIED about the true reason for obtaining the therefore bogus warrant, for she has refused to enforce the law on which she argued was the reason to be granted my personal belongings. The refusal of the fascist enemy bushite to charge me for the alleged criminal matter, would surely get George W. Bush arrested, tried, and rightly executed for 9/11, and then, the war of terrorism would be over. My writings on behalf of police investigations made public, and Jim at MSNBC, along with the documented fact demon bush used no evidence whatsoever in his allegations against bin Laden while closing criminal investigations, have been deemed by the, protect the demon anti-Christ at all costs Crown, as inadmissible, along with my essays in psychology and sexuality. When receiving my computers, a Cnst. --lling was told to look for the phrase, "bush is dead", he stated because the term wasn't found, the warrant couldn't be fully carried out. The quotes however in the top secret, nobody was suppose to see it, warrant provided to the judge, were from "The Trial and Conviction of Our Mr. bush Jr.", and none of the quoted text, contained "bush is dead". Then, on top of that, when they seized my property, I told them exactly where my writing was located. And proudly confessed to stand on the principles of Universal Justice, in serving for America's best. Instead of defending our rights, they are, as cowards, and what true fascism

is, attempting to help flee, those responsible for the terrorist crimes of 9/11 back in New York City. And don't you think for a second, the Crown involved in my particulars doesn't know that. An enemy of Justice is our Court in knowing directly with the evidence in front of everyone, they sell out honorable FBI officers for death, all to please the false deity G.W. for YOUR losses too my American friend. Please, again, I beg you to help my cause, the cause of every true patriot soldier, and grieving mother. To be left without Justice for Humanity in silence, is to do an injustice no real man should want to see happen quietly to another. Once I'm silently convicted, you'll be too late to help be my witness. And if you knew my mother, you'd love her too. So please, I beg you, forward this to your favorite journalist, get on Coast to Coast, get on CBC radio or on Winnipeg's local CJOB, and demand I be allowed to face the bushite false accusers wide OPENLY in our public arena. They don't let any of us on now when we speak of General Ahmad, Afghanistan, Iraq, Enron, Social Security, Health care, and on and on and on, so your gonna have to get a little more forceful with your super human will power against the melancholy return of same old nazi fascism. I shall try more from here also.

Help life out some won't yah?

--

Release the Press

In regards to Johnny's criminal charges.

Being in possession of that I know not of until it reaches my computer, puts the onus on the distributor's server to be held in the same regard equally. To argue for criminalizing the possession of materials that are granted full legal rights to be propagated, as not for sure either way then, but now that they're multiplied to others, makes little sense. For, it only increases a problem that will end up costing the public a great deal more to deride, if the said material is found to be, without reasonable doubt, objectionable from a legal framework set of criteria. Instead, in my case, they've used every impractical assumption regarding the content of what I may have witnessed. I am beside myself dumfounded to learn a picture termed of a topless youth smiling, is a sight the officers involved wish to draw me with as evidenced pedophile. A term classified to include dehumanizing personal acts of sexual assault against the rights of actual children. This is unacceptable. And, I will not be found guilty of approving such conduct. As to other depictions of cruelty I've witnessed by information gathering, I can say without doubt to any as a seeker of injustice, has motivated me personally as a public figure, to take direct steps few others do in defense of the innocent. Unlike the two officers who are my public accusers, I don't believe indiscriminately murdering people by bombing a country brings about protections for those involved for example, and yet, my accusers

proudly stated, they were supporters of such unprovoked, and unwarranted ILLEGAL criminal conduct against our children left undefended under their limited bushite haze.

Nothing will bottom this episode of my life, where as a lover of children everywhere, and a champion for human rights around the world, am judged not fit for freedom by a couple expert, pro-war "liberating" bushite bombers. [they both survived serving the military before taking up this police business as Bush supporters for lawlessness - (they PUPOSEFULLY sabotaged, the planned video recording of public evidence against Bush, that I made to the National Security Division of the RCMP in writing, and in approximately, ten separate audio recordings. [Oops...])]

The bushite bombers searched for depictions of behavior sexually impressionable readers could arguably, lose their self respect or control over, but can be found by any desperate conniver, searching in depictions of a rape scene, naked people on a beach, or in a cloud storm. So, some guide lines on how best to stop their depictions of the rights of children being breached most definitely, should be handled where the questionable material emanates, not with the quester of good taste, out looking to see what is widely, and freely, publicly available by the thousands. Again, not perceived until within the possession of the observer to witness. The classifications of all that is accepted to include in the definition of "child pornography", should not include the beauty of what it is to be nakedly human, or normally affectionate. But that is being open, honest, and beautiful, traits an advocate of tyranny through censorship will run and hide from, for they fear the private human element in our public political affairs speaking freely. Bushitism. [Think of Life, a struggling to survive for better times profiteer, and ourselves, a distant relative nobody's ever heard of till now at most.]

I've been a widely published internet psychology columnist, almost since ideas have been broadly shared as such. And my writing testifies to the subject of human rights denied, as the struggles I attempt to find, real solutions for. The artistic impressions created by the artist, like the words defined within this sentence of words, is but streaming reference points to the larger unbound projections of the manifested mind. A defined, definite conclusion on it's meaning, loses it's truer state. Recognizing the subjective relationship on communicating through media, is ultimately the reader perceiving this conclusion. It is not therefore a conclusion the reader becomes for, but is held in consideration, when creating it's over all pretext, in the form of personal insight or imagination. An imaginative state of fiction, does not preclude it from still being, a shared artistic work suspended through disbelief. I can read a fictionally exciting murder mystery, all the while knowing, the characters who suffer misfortunes, are not living worse because of me, nor to learn the

reasons someone is obtusely perverse, make me then, more inclined to disrespect real living, in a similar kind. [read anything from corporate media challenger, the lover, Johnny Wizard] The actions of a character in fiction, does not compel me to give up my own belief of reality, or a respect I grant in those who protect the rights of any child, or adult for that matter. I have many written works for example from those who accolade Bush as of unprecedented prowess when it comes to believing in the holy scriptures, but come on, who believes that make believe horror show, and how did I get to know people could be so deceived without knowing the indisputable consequence of Bush's deliberate criminal actions? The opinions I hold in reference, are not opinions I just automatically except as my own without thinking for myself in other words. If America witnessed without censorship the vicious evil bombing of God's children in Fallujah or Samara, or the torture of innocent people to death by liar Bush's satanic sadomasochists, every bushite repuglicon who voiced political support for the irrational murderous acts, would be hunted down by millions of armed America men, tried, convicted, and executed in time square, that we all know for certain without room for question.

/ / Expression that degrades or dehumanizes is harmful in and of itself as all members of society suffer when harmful attitudes are reinforced. \ \

But does the witness of such a relationship, granted only to the mind of an officer? Harmful attitudes depicted in Nazi film archives, works of fiction, or artistic expression, does not every time, have us rooting on the bad guys. For if so, police officers investigating harmful child pornography possession, would be left without an ability to even discern a care for any one. But they would and do care. We can see a need, and a honor to defend the rights of children, and I can't think of a more noble police position, to try defending those principles to the best of our ability. Not infringing on free thought access of everyone because some are arguably, more impressionable to the false view of the bushite conspirator. DISTRIBUTERS of illegal material is where the law should not be denied a place to practice. Making criminals out of what someone picks out in coffee grounds, is to say, some thoughts considered, are thoughts better left alone as forbidden when alleged thought of. That is where no god or person should be allowed to falsely determine for our selves, with what words can be thought "about", and what words can not. Of course threatening the freedom of another living individual with the law, better be based on the tangible as documented offences, otherwise, our rights wouldn't be publicly challenged for protection, but of denial. So Hammurabi came up with: A person accused of a criminal offense without any evidence is innocent, and the accuser, especially when it comes to capital crimes, is the bad guy every time. And gee, if America does that, Mr. bush Jr. could go to jail from Canada, China, or perhaps somewhere off somewhere's else where they have

laws enforced against the crime of murder.

I am a behavioral psychologist, who's not only written on psychology's pillars of understanding, but also on the struggles of lawless war committed by sexually dysfunctional sadomasochists. I was interested to watch The Learning Channel's special, The Meaning of Love, a four or five part series, hosted by "The Naked Ape"'s, Desmond Morris. This world's most recognized, widely publicized human behaviorist, reporting on juvenile properties of mutual expression between lovers, lending well into nurturing a caring relationship for each other.

Therefore, is a reader of fiction regarding adult themes, going to read all about who get their toes piggy wiggled, or the professional accountant, who at spin the bottle, becomes the lucky "loser" of a sound deserved spank or two, secretly though, underneath it all, a pedophile who thinks unclean thoughts? Examples of sexual boundaries: Is not a heterosexual, secretly gay when they play with themselves that way? Perhaps a trans cross dresser? And some men may relate to this, but man, lesbians are a dream come true. But then... well, your a guy too right?

Such normal dynamics of continuous change through development within relationships, can not be denied a place, as being mutually beneficial as human in quality, (and maybe fun,) and being, private, none of our business, almost childhood like high jinx of that moment in time. But, leaves a, any person public view of definite acceptance, intolerably immature as inappropriate across the public spectrum. Publicly get into the intricacies of private relationships with your new book why don't you with the Court now John, you have all our ears a-flutter. Grandma doesn't need to know about your proficiency at.. and I'm not the same to Dick as I am to Jane, if you catch my drift.

While two male bushite, who are now helplessly stuck appearing plastered to protect Bush from arrest for mass murder through the advocation of censorship by tyranny, could quip to us being lovey dovey, means your ripe for picking on as, the soft and mushy easy push over in the corner they see. Me? This is why bushite think allowing brave men of our communities to speak openly as would be, calmly, against the criminal dictums of the demon anti-Christ, shouldn't be allowed, because they know, the world would then recognize them for the cowardice and betrayal they hold of our human spirit. A spirit that craves for all, the end to the continuing neo-con wars with the freedom to love Life for being truly ourselves. I see life everywhere, for trying to make some happiness and prosperity. If only we would listen to reasons for believing in creating a better world where life in cherished, is a world where bombs don't drop indiscriminately from the sky in God's name left for blame by the thieving liar bushite scoundrels.

The inner world of artistic creations by story line, is a world of pretend make belief, forwarded by the observer's conclusions. I am concerned to read struggles for entertainment, to include, cruelty against anyone for sexual gratification, but all literature regarding such, does not change my respect for the rights of others, especially those of children. If anything, it makes me more concerned on how respect for another can be better served by the powers and freedom of the unshackled word.

I've seen more child pornography on the television news regarding child pornography, than I've ever mistakenly got through the internet. Providing illegal depictions for public consumption, is where the law should be exercised, but it's often not on the grounds it doesn't prosecute as many. See my point? The FBI did an expensive child porn sting, running for two years in total I think it was, and in that time, they gave away tens of thousands of images to thousands of, who knows how to copy customers, that much later, the FBI would argue were illegal to have possession of. That is like a huge wasted effort OF OURS to distribute such offenseble materials, particularly if it was sold as, "teens in action", "youthful beauty", "buttercups", "a day at the dentist", or something of some sort to entrap more crime business. For our police agencies to set exact criteria on what would constitute child pornography, and scan internet traffic for such distributors, would be far more effective in halting such proliferations. They don't largely because, they'd have to be more precise in determinations, and therefore, many would lose their jobs as then redundant. By not doing so, we can pay billions to have people arrested, labeled pedophile for witnessing depictions of God's beautiful children being normal - while then pleading guilty to avoid the public tarnish such new bite revelations would bring. Destroying families, and future job prospects of individuals such as myself, who hate the thieving, murderous, ignorant as truly ungodly bushite liars to the core of my eternal being. Currently, our legal services, can't help but learn, bush did 9/11 with General Ahmad, and are left speaking "nothing" too - in news public suits regarding the injustice they're recorded not to answer about. Instead, a couple confessed bushite, will conclude who ever witnesses depictions they suggestively reach for as inappropriate, to not possibly also, hold children, and their rights, paramount. Well, that's just simply not true. I call for the arrest of those that ran d squads against only known as innocent families including children in Afghanistan, (Tenth Mountain Division), what do the, two self confessed once blind Bush worshipping police offers, who stand as my public accusers as job requirement, have to state on that denial of our rights to cherish life and liberty? As bushite bullshiters, they don't want to answer to not presently asked public media enquiries, because being "embarrassed" sadomasochists, they then may likewise, get off on accusing community members to be pedophiles, with flimsy examples of what, in their minds, in an insult to our sworn values. Children can be beautiful, but

certainly aren't, as adults, interested in being so naked, on the six o'clock news. Do they care to make a scene bigger than it first appears? Imagine me hosting the evening news and the Johnny Jamboree, hashing it out with my opponents on the tough questions, rolling with the insults and the cash offerings, while taking time to sample the world's "best" pizza an beer joints?

Or, do they adroitly believe, they'll teach that Johnny image something or two on their own behalves for our Humanity?

George W. Bush is primarily motivated ultimately with how much they can sucker out of our public coffers, thereby in spirit, advocate censorship on my calls for traitor bush's capture for 9/11.

What they are doing is this:

My "official" court case, (Involving all good people I believe) is enforcing our Law by suggesting everything in my possession can be isolated, onto itself, and made into something I'm not of entirely. All the while pretending, we ain't at all aware of Usenet servers, or my, Johnny Wizard saves the World writings of DOCUMENTED CRIMES AGAINST YOUR HUMANITY. Writings that dominate the interest of the whole investigation, locally, and internationally. But gee, without your help, two bushite "coppers" are going to appear still pressing that bush not be arrested in their contempt of silence, while praying, I not be granted a moment in my trial to speak for my own defense literally. Well, maybe not, after all, we all change with the times. My last conversation with the said two, was quite a way back when they were asked to prosecute Johnny Wizard, and likely came back with the reply, Johnny Who? So, let's not kid ourselves, my words are quite amazing when you think about it. Well, I'd hope in these last days, before this coming media flop, they've taken it amongst themselves, to get together with the loving family to discuss anyone of the hundred or two, Johnny Wizard works of the world, and conclude, George W. Bush is truly bad news to their world's view too.

Even.

Well.. how a you been doing anyway? Are not these developing story lines to be something good going live mainstream... will we demonize the principles of Christ, in censoring ourselves like the individual person of Johnny Wizard is to be, as, being denied personal freedom by "unaccountable" George W. Bush's dictatorship of tyranny through enslavement of the human species, or, will You consider the equal freedom of a telephone call, a cassette tape recording, or perhaps, photo copier to bring us around this, we want our still living rights heard too man. Right now before we alls go it to the clink. Coast to Coast should be broadcasting for America's interest, by openly discussing the still paying costs of the bushite war crime business.

America! - bush's war is something you do not want to lose to in further dying silence. Take it from me. Be a hero. Dream of the babes! - Movie deals. Lives saved!!!

Business is business.

Look you might not care for me personally, okay, but this George W. Bush's treason of nine-eleven is an evil we together, will never, be too weak to stand against as. As indecisive humans without a leader, we will never be too few from demanding Justice be served in respect of Humanity's interest.

In nabbing those who committed treason against our America's America on 9/11, needs to be completed by firstly, following the crime scene leads at the beginning with Bush's prior 9/11 plans worked with the ring leader's financier, General Ahmad, and how Condi, rumsfeld, and Cheney with Myers, fits in the picture together as likewise traitors. The Iraq war is also a crime against humanity. All stolen monies and property must be sought, then returned to a legitimized democratic government. Torture is outlawed, and finally, all innocent people held in prisons by bushite forces, held without out charge for trial, need to be released immediately as ourselves being denied liberation truly. Let common sense prevail.

Your Kingly King of a Dreamer's dream,

seriously considering prison time to be,
a major downer for my chances at partying,

Johnny Wizard

P.S. TELL SOMEBODY!

---

for all mankind...

The EVIL anti-Christ "un-accountable to American law cos hees duh president" demon bush Jr., has ordered the commitment of mass murder in our names, while his enemy bush bitch cult following in the corporate news establishments, have refused our communities to publicly address the DOCUMENTED evidence made public by the FBI. Alleging, General Ahmad, bush's business partner, was "secretly" responsible for a wire transfer of 100,000.00 to 9/11's "ring leader" Mohamed Atta, and in addition, that the demon anti-Christ, Our Mr. bush Jr,, had a top secret CRIMINAL war plan in place, worked on with condoleeza rice, and implemented in part by General Ahmad, to criminally invade Afghanistan signed September 9th, 2001, provided to and reported on by Jim at MSNBC. All centered on not apprehending bin Laden, (prior, during, or after) as a prerequisite to guarantee invasion. (, to secure a liquefied natural gas pipeline for pension thievers Enron.) THEREBY,

forbidding the apprehension of the true culprits through following the crime scene leads at the real murder scene. See, with a talk radio program we could take calls and help any others who have some difficulty in understanding the logic of reason, as super simple thinking.

So, as many know, the bush regime is FOR REAL pushing still to have me incarcerated for speaking these truths, truths that stand irrespective of my personal opinion, or spin doctoring. Will you, as a complete stranger, but a fellow lover to life, help my cause by requesting also, I be allowed to face publicly my accusers on the, censorship for bushite tyranny radio networks Coast to Coast, or CBC national radio here in Canada? Before, god forbid, a couple, once self confessed bushite "police officers" of tyranny, (death squads against school kids, happy funders of heroin pushers, and who in silence, work getting un-informed soldier teen/bushite sacrificed as the bad guys for Bush's thieving. Done all to gloriously please the fabulously wealthy, safe at home from the clutches of power, neo-con "Cabal" of enemy traitors.) get lost in the translation. The fascist corporate interests are likely not going to factually report on my trial, but attempt to demonize me with their falsehoods and betraytals against our communities, that is now presently on going without your voice also heard raised yet for objection. A trial, where the evidence that factually establishes bush guilt for treason against all the American People will be sought as immaterial. What the evil enemy as godless bushite dogma blindly hope for is, a silently feared coercion through suggestive threat against Our entire Justice system, leaving the court to have quoting perhaps, only one or two lines written by myself out of context from "The Trial and Conviction of Our Mr. bush Jr" to a jury, while disallowing the documented facts, surrounding my allegations to be refused as my defense. [the criminal leads end at the bush administration's door step with bush's own signature, but bush, as Presidente', can't be arrested under American law, only impeached by the majority of already bought out and sold whole repuglicons.] Counting that our community of peers will have not a inkling what is contained in the very first paragraph of "The Trial...". You my friend alone, you alone, could help US change all that. I, as a single person am trying to stand on the principle, that ANY individual, that is accused of a capital offense without evidence, is UNIVERSALLY INNOCENT, as they would be tomorrow, today, and way back in Hammurabi's day also. And that by reason, the false accuser, is the number one suspect to start with. The enemy bushite MURDERERS try to confuse this extremely simple matter with the powers of hypnosis, or suggestion through the dictate of "our" television and radio cult broadcasts that promote tyranny by fascist censorship.

The nature of hypnosis shouldn't be feared, but learned from to gain a better understanding of the true human condition. Something a bushite hates like our public education systems, is where we through improved communications, halt their criminal transgressions against our better selves.

In the warrant to take all my writings, and computer stuffs, (to begin on their fishing expedition to protect the war monger demon anti-Christ,) it was argued, that the information contained within their possession should remain TOP SECRET. The document has now been made available for my defense, and here is the reason it was argued THREE YEARS AGO, to not have the charges publicly heard.

/ / FROM TIME TO TIME, the NSIS section receives threats from members of the public who after investigation, turn out to be suffering from mental illness. On occasion, proceedings under the Mental Health Act as opposed to the Criminal Code may be more appropriate. In cases of a mental illness, the publicity and sensationalism of an incident such as this one may turn out to be negative to mentally ill persons. \ \

Yeah but, what about DEFENDING the FBI's findings "copper"? Is it that anyone who stands up for Justice in America, who asks loudly for a public platform in OUR media market place, should only be considered, top secretly, mentally ill to think they have a right to contribute on an equal basis, among the oh so lauded, intellectual power breaking crime pushers of our World? (The woman hating child killers, like naive bushite nazi demon liar Mattis wear badges too don't you know?) Are we crazies to want to defend our rights to be free of murderous tyranny? Are they secretly saying on behalf of the bushite: to speak out in praise of the good investigative work the FBI sometimes does, is a bad thing for their future top secret "investigations" on Our behalf? Or is it because, if we believe in doing what needs to be done to protect Humanity from tyranny, would truly mean, evil bushite wouldn't be able to rob further from dying sacrificed as the undefended America?, and soon, wisdom by communication through science and reason would rule our better stays? Would it surely drive me insane to have our public acknowledge our good deeds that work to have freedom really reign indivisibly through Justice supreme? Anyway, Jeeze, I'm already crazy.

The national security branches of all our governments need a major overhaul in protocols. (officers who are involved in uncovering a criminal conspiracy, a conspiracy involving the murder of thousands of now dead Americans, should receive the full support of every police unit this world over as a protective measure for fellow officers. After all, George W. Bush is an American cop killer too.)

Before my site "Wizard's World Wide Works of Wonder" was taken down, I had the center piece (still available in other places) "Stand Together or Don't" as a full page spread with graphics and everything. "Stand Together..." is an essay that only asks that our standing criminal code in Canada be enforced, when it comes to the documented thieving of our communities as committed with the notoriously miss reported workings of the "cheating at play" VLT machine. I also had "Johnny's Last Stand" take a prominent position at the web page, along with "The Alien's Take". So get this: another argument made for the warrant to confiscate my personal belongings and leave the FBI out to die, was attributed to only a single Cnst., who blanketed my entire site in reference as "anti-government". That statement was the only statement made by the officer in regards to her summation of my writing skills, and was made in argument to a Judge to obtain the Warrant, just before the site fell, so I'm now, suspecting, was likely responsible for complaining it should be shut down by maybe.. badge waving?) Strangely (unknown to me until just recently) as it would happen, this same individual I had contacted over the course of several months regarding the VLTs, (on how the DOCUMENTED crime is perpetrated, and on our communities TRUE monetary losses (maths)) was the same who, top secretly claimed, my writing on Justice was "anti-government." See, I offered to come down to the station and assist with the maths if need be, (remember we're talking the thieving of literally billions and billions of dollars each year from mostly the poorest segments of our societies) to offer assistance in any way I could. (Or, to be told "fool, your mistaken".) But each and every time, I was denied access to have implemented, the protections of the criminal code here in Canada, (that usually makes our country greater than all others,) without a given reason why. [An aside: bushite irrationally hate science and reason because we're intelligent, while I, can't help but respect life by learning something from just about anyone.]

Here is what it further said in the warrant, that up until now was considered top secret. (without the warrant staying secret, the darkness can't stand the light of scrutiny, and I would be freed from the restraints of a bogus warrant to go on shouting for TRUE Justice by DEMANDING the arrest, trial, and subsequent execution of those responsible for the crimes of nine/eleven - bush, rumsfeld, Ahmad, and condoleezza rice. With cheney and myers running a close second.)

ORDER

-snpd-

AND UPON being satisfied that the ends of justice would most probably be subverted by access to and disclosure of information filed in the Information to Obtain the Search Warrant filed in support of the application to prohibit access and disclosure;

[Good guy police officers might get the public recognition they deserve in other words right?]

the Search Warrant;

AND UPON being satisfied that access to and disclosure to information filed in support of the Search Warrant referred to above might be used for an improper purpose;

[getting back stolen VLT revenues you mean?]

AND UPON being satisfied that it would be in the best interests of the administration of justice that access to and disclosure of information filed in support of the application for the Search Warrant referred to above should be prohibited to the public;

[What?, don't want US public to know bush, rumsfeld, and condi committed nine/eleven with General Ahmad? Well, now I can see why all the hush hush.]

AND UPON being satisfied that access to and disclosure of information filed 'in support of the Search Warrant referred to above might well pose a substantial threat to the interests of effective law enforcement;

[following crimes scene leads at real murder scenes not good enough for our police agencies? - US people backing up ourselves with as something worth reckoning a better future with?]

AND UPON being satisfied that access to and disclosure of information filed in support of the Search Warrant referred to above would compromise the nature and extent of an ongoing investigation;

[Well, it's only been years now. Let US ask you, have YOU called the news desks of CBC or CNN, about bush's prior plan also? Are sandwich boards, posters, and placards, a police union willing to truly get behind as the untold Justice struggle for our suffering Humanity?]

AND UPON being satisfied that access to and disclosure of information filed in support of the Search Warrant referred to above could conceivably compromise the health interests of a person;

[What about the health concerns of the hundreds of thousands of innocent people bush has since ordered murdered, along with the millions of others who will suffer the consequences of radio-active contaminations for the next few eons? National news coverage is not what I fear, I fear that no one on this lonely planet cares to hear the cries of my Humanity for mercy, or holds love for God as worth fighting for.

-snpd-

So, what now? Please don't leave ourselves undefended from the criminal dictums of the demon anti-Christ, Our Mr. bush Jr. Demon bush is not America, America is America. Look, we arrest those responsible, and we carry on, by firstly reversing almost every thing G.W. the traitor implemented. Look, when Clinton implemented change, he was able to turn the country around pretty quick. Just bring back some progressive ideas. Dump the Patriot Act, and those that voted for it, and truly bring back the Constitution with a respect granted to all Peoples regardless of nationality. Christian Palestinians are humans like US too don't you know? While fixing the neo-con war mess should start by making all co-habitants equal under the principles of fair judicial due process, meaning: freeing the innocent held captive, and arresting for war crimes among other things: bush and rumsfeld, myers and cheney, Allawi and Doud, Tommy Franks, Steven Russell, Saudi wahhabi Buford Blount, woman haters Sicko Sattler and mad dog Mattis, Batiste, Miller - along with all the rest of the rapists and torturers, and then, we.. seek out all the stolen assets taken in America's stolen name. Big job. But we can do it! God is on our side.

I was reading about "Jew Boy..." and I thought, perhaps some may misunderstand my position on Mr. Felton. When I said, "And in light of our desperate challenges today of defeating the enemies of Humanity as specific unjust individuals in "hiding", an ignorantly stupid thing to say." I was coming from a position that I felt, Greg's own superbly good and strong,

intellectual arguments on the bigoted demonization of the innocent, would find himself! at fault with, by not looking for another's view regarding the label of "Zionist". Perhaps I was being too picky, but then, generally speaking, disputing the indefinable public's perception of the Holocaust is a loser's argument. Arguments, that generally, refuse to realize, soldiers like today's bushite, would as mindless droids, line innocent humans up next to a ditch, and shoot them all dead for no real reason in particular. [Nazis took film footage early on, then banned it, because it looked so completely insane.] Just like rumsfeld's blitzkrieg, or when enemy bushite thieves dropped thousands and thousands of land mine cluster duds in Iraqi school districts, threw grenades into Iraqi homes indiscriminately before entering with guns blaring, and true Americans, like Germans of yester year, still don't have it together as a freedom force worth reckoning with, to immediately destroy, the known of bushite with American law for criminally implementing the sadomasochistic torture of completely innocent people, and in some cases, tortured to death because maybe they finally then admitted, they were in cahoots with whomever as the "terrorist". Thereby, according to America's new Justice speaker, Gonzales, no longer was a human with rights to begin with anyway. A publicly expressed contempt for US innocent, done in by the disfunctioning sub-human bushite traitors sitting in our office. I'm sure some might understand who the greatly knowledgeable Greg Felton was referring to when stating "Zionists", but just think of the Arab "Semite". Ariel Sharon will steal the definition to victimize innocent Jews with for the American tax payer to foot the bill as, but when an Iraqi Semite, new to English newscasts tells you he's a bonafide Semite really, can he therefore be completely wrong about his true identity? Or how about this: do you think, the persons never shown for public media interview as accepting to receive stolen property like completely furnished houses called those of "Jewish Settlements", contain anything but, bigots masked as religious observers? How else could they possibly live with themselves? Amongst US true believing Jews? What of Hillel do we fail to recognize in not condemning the brutalizing of the innocent in our own names left forsaken? A well entertained teen, growing up in dum-dum America, or here in Canada for that matter, will likely have little understanding of Palestinian Jews or "Zionism", (like we don't regarding regressive tax systems,) but for like a proud Catholic in Ireland, it's something stupid he's suppose to stand up and destroy himself about while in a drunken stupor turning orange regarding some ancient Roman history or earlier biblical teachings not ever comprehended entirely... But then, I thought, gee, I was the one being ignorantly stupid, because in that space where we were communicating during the recorded interview, we had just

finished making the correlation of mutual racism/bigotry expressed between Hitler and Ariel Sharon. Sharon/Hitler steals/stole an innocent person's home, then throws/threw them into concentration camps to be victimized further because they're said to be inferior to the war funded as ungodly criminals, by the ignorant and stupider than ever American tax payers, again. [See "Trading with the Enemy"] And it was there where, Greg brought forward, that too, they are some of the very same Ideologs, of both scenes, who want always to divide the masses by intolerance, through racism or bigotry, to get ourselves to die at war with our/their ignorance, while the true 'hidden' instigators, (non-descript billionaire weapons dealing private bankers usually,) bask on some beach somewhere in our stolen luxuries, not having to lift a finger to command a full course dinner. That is why bushite are currently working to even further destroy America's public educational system which is already the very weakest of our developed world, and why it is preached on television in America non-stop, invest in deregulating the world market so you too, can rip someone off with slave labor conditions to compete your good for nothing son/father with. One out of three workers, officially, in America earn ten dollars or less an hour. And repuglicons hired near homeless people at 75 dollars a day in Ohio to walk around carrying we vote repuglicon signs during the mock election. An informed populace, is a group of people growing tired of being taken for victims, who might wise up and stand for real Justice through the Freedoms of understanding. Can you imagine US speaking internationally? I can. If only You'll help me gain a platform to debate the facistic censorship deniers. The Coast to Coast radio netwrok don't want no Americans talking about why Americans are being asked to die for the bounty of, bad guy bushite war profiteering. The wealthy celebs don't have to risk their own lives, just the lives of other Americans denied a voice for representation. So, asking once or twice, and then fading away to give up ain't gonna do it. Coast to Coast only allows an intelectual one time a month to speak for maybe few seconds. That should change to weekly. And Americans should DEMAND America's serious political issues work to be addressed in an open forum like talk radio provides. I am open for challenging interviews. But again, bushite don't like free excange of ideas within our communities, for it puts their Satanic cult leader in a disfavorable light, who then wouldn't so easily, get away with committing mass murder in America, or allowing America's greatest pension thieves, to escape un-accounted.

So, I've been working on questions..

Do you not as an officer of our laws, require evidence to substantiate allegations of criminal impropriety against members of our community?

Would not allegations of murder substantiated without evidence, be false? And would not therefore, the slaughter of innocents, blamed for terrorism without a shred of evidence being known universally, be acts of mass murder committed against US interests? Or for the true believers, terrorism inflicted against G-d? (And, is this not why defining "Terrorism" was forbidden in the recent "Terrorism" conference in Saudi Arabia?)

To persecute an individual nation without a reason substantiated by evidence, would be then the persecution of our forsaken God as the innocent of US individually? Like Christ on a cross somewhere you'd be then right?

Come on, please, help yourself out man. This is Your world too you know,

King Johnny Wizard

"I share the belief of many of my contemporaries that the spiritual crisis pervading all spheres of Western industrial society can be remedied only by a change in our world view. We shall have to shift from the materialistic, dualistic belief that people and their environment are separate, toward a new conciousness of an all-encompassing reality, which embraces the experiencing ego, a reality in which people feel their oneness with animate nature and all of creation."

-Dr. Albert Hoffman

I Stand Corrected

Okay, I'm sorry, I was wrong. After reviewing communications with my home planet, it seems I may have goofed on location. I wanted to go to Earth, but it seems we suffered a data mix up, and, well, this civilization isn't nowhere near, here where I thought I was. Oops. And.... a.... another slight mix up has me mistaken on another as well too, with an out of date computer malfunction, a glitch, set me back a hundred years, those idiots, and, a, hells bells, I, was... also suppose to praise the Republicans. Doh. Sorry bout dat. Bush, I lied, my fault, I'm an idiot. Please, I hope you can except me for being wrong like I was, an, maybe next time I come back, I'll do it right the way I should. Your not so bad, and I know you would want to do the right thing, if you knew how, like I wish I could be certain for myself sometimes. Maybe at some point we could be friends. Hm, it would seem you people haven't begun evolving just yet though. My mistake again. I suppose that explains allot about my vanishing thrills of excitement about prospects, and

our unanticipated exhaustion without explanation. I thought you people would be smart enough to catch on as humans, with me being, you know, Jesus or Satan, Mithras, an immortal child of God, stand in maker of the universe and all that. So, hmm, I guess I'll be leaving shortly, to head out to my original destination, a developing planet I do understand to be years ahead older than your own, who already kinda have an inkling about not destroying life, and really have made themselves as the living, a must see destination. I was destined to a planet system revolving around who you would refer to as Bernards, being originally from deep within the supercluster you have labeled Perseus, as humans too, interestingly through God. It's a small universe after all. My transportation device is of a free energy nature, something much like you have already available, but refuse to implement. God knows why you don't, I mean doesn't. Know I mean. Ah.. No matter where you are in the universe though, as you may discover before destroying yourselves, if your conscious, and sufficiently intelligent through life to recognize yourselves as a living part of the universes, you would come to the same conclusion, no matter where you do your thinking. They are us equally, and this is true, no matter where your from, stand, or hold. This concept represents the death of ego, but not really because your still the same, you just learn more about how to get around as best we can. The same as it ever was. We, an intergalactic federation, commandeers originally under the apices of the great, we never needed a world war, Sir Admiral General D. Wesley, who's responsibilities dictated, we recognized to be our own through his genius. After being the forerunner of the foundations beginnings, we gave us all an award, and helped many find themselves, comfortably in a state of semi-retirement of which us all, our truly grateful. We in total, so far, are the S.D.S.G., Super Duped Spacegirl Group, consisting of more than twenty thousand, distinct, well connected civilizations, (fiber optics is very popular as well as free solar powers) who through good times, have naturally become friends, in this amazing, got a have a care for yourself because we understand just how fantastic you all really is for benefits, and there are many. The Universe is compassion, love and understanding, but because we are of life, and as growed ups we can also, which includes me occasionally, be greedy, hateful, and stupid. But I guess for yourselves, because life is free, you've deemed it therefore, worthless, for the shortening time you believe you are here to take from

yourselves. Survival of the fittest, we as the intelligent universe have surmised, and by you deeming yourselves consciously as obsoletes for profit politically, I guess is for the best, if you really can't figure out why you would. Hmm.. You mammals are dumb. So, I would now suggest all previous writing I've done as incorrect, and highly implausible on this matrix set. Private bankers in their private market on this planet, are clearly the best informed top secretly, Greenspan is who stands over and against our nature with his private plan is betterer, controls the world, and is in with the winners, because they own all you as money to hide from their manufactured fears of your adding abilities, because your really scared of yourself right, and that is what you are all about as them. Continue on as you were, pay no attention, it's just us losers here, take advantage of yourselves, continuing to treat the public like your, oops, I mean their corporations tell we, who you are. Continue to allow the corporations to destroy your living economy and your souls with the VLTs, while they convince you to think your stronger for robbing the defenseless illegally, like this isn't you here along this reading rainbow. Be blind to the loss of 3 trillion dollars off the market, stolen in my mind, while private bankers continue to take out your interests, leveraged with our properties over a currency that doesn't exist, sending the nation into a depression, then a war to kill all the poor stupid people. Through who, as they say, "nobody", protects your laws, and your fears of being as stupid as they all are, finding yourself isolated in their noisy universe, as we are alone apart, of all that is here silently. Clowns to the left, jokers to the right, stuck here in the middle with a little story that never has been told outright. I love love love love, the sweet things in life! Growing improbable, but still possible. Rock on Art Bell! Okay now, let it ride. Hey boo-boo.

"The power to destroy a planet is insignificant when compared to the power of the Force."

"The real geniuses simply have their bright ideas
closer together."

- Lichtenburg

A free of charge 17.33% increase: American right wing cowards also hide themselves as the world's biggest terrorist organization. They make us support military dictatorships with our capital and weapons against our wills, like the oppressors of the great Chinese people, or not demanding life term prison sentences of the current Dutch-Shell's board of murdering directors, and have the gaul to slander our hero, Castro, humanitarian of the millennia. The man the entire city of New York gave a party for, way back when they were actually educated, and could read in their spare time, in between working only one job, closer to earning a living wage. But Americans aren't suppose to remember that, to keep em' dumb. Like "The U.S." routinely says, Castro's commitment to education and health of people is not worth talking about, enof sed, get back to work part time full time with no free time to care, except of course for war against ourselves as the losers everytime. One thing leads to another. So just what am I trying to say? I've been to heavens and hells and back, and... well... it ain't so bad, and kinda fun. One and one and one is three dressed up like a nine, that, well, could be a five, and, then well, I know you like you know me, and one thing I can tell you, is we must be free, to do our own things. All mighty then!

My apologies,

J. Wizard - Demoted to 4th rank Scout

Weee!

/ / On January 27th, President Bush, in an interview with the Times, assured the world that "torture is never acceptable, nor do we hand over people to countries that do torture." [...]

Arar, it turned out, had been sent to Syria on orders from the U.S. government, under a secretive program known as "extraordinary rendition." This program had been devised as a means of extraditing terrorism suspects from one foreign state to another for interrogation and prosecution. \ \

Am I the only person who sees something seriously wrong with the picture bush's trying to say he is not of? Would not bush call for the arrest of Ashcroft? Miller? If not, why? For, he states he is at least aware of handing innocent people over to foreign nations to be tortured by satanic lying enemy traitors to God and Humanity..

--

Feel free to forward this post for publication consideration.

--
I wrote the letter following "Jew Boy..." the day a single complaint arrived to the radio station, with the threat that the ADL would soon be contacted. The letter was provided in advance of the next day, of the time scheduled for the complainant to return for a recording of the questionable broadcast. The station manager refused to give the complainant my letter, and insured me that I would no longer be allowed to produce a show for our community. Is this fair to our Jewish brothers and sisters? Is this fair to You?

Paris "And then what if you saw, all of the things thats wrong, would you stand tall and strong? Or would you turn and walk away?"

Johnny

Jew Boy Johnny and the anti-Semites

- or -

"The Zionist Conspiracy"

Monday, January 31st, around 3 pm, I called the station manager to ask how my afternoon recorded broadcast went, and to discuss the new week's tentative guest spot with an update regarding the falsely maligned, Mr. And Mrs. Benderman. The station manager informed me my phone number had been misplaced, and was managing with stress trying to put together an apology letter to a single individual, who came into the station, while the interview was still running, to demand action be taken regarding the anti-Semitic broadcast that he was certainly going to report to the ADL about. I told her the Felton interview itself was about bigotry through the demonization of the innocent, what the Jews of world war II suffered through, and, that I was a huge defender of religious Jewish teaching. I told her, to offer the individual a chance to publicly speak regarding the issue, with me, or by himself regarding Felton, to try getting specifically to what has got him so much, by himself, upset about allowing my voice heard defending Jewish rights within our community. She told me that she would likely, none the less, have to let me go to appease the sole complainant, for what if a lawsuit should result? I told her to consider her options, reminded her that it was only one single individual who hadn't even heard the show's context, and that the broadcast in every other way had been going well, doing good. She told me she was very busy, and said goodbye. Then a short while later, phoned me back to ask if I would write a letter, and have it at the station next day before the complainant arrived for his copy of the broadcast. I said sure, said it would be a great challenge, and proceeded immediately to do just that. The next day, I contacted the station to ask if my arrived letter was forwarded to the individual, and was informed no, he didn't receive it. It wasn't the apology the station was looking for, and my show was now officially terminated. I told her it was very unfair to me, to not allow him to read my formal response, and that I couldn't in good conscience, back down from defending my rights to be heard on this issue, or to allow us, as our public, to hear the complainant's actual complaint about my, freedom for all broadcast. She said she would try to get the letter to him, but that the show was over. Case closed.

Stand up for Jews, and look at where it gets you, Jeeze.

Let us not put aside, the station manager's legitimate concerns. Who has the money or the time for a frivolous lawsuit? Why do expensive independent research, when the Bush Administration can hand us all the free news they want us to have directly without any costly questions? Saddam wouldn't let the inspectors in, right? Why risk standing up for someone else's rights, when doing so, will get the (anti) Jewish-Defamation League calling you an anti-Semite (Semite=Arab) for communicating some understanding with Felton? Felton, is bizarrely quirky as interesting, for his recent book is about the demonization of the innocent, (you know? Nazi gas chambers and ovens?) and as such, we can learn from, as too, we can teach. If he'll listen. Ariel Sharon is not Jewish my friend, NOT JEWISH!!!

Open the gates, it's getting late.

John.

---

http://radio.indymedia.org/uploads/big-package.mp3

Greg Felton : "The fear is necessary for two reasons. And the principle reason has nothing to do with Iraq. it has to do with the government itself. The bush government is criminal. [...] The problem is: how do you keep people from paying attention to this? You keep them focused on an external enemy. [..] so they forment this fascistic hatred of a definable group of people. So, the war on terrorism so called, is not much a way for the United States to protect itself against it's enemy, it is a way for it to create enemies, to justify the kind of repressive measures that would otherwise be intolerable in peace time."

To whom it may concern,

regarding the January 31st broadcasted interview with Greg Felton.

May I, on behalf of only myself, ask that you pardon my failures in judgment, in not allowing what I should have gave: an immediate re-dress regarding, 'who is the Zionist label?', or 'What Holocaust are you referring to?', during the broadcast of January 31st. (bet you we can't get two Christians that agree on everything.) However, I can offer perhaps a show centralized on a chance to exercise your personal views, be they pro or con on where you think we should go from here, or whatever may have you regarding said interview. Or, if you would like, you may wish to do only, or else include, a written work that I promise, will reach as far as the original broadcast. So, actually, this could be a prime moment to have a dialog regarding racism, bigotry, and intolerance. I confess, I may be unaware, and still have much to learn, when it comes to communicating well with all others. But, I know I'm getting better, and I'll tell you, the Justice-Freedom thing, sure seems to be our ultimate calling.

I was not so surprised that the broadcast interview with Greg Felton would be considered controversial, (as every show I've ever done always has), although I wasn't prepared to hear criticism against the show as being defamatory to a group, or groups of people. As certainly that was not my intent, but however was the difficult subject addressed within the interview. The fundamental teachings of Law, as it pertains to justice and freedom, along with every legitimized religion, is that all free people should be thought of as equals to each other in vigilant protection. And by doing so, one would be serving G-d's interests. (Even if a G-d doesn't exist - an Atheist too, could become a proponent by understanding Jihad). Thereby insuring\realizing that a just intelligent life force

rules our chaotic timeless universe in service ultimately to ourselves individually. Giving us in the Torah of Moses, ``all people are created in God's image'' teaching all peoples are Sacred. And as such, would be so in God's interests to defend as the innocent. While in eternal pursuit of happiness and prosperity for all through just means.

Under Greg's definition as being a "Zionist" conspiracy, negates the failure of himself personally to recognize the public connotation is too vague, and that Hitler's Nazi Germany, like Bush's America, is politically expressing an inability to represent ourselves with respect as truly worthy of fair deliberations amongst ourselves. Sacred, every-one. (Or as in, to rise to the defense of those we know to be irrationally victimized as the godly and innocent, victimized in our un-addressed names.)

Greg "This is why the Holocaust is such a very dangerous thing to talk about because, it's not really understood. It's preached at us like a sermon. We're suppose to accept at face value what we're told about it, as if to, criticize it, is some how disrespectful. Much of what we know about the Holocaust has been propagated by the Zionists, and can be shown quite untrue"

I replied shortly later "One thing about the whole situation is that innocent people were targeted for murder. End of story. That's what the war was. All wars are like that."

Greg's mistake I believe, centered in his Zionist labeling through an apparent bigotry expressed, and as such, was too narrowly defining the larger established history of the Holocaust, as being the struggle of the human species in halting, the demonization and then subjugation of the innocent millions, Jewish or otherwise. Perhaps it was strangely on his part a testimony to a real struggle we all have when it comes to identifying ourselves to others. Considering it is the exact subject matter he wrestles with in his book writing, regarding our corporate media's perception of ignoring an innocent people's concern or cries. That said however, for Greg to blankly criticize Greg's false construct of what is publicly understood about the Holocaust, is to deny that much for sorrow and suffering took place against the whole of Humanity, especially, of those who held the practiced Jewish faith. To think the nazi regime would have the gas chambers and the ovens, while the whole of humanity were not strong enough to communicate the unjustness of it all to the German people while it was happening. I have read of a recent documentary that provides film footage of nazi soldiers committing the worst war crimes imaginable to god loving Jews, interspersed with film from the same dated period where, the

German people were living civilized lives, left unaware of the atrocities that were being committed against God in their names. Same as America and Canada today, with Fallujah's 300,000 People being, the undeniable example. Or, are you too, a convinced denier of that which is fully documented? (Needless and irrational was the indiscriminate murder of the people of Fallujah, but for to have more American soldiers sacrificed in a conflict created by an unjust as immoral totalitarian dictate.) The Holocaust deniers are those the same of today, who refuse our Humanity to nationally communicate those screams of mercy, or for justice regarding the People of Iraq to be served in our true interests as legitimate. More than ten million Russians died fighting the evil eugenic scourge of the "superior" nazi regime, and like those in Poland, Britain and France, as elsewhere testified our established history, (albeit only later), the sadistic ungodly as lawless barbarity that Nazism inflicted upon the general masses, went largely undeterred from our "informative" television and radio broadcasts. The same, almost word for word, and action for action, can be found in Rumsfeld's "blitzkrieg". Bush's freedom by tyranny doctrine. Or the criminally sanctioned unchallenged news pronouncements of a Mark Kimmit, Buford Blount, Steven Russell, Mattis, Allawi or Sattler, when it pertains to accepting without our objection, to the victimizing of Iraqis collectively as an indiscriminate act of criminality, like murder. As like in the policies of Ariel Sharon, where an innocent, haven't committed an accused crime in their life Christian Palestinian, is denied the earned home they worked and paid for, on a parcel of land shared up until recent times for countless millennia. My personal struggle has been to inform the public on the "forgotten" importance of established evidence, being the only requirement to convince ourselves on who is a bigot, tyrant, a criminal, or a murderer. Will you not therefore, as a fellow humanitarian of this shared world, speak against those you know of, who victimize the innocent to thieve from? Sure you would, if you knew as much for certain about God and this universe, or the under reported, freed to go General Ahmad, funding the mastermind ring leader Mohammad Atta of Bush's 9/11 game. But will together our Humanity ever learn? Well, my plan is to search for guests to speak with, that I'll try not to offend early on. Greg knows, like the Pope knows, as every legitimate police officer worth their grain of salt knows, as so too does include a great many Jewish Jews, George W. Bush used absolutely no evidence to substantiate his therefore, false accusations in our names against bin Laden, while then ardently with Cheney, worked to close outstanding criminal investigations regarding their extremely suspicious behavior. All according to his official publicly documented plan. And speaking the news as thus, does not make anyone anti-Semitic,

anti-American, or anti-Human, but pro-Jewish, pro-Christian, pro-Muslim, pro-Justice pro-Freedom, almost wholely human like even. Not of a long gone as lost and forgotten religious dogma, but for now as it always has been found, a mutual respect for all life as we find ourselves being part of. Or, so we would for Atheists, argue in all likelihood to get to the same reasoned to be, just political decision, to this or any another life and death matters matter.

Because the unjustified criminal war actions of George W. Bush are our shared documented history, others, with an ulterior agenda to propagate their weakness through bigotry or racism, will arbitrarily blame a subjective grouping of people, instead of demanding by godly individual might, the arrest of specific individuals who are actually responsible according to the established as public evidence. So, now who's fault is that? We live in difficult times. To admit weaknesses regarding our corporate news control content decisions, is to seek a better world for our lives through stronger open communications.

I believe the defense of the Jewish faith is found in the indivisible properties of Creation, and who's central belief is made simpler than any other. Hillel was asked: Rabbi, who is a Jew truly? Hillel answered, "What is hateful to you do not do to your neighbor. That is the whole Torah. The rest is commentary -- go and learn it." So my challenge in defense of the Jewish faith during the interview, was that those who practice criminal misdeeds, are therefore found by the official definition taught by Hillel, to be not practicing the "Golden Rule" of the Jewish Faith. (as so pronounced by the religion's recognized ancient oratator.) By calling alleged criminal actions, the conduct of an entire people, faith, or branch thereof, is to fall into the fascist minutia of bigotry, or racism, held by those who judge us "others" unfairly. After re-hearing the interview, I did find the allegations made by Greg, regarding the Holocaust being blanketed by falsehoods, generally, a failure on his part to recognize the true horror of what that war wrought. And in light of our desperate challenges today of defeating the enemies of Humanity as specific unjust individuals in "hiding", an ignorantly stupid thing to say. While I, perhaps wasn't thinking along those conceived lines, where at that time, I had just left the thought of: the struggles of the Jewish faith, are the same struggles all young adults go through by naturally establishing our associative identities. Who are you I truly ask? How many news channels even allow us as Humanity to know about the absent reason for the bombing of the Jews of Samara? The Jews of Fallujah? The torturing of completely innocent People to death, as in Guantanamo? Or still unaddressed publicly: the willful lawless criminality implemented by the, therefore tyrannical Bush Administration in suffering God's Iraq? (See

missing ``Development Fund of Iraq'', or private mercenaries discipling for Bush as deemed un-accountable to every conceived ``natural'' law? [see the entire Bible for the judgment call on that one...] or, Bush's declarative, he magically owns everything in stolen Iraq now, [where did it go?] and I can't say anything because he signed his John to 13303 some time back, but as still is left unreported in Your dying world?)

Publicly question our reality, by taking the station up on doing an interview with me, along with your own impressions of our world. Or, if you prefer, you can do a solo written piece, or a recorded statement for the station. I look forward to finding common ground with your concerns. I hope I have got you wondering more, about what trying to save our world from injustice and slavery, in whatever way we can is all about for me really. In these words I can say, I apologize to you, for a resulted perception, that wasn't with better words, my true intent towards us people together.

I will, after some small revisions of this paper, include it as well as the broadcast package. So I do thank you for bringing up your important view, that otherwise, would have gone farther without this opportunity, that I offer as a starting point for deliberation, or argument regarding my foolishness. Thanks for speaking, and I hope I have met most of your concerns with a positive light on where I'm trying to come from.

John.

----

http://radio.indymedia.org/uploads/benderman.mp3

The Benderman Cause

I felt compelled to support the Benderman's cause in any way I could, so I am providing America some arguments that I would use in a court of law to defend your freedoms. If America would so desire, I would also be prepared to make a recorded statement from here in Canada. (I have been denied access into the U.S..) My positions of rational argument are naturally based upon our established facts, and as such, are something few Americans are afforded the luxury of through corporate channels. I hope my forcefulness on these issues does not fear you to doubt I have the best of intentions when it comes to serving the interests indivisibly inherent within the American Constitution. God, I believe is just, and as such, the ungodly war actions of George W. Bush dictate are criminal in the worst degree, being a harbinger of

suffering and misery against all of Humanity as
US being the innocent. The innocent in our entirety,
is my "God" that I love with all I can will. I am
compelled as a living human being to defend America
to the last bush supporter praised if need be. I fight
the enemy of God and Humanity with reason,
understanding, Akeido, and a conviction that our
justice system must prevail for me to be truly myself
really.

"He explained to "60 Minutes," "I was told in basic
training that, if I'm given an illegal or immoral order,
it is my duty to disobey it. And I feel that invading
and occupying Iraq is an illegal and immoral thing to
do."

The war was declared "illegal" by the U.N..
Why? Because Saddam wasn't found in breach
of the internationally agreed upon resolution 1441,
(Saddam did EVERYTHING POSSIBLE that was
asked of Iraq by the bush administration, and then
some Mr. Bush refused to even take him up on.
Like national Iraqi television broadcasts.) despite
the lies quoted by corporate news America. There
was no need for the conflict to begin with as was
so reported internationally on march 7th, 2003. U.N.
inspectors had complete unrestricted access to go
anywhere without delay, and known stock piles of WMD
were burned, so could not possibly be
completely accounted for by evidential findings
due to the fact that they were destroyed beyond
recognition. American soldiers were put in harms
way to be sacrificed for no better good, but for to
allow as has happened, the misappropriation, or as
some have alleged, the criminal theft of Iraqi
resources, including monies of the Iraqi Development
Funds through Presidential decree 13303. Which
include the unappropriated, desperately needed,
humanitarian aid provisions still denied innocent
Iraqis, such as potable drinking water and food
stuffs. Democratic principles are DENIED the
Iraqis by the neo-con military forces, such as holding
all individuals equally accountable to a rule of law.
The outlawing of torture, or the outlawing of false
imprisonment has not been professed as the action of
the neo-con "liberating" force. Mercenaries are not
obliged to obey any laws for example. And, "Dr.
Germ", and "Dr. Anthrax" are held solely for the
fact that they know of the scientific hazards of
depleted uranium, and may have warned the
uninformed sacrificing American GI, if not held

illegally against their wills by the enemy.
Commanders such as irrational war criminal
Sattler, forbade all men and boys between 15 to 50
from leaving the city of Fallujah, while refusing to
negotiate with anyone, (because as so was openly
confessed, Sattler had no evidence that Zaqari was
in Fallujah) then leveled the city to kill all it's
inhabitants, estimated at that time near 300,000
people. Using a napalm type WMD, cluster dud
land mine munitions, and as reported, nine two
thousand pound bombs in a city 3 1/2 km by 4 km.
Serving for a military not strong enough collectively
to prosecute such lawless criminal barbarity, is
serving for a military not principled in the American
virtues of freedom and democracy. In truth,
serving for such ungodly criminal command is a
cowardly act of treason. George W. Bush is an
enemy of our Humanity.

Copy and distribute this personal challenge freely.
Thanks.

--

I know we're all expected to be selfish, in helping out those others
who cry out for our help, but I beg you, I can't do this alone. My
show did make a positive difference. I need your help in asking I
face my accuser, and politely, with reason, using communication,
and understanding, bring about a better world.

World Productions.

Can I Get a Witness?

"It is now argued that because demon bush is President,
it therefor doesn't matter where the actual crimes scene
evidence for the murder of thousands in America leads to
according to the FBI, for George Walker Bush (666) in
above all the laws of the universe. Despite! the
reason they obtained the warrant, was to charge me for
"threatening the life of an international person", they
instead decided not to as saboteurs of liberation. They
argued after the warrant gave them my personal
possesions, [...]"

Don't miss the rest of the inside scoop to the up
coming public Johnny Wizard trial, cradled within this
last testimony of a King left forsaken by all of America
as unworthy of public discussions in our media.

> http://la.indymedia.org/uploads/somebody.mp3

Seriously Folks

Napoleon Bonaparte wrote forming governments are forged only through the public witness of shared mutual experiences, simple, yet, the bushite strategy implemented continually on behalf of the enemy forces in Iraq have been to divide the nation's people with different "legal" definitions, while speaking for typical bushite bigotry, by then offering distinctions of human value between US some from "others". Not freedom, nor democracy. [Remember: Evil is dumb]

Example: Allawi forbade surviving Iraqi doctors and nurses from medically treating any of the estimated 200,000+ innocent victims from Falluja [IRAQI vicinity].

Example 2: DYING two-bit bushite war with "foreign" soldiers paid especially more than a thousand dollars a day as self confessed RACISTS, and THEREFOR, left "officially" too weak as, "pissing post illiterates" to go after real terrorists who torture the innocent, or real thieves, that have stolen BILLIONS from the Iraqi Development Fund. Done all to sacrifice life's purpose for no better good to the ANTI-CHRIST EVIL bush "cabal" of lying neo-con Christ haters. Allthewhile stating the objective worth dying young America as bushite for is "Democracy" in Iraq. But, isn't a founding principle of any democracy to outlaw thefts, sexual assault, murder? Again, bushite kills bushite for a stolen nickel that they just as soon, stole from anybody. If you can believe it. We need YOU to make some effort to engage American talk mediae. Perhaps it's only YOU, who hasn't yet heard a responsibility to this once greatly revered world of wisdom, of the enchanted, and mystical, or of the tyrannical as hell bound for suffering and sorrow. ,in which you share allegiance too my friend.

Being caring and compassionate for the victimized innocent not only feels good, but it is a choice we would make at being alive to help US survive. To not speak against the bushite war crimes against YOUR Humanity, is to not speak in defense of our ancient

dying God no longer found worthy of you Peoples humble respect. Currently corrupted bushite want my voice of truth silenced by censorship with false imprisonment, and those who advocate such hatred for myself and our humanity, speak no public word or disagreement on my allegations of high treason by Our Mr. bush Jr.. While I want to openly debate the, "censorship for tyranny", corporate talk radio bushite bitches on their furthering commitment to not allow objections regarding their contempt for true justice and freedom in America. But if you singly decide not to support my cause, like corporate news control encourages, We will be left forsaken, again. God is Just to the core, like Johnny Wizard tries to be, while bushite liars lie, cheat, and steal from America as ourselves measured unworthy for deliberation to gain true understanding. The Coast to Coast radio network in America disallows America learn for why American soldiers are currently sacrificing their LIVES irrationally. Why? Because there is no legitimate reason, while bushite pretend in YOUR name, that there must be another reason but for to rob our humanity in George Bush Jr.'s name. For if there truly wasn't another reason, not so then blind, stupid, and cowardly American soldiers wouldn't be too happy about the wealthy corporatist bushite commentators silencing America's dying cries by bushite enemy command. Now would they? Remember: wealthy blind and stupid bushite kills/gets killed, poor blind and stupid bushite for a stolen nickel - a nickel in all likelihood, they rifled as thieves from some pensioner, that just as soon, would be their own "grand" parents. Or Yours as someone elses beside.

Phil Donahue had the highest rating, number one money making news commentary show on NBC as it was canceled. Why? Too good as enlightening and INFORMATIVE. Then there was the recently canceled Crossfire. Or how about Barry Zwicker on VisionTV as Canada's greatest broadcast before it too was canceled. Why? Too good as enlightening and INFORMATIVE. VisionTV, a "religious" channel now likely forbids anyone to suggest that God would be good as just, and REALLY INTELLIGENT. Forbidden knowledge we are the corporate bushite insist with Your stolen rights. Why so? Because Americans might learn of what it is to be a true Christian, and therefor stop to have arrested else immediately executed for high treason regarding 9/11: the enemies of Johnny, Justice, God and Humanity, the evil doers George W. Bush, Rumsfeld, and Condolezza Rice. Alone with Myers and Cheney for good measure. Then, those responsible for

the needless bombing of Samarra and Fallujah.

Under EVIL bushite tyranny, We are criminally fighting for needlessly dying as bushite here, but corporate newsCASTers don't find "our" costs worth getting a discussion group going, after all, American soldiers who die for the bush regime, as the kept in the dark, will less likely be going after the real bad guys for 9/11 then right? Corporate America refuse US just basic rights of legitimacy to at least address the absent war reason issue from time to time - Jeeze. But no. As bushite, they're prepared to not inform the bushite soldier that depleted uranium is radio-active, that the stolen American Enron pension money is sitting in the Cayman Islands, or that the war itself has no justification. See, the bushite war is a TRUE CRIME against all Peoples of Humanity, for the war against Iraq has no reason available to explain enemy military action, but for to die thieving from ourselves as the bad guys. The Enemies of Freedom. Why we have Law. God is Just, and evil is just the slavish ignoramuses who censor our Words of empowerment for freedom through Justice represented indivisible as Eternal. We rule.

Therefor, George Walker Bush is guilty of treason to US all, not only including your one and only King Johnny Wizard as Heaven's afar, but also the not going anywhere but yet still sacrificing ungloriously as the stupidly blind as almost completely incoherent,. devote bushite nazi dumfuk soldier grunt enemy vermins.

Will you not help these words reach a larger audience? I ask you to consider your helping me can do good for your real world too. Perhaps it is ONLY the single individual that hasn't yet understood, this once greatly revered world of the Word is of which you share allegiance too.

Speaking for a just battle of freedom for all humanity, is a right you could exercise in brightest intentions of a muted God who sure could use your help right about now man. Our family is in so a desperation for needed support. I am fearing your fears have got you believing, you have no dying right to speak against Mr. bush Jr. for the crimes he has committed in Your name, but You do. Think of it this way: anybody who stays silently connected secretly to the crimes of nine-eleven, can not be trusted as a sacrificing bushite thief by the enemy bush administration. [Secretly speaking in all strict certainty.]

The warrant that allowed the confiscation of my computer equipment, was to prove that I was the one and same who demanded true justice for our humanity by following the crimes scene leads for nine/eleven, arresting those responsible, or killing the escaping culprits, bush, rumsfeld, and condolezza rice by the hand of our guns. (Why do you think Police officers carry guns after all?) It is now argued that because demon bush is President, it therefor doesn't matter where the actual crimes scene evidence for the murder of thousands in America leads to according to the FBI, for George Walker Bush (666) in above all the laws of the universe. Despite! the reason they obtained the warrant, was to charge me for "threatening the life of an international person", they instead decided not to as saboteurs of liberation. They argued after the warrant gave them my personal possesions, (hundreds and hundreds of video tapes, ALL MY WRITING, computers, disks, along with approximately 50,000 tasteful images.) That the reason for the warrant being originally issued, no longer, if ever, was justified. For if they were calling for justice, the demon bush, and his co-conspirators might get caught by America, and pay the ultimate price for their treason by death sentence. After two self confessed PRO-BUSHITE (support death squads against Afghanistan school girls, and propping up the heroin trade by arming women slave traders) "officers of the law" reviewed my images, they now contend, that several can be argued to be illegal in an almost fixed to win proceeding. (No more than a small few pictures of beautiful girls in different states of undress - "Home Lolita" I think.)

The charges they offered to the prosecution to argue for a "life term prison sentence" (almost jokingly it was quacked) were complete fiction, of which the crown offered me "a deal". Plead guilty for being a shamed ostracized sex offender, [I'D HUNT CHILD KILLER ENEMY BUSHITE EVERY DAY OF MY LIFE IF I HAD THE BUS FARE AND THE AMMO] and maybe, the Judge won't argue for a long term prison sentence for another charge that has absolutely nothing for substantiation. Substantiated, that will surely do nothing but testify to their attempts at demonizing my better name. Nothing doing darkness, the court of Law, is Our court, and I intend to make my case heard among my peers. Here.

Please, I beg you for my life, forward this document to the propper authorities, post these passages to any church, or, phone talk radio America and demand my public case be heard for Your benefit too, or don't and get what we'll deserve by not making a miracle happen with your single sole but sure, human will power!

1. I obtained the questionable images through Usenet group "youth-and-beauty". Images can be downloaded a thousand or more at a time. I can't not perceive the images until they are on my computer! If they had told me they were coming as bushite, I would have been sure to delete anything near objectionable for argument's sake. They laughed when I told them that.

2. The service companies that offer such groups as child-rape and so on, have an easy ability to filter out subjective objectionable material, along with the truly grusome stuff. But they don't, nor, are they found legally liable for not doing so. I suggest the reason is, it would put out a billion dollar industry of these child-porno cops that view real sicko slime routinely, while then arguing anyone who witnesses such depravity must be guilty. Guilty to have their professional lives destroyed, their life invested property removed till whenever/perhaps stolen, and then be publicly ostracized as senseless victims. All because some guy maybe believed women are worthy of worship in the highest respect and honor, while cute adorable boys he couldn't help but feel compeled to cover with praise, or mutual hugs and kisses., as long as there are no other men in the room with him and the gals perhaps one day chatting over maybe child care let's say. (no wonder the two child porn cops in question regarding my public case admittingly were/are staunch bushite offenders.)) I know of no nobler lineage that that of our police officer. For protecting the rights of our children, is what we've always been committed to gaining respect for. We want to do right for ourselves, and despite Johnny, this world really is something remarkable to concider a future with on our own terms as a foundation of wisdom with the ever presnt will to succeed at something greater than first realized. Evolution. The Revolution of reason while jiving with justice for freedom holds many perks per praised principle. Hammurabi's number one thang.

3. If a search warrant can be made against anyone who a criminal bushite finds objectionable, (bush and rumsfeld made the charge against me through the Secret Service, then to the RCMP.) then what freedom fighter is safe from pictures of godly and beautiful children in bath tubs? Swimming? IF, the bushite demands the images appear seductive, and compel them to commit sexual assualts? Or, what if you download a program on cars to have the bushite find, it contains bin Laden's secret where abouts in code? Would you be guilty, and if so, of what? No thinking freely?

So, the warrant brought the officers of law the right to prove my Johnny Wizard writing was of my own, but yet, after doing so, refused to enforce the law by giving me my day in court on the reason the warrant was granted to begin with. Also, I, as anyone can not perceive potentially objectionable material until it is in my possession, while a service provider would have little of no problem. (The still working child porno cops could look for child porno all day, and actually get closer to catching those who proliferate actually objectionable materials. [See?, an internet service provider could defend thus: they're not guilty because the subjective material, that would be questioned, is subjective, and so would the porno cops if they got someone intelligent to defend themselves. But for Christ who needs to know what's going on in the realm?, while loving girls in general like they were his own distant siblings? They'd put Christ up on a cross for loving schoolgirls, by demanding such thoughts come only from a criminal prospective. The problem here is child porno cops can view a suggestive cute girl smiling in her panties, or witness some heinous bushite rape or torture, and measure them equally when charging US for their deviant sexual sugestion. As alas, they refuse to support the Law when it comes to the easily provable criminal actions of enemy bushite, as for would be, the defense of the lives of our innocent children in Iraq mean something to me too.

Anyway, apparently, the reasons for the warrant were not as was so intended. To charge me for threatening the freedom of bush, rumsfeld, and the evil witch condolezza rice. (Can I get some legal advice from someone out there on this then bogus? warrant please?). The Court will (try) argue without allowing ANY voice of objection, that because I demanded the immediate arrest or execution for the individuals responsible for the crimes of nine/eleven, (relying primarily on the Whitehouse, FBI, and the public spewing of the war criminal demon anti-Christ itself,) the prosecutor, it has been alleged, will demand justice not be served in that respect, and that the search warrant that obtained the bushite's evidence against me as a truth teller during their fishing expedition will not be allowed for re-dress. Is this Justice on behalf of God I ask you?

Nature of the Beast

(Again, remember, nobody from the RCMP, the Secret Service, or the FBI, state that I am incorrect in my allegations of treason against the bush administration.)

The prosecutor is going to press for incarceration if I plead not guilty for a crime I'm not guilty of, while my public freebie lawyer, contends my defense of innocence and corporate news agencies forbidding the pursuit of Justice in protection of our Police services, like the honorable FBI officers that contend Ahmad funded Atta will likely not be allowed heard. [Are you a member of a Police Union somewhere, or know of someone who is? Or, do you just not give a care for you fellow officers either?] See?, bushite falsely believe bush can not be arrested for nine eleven, no matter where the actual evidence leads, because he is not judged an equal among men by corporate news standards, but as the anti-Christ, FALSE deity, an enemy to every free person standing.

That is our, for real court case against the Bush administration as it stands today. While some have warned, bushite are pushing to have me taken in now, to try stopping this from speaking in our Humanity's true defense. They just might succeed, if you decide no care for Freedom from tyranny either..

This is was/is/will be my last Wizard Wire public service announcement regarding this, George Walker Bush (666) wars America, Humanity, and me as the Lord of Creation. I've said everything I can say twice over, and if you can't find it within yourself to pass this post on to every church corner, with a, "I love life too" set of priorities, I can guarantee you no greater reward. But for to be present if not in person, but in spirit during my public trial where the bushites will publicly judge my character unworthy, while attempting the silencing of our own voices for Justice as We stand in TRUTH, indivisible. Be it known, the prosecutors of Law in my case have read Johnny Wizard's "The Trial and Conviction of Our Mr. bush Jr.", and likely a few others that will be asked by the hiding in darkness bushite enemies to completely disregard as crime scene evidence. It's going to be a case worth getting to, considering the newspapers, talk radio stations, and National News desks are expected to forbid honest coverage of by the higher ups at corporate command. Call your Church group to organize a call for Johnny!

Or don't.

I thank all those with whom the true liberation of Humanity from tyranny could not have been made possible without themselves individually. I know it seemed like no one was listening, when we spoke for God's cries, but WE knew better, and we knew soon, all of US will then learn it too, defending God is of no greater privilege.

So, cheers to You, our Humanity's defenders of the human challenge, for being there to speak for this life when we needed You as a contributor. Fare thee well with your pride and honor, and no bars will ever hold your undying spirit.

/ / God bless America by destroying the enemy evil anti-Christ, Our Mr. bush Jr. Yourself. \ \

Your stranger then fiction,

Johnny Wizard

See you on the other side of whenever,
Your ever present bids you now,

an adieu.

Johnny Wizard

Chow.

/ / "The US government is trying to silence Dr. Ammash's outspoken criticism of the US role in causing cancers and other illnesses in Iraq through its own use of biologically hazardous weapons such as radioactive deleted uranium." \ \

/ / ``Such a blatant statement acknowledging the commingling of his official duty to ensure a fair election with his partisan duty to re-elect President Bush, made in a political fund-raising appeal, evidences Secretary Blackwell's poor judgment at best, and the manipulation of election administration for partisan purposes, at worst,'' the report asserts. \ \

--

Breaking Camp

I will advocate full compensation for every mistreated soldier who had been tricked into believing something without reasoning.

Johnny condemns George Walker Bush (666) to death for the crimes he has committed against God's Humanity.

Let it be understood, that Saddam gave America 100 percent access to do anything the anti-Christ wished without delay prior to the needless military conflict beginning. So, every treasonous thieving bushite life taken, is done in protection of God, and the American dream. See?, TRAITOR bushite Art Bell's amerikan talk radio forbids BY CENSORSHIP anyone in America to speak in the defense of the undefended American People. Art Bell, America's enemy, with ensure that America "never" learns that bush's business partner, General Ahmad, funded 9/11's mastermind ring leader Mohamed Atta, or that depleted uranium is measured radio-active, or most especially, that billions of STOLEN American pension money is sitting in bushite bank accounts in the Cayman Islands. Instead, he'll do another show on UFOs, or bigfoot, while broadcasted to the wordless bushite grunts their dying is for naught. Who cares?, bush's war against freedom in America isn't anything bushite amerika ever wants to get persnickety about.

http://www.chapelhill.indymedia.org/uploads/bushite-kills-bushite.mp3

/ / Who cares? CNN is not going to cover it, we know that. CBC in Canada, they're not going to mention it to anybody. It's no concern of themselves to show a caring word for the [thieving] sacrificing soldier. \ \

The EVIL bushite liars die for no better good, but as the ungodly bringing further hardships against US innocent people they target for murder. God says, the Magna Charta says, the American constitution says, let US all arrest or kill the TRUE ENEMY bushites instead. "See lawless bushite, kill it in defense of all that are innocent", I always say as the Son of Man and Living Creator. No joy greater than saving the innocent victims of the enemy bushite thieves, torturers, and first degree murderers. WHO WOULD DISAGREE? in a true Democracy?

Every American soldier who dies as a bad guy in Iraq, dies for cowardly worshiping bush instead of Life. The demon anti-Christ as their false, untrue, dummy deity, sends them into harms way for only to steal from the innocent. The innocent left in God's trust. There was nothing that could have better been done in Iraq by bombing the country. The blind attacking of the population, along with it's functioning public institutions, brings only the STOLEN cash rewards on trading in the American soldier's LIFE as a fascist criminal. All that is bought to by putting cowardly

bushite soldiers in bush's un-needed conflict, is to steal from their very own families back home left almost completely undefended. [Have no fear, Johnny Wizard's here!] A criminal military force that deems some soldiers from Apartide fame as "un-accountable" to American or "Iraqi" law, while paying them a thousand dollars a day or more as rewarded racists who fight allong side black and Hispanic dying bushites, to not allow equal rights for those classified by different colorations. Allthewhile with spokespeople smattering the sacrifices are to bring democracy together in Iraq to arrest bushite for thieving then? [No matter whomever you are, George W. Bush is truly evil to God in YOUR name too see?] Regular Joe in the Army, 47$ before expenses concurrent and impending.

I will advocate full compensation for every mistreated soldier who had been tricked into believing something without reasoning. Example: those who had been taken in criminally to handing over their military pensions for five year loans at 56%, or a 20,000 loan paid in five with 60,000. No competion exists for this racket because it's an actual crime scene. Guess where American Gis can hear the sales pitch advertised? The Army Times.

No thoughts of understanding are expressed (OR COULD BE) from the soulless bushite on why they are in Iraq dying, or why depleted uranium is harmless, or why depriving Iraqis of medicine along with food and water, is a ploy to win the hearts of every man who owns a gun. Or why the bushite demands through the censorship of tyranny, that Our Humanity has no rights to speak for our freedoms and liberty, or on behalf of Iraqis who have had billions of much needed dollars stolen from themselves by the bushite enemy. (The billed for taking bushite soldier itself, will not receive a penny of the ill gotten gains, just like their own grand parents were robbed of the pensions, and the bushite couldn't find a word of outrage to say against their false idol then either.)

/ / As the soulless disciples of the enemy anti-Christ, Our Mr. bush Jr., their "officially" granted legal immunity from all prosecution means nothing to me as a honorable man defending my humanity, or as living Creator, who brought all into this new world to be free, and can just as soon, take you all nazi bushite out the old school way. \ \

The ungodly evil bushmob fascist totalitarianists are pushing to have US specially arrested. The demon anti-Christ enemy forces have gambled an attempt to find prosecutors and judges, lawyers and defendants, who together wouldn't let the truth be spoken in our own defenses. I have had many discussions with the National Security branch of the RCMP, CSIS, the Secret Service, the FBI, and several commanders in the Canadian Military, and WE all know, this upcoming trial is something a great deal of many are lookiung forward to, however, an agent of law recently approached me to warn, some are working to try having me arrested without bail, and spend maybe a few years behind bars before a trial could not be postponed any longer, all in an attempt to try stopping my words of truth that represent the interests of all defendable legitimate legal enforcements. Canada's system of checks and balances, and our honorable police services have too many good guys in place, to want to silence my calls for Justice by measurement. And, up until now, our security people have advised the bushite case would never fly in a public court room, for Johnny Wizard would just make his case as it stands FACTUALLY DOCUMENTED along with that which was FALSELY ALLEDGED, and the wealthy do nothing corporate news agencies would be caught as culpable to being accessories to first degree murders in New York City, where they deliberately with malicious intent, refused to report on the FBI's findings that General Ahmad funded Atta, or that demon George W. Bush with condi and rummy, had a top secret CRIMINAL plan to invade Afghanistan dated September 9th, 2001. Just like still, CBC and CNN refuse to report any human concern for those murdered irrationally by bushite in Iraq today. No concern for those Humans, but in Asia, where bush isn't yet anyway, thieving in the wide open from God, they can try to make up for lost respect by claiming those People are better People worthy of our commpassion with wall to wall coverage on the suffering we have little of chances in preventing. But for to stop needlessly droping tons and tons of toxic bombs into our Living Earth. It is the bushite enemy who refuse to allow YOU speak in your defense as an Earthling.

However, this being said, I have been recently informed that, since the godless bushite enemies would wish to have our freedoms censored, it will likely be pushed to do so without a public trial allowing a jury of my peers to judge the case accordingly. Up until recently, Guantanamo could never happen in Canada. But now in Canada, the enemies behind closed doors are talking

about sending intelligent innocent people away to be tortured for sadomasochistic satanic tendencies, and further have argued to no one that persecuting People in Our names without evidence, maybe isn't such a bad idea, when you think of all the people we could rob our humanity from like the "popular" and "Democratic" bush regime does. Bushite corporate new censors are fighting for a return to the dark ages. Don't let this happen to YOUR world. Care not for my freedoms as an honorable man who stands with America's FBI, and your given up life wont be worth nothing but as yet another sacrifice to bring further glory and stolen riches to the American cop killer, pension thiever, 9/11 perpetrator, war mongering anti-Christ, Your unbelievably EVIL Mr. bush Jr.. The enemy of God anti-Christ who continues to hold your real life in mistrust and dishonor, while wealthy corporate "celebs", talk freely about their pride in such ungodly sacrifices as Christ's forsaken name.

I ask ONLY you to argue this paper with your best intentions, for I will perhaps not receive another chance to publish, if as usual, the Internet community at large extends me little support in my UNCHALLENGED assertions on who truly committed the crimes of 9/11. A single bushite corporatist sends a complaint to a Internet provider alleging I talk "spam", therefor, without any hearing, private owners are threatened to lose their privilege to communicate, by an enemy bushite protagonist who exercises his "authority" by stating only, "spam", and not even providing my actual post in it's entirety. One Internet service was shut down for the sole reason that discussing George W. Bush as the 9/11 perpetrator in tx.politics, was against the rules, for such subject material must be confined to only a American nation political forum. I talked to the kid on the phone who made that power decision on behalf of all usenet, and let it be known, he knows what he's doing. But "they" can't do this everywhere. I can not "take over" your big old lonely world that you must work to protect for yourself as an equal citizen sworn to freedom. I have written all I need to say about Justice and Freedom, and if the human race can not still find enough care for themselves to propagate my writings for others to read, or demand Art Bell be removed to allow Johnny Wizard to debate the ungodly dumfuk bushite vermins, there truly is no hope for US continuing.

Johnny Wizard

U.S. deserter 'didn't want to have to kill babies'

/ / Mr. House will argue that American soldiers are
guilty of war crimes and that forcing Mr. Hinzman to
fight in Iraq would have made him a war criminal.

He will call as a witness former U.S. Marine Staff
Sergeant Jimmy Massey, who is expected to testify that
he and other soldiers shot more than 30 unarmed Iraqis,
including women and a six-year-old child, at a U.S.
military checkpoint. \ \

--

CNN.com - Aid group 'told to freeze' Falluja work - Dec 6, 2004

/ / Only about 100 families are thought to remain in
Falluja, as most fled the city before the U.S.-led
operation aimed at flushing out insurgents. \ \

Huh? Again, witness wealthy CNN "news" staffers, didn't
even bother to seek for an update on their "about 100",
that had not ever been given. Red Cresent, the day
previous to Dec. 6, no... actually reported on, Dec
3rd!, stated, (from their limited circle of reference)
they had witnessed a minimum of many corpses, of
completely innocent pro-Iraqi women, children, youths,
and men.

/ / Iraqi Red Crescent spokesman Muhammad al-Nuri
estimates that some 6,000 people have been killed, many
of them civilians. \ \

(That is discounting murdered armed defenders of Freedom
in Iraq we can prusume.)

But, again, the true bushite enemies of loyal bushite
enemies, thay'l' "bushite lie" to the bushite nation
about the "holy" benefits of, sacrificing America's
young life., all done for the glorious betterment of the
traitor demon anti-Christ liar, the war criminal, Our

Mr. bush Jr., along with his treasonous evil cabal of anti-semitic Palestinian Christ haters. A compassionate, "conservative", war mongering cabal whos warring of America is done to secretly steal further from the innocence of God in silence. Without a honest to Johnny, bushite killin' God-Man to speak on the nature of reality itself from living Creation's time-less prospective. Naturally leaving ourselves to save all of humanity with my "magic" - guitar, notebook, cybercafes, and super cool Akeido, leaves me in wonder of where life could lead as committed to freedom through justice for all?, as truly ourselves democractically represented?, Miraculous?. or will we choose as ENEMY bushite instead not to, ending to devolve ourselves from existence?

I know of some pretty, almost miraculous words in which can bring about positive change, and man, if you could see the world for America's Dream, where all People are judged not by the color of their skin, but the content of their character, the entire bushmob would be behind bars awaiting trial for treason, and the Iraqi People would have American Forces demanding Allawi be arrested for failing to explain himself regarding the needless bombing of our Humanity in Samarra and Falluja.

--

SEE BUSHITE, KILL IT FOR GOD'S AMERICA

/ / Another humiliating proposal, which even triggered debate among Marine officers in control of the city, is to force all Fallujan men to work in military-style battalions, reported the Globe. \ \

This is the best the ENEMY bushite could dream up in all possible worlds?

/ / His company of tanks and Bradley Fighting Vehicles had roamed the eastern third of the city [Falluja] for 13 days, shooting holes in every building that might pose a threat, leaving behind a landscape of half-collapsed houses and factories singed with soot. \ \

--
http://www.wsws.org/articles/2004/dec2004/iraq-d06_prn.shtml

/ / Of course, none of the assembled media pointed to the absurdity of Bush's comments. \ \

--

http://billmon.org/archives/000172.html

/ / Bush administration official says: "Saddam never had WMDs, and we never said he did." \ \

--

/ / Goldsborough said the reason he was given after the fact is that the column, about why Jewish voters overwhelmingly cast their presidential ballots for John Kerry, was "offensive."

"The publisher said it might be offensive. To whom? \ \

--

/ / twenty-seven Israeli pilots indicated that they would no longer fly missions in the Occupied Territories (Boston Globe). The pilots said "We veteran and active duty pilots are against carrying out illegal and immoral attacks" and they "refuse to continue attacking innocent civilians." \ \

--

KILL ENEMY BUSHITE FOR OUR LIVING LOVING GOD MAN

/ / They should put dynamite in their behinds and drop them from 35,000 feet, the whole pack of scum out of that jail."

Remember, these are the same prisoners that the Red Cross estimates 70 to 90% of them were innocent and later released. \ \

--

/ / It gets worse. We already knew about the Franklin County, Ohio, precinct that tallied 4,258 votes for Bush when only 638 people had actually voted. \ \

--

See? The bushite knows that bush murdered thousands of Americans on 9/11, yet, will advocate fascism, to censor America, from finding the truth for ourselves.

That enemy of God, the demon anti-Christ told US the conflict he began, was because Saddam wouldn't let the inspectors in. While, corporate nazi whores, refused to correct ourselves on our sacrifices, for they enjoy remaining impartial, when it comes to the crimes they inflict upon our humanity. Enemies to all humanity CBC and CNN are by refusing OUR facts to speak for themselves. No betterment could be garnered, by the demon anti-Christ's war crimes against civilization, WITHOUT DOUBT. And, it's only the enemies of our dumfukked and dimmer soldiers, in corporate mind

control, who refuse to allow anyone to state THAT FACT,
for, the enemy bushite would be exposed, and America
would be hunting them down with the Law as the traitors
to freedom they clearly are.

--

http://www.theallianceforddemocracy.org/html/eng/2180-AA.shtml

/ / "We cannot be the home of the thief and the land of
the slave." \ \

--

Bush Lies to Canada

Demon bush spew "I made some decisions obviously that
some in Canada, didn't agree with. Like for example
removing Saddam Hussein, and enforcing the demands of
the UN security council."

Saddam was not found in violation of 1441, so the war
criminal anti-Christ's demands were not our world's, nor
that of the UN Security Council. How does thieving our
assets, destroying our infrastructure, and
indiscriminately murdering more than a hundred thousand
innocent people, (in turn to sacrifice more worthless
bushite nazi teens) bring about their closer fraudster
bushite "Freedom"? Again, CNN, and CBC let the demon
liar spew his hatred of our liberties, without factually
challenging his lies with our un-debatable established
truths. CNN and CBC would "sell" seeing our dimmer
youths sacrificed as bushmob thieves through blatant
bushite lies, to truly, steal our freedoms and liberty
with further murders by proxy.

/ / .. or when [bush] just told you for no reason
possible, why American soldiers are DYING, "Saddam
wouldn't let inspectors in", \ \

This should be a time when the People rise up as angels
of mercy, and hunt with Law to kill George W. Bush,
Rumsfeld, and Condoleeza Rice for the crimes committed
on 9/11. Just because the corporate T.V. doesn't
mention the facts to draw our own conclusions, doesn't
make it not so out of our realms of expertise
as Freedom's true represention.

--
http://www.opednews.com/fitrakis_113004_GOP.htm

/ / "It's about a will to dignity. It's

security force guy who's honest, reliable and
dependable, it's worth five Marines," \ \

--

This is Hockey

US general John Sattler declared: "We have liberated
the city of Fallujah."

Sattler openly lies to the lives of America with this
insult, and the bushite nazi dumfuk, is too stupid or
evil to frag him as enemy proudly for it. The People of
the world, look, see.. bushites are murderous liars,
cheats, and thieves as the enemies of America, who even
lie to THEMSELVES on how many have been sacrificed to
blood the coffers of the American pension thieving war
monger bushite 9/11 cancer. A liar nazi bushite
commander would sacrifice his nation, along with own
family, before saying a word in defence of our freedoms,
our humanity, or our God. COWARDS. American nazi
bushite commander gets killed american nazi bushite
grunts, in dreams they too, can financially profit off
the talentless continuing THEFTS for enslavement to
sacrifice themselves as fascist tyrannies. Hmmm. but
the nature of American freedom, is to be one as everyone
being equal scores. "Gee, maybe some day even you could
be Presidential."

Weak intellectually, prone to cuss, the bushite nazi
dumfuk, is a worthless piece of crap.

http://bellaciao.org/en/article.php3?id_article=4591

/ / I have the impression that there are no other words
except "fuck" and "shit". Each communication, each
order is accompanied by a flow of 'fucks', 'shits' and
'bullshits'. I look at Americans with a pity.

Among the "colored-skin" GIs "Latinos" are largest
group, then Africans and semi-Africans. The officers
are mostly whites but there are also blacks... But I
cannot understand at all, why the US Army soldiers speak
broken English!! \ \

/ / During the five days, while the count was yet
conducted, more than three thousand wounded passed
through our hospital. These were the people who lived
nearby. The people who could be delivered to us.
Nobody knows how many people in the city are dead. \ \

/ / I cannot recognize the city. Only ten days ago it
was an Iraqi town with its regular for centuries Arabic
life. Boling bazaars, noisy streets. And here I am
going through the empty dead city, between the ugly
"pyramids" of destroyed buildings, broken streets, whole
quarters wiped from the face of earth. \ \

government.

1006. New Greater Manchester (UK) Scanning Group

Newsgroup: rec.radio.scanner
Date: 2005-02-17 03:20:04 UTC
From: Phil Hope <GMSUK_NOSPAM@softhome.net_NOSPAM>
Message-ID: <5r28119nj62lbcbd5gpfvv9vim8kulhssa@4ax.com>
Source record: 14666
Cross-posted to: alt.radio.scanner.uk,alt.radio.scanner,free.uk.scanner-radio,rec.radio.scanner,uk.rec.radio.cb,uk.radio.amateur,uk.local.manchester

This group is aimed at the Radio Scanning enthusiast who is located in (or around) the Greater Manchester area of the UK.

Whilst other groups such as "Scanpromauk" offer a wide diversity of topics and users, they have little or no regionality, and with messages 'coming in' from all of the UK, posts regarding scanning and frequencies relating to the Greater Manchester area are often swamped and difficult to find.

To subscribe, please visit: http://uk.groups.yahoo.com/group/GMSUK

I had my bearcat running as I drove up to a McDonalds drive through order box and ordered a plain biscuit one morning. After paying and picking up my biscuit, I heard someone over the bearcat say "boy I wouldn't have paid 79 cents for THAT biscuit" I pulled the biscuit out and found out that it had been sitting around the kitchen for a while, it was hard as a rock.

Best way would probably be Ebay. They sell new for just about that price so
I doubt he will get that, but sometimes people will bid something up over
the new price so it would be worth a try.

I think the VR-150 was made for sale in Japan only and I
don't know if an English manual exists. Please let us
know if you find one.

You are welcome to use tk150, the free, open source software
I wrote for the VR-150. See http://parnass.com for more screen
images, info, etc.

If you could pull the Manchester frequencies and post them to the
group I'd be grateful. Maybe we (the group) could check them and make
sure they're correct and up to date.

Which one do you have, what's the price, and how many radios do you feed from one antenna? I am seriously considering a dressler...replacing a damaged discone.

Any good links or pics

Talked to a MEtro LEO yesterday and he told me the patrol units
have upgraded to a new data terminal system.
The antennas consits of two units about 2" in diam, and about 3"
high. They are mounted on the trunk of the cruisers about 3'
apart. I have not had a chance top look at the terminal or display
yet.
Does this system sound like anything anyone else has had before?

It's highly probable any BNC chassis jack will do. I did not tear in to mine, but from topside it looks like nothing special.

Try www.digikey.com and order a "BNC chassis jack" or pick one up at Radio-Shack (part number 278-105, $2.99)

The labor intensive part will be installing the new jack itself, providing it's the only thing broken.

Good luck,
B.

Anyone have a schematic on this unit OR the whole service manual?

This one seems to have some sort of Power Supply problem. No frequency shows up, no or weak audio. When it is turned off and on real quick, sometimes, it will seem to reset, and work - albeit the frequencies in memory are gone. I have resoldered the Solder Joints off of the DC jack, which were loose. Checked a couple components, not sure now where to look with out the schematic. Any ideas?

Im tellin yah it workx and its so worth it

Turn $5.00 into $50,000...read this to find out how!!!
READING THIS COULD CHANGE YOUR LIFE!!!
I found this on a bulletin board like this one and decided to try it.
A little while back, I was browsing through a newsgroup, just like you are now, and came across an article similar to this that said you could make thousands of dollars within weeks with only an initial investment of $5.00! So I thought, "Yeah right, this must be a scam", but like most of us, I was curious, so I kept reading... I also did an internet search and found nothing but success stories.

Anyway, it said that you need to send $1.00 to each of the 5 names and address stated in the article. You then place your own name and address in the bottom of the list at ..5, and post the article in at least 200 newsgroups. (There are thousands) No catch, that was it. So after thinking it over, and talking to a few people first, I thought about trying it. I figured "what have I got to lose except 5 stamps and $5.00, right?"

Then I invested the measly $5.00 (I use the word "measly" because $5 really is measly compared to the money I have made through the initial investment). Well GUESS WHAT!!... within 7 days, I started getting money in the mail! I was shocked! I figured it would end soon, but the money just kept coming in.
In my first week, I made about $25.00. By the end of the second week I had made a total of over $1,000.00! In the third week I had over $10,000.00 and it's still growing.

This is now my fourth week and I have made just over $42,000.00 and it's still coming in rapidly. It's certainly worth $5.00, and 5 stamps, I have spent more than that on the lottery!!
Let me tell you how this works and most importantly, why it works....
Also, make sure you print a copy of this article NOW, so you can get the information off of it as you need it.
I promise you that if you follow the directions exactly, that you will start making more money than you thought possible by doing something so easy!

Suggestion:
Read this entire message carefully! (print it out or download it.)
Follow the simple directions and watch the money come in! It's easy.
It's legal. And, your investment is only $5.00 (Plus postage)

IMPORTANT:
This is not a rip-off; it is not indecent; it is not illegal; and it is virtually no risk - it really works!!!! If all of the following instructions are adhered to, you will receive extraordinary dividends.
PLEASE NOTE:
Please follow these directions EXACTLY, and $50,000 or more can be yours in 20 to 60 days.
This program remains successful because of the honesty and integrity of the participants. Please continue it's success by carefully adhering to the instructions.
You will now become part of the Mail Order business. In this business your product is not solid and tangible, it's a service. You are in the business of developing Mailing Lists.
Many large corporations are happy to pay big bucks for quality lists. However, the money made from the mailing lists is secondary to the income which is made from people like you and me asking to be included in that list.
Here are the 4 easy steps to success:

STEP 1:
Get 5 separate pieces of paper and write the following on each piece of paper "PLEASE PUT ME ON YOUR MAILING LIST."
Now get 5 US $1.00 bills and place ONE inside EACH of the 6 pieces of paper so the bill will not be seen through the envelope (to prevent thievery).
Next, place one paper in each of the 5 envelopes and seal them. You should now have 5 sealed envelopes, each with a piece of paper stating the phrase "PLEASE
PUT ME ON YOUR MAILING LIST.", your name and address, and a $1.00 bill.
What you are doing is creating a service. THIS IS ABSOLUTELY LEGAL!
You are requesting a legitimate service and you are paying for it!
Like most of us I was a little skeptical and a little worried about the legal aspects of it all. So I checked it out with the U.S. Post Office (1-800-725-2161) and they confirmed that it is indeed legal!
Mail the 5 envelopes to the following addresses:

..1) Jason R
3702 Werner Ave.
Austin, TX 78722

..2) J Arenas
1600 Malibu
Carrollton, TX 75006

..3) Richonda S
CMR 402 BOX 274
APO, AE 09180

..4) J Roth
2901 Barton Skyway ..3406
Austin, TX 78746

..5)Jesse James
1778 Swift Ave.
Ventura, Ca 93003

STEP 2: Now take the ..1 name off the list that you see above, move the other names up (5 becomes 4, 4 becomes 3, etc...) and add YOUR Name as number 5 on the list.

STEP 3: Change anything you need to, but try to keep this article as close to original as possible. Now, post your amended article to at least 200 newsgroups. (I think there are close to 32,000+) All you need is 200, but remember, the more you post, the more money you make!

This is perfectly legal! If you have any doubts, refer to Title 18 Sec. 1302 & 1341 of the Postal lottery laws. Keep a copy of these steps for yourself and, whenever you need money, you can use it again, and again.

PLEASE REMEMBER that this program remains successful because of the honesty and integrity of the participants and by their carefully adhering to the directions.
Look at it this way. If you are of integrity, the program will continue and the money that so many others have received will come your way.

NOTE:
You may want to retain every name and address sent to you, either on a computer or hard copy and keep the notes people send you. This VERIFIES that you are truly providing a service. (Also, it might be a good idea to wrap the $1 bill in dark paper to reduce the risk of mail theft.)
So, as each post is downloaded and the directions carefully followed, five members will be reimbursed for their participation as a List Developer with one dollar each.
Your name will move up the list geometrically so that when your name reaches the ..1 position you will be receiving thousands of dollars in CASH!!!
What an opportunity for only $5.00 ($1.00 for each of the first five people listed above)
Send it now, add your own name to the list and you're in business!

---DIRECTIONS ----- FOR HOW TO POST TO NEWSGROUPS----------
Step 1)
You do not need to re-type this entire letter to do your own posting. Simply put your cursor at the beginning of this letter and drag your cursor to the bottom of this document, and select 'copy' from the edit menu. This will copy the
entire letter into the computer's memory.
Step 2)
Open a blank 'notepad' file and place your cursor at the top of the blank page. From the 'edit' menu select 'paste'. This will paste a copy of the letter into notepad so that you can add your name to the list.
Step 3) Save your new notepad file as a .txt file. If you want to do your postings in different settings, you'll always have this file to go back to.
Step 4)

Use Netscape or Internet explorer and try searching for various newsgroups (on-line forums, message boards, chat sites, discussions, etc.)
Step 5)
Visit these message boards and post this article as a new message by highlighting the text of this letter and selecting paste from the edit menu. Fill in the Subject, this
will be the header that everyone sees as they scroll through the list of postings in a particular group, click the post message button.
You're done with your first one!
Congratulations...THAT'S IT!
All you have to do is jump to different newsgroups and post away, after you get the hang of it, it will take about 30 seconds for each newsgroup!
REMEMBER, THE MORE NEWSGROUPS YOU POST IN, THE MORE MONEY YOU WILL MAKE!! BUT YOU HAVE TO POST A MINIMUM OF 200
That's it! You will begin receiving money from around the world within days! You may eventually want to rent a P.O.Box due to the large amount of mail you will receive. If you wish to stay anonymous, you can invent a name to use, as long as the postman will deliver it.
JUST MAKE SURE ALL THE ADDRESSES ARE CORRECT.
Now the WHY part:
Out of 200 postings, say I receive only 5 replies (a very low example).
So then I made $5.00 with my name at ..5 on the letter.
Now, each of the 5 persons who just sent me $1.00 make the MINIMUM 200 postings, each with my name at ..5 and only 5 persons respond to each of the original 5, that is another $25.00 for me, now those 25 each make 200 MINIMUM posts with my name at ..4 and only 5 replies each, I will bring in an additional $125.00!
Now, those 125 persons turn around and post the MINIMUM 200 with my name at ..3 and only receive 5 replies each, I will make an additional $626.00!
OK, now here is the fun part, each of those 625 persons post a MINIMUM 200 letters with my name at ..2 and they each only receive 5 replies, that just made me $3,125.00!!!
Those 3,125 persons will all deliver this message to 200 newsgroups with my name at ..1 and if still ONLY 5 persons per 200 newsgroups react I will receive $15,625,00!
With an original investment of only $5.00! AMAZING! When your name is no longer on the list, you just take the latest posting in the newsgroups, and send out another $5.00 to names on the list, putting your name at number 5 again. And start posting again.
The thing to remember is do you realize that thousands of people all over the world are joining the internet and reading these articles everyday?, JUST LIKE YOU are now!!
So, can you afford $5.00 and see if it really works?? I think so...
People have said, "what if the plan is played out and no one sends you the money? So what! What are the chances of that happening when there are tons of new honest users and new honest people who are joining the internet and newsgroups everyday and are willing to give it a try?

Estimates are at 20,000 to 50,000 new users, every day, with thousands
of those joining the actual internet.
Remember, play FAIRLY and HONESTLY and this will really work!!!

Yes..... They had it mounted in a vehicle when the problem started,
"I" am using a power supply which is set to the proper voltage and current
to operate the scanner, not the/a wall adapter.....

As I said, I checked and repaired "loose" solder joints around the DC jack, then tested a few other components I thought could be the culprit, via tracing down the traces. No luck. Without the schematic, not sure where to go from here. I checked the voltage regulators in there - the 2 that I seen, they seemed to be ok. Just looking for some ideas to go with, short of having documentation. Usually I've been able to trace the problems down, but this one has me stumped - for now - anyway.

I have been reading that the June 1994 issue of Monitoring times page 112 has the mods of this scanner that I need but I cannot find this issue anywhere. It even has a schematic for the mods. Does anyone have this issue? Could you copy this page and email it to me. I would be very grateful! Thanks.

Morning Lou,
Push comes to shove, Federal law superceeds state and local laws. It is legal now in all 50 states for a ham radio operator to have a receiver either in hand or in his/her vehicle. The state of New York states while this is legal under ferderal law, it is illeagal to have in a vehicle, a radio that is CAPABLE of TRANSMITTING on public service frequencies, as many of todays tranceivers can. This is a very specific distinction in NY. As for carrying a portable receiver onboard a PUBLIC carrier, your actions are legal as one of "the people" A PRIVATE carrier may impose specific regulations or rules on passengers, which may be theoreticly a violation of ones constitutional rights, but could be enforced at that time, as long as notification of such rule is properly displayed and presented to the patron. The idea is to avoid a problem before it becomes one, and that is due to the climate out there, with all the tension and "heightened" awareness, it would be best to keep such a device passivly displayed or under wraps as to avoid potential conflict. Headphones ARE A MUST!
I know of now law that resricts the possession of a radio scanner on ones person while transiting onboard any ground transportation..You may request from your carrier, a WRITTEN list of compliances for its passengers.
Cheers and happy RX'ing

1046. Antenna-Climbing out 3rd Flr window

Newsgroup: rec.radio.scanner
Date: 2005-02-20 14:09:09 UTC
From: bluecool <stef@stefanbecker.com>
Message-ID: <82351f9e5694dc0d244bbb4873296d17@localhost.talkaboutelectronicequipment.com>

I purchased a ScanMaster 12 - 1200Mhz, small base antenna for the roof of my apt (house type). I'm hooking it up to my Dual band, trunking, portable scanner for receiving better than the rubber duck.
I purchased a 5 ft mounting pole wtih the Antenna and cable. I'm ready to climb out the window in 20 degrees cause I'm so excited to raise it.

I also have a Discone Diamand I want to put up there.
BUT It's a sharp angled roof. 45 degrees? I need to find something to hang from or nail into to stand on to give me leverage while I work on the slope.

I have 25ft safety static rope, I know a some boy scout knots, a have few steel carabanines, I'm ready to climb out the 3rd floor window.
Excited...nervous.

Any advice (besides good luck)

thanks
Steve
(bluecool)

Unless you're an experienced rigger, I don;t think there any safe way to be on a 45 degree slope.

Safer suggestion:

Buy a few pieces of chain link fence 'top rail' and guy up a mast instead. Much safer, and easily lowered when modification or repair is necessary.

Nothing surprising there.

Just search Google for antennas with a high angle of radiation, then
use one of the many online calculators to center in on Milair band.

You can make one for less than $30 in Home Depot parts.

Even the Radio Shack 1/4 wave works fine on Milair when cut properly.

Why would you want a mil air antenna with a high angle of radiation? At
an extreme distance you would want the pattern at the horizon.

The Dressler is a very disappointing antenna, I had two demo units from
my local distributor and a R/S Discone worked better on lower VHF and
much of the other bands. At best, the Dressler was a little better than
the Discone on UHF and 800MHz but not enough to justify the exorbitant
price. The dealer even admitted he used a Discone with a separate
Dressler pre amp and got really good results. After several antenna guys
looked over the Dressler, we concluded the antenna element inside is
just not a very good design and the internal pre amp can only do so much
with what you feed it. If someone is praising a Dressler, ask them if
they actually compared it to anything meaningful.

I can't find any listing for this freq. However it might have to do with a carrier operation going on off the FL coast. Put some scanners into search and found quite a few freqs which I can't find ID's for. Here's my list so far, any help with id'ing these freqs would be appreciated.

237.4000 (AICC) Callsigns, TIGER, RUBBER,
360.0000 (?? Possible Flattop ops)
333.3500 (possible a/a)
252.8250 Callsign SPIDER
298.6250 Callsign SPIDER
337.2250 weak signal but active.
298.6250 (possible a/a)
262.7000 Callsign INVERJACK, STRIKE227
266.4250 (possible a/a)
283.0250 (same voice as callsign RUBBER)
333.8250 (strong carrier with a buzzing sound every 10 sec.)
292.5500 Callsign SHIELD working in Pinecastle

Comms received from Ponce Inlet (Daytona Beach area)

Hey all,
Made my own harness, bought some good rope and some combs, and climbed the roof no problem. Had a friend hold my line until I was up top and tied on to something. No flat portion of the roof, just an angle. Tore down the old rotted TV antenna and put up the 5ft mast with the new Aluminum and Fiberglass multi wave Scanner anetenna. Grounded it, droped the coax, and repelled down the roof. (was actually up and down twice) in 16 degrees.

thanks Brian...

I heard about a fellow a few years in your same situation. He was working on the rear slope of his house. He threw the rope over the roof and tied off to the bumper of his truck in the driveway. His wife drove off and damn near killed him.

Wiz

I had a dressler for over two years and in blows away my discone, it pulls out signals my discone never sees

both have the same coax and about the same height (discone is better in the 25- to 50mhz range)

1062. Re: Antenna advice - best super gain

Source record: 14722

We had the Dressler and the RS Discone on a small antenna range with a 50MHz to 1GHz log periodic source antenna and an HP scaler network analyzer. The Discone was swept and stored as a reference and then compared to the gain/loss of the Dressler and it was not very impressive for the Dressler. Itï¿½s been a few years but I do have the plots somewhere around here. The two Dressler antennas were borrowed for a commercial application and when they didnï¿½t perform very well we had them checked on an antenna range and both antennas showed identical response. The local distributor also checked them out when returned and said they were in good working order (if you call that good). I think, or I should say I know you will get better performance starting with a Discone and then using a high quality pre amp right at the Discone. The Dressler pre amp is pricey but you can find some real nice and originally very expensive high level, low noise figure, wide band amps on Epay for cheap that are surplused from commercial/military equipment.

Today while I put 7 BC780XLT's into search mode, each scanner working a
25 MHz section of the MilAir band. In the log below you'll find the new
freqs I had not ID'ed before today.

The MilAirComms.com Log report for 2/20/2005
All times are Eastern Time, frequencies in MHz and
unless other wise noted modulation type is AM.

TIGER, RUBBER
Time: 1200 USS Boat in 6X; 360.0 MHz had some HAVEQUICK Xmisstions
Frequency: 360.0000 (Carrier Operations?); 364.2500 (Carrier Marshall)

BLADE, RUBBER, TIGER
Time: 1206 ACM then back to 364.2500, What is ROLEX 5? Is this a
callsign or code?
Frequency: 237.4000 (found in search ??)

unid
Time: 1207 strong carrier with a quick buzzing sound every 10 seconds.
Frequency: 333.8250 (found in search ??)

unid
Time: 1211 request direct Waycross
Frequency: 346.2500 (JAX Cntr, St. Augustine)

unid
Time: 1240 sounded like same voice as RUBBER, "switching to omaga".
Frequency: 283.0250 (found in search ??)

unid
Time: 1255 two aircraft, sounded like A/A
Frequency: 266.4250 (found in search ??)

INVADERJACK
Time: 1306 "STRIKE 227 if you hear me click your mike twice".
Frequency: 262.7000 (found in search ??)

unid
Time: 1309 sounded like A/A
Frequency: 298.6250 (found in search ??)

unid
Time: 1310 "decending to 4000 and holding over the water", probably
Daytona 500 FlyOver
Frequency: 387.0000 (DAB App)

unid
Time: 1311 weak sig.

Frequency: 337.2250 (found in search ??)

AlphaAlpha 712; TIGER
Time: 1311 Pinecastle Range; Flight of S-3's with total of 8 Mk-76's
Frequency: 357.0000 (SEALORD-Pinecastle); 380.8000 (Pinecastle

AlphaAlpha 710
Time: 1312 Flt of 2 level FL180
Frequency: 307.2500 (JAX Cntr)

COMM 32; TIGER ##
Time: 1316 COMM asking Tiger if he's at "push point"
Frequency: 360.0000 (Carrier Operations STRIKE)

SPIDER ??
Time: 1318 possible new CAP freq? SPIDER is who worked SuperBowl
CAP a few weeks ago. Possible CAP for Daytona 500?
Frequency: 252.8250 (found in search??); 298.6250 (found in search??)

TIGER ##
Time: 1333 "99 echo rolex 10", "TIGER echos rolex 10"..sounds like
football plays...
Frequency: 237.4000 (found in search ?? AICC)

unid
Time: 1334 ACM?
Frequency: 333.3500 (found in search ??)

TIGER ##; SHIELD##; HAMMER##
Time: 1348 3 minutes from entering range, flt flight of 6 F-18's
2-F14's
Frequency: 267.5000 (SEALORD)

SHIELD
Time: 1403 5 east of Pinecastle
Frequency: 292.5500 (found in search ??)

possible callsign "SIRIUS"
Time: 1408 Daytona 500 Flyover
Frequency: 385.5000 (DAB App)

Depends on what you are listening to.

For distance, yes. You would want a 5/8 wave to maximize the horizon.

For local use, I'd want the high angle of radiation to capture more of
the sky.

Hi all I am helping a friend promote a web site. You see a childhood friend of hers lost her husband at the World Trade Center on Sept. 11, 2001. She has run into some hard times and my freind wants to help her. So she came up with the idea to market Just say NO to Bin Ladin dartboards and punching bag covers. Not only is she going to donate part of the proceeds to her freind but an additional part of the proceeds will go to the Firemans Fund. If you could take the time to check out the web site it would be much appreciated!! The web site addy is:

http://www.angelonmyshoulder.4t.com

Thanks so much everyone!!

Last year when I was in the B.C. lower mainland the RCMP there were
still using FM in the 155 Mhz area. Same as in Alberta. So just
about any scanner should do that.

I heard some stuff in the 138-138 area as well. Some ambulance and
fire in the 153-154 Mhz.

It's my understanding that some folks, such as detectives or
surveillance are using encrypted stuff.

Tony

Given that aircraft or satellite at a "high angle"
are nearly overhead, you can use a 5/8 wave
to catch those on the horizon and those overhead.
I used a 5/8 cut for the 136.n weather satellites
with very good coverage. On passes that went
diredctly (withn 2 or 3 degrees, I had to use a
horizontal dipole. There were a lot more like
maybe 30:1) high angle, but not directly overhead
passes then driectly overhead. Then I went to a QDH
and it receives overhead and on the horizon. Check
out QST, or do a web search, for construction details.
I have made one for milair, but ahven;t had a chance
to test it. I am in the middle of a maojor shack redesign
and rebuild. so it is going to be a while.
Shucks, even a ~20 years old radio shack discone
does a good job on milair, ad a not so bad job for
wX sats.
Terry

I fix them ,

1. Take the cover off

2. Locate where your antenna connection is.

3. Take a pair of wires cutters and cut that lead.

4. Turn every turnable "cans" you see on the board all the way right.

5. Pour epoxy glue on all those so they will not move

6. Now put the cover back on.

7. Drill a hole in the top cover (3/4" should do)

NOTE don't worry about the filings they won't hurt!!

8. Put a candle in the hole and light it (to make the glue stick)

You should be rx'ing NOAA in no time......or maybe not

These mods are for educational purposes only , not responsible for
damge to your eqpt.

Looking for a radio holder to mount to side of comp monitor. Think a cell phone cradle would be a decent holder for the 246T? Lots of cell phone holders out there but not seeing one specifically made for mounting at the side of your monitor. Any ideas or links where to look would be great - thanks!

Jacko

More of the sky? An aircraft could never get high enough, even directly overhead not to be heard with a low angle antenna. I have communicated with aircraft on VHF out to 200mi runing a 5w transceiver and a 1/4 wavelength antenna right on the transceiver. Signals were perfect copy and virtually unchanged until the last few minutes of travel as the aircraft headed away from me. GPS was used to determine distance. On another occasion, the exact same radio was used with a large (11dBD gain) yagi antenna and the distance obtained was about 250mi. Signals held in a little longer but the ultimate distance was not much more. The yagi pointed away from the aircraft at close distance and directly below picked them up just fine. Bottom line is, if your antenna is in the clear of obstructions, you should pick up aircraft from very high altitude overhead and out to the horizon + a little more with no problem. Unless something is broken...
Mike

Go for the BC246T. It's newer technology, the Pro-95 is about two years
old. When you add in the cost of batteries, data cable, and AC adapter for
the Pro-95...The cost is about the same.

Jim

Hey Jacko! I am not sure about a holder for the side of your monitor, but before you buy anything make sure your monitor is not going to put rf into your scanner and mess up reception. I have had a problem with that with several monitors. Just something to think about. Have a great week! Jon.

I'm with Jon on this one. I really can't think of a *worse* place to mount a sensitive radio receiver.

Hell, even my laptop puts out a ton of RF.

You'll need to either re-think your application, or be damn certain your computer monitor has been 'tin-foil' shielded. (That is, create a metalic shield between the radio and monitor - some folks use generic tinfoil.)

Good luck,
Mike T.

1097. To owners of a JIL SX-200: display blocked on "89APL-E"

Newsgroup: rec.radio.scanner
Date: 2005-02-23 09:29:46 UTC
From: faccoberlo@hotmail.com
Message-ID: <d21fe435.0502230129.6b85af47@posting.google.com>
Source record: 14606

I have an old JIL SX-200 (http://www.rigpix.com/miscrx/jil_sx200.htm)
and it worked perfectly until yesterday...
While listening on VHF, all signals disappeared and now I can hear
only white noise.

And suddenly this error message "89APL-E" appeared on the display.
Since then I'm not able to enter any frequency or set the clock.

On the service manual this error "89APL-E" is mentioned and it should
happen when power supply is cut with the scanner switched-off in clock
mode.

Any suggestion for solving this problem on my old dear sx-200?

Thanks in advance,

Fac

I agree with the 246T suggestion - the 95 does not trnk LTR, no decoding,
and the Close Call option on the 246 is absolutely awesome. Smaller package.
The new memory allocation - how can you compare? No contest...

BOG is our regular VK pedant who unfortunately expects all others to confirm to the "proper" form of English. Bit of a laugh really, given all of his screwups - guess the comment about rocks and glass houses is appropriate for him.

Exactly. They don't compare..

The 246 got a lot of nice features, but in RADIO PERFORMANCE, the 95 beats it hands down. At my home, there were a half dozen busy Police freqs that were trashed by pagers and a local TV station. I don't even hear them on the 95. And no, the 246 wasn't defective, I borrowed another one, and it was slightly worse!

The tone decode is nice, but if the radio is intermod free, it's not a needed thing. That's all I ever used it for, keeping the radio from stopping due to pager or other unwanted signal bleedthrough.

Uniden should spend a buck or two on RF design, and not worry about a lot of somewhat useful "toys" they put into their radios.

Well, at least they got rid of the damn battery pack crap and went to AA batts. A step in the right direction. Finally!

BDK

Wow, it has been a long time since I had my JIL SX-200! I can't
recall if there is a readily accessible "reset" switch, but I would
give that a shot if you can locate it. My JIL SX-400 is still running
great, but a couple of times each year it will lock up and require a
reset, then it comes back to life and continues to scan on.

Good luck with it!

Ender

It's a great scanner-- dual trunking, 1000 channels. I believe Radio Shack's
got them on sale now; check their website. I'm delighted with mine.

Who they work for and who pays their wages is irrelevant.

They are to uphold the law and obey the law. If they are doing this, they
should have no problem having voyeurs follow them around the city.

I have been real happy with mine. I am a real amature at this. I only bought a 95 because the police here were going to switch to 800 trunked. I was using a Pro-79. The first thing I found was the 95 did do much better at picking up calls in places where reception was hard to get on the 450 band. As said the Manual is very poorly written. It's as if it was made for people who already know how to use the radio. After you learn, it's great, but there are plenty of people willing to help you while you learn. Since I only am interested in Police I never bothered to get the cable to use it with a PC, but they are easy to buy. As long as you don't need digital they work great. The new BC is smaller and is supposed to work about as well in a more compact package, and is only about $50.00 more. There are enough of those out there now to get people to help you with them also.

I had a Pro-95 but I found it too bulky and hard to use (and no one in my area uses trunking), so I sold it on eBay.

So, with a few extra dollars in my pocket, I went to my local Wal-Mart store and got myself one of the new little Uniden BC92XLT scanners for just $99 (lowest price anywhere, NO shipping cost, and you don't have to wait even a minute for it to arrive).

After a week with my little BC92, I think it's a perfect scanner for me. It's very sensitive, very fast, and very small.

The BC92 isn't my only scanner. I've got others by Uniden, RS, Sony, and Yaesu, but my little BC92 is holding its own right now.

Stop by your local Wal-Mart and try one (they accept returns if you don't like it). The BC92s are back in the automotive section in a glass case. They have a NASCAR label on the front of them, but don't let that worry you. It has nothing to do with NASCAR or auto racing. I guess the NASCAR name is just another gimmick to sell scanners.

Oh, the BC92 has the exact same Close CallT RF Capture Technology that the BC246T has. That was another reason that I bought the BC92. I originally planned to get a BC246T, but after doing my homework, the BC246T would have cost me $140 more, and it wouldn't have done any more for me than the BC92.

1124. Re: HOW do i get my BC 200 xlt scanner to search?
